As to the ladies, as the French comic song says—"It was complete bouquet of flowers." The young American ladies always make a grand show, and they were in strong force, but they were not without rivals, and powerful ones too—Gallic and Britannic; and with respect to dress each fair one was more brilliant, if possible, than her neighbour. There was a good sprinkling of literature and art in the rooms, Gudin and Gustave Doré, Arsenne Houzaye, and many other French literati, and most of the English journalists in Paris. The entertainment was in truth a great success. Mr. and Mrs. Burlinghame have acquired a decided reputation for urbanity, and the entertainment which they presented to their numerous visitors was as elegant as it was liberal. But the great attraction of the evening was of course the Chinese, who came out in full force; the first of the Ambassadors, not speaking French or English, could not enter into the conversation, but he bustled about briskly all the evening, followed by a younger member of the Embassy, and seemed to be keeping an eye upon everything. As to the young diplomats, they were gaiety itself; one or two spoke English perfectly, and a little French, and they seemed as much at home as if they had moved in European society for years.

Of course entertainments like this are no more than a mere ballet compared with the main feature of a performance; but seeing that our Chinese friends are so ready to enjoy themselves, it is to be hoped that when they return to England they will have full opportunities of witnessing not only the solid magnificence of English society, but the hearty good fellowship of the English people, and thus be the means of paving the way for a closer and heartier intimacy than has yet occurred between two nations who have a good deal in common.

## GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, April 9.

From the accounts just made up of the receipts of the Zollverein for the year 1868, and already transmitted to the respective Governments, there is an apparent increase of 3,123,776 dols., the revenue showing a total of 27,2.8,800 dols. for import duties, and 20 725 dols. on exports, together 27,319,525 dols., against 24,195,749 dols. in 1867. But on the other hand, it must not be lost sight of that 1,485.910 dols. were raised in Schleswig Holstein, Lauenburg, Mecklenburgh, Lubeck, and the rural territory of Hamburg, all of which figure for the first time in the Zollverein accounts, having only joined the Customs' Union last year; and further, that among the receipts is the sum of 1,824,000 dols., being the duty (2d. per cwt.) on 912,000 centners of salt imported from abroad in 1868. Taking all this into consideration, there is a real deficit of 186,000 dols., as compared with the previous year. In looking at the different items there is a deficiency of 897,668 dols. on raw tobacco; of which 224,417 centners less were imported in 1868; but on the other hand duty was paid on 6,483 centners of wine and 294.451 centners of raw iron more than in 1867. The division is as follows: Prussia and the other States of the North German Confederation, 23,512,292 dols., or 86·1 per cent.; Luxemburg, 211,851 dols., or 0·8 per cent.; Bavaria, 1,407,199 dols., or 5·2 per cent.; Wurtemburg, 574 814 dols., or 2·1 per cent.; Baden, 1,165,205 dols., or 4·2 per cent.; and Hesse Darmstadt (south of the Maine), 448,163 dols., or 1·6 per cent. The population of the Zollverein participating in the revenues is 37,849,048, so that the gross amount is 21 groschen 8 pfennings per head. The expenses amounted to 3.544,785 dols., or nearly 13 per cent. of the gross receipts, which shows a surplus of 410,709 dols. over 1867.

The necessity for a *rapprochement* between the North and South of Germany is becoming more apparent every day, and steps have already been taken with regard to the more material points of coinage and currency. Baden sees the impossibility of maintaining any longer her cumbrous mode of keeping accounts in florins and kreutzers, and is now negotiating with Prussia to join the North German system of thalers and groschen. As soon as the Convention is concluded, Hesse Darmstadt will follow for its Southern half, the Northern part, beyond the river Maine, forming already an integral part of the North German Confederation. When this is completed, Bavaria and Wurtemburg will stand isolated in their monetary system, and must sooner or later join the rest of Germany.

At the instance of Saxony, a Bill has been introduced for the approval of the Federal Parliament, to establish a Supreme Court of Appeal for mercantile affairs, to decide appeals from the decisions of the different local tribunals of commerce in the Confederation—the seat to be at Leipzig. Great opposition is offered to the project by the seaport towns, and especially Hamburg and Bremen, on the not altogether unfounded ground that as the greater part of the disputes brought before the commercial tribunals have reference to shipping, freights, bottomry, salvage, and marine insurances, it is not to be expected that judges sitting in conclave at an inland city like Leipzig, and never having seen the sea or a sea-going vessel, can have any clear conception of the *pros* and *cons* of a case where technical knowledge is absolutely required, and where it would be impossible to find experts that might be examined as to the usances in practice.

Count von Bismark has laid before the Federal Council the draft of a Bill for collecting under one department all stamps used for bills, drafts, and promissory notes issued either at home or abroad and circulating in North Germany, and placing the amount thus raised to the credit of the Federal finances. This measure, if carried out, cannot but be highly injurious to Hamburg and Bremen, where bill stamps are issued by the local Governments, and a strenuous opposition will be offered when brought before the Federal Parliament. Whilst the two Hanseatic cities are left to bear on their own shoulders the whole charge of lighting, dredging, and buoying the channel and approaches of the Elbe and the Weser, as well as the quarantine and pilot establishments and the management of the river police, it does seem hard to deprive them of any source of revenue derived from the operations of trade. To show your readers the extent of the loss that would be suffered by Hamburg, I may here state that the bill stamps raised here last year produced a net revenue of 539.412 marks currency, and all stamps together 1,346.530 marks currency, or about £800,000. As according to the present trade of North Germany the produce of the proposed new Federal stamp law would probably not exceed a million of dollars, and Hamburg participate in it in the usual way of the number of inhabitants, she would not get back more than 10,000 dols., by which a dreadful loss must be incurred. The Bill proposes one uniform rate of a half per mille on all bills and other negotiable paper, even cheques on local bankers, for all sums, without any exception. Hitherto drafts under 50 dols. and local cheques for any amount were exempted from the stamp tax. If the proposed measure becomes the law of the land it cannot fail to interfere most materially with the free circulation of money, and place a restrictive bar on advances, loans, and discounting operations.

The North German corvette *Arcona* is to be commissioned next month with orders to join the corvette *Medusa* on the East Asiatic station, which is officially described as extending from the Straits of Singapore to the Kurile Islands. On her arrival out, the *Medusa* will be placed under the command of the *Arcona*.

### COMMERCIAL.

In spite of the Easter holidays the markets have been very lively, and the prices of many articles are higher. The late rise in Cassia Lignea is fully established, the 4,000 chests per Excelsior direct having been all taken at 13½ to 13¾ sch. bco. Mace has risen in value, and some parcels were taken at 28 sch. bco. Cloves in demand, and 6 sch. bco. paid for Amboyna. Pepper firm, with a rising tendency; Singapore commands 4⅛ sch. bco. There is a lively demand for Starannis, and the 185 chests lately to hand per clipper were all taken at full prices. Cleaned rice moves off quietly at full rates. A cargo of rough Saigon (49,000 bags per Otto and Antonie), shortly expected, has been sold to the millers for arrival at secret prices. In teas the market is inactive, but prices are steady; yesterday 200 chests of Kaisow Congou were taken. After a pause during the holidays spelter is again in favour, 7,000 centners having been taken at 14 marks banco, partly in loco. and part for delivery, since which 500 centners were sold at 14.2 sch.

### SHIPPING INTELLIGENCE.

ARRIVED.—Varuna, from Singapore; Excelsior, from Macao; Alexander, from Foochow.

SAILED.—Ida, to Nicolayefsk; G. F. Vorwerk, to Singapore; Hammonia, to Shanghai.

LOADING AT HAMBURG.—For Singapore and Penang, Tong; for Manila, Lola; for Hong Kong, Marie Louise Antoinette, Kati; for Macassar and Hong Kong, Persia; for Shanghai, Quaymas, Susanne, Gustaf.

The Hamburg three-masted schooner Hainan, last from China, has been sold by public auction to Messrs. P. and H. Lohmann, of Kiel, for 17,200 marks banco.

SHIPPING AT BREMERHAVEN.—Arrived: Orion, from Bangkok (5,524 bags rice, 495 pieces sapanwood).

## HOLLAND.

—o—

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, April 9.

The Minister of the Colonial Department has laid before Parliament the "Agrarian Bill," in which measures of the greatest importance to India are proposed. The Minister brings forward for consideration a proposal to lease land in India at quit-rents for periods not longer than seventy-five years, and this without intertering with the rights of the natives in the slightest degree.

A curious story is going the round of the papers with regard to a festival given by the Governor-General to some Indian princes, to whom he spoke on religious topics—"the expiatory sacrifices of Christ," and so on. The *Nieuwe Arnhemsche Courant*, a moderate Conservative paper, says that if this story agrees with the truth, the

Digitized by Google

Governor-General ought to be recalled, because he imperils our authority by offending Mahomedan princes. At the same time it is stated by the Conservative press that Mr. Hasselman, the former Minister to the Colonial Department, has proposed to the Ministerial Council of recall Mr. Myer. The proposal, however, was withdrawn on the motion of one of the Ministers.

It is said that the Minister of the Financial Department will shortly introduce a Bill to establish a uniform letter post of five cents. The Conservative papers use this as a pretext to persuade the members of the First Chamber—who met some days ago for the despatch of business—that they will be obliged to throw out the Stamp Duty Bill. I do not think, however, that their arguments will be of much influence. Probably the fate of this important Bill will be known to-morrow, and then the Lords will proceed with the India Railway Bill, about which a most important *brochure* has been published by Mr. van Nierop, a former M.P. The author, who is a very clever lawyer, is of opinion that the First Chamber will not approve of the measure. It is much to be regretted that Mr. van Nierop did not publish his pamphlet at the time when the Second Chamber discussed the Bill. The First Chamber not having the right of amending, the Lords, of course, can only approve or reject any measure as a whole.

Another important Bill has been laid before the members of the Second Chamber, viz., that regulating academical instruction. The Government intends to maintain the universities at Leyden, Groningen, and Utrecht, for which purpose the expenses are proposed to be increased from 320,000f. to 580,000f.

The result of the election for the district of Zuid Horn was not satisfactory. Of the 1,365 electors only 532 voted, Mr. N. Olivier obtaining 197 votes, Jhr. C. de Wendt, Alberda van Ekenstein, and H. W. Wierda each 115 votes. A re-election must therefore take place between these three Liberal candidates.

A large East Indiaman was launched some days ago from the yard of Mr. J. Smit, at Slikkerveer. It is named *Voorlichter*, and is of 2,030 tons burthen.

ROTTERDAM, April 14.

The First Chamber has approved of the Bill abolishing the stamp duty on newspapers and other printed matter. This Bill will be brought into operation on the 1st of July. The Lords have also passed the India Railway Bill by a majority of eleven votes, which will no doubt create a very good impression in India. Some days ago gold medals were presented to the ex-Ministers, Heemskerk and Count van Zuylen. The money for their purchase was subscribed by five hundred Conservatives. Yesterday the man-of-war *Nils Sin*, a beautiful steamer, was launched from the yard of Messrs. C. Gips and Son. It is built for account of the Mikado of Japan. Mr. Vroom, the second mate of the *Kay-o-Mar*, has been appointed commander for two years.

Mr. C. J. M. Nagtglas has been appointed Governor of the Dutch colonies on the coast of Guinea. A subscription has been opened on behalf of the sufferers in the recent fire at the Cape of Good Hope. Only a trifling sum has been collected up to the present time. Mr. Lith de Jeude, M.P., has resigned. It is said that Mr. Caron Mackay will be elected in his place. The first flower shows of this season have been opened at the Hague and at Amsterdam.

A very firm tone prevails in the colonial markets. Coffee is very active, in consequence of the Trading Company having bought 50,000 b. Rio and Santos in Hamburg. These quantities will not be brought into the market before August. The prices are becoming daily higher. Tea is very firm; but since the last private auction there have been no transactions. Sugar and tin are dull. The Trading Company held auctions last week of rattans, hides, and gutta percha, and several parcels Java tobacco were sold by private subscription. The prices for Manila tobacco are very firm, because nothing transpired about new shipments.

COMMERCIAL INTELLIGENCE.

COFFEE.—The market continued to improve. There is a lively demand, and holders decline to operate without a further advance. The transactions include 4,900 b. Java, ex Nederland, which were sold at 39½ to 40c.; 300 b. Macassar, ex Timor, at 35 to 37c.; 965 b. Java, ex Krimpen, a. d. Lek, at 40c. to 48½c.; 830 b. Padang, ex Julie, at 41c. to 44c.; 200 b. Macassar, ex Maria Adriana, at 39c.; 1,500 b. Java, ex Jason, at 38c.; 2,000 b. Pamanoeken, ex Jason, at 42½c. In private auction were sold 1,330 b. Java, ex Krimpen a. d. Lek. The stock amounts to 565,500 b., of which 336,900 b. are unsold.

SUGAR.—There is an animated demand for raw Sugar, but, holders declining to operate at present quotations, transactions are small. Floating cargoes are offered at 2f. to 2½f. above the March prices, but these prices cannot be obtained for parcels on the spot. The following lots have been sold: 175 mats Batavia, ex Noach II.; 454 mats Sourabaya, ex County of Argyle, No. 13½, at 37f.; 147 mats Samarang, ex Twee Gezusters, No. 14½; 1,444 mats Sourabaya, ex Birma, No. 12½; 855 mats Cheribon, ex Ludwig; 1,345 Probolingo, ex Hebe; 1,323 mats do., for Admiraal de Winter; 1,060 mats do., ex D. H. Watjen. The unsold stock of the Trading Company was, on the 1st inst., 61,672 mats; and the private stock, 6,927 mats.

RICE.—The market is dull, but steady. 4,388 b. Java, ex Bremen, sold at 7⅞f.; 1,834 b. do., ex Emilie. 14,515 mats Saigon sold in auction at 6¾f.

SPICES.—The market is firm, but without transactions of importance. The unsold stock was on the 1st inst. 923 casks Nutmegs, 275 casks Mace; and the stock on warrants 3,395 casks Nutmegs, 388 do. Mace, 2,743 casks Cloves, 163 b. Cinnamon, and 1,156 b. Pepper.

TEA.—The market is very firm, but inactive, in waiting for the cargo of China tea, ex Albio, to be sold on the 7th in public auction. The result of the last Trading Company's auction, at which 8459/4 563/8, 370/12 and 19/16 chests Java were offered, was satisfactory.

JAVA TOBACCO.—There are no transactions to report. The stock is 6,142 bales.

INDIGO.—Owing to the absence of stocks no business has been done; the markets, however, remain very firm.

TIN.—The result of the Trading Company's auction, held on the 1st inst., was most satisfactory. Not only was the whole quantity sold, but the orders will be deducted with 31 per cent. The 49,447 slabs Banca were sold at 82½f., and the 740 slabs Billiton at 82½f. Since the auction there has been an animated demand, with transactions at 85¾f., and for delivery out of the forthcoming auction at 86½f.; Billiton on spot and floating, 85f.

SHIPPING.

ARRIVALS.—March 21, at Brouwershaven, from Sourabaya, County of Argyle; 24, at Brouwershaven, from Batavia, Kosmopoliet I.; April 3, Europa, Isaac da Costa; 5, at Texel, from Batavia, Ragna.

DEPARTURES.—March 21, from Brouwershaven, for Batavia, Jorgen Lorentzen, Kortenaer, Helena; for Singapore, Henriette Elisabeth Susanne; from Texel, for Samarang, Friso; 23, from Brouwershaven, for Batavia, Julie; 31, Antje; April 1, Anna; March 23, from Texel, for Padang, Maria; for Sourabaya, Twee Cornelissen (via Newcastle); 31, for Batavia, Nieuwe Waterweg; April 1, for Sourabaya, Koning Willem II.; for Nagasaki, Professor Suringar.

PASSENGERS INWARD.—From Java, per Maria Sarah, Mr. E. M. Coerle and family; per Kosmopoliet, Mrs. Ondaatje and family, Baumgard and family, Gildemeester, Mrs. van Beveren and family, Dolder and children, Kist and family.

PASSENGERS OUTWARD.—For Java, per Nieuwe Waterweg, Mr. C. L. Salomons and family.

ARRIVALS.—April 9, at Texel, from Passaroeang, Sliedrecht; 12, from Banjoewanjie, Alcyone; from Tjilatjap, Gelderland; 6, from Batavia, Ragna; 7, from Batavia, Johanna, Estafette; from Banjoewangie, Zeebloem.

DEPARTURES.—April 9, from Brouwershaven, for Batavia, Grootmeester National; 8, from Texel, for Batavia, Mentor; for Macassar, Elizabeth and Jacoba; for the Cape of Good Hope, Wildemin; 9, from Zierikzee, for Batavia, Burgomeester Hafman, Concurrent.

PASSENGERS OUTWARD.—Per Grootmeester Nationaal, Mrs. G. H. F. Bodenstaff, W. J. Steinmetz, J. A. van Ameyden van Duym.

## UNITED STATES.

—o—

### NEW YORK MARKETS.

TEA.

The total receipts of Tea from China and Japan in the United States from the 1st January to the 24th March, 1869, were as follows:—Greens, 8,636,120 lbs.; Japans, 2,625,967 lbs.; Souchongs, 694,018 lbs.; Oolongs, 1,713,413 lbs.; other sorts, 204,500 lbs.; total, 13,874,018 lbs. The stock on the 1st January was 9,577,014 lbs.; which, added to the above total, gives a result of 23,451,032 lbs. Subtracting from this total the exports from 1st January to the 24th March, 761,728 lbs., and the withdrawals for home consumption during that period 11,206,094 lbs., there remains a total of 11,483,210 lbs., representing the stock on the last-named date. The receipts from March 9th to March 24th amounted to 4,363,185 lbs., the withdrawals for home consumption to 1,581,427 lbs., and the exports to 315,173 lbs.

The following is from Messrs. Beebe and Brothers' Circular:—Since the date of our last the demand for tea has been less active, and business moderate, except in Greens, with a tendency in prices adverse to the interests of holders. Sales of 17,300 half-chests green are reported, at an average decline of 2c. to 3c. on late quotations. The market closes, however, with rather more firmness in tone, and an increased disposition to operate at current rates on the part of the trade. 7,000 half-chests Japan have also found buyers, at some decline upon rates realised earlier in the month.

The transactions in Oolong comprise sales of 800 half-chests old crop and 3,921 half-chests new crop, ex Camilla, on private terms, and 4,700 half-chests of the Tudor Ice Company's importations, under the hammer on the 19th March. For these, as well as for Japans, the market closes without animation.

Current quotations (in gold, duty paid):—Congou and Souchong: Dusty and common, 43c. to 49; good cargo, 52c. to 55; superior, 57c. to 60; fine, 63c. to 65; extra fine to finest, 70c. to 90. Foochow Oolongs: Fair cargo, 50c. to 52; good, 54c. to 56; superior, 58c. to 62; fine, 65c. to 70; extra fine and finest, 80c. to 110. Amoy Oolongs: Fair cargo, 47c. to 50; good, 51c. to 53; superior, 55c. to 57; fine, 60c. to 63; extra fine and finest, 68c. to 75. Japans: Common, 55c. to 57; medium, 60c. to 62; good medium, 63c. to 64; fine, 66c. to 67; finest, 69c. to 73. Greens (Moyune, Twankay, and Fychow), Gunpowder, 80c. to 125; Imperial, 65c. to 105; Young Hyson, 55c. to 110; Hyson, 60c. to 105; Hyson Skin, 50c. to 62.

## THE SILKWORM IN ITALY.

A discovery has been made which is of vital interest to an important industry in Italy. M. T. Gandolfi, of Mondovi, states that after some years of study he is able to ascertain, by means of chemical analysis, whether the eggs of the silkworms are healthy and can be safely reared, or infected and useless. The practical success of M. Gandolfi's discovery will be seen in the ensuing season, when the value of his analyses, now being carried on at Turin, will have been tested by their results. A simple reference to the decline in the production of silk in Italy and the Tyrol in the last few years will show to how great an extent the industrial interests of the Italians are dependent upon the result of this experiment. Before the outbreak of the silkworm disease there were nearly 3¾ millions kilogrammes of raw silk produced; this declined in 1863 to 2¼ millions, in 1867 to two millions, and last year the total produce was only 1,900,000 kilogrammes. The future of the silk crop of Italy gives great cause for anxiety, especially since the silkworm disease has reached certain parts of Japan, whence the Italians have obtained the largest portion of their best cocoons; and Mr. Consul Colnaghi reports that all attempts to root out or even to palliate the malady have hitherto been ineffectual. The germs of the disease are said to be found in the mulberry trees, similar to the oidium affecting the vine. A trade of some eighteen millions in value in the present unfavourable period, and capable of indefinite increase should the silkworm disease be stamped out, is no small element in the industrial resources of a country like Italy.

## THE COMING TEA SEASON.

THE ever-recurring losses on tea shipments have given rise to much speculation—not as to the cause of them, for that is pretty well understood, but as to the length of time over which the credulity of buyers may be expected to extend. At present, notwithstanding the severe lessons afforded by a series of disastrous seasons, it shows no signs of diminution. It would almost seem that a man who once enters into the tea trade becomes afflicted with a monomania that urges him to buy unceasingly, with an utter disregard of consequences. In the good old times it was an axiom of the trade that regular shipments, extending over a term of years, must produce a profitable result in the end. A bad season might come now and then, but on the whole a steady trade was held to ensure ultimate success. As a rule, it did so; and many considerable fortunes were amassed in this way. The tea shipper of the present day, haunted by these recollections, does not allow his ardour to be damped by one, or even half-a-dozen losing ventures, but fancies that if he can only continue to ship year after year on a large scale, his turn will come some day, and he looks forward to "next season" as the time when his perseverance must meets its reward in the shape of a golden harvest—forgetting, all the while, that the conditions under which he buys are totally different from those that existed many years ago, when the trade was an uniformly profitable one. The quiet regularity, the skill and prudence that governed the trade when it was in fewer hands, and carried on at fewer ports, have given way to a feverish haste and a reckless system of competition entirely foreign to the principles of sound commerce. If the exceptionally ruinous losses of last season have failed to modify the extraordinarily sanguine views of speculators, we can hardly hope that any words of ours will affect them; nevertheless, we have a few remarks to make on the present aspect of the trade, which may perhaps possess some interest for those who are disposed to reflect seriously on the inevitable results of a blind adherence to the prevailing method of conducting it.

It is worthy of notice that people on this side generally throw all the blame on those in China, and *vice versa*, neither being willing to admit that there are faults on both sides; while many on either side are disposed to blame the banks for too readily affording facilities to buyers who are devoid of capital. Many of those who send orders for teas from this side do not thoroughly inquire into the probabilities themselves, but are influenced by the advice of some visionary enthusiast, who, by a process of calculation incomprehensible to any one but himself, conclusively demonstrates that at a given date our stocks will be at such at a low ebb that the trade will be almost at a dead-lock, that *this* is to be *the* year for tea, that prices will be kept up whatever figure the export may reach, and in fact that the golden harvest is at last within reach. Enthusiasm of this sort is contagious; the excitement spreads, and even people who have never before entered the trade send out orders for tea, first getting "safe" limits from some friendly broker—limits, alas, at which the teas are "safe" only to lose. This is no hypothetical case, for it has come to our knowledge that would-be importers have been advised to purchase at limits as much as 3d. to 4d. per lb. too high, they accepting such advice in all confidence, thinking probably that various qualities of tea can be described as easily as Wallsend or Silkstone coal, whereas hardly any two brokers or tea-tasters will give precisely the same character to a single sample.

Buyers in China receive these large orders with high limits, accompanied by exciting letters, followed up by still more stimulating telegrams; and, to do them justice, they at least act boldly. Even when they see the export running enormously in excess of known requirements they go on buying as though the consumption must by some occult law be developed in proportion to the increased shipments. Among the disappointed speculators on this side there are some who make no scruple in asserting that buyers in China go on the principle of executing all orders at the outside limits, even where losses are certain, merely for the sake of their commission, but this we cannot believe to be the case. At the same time there can be no doubt that they are far too sanguine. Another disturbing element is the migratory tea-buyer, who turns up in China annually about the end of May, with credits to an untold amount, and arrangements with every bank, determined to "go in," and do a grand stroke of business. In short, there must be a great change in the conduct of the trade in China, as well as on this side, before a steady and profitable business like that of old can be looked for. Could anything, for instance, be more suicidal than the way in which the Foochow market was opened in 1867, when two of the largest buyers almost fought for the preference of the teamen? The latter, of course, made their own terms; yet had the opening of the market been delayed but a few days, they would have been glad to accept much lower rates than those actually obtained, for it was well known that they had obligations falling due to a heavy amount, to liquidate which they relied on the proceeds of these same teas. This exceedingly judicious "opening" was of course followed by a general scramble, in which the holders had the buyers entirely at their mercy. Indeed, not only could they exact whatever prices they pleased, but their victims had no time to examine the teas properly before buying, or to ascertain that it was equal to sample after weighing. We are assured by more than one person who has had actual experience of the market, that for some time after the season is opened scarcely a package of tea is weighed before freight is engaged, and that not only are the marks prepared, but very often on the chests, before the weighing and examination has been completed. The perpetuation of such a system as this would absolutely preclude all hope of a remunerative business. And as regards the prospects for the present year, it is self-evident that if all the losers attempt to retrieve their fortunes in one season, the result will be ruinous to all alike.

We commence with an import in excess of our consumption, and not only that, but an import that is apparently capable of being largely extended on the smallest encouragement, while the consumption shows no signs of increase. Looking at the trade from an outside point of view, one would suppose that the coming season must be characterised by low prices, and shipments more on a par with our wants; but let us ask those who know anything of Foochow buying whether the "crack" chops that have fetched 2s. 8d. to 2s. 9d. are likely to be allowed to go at any reasonable figure? More especially when (as we hear from a reliable source is the case) certain brokers have advised purchases at very high prices; while some, who publish a circular letter, write out to their especial favourites not to adhere too closely to their printed limits, but to give 1d. or 2d. higher if they think the teas fine! Again, if, as appears most probable, these fine chops fetch 2s. 5d. to 2s. 6d. per lb., medium kinds are pretty certain to be kept up in proportion. In 1867-68 very little tea was settled in Foochow at prices above 2s. 3d., and medium kinds were bought at prices that left a ruinous result; from which it may be argued that if in the coming season still higher prices are paid for the fine teas, and the export keeps up to the same level, medium kinds must again lose heavily.

Altogether, the prospects for the new season do not look very encouraging, for we cannot reasonably expect to find that a total change in the views of buyers has been worked in a single year. Such a revulsion would be unnatural. But we do hope that the dearly-bought experience of late seasons is beginning to produce some effect, and that by degrees caution will take the place of recklessness. Among their other errors, buyers in China appear to ignore entirely the Indian teas, which in reality should be considered very seriously; for the eight millions or so that we now receive from this

Digitized by Google

source is equal, owing to its great strength, to nearly double that quantity of China tea. For teas to pay this season we ought to have finer teas than last, none costing over 2s. 3d. for the finest Congous, with a proportionate price for medium kinds, and a total export not exceeding that of 1865-66. And buyers really desirous of doing a safe business should make up their minds not to buy a single package until the teamen come to them for offers, instead of begging as a favour for the first offer of the teas. With this parting word of advice—which we dare say will be received with sovereign contempt—we will dismiss the subject.

## STEAM ENTERPRISE IN SHANGHAI.

THOSE who argue in the Chinese interest—Sir RUTHERFORD ALCOCK in especial—say we have no right to ask for the privilege of navigating their rivers, to the detriment of the native trade. If we arbitrarily refused to permit the Chinese to have any share in the benefit of such enterprise, they might have some reason to complain; but as the Chinese themselves are shareholders in the steam companies, and find it to their advantage to transport their goods by them, the apparent hardship slips away. Considering that Foreigners pour immense wealth into the Empire by their purchases, it is only a natural consequence that they should avail of legitimate opportunities for expediting and otherwise improving the transit of goods into the interior as some return for the large purchases they make. As we have already stated, the fact of the Chinese availing themselves of our improved methods is conclusive. China can no more expect to stand still than other parts of the world, where the stage coach interest has been driven out by steam, notwithstanding the anticipation of ruin and poverty on the part of the anti-progress party. The use of steam in the inland waters of China is simply carrying out natural laws which are inevitable in the nineteenth century. The Chinese have no right to expect the entire benefit of foreign intercourse; unfortunately they do get the lion's share, owing to want of tact on the part of Foreigners in competing against each other, whilst the Chinese quietly combine, and bide their time for the prices demanded. It is only reasonable that Foreigners should have a *quid pro quo* in some way. The profits of the Chinese merchants during the past ten years on their sales of tea and silk must be little short of fifteen millions sterling. Besides this we must consider something on the other side. Look at the labour employed by Foreigners in developing China. The coal mines, for instance, will employ native labour quite equal to that thrown out in boats and junks. What can be more equitable? The chief item required for our steamers redounds at once to the benefit of the Chinese. The anti-progress party say, Let the Chinese alone in their mode of conducting business; they know best, they prefer to leave their coal mines undeveloped, and to abide by the old scull and oar. We believe we have made out a fair case on the other side that Foreigners have a reasonable right to some of the benefits they confer on the Chinese, more especially when it is remembered that while we are developing the coal fields in China we are cutting off the custom for our own coal, and the employment of our ships in its carriage. But this is, of course, owing to our taking an enlarged view of free trade.

The steamboat enterprise of Shanghai is one of the most interesting features of the day. The rivers and lakes of China are as important as those of America, and with the extension of facilities for foreign intercourse we shall, doubtless, see a corresponding increase in the use of steam. Vessels of American build are found to be the most suitable, and, consequently, nearly all in the trade are of that class; builders in England and on the Clyde seem to have a prejudice against the style, and, notwithstanding the opportunities that have been afforded them, have failed to produce anything satisfactory for the work. For ocean steamers of iron there is no question about the superior style of vessels they produce; but they will not follow out the plans and specifications suitable for a river steamer, and hence the majority of the boats here running on the river are of wood, and of New York build. The superiority of iron over wood for fresh-water rivers, like the Yangtze, is so well known that it is intended to give our home builders another chance. We understand that each of the three companies, the Shanghai, the Union, and the North China, have decided on iron vessels, and we trust that whoever the builders may be they will give such satisfaction as to produce further orders. These three companies are now working in harmony, but there has been a great deal of hard fighting preparatory to this. It seems peculiarly the fate of our steam enterprise to encounter opposition and to sink a great deal of money before an arrangement can be arrived at, although there are generally the same means of arriving at it before as well as after the struggle. The company which has done the most to obtain the mastery is the one worked by Messrs. RUSSELL and Co., under the American flag, called the Shanghai Steam Navigation. This company was formed in 1862, with a paid-up capital of 1,000,000 taels, which was subsequently increased to 1,875,000 taels, in 100 tael shares; part of this increase consisted of a bonus of 50 per cent. to the old shareholders. A return of 10 per cent. of the profits is made to shareholders who contribute freights to the company's steamers, and as a rule this class of stockholders is preferred. Dividends of 12 per cent. per annum have been made, after providing for depreciation and insurance. The current value of the 100 tael share is now about 95. The company's steamers at present consist of the *Plymouth Rock*, *Fire Queen*, *Fusiyama*, *Hirado*, *Kiangloong*, and *Moyune*, say six steamers of from 1,200 to 2,400 tons capacity for cargo, besides Chinese and European passengers. These steamers are of a splendid description, and must have astonished the eyes of the Chinese not a little. They are all employed on the Yangtsze traffic, and run three times per week from Hankow and intermediate ports of Chinkiang and Kiukiang, and also several smaller places, such as Nanking, Nganking, Wuhu, Tatung, &c. Chinese passengers are allowed to come on board. The rates of passage money for Chinese to Hankow are 15 taels, and for Europeans 40 and 70 taels return tickets. The rate of freight on tea, &c., is four and five taels per ton.

On the Ningpo line is the *Kiangse* and *Hangchow*, and on the Tientsin line *Shanse*, *Szechuen*, *Manchu*, and *Chili*. The harbour tender is the *Tsatlee*. The company have lost by fire and water the *Surprise*, *Chekeang*, *Huquong*, *Fokhien*, and *Tahwah*.

The annual carriage on the Yangtsze by these boats amounts to the huge total of about 150,000 tons, or an average of about 12,500 tons monthly. This includes a quantity of cotton carried to Hankow, owing to the failure of the cotton crop by floods, and is of course not a permanent thing. The receipts from cotton freights in one year made the handsome addition of over 200,000 taels. The Chinese passengers do not average more than ten or twelve thousand per annum, and Europeans about one thousand. To Tientsin, Chefoo, &c., the traffic is about half the number.

The principal premises of the company at Shanghai are the Kin-lee-yune godowns on the French settlement. The river steamers load and discharge here at a wharf about 400 feet in length, and over seventy in width, which, being covered with a corrugated iron shed, affords space for all "transit cargo." Tramways connect this wharf with the godowns, wherein 30,000 tons of merchandise can be stored. During the busy season this space is fully required, as the company stores goods without charge for seven to ten days after receipt, and has arrangements for the inspection, marking and rattaning of teas, at the minimum of expense to the Foreign merchant. The risk of fire at these godowns, apart from their isolated position between the city moat and the river, is provided against by abundant supplies of water at various points, and by an efficient local brigade composed of the company's employés. The value of these premises may be somewhat measured by the fact that their cost was over Tls. 250,000, or £80,000. A little above is the Kim-fong-toong Wharf, used by the Tientsin steamers, connected with which is an iron godown for transient cargo, and a large yard for storage of coals in a convenient position for the whole fleet. A mile further down the river is the Kin-wung-sung Wharf, which, with the large godowns attached, was purchased from Messrs. Dent and Co. in 1867. The Ningpo steamers lie here for the greater convenience of arriving and leaving at all stages of the tide. Passengers are taken to and from the settlements in the harbour tender *Tsatlee*. About three miles down the river on the Pootung side is the company's steamboat dock, also purchased from Messrs. Dent and Co. This is the only dock in Shanghai capable of receiving large river steamers without removing more or less of their wheel arms and floats, though it cannot at present admit heavy draft vessels.

The only other steamers running on the Yangtsze are the *Rona* and *Tunsin*, of about 1,200 tons carrying capacity,

Digitized by Google

belonging to an English company, styled the Union Steam Navigation Company, under the management of Messrs. GLOVER, DOW, and Co., at Shanghai, and DRYSDALE, RINGER, and Co., at Hankow. A few years since almost all the large houses ran steamers, and freights, which had stood at 20 taels, were brought down to 2 taels per ton; they are now steady at 4 to 5, with very satisfactory results for the owners. The Union Company at their last meeting showed profits equal to 30 per cent., besides placing a sum to the reserved fund. It is proposed to increase the steamers of this line, and Capt. MACQUEEN, for a long time in the service of the Shanghai Steam Company (RUSSELL and Co.), has left for England, and will superintend the building of a suitable steamer for the company. There is also a company under the management of Messrs. TRAUTMAN and Co. running on the Chefoo, Newchwang, and Tientsin route. This company has at present the *Nanzing* and the *Yen-tze-fei*. The rates of freight are about 10 taels per ton, and the working shows a profitable result. Another vessel is now building in England for the company.

## THE ACTION OF HER MAJESTY'S GOVERNMENT IN REGARD TO THE FORMOSA OUTRAGES.

BRITISH residents in China have no longer any reason to complain of apathy on the part of Her MAJESTY'S Government in regard to events affecting their interests or personal safety. Her MAJESTY'S Government is at the present moment exceedingly active and vigorous in the direction of China, and its energies are just now concentrated on the recent Formosa imbroglio, with the view of placing British interests in that happy island in a thoroughly comfortable and satisfactory position. To this end, a Vice-Consul who has too energetically vindicated the inviolability of British subjects is to be dismissed, a naval officer who supported him is reprimanded, the money exacted as a reparation for injuries sustained is to be returned, and a humble apology is to be tendered to the ill-used Chinese officials. So shall the exigencies of diplomatic etiquette be satisfied, at the same time that Lord CLARENDON and his colleagues are enabled to gratify their inordinate appetite for humble-pie!

Our first intimation of the course events were taking was derived from a short discussion in the House of Lords, commenced by the Duke of SOMERSET, who handsomely exonerated the London Missionary Society from any share in originating the recent troubles. The Duke blamed the rashness of the missionaries in Formosa, complained of the interference of "the inevitable gunboat," and asked—"Is this the way to promote Christianity in China?" Lord CLARENDON, in replying, also laid the chief blame on the missionaries, asserting that the affair "originated in the destruction of a mission-house," though there were also "some commercial matters" for which redress was sought. In fact, regarding any insult or injury sustained by British subjects his Lordship knew little, and cared less. But he was quite clear as to the necessity of humiliating our own officials, and making abject submission to the Chinese. Self-abasement on the part of Great Britain, carried to the utmost extent, would, he considered, "have a salutary effect;" there would be no further cause for anxiety, and this GLADSTONE-BRIGHT-CLARENDON policy, working under the distinguished patronage of Mr. BURLINGHAME, would place our relations with China on a more satisfactory footing than ever. Of course these sanguine anticipations are unreservedly endorsed by *The Times* and the Liberal press generally, as will be seen by the articles we reproduce in another part of our paper.

We have distinctly expressed our disapproval of a precipitate resort to force in cases where it can be dispensed with, such, for instance, as when missionaries, belonging to no properly-organised society, stray beyond the limits wherein they have a right to expect protection, and suffer for their temerity. But, on the other hand, we observed, in a recent article on this subject,* that this series of outrages in Formosa "must be regarded in a very different light from those happening in a central province of the Empire." A difficulty arising in such a province, under the personal government of one of the highest officials of the Empire, who is known to be in intimate communication with the Central Government, bears no comparison with one originating in an outlying dependency like Formosa, where the sovereignty of the EMPEROR is hardly more than nominal. There is not the slightest hope that the local mandarins at Ta-kow or Tamsui will pay the slightest respect to our treaty rights unless we are prepared at all times to enforce them on the spot. In the present instance, so far from a single attack on a Mission house being the sole ground of offence, there was a long series of outrages to punish. An English gentlemen was stabbed by a servant of a Chinese official, and was allowed to go entirely unpunished. Mr. GIBSON, acting Consul at Taiwan, received the grossest possible insult from the Taoutai, for which no *amende* has been made or offered. A deliberate attempt was made at the instigation of the Taoutai to murder Mr. PICKERING, a gentleman engaged in legitimate trading operations. On the occasion of a subsequent endeavour to renew friendly relations, the Taoutai actually struck Mr. Consul GIBSON with his fan. Illegal "squeezes" of all sorts were imposed on British trade. The premises of a foreign firm were sacked, and property to a large amount carried off. Repeated applications for justice and redress were treated with increasing contumely, and at last, after an astonishing amount of forbearance, Mr. GIBSON invoked the aid of the naval forces, with what results our readers are well aware. And now all the good that has been effected is to be undone, and Mr. GIBSON is to be punished instead of rewarded for his efforts to maintain unsullied the fame of the flag he represents! Such an act as that for which Lord CLARENDON takes so much credit to himself and his colleagues will be a lasting disgrace to their administration.

* See *London and China Telegraph* of March 22, page 140.

## FRENCH TRADE WITH CHINA AND COCHIN CHINA.

IN *The London and China Express* of the 18th February we gave the purport of M. JACQUES SIEGFRIED'S report on Japan, with a promise to follow it up with notices of the reports by the same gentleman on China and Cochin China; but until the present time we have been unable to fulfil our promise, as the reports were out of print. The author has now republished the whole of his reports on the Far East, together with the notes made during his voyage round the world.* M. SIEGFRIED was quite enamoured with Japan, and his report on that country is far more interesting than those on the other countries which he visited; nevertheless, they deserve attention, and we now offer our readers a resumé of the reports on China and Cochin China, together with a few extracts from the other parts of the volume.

After giving an approximative estimate of the commerce of China for 1867, which the author says amounted to £24,000,000 of imports, and £18,000,000 of exports, he adds: The share of England and her colonies in the above imports may be set down at seven-eighths of the total amount. The exports consist principally of 75 millions of kilogrammes of tea, and 2½ millions of silk, of which England takes 60 millions of kilos. of tea, and 20,000 bales of silk; America 15 millions of kilos. of tea, and 1,000 bales of silk; and France 500,000 kilos. of tea, and 20,000 bales of silk. M. SIEGFRIED, studying commercial China from a French point of view, gives little attention to the secondary ports, for he says the Chinese merchants, on account of the small costs they have to support in comparison with the French, have a constantly increasing predominance in the trade of the coast, and of the Yangtze-Kiang. Of Hong Kong M. SIEGFRIED speaks with much praise as an entrepôt, and says that the English perfectly understood its importance and position when they made it a free port, where goods could go in and out without an account being rendered to any one; but he notes, *en passant*, that this very freedom renders it difficult to obtain exact information relative to its commerce. He estimates the chief articles of import as follows:—Opium, £6,400,000; printed goods, 50 millions of yards, of the value of £1,600,000; rough cotton goods, £1,600,000; rice, one million. But the importance of Hong Kong, he thinks, consists less in the value of its direct trade than in its influence; what places Hong Kong so high is, in M. SIEGFRIED'S opinion, its fine port, placed exactly in the way of vessels bound from Europe or India to any of the ports of China or Japan; its position, which makes it the natural head of the postal service, and, finally, the advantage which it possesses of being placed under the liberal shield of England. All these privileges, says the author, attract to it the principal agencies of the banks, and the chiefs of nearly all the commer-

* *Seize Mois Autour du Monde*, &c., with Map; 12mo. Hetzel, Paris.

Digitized by Google

cial houses, who obtain news at first hand from Europe and India. On the other hand, these very advantages often lead, says M. SIEGFRIED, to want of sufficient prudence in business. He also raises the question whether the establishment of telegraphic communication with all parts of China may not take away from Hong Kong some of its present *prestige*, as regards the facility of communication. Apart from its commercial importance, he considers Hong Kong one of the greatest triumphs which human energy and perseverance have ever achieved, and he does not stint his expression of admiration at what the English have done with what, in 1841, was an arid precipitous rock, with, however, a fine port and some good springs of water.

Of the future of Shanghai M. SIEGFRIED says:—"Its future "shows itself under brilliant colours; its business cannot "fail to increase in proportion as the ports of the Yangtze-"Kiang, and particularly Hankow, cause the products of "Europe to enter into the interior of China. I think I may "venture to say that, of all the places of commerce in the "China seas, Shanghai is certainly that which offers the "greatest resources, and which I should recommend most."

After referring to the late crisis, M. SIEGFRIED gives it as his opinion that the banks have lost their admiration for gigantic establishments, and that more modest operations have now good chance of success. The Germans and Swiss, he says, have profited largely by recent events, and it is they, perhaps, who are carrying on the most regular and safe business. As to the Americans, their part here grows more and more important, and they are especially remarkable for their spirit of enterprise in the establishment of lines of steamers on the Yangtze-Kiang and the coasts. As regards France, after paying a well deserved compliment to the Messageries Imperiales and the Comptoir d'Escompte, M. SIEGFRIED says:—"I regret, and I am even ashamed to have to write it, that "our commerce has not a single representative in the whole "extent of this vast country, which, however, is the great "producer of the raw material necessary for our national "industry, par excellence, namely, the silk manufacture!" It is perfectly natural that M. SIEGFRIED should appeal to his countrymen to put an end to a state of things which makes it necessary for a French merchant to get his silk through foreign houses. M. SIEGFRIED is not an ardent admirer of the Chinese Government, for he says:—"It is impossible to avoid "deploring that so fine a country as China, with such an in-"dustrious population, should be burthened by a Govern-"ment so corrupt and benighted as that of which the "European Powers some years since thought it right to "prevent the fall, which, however, is very likely to take "place within a longer or shorter period."

M. SIEGFRIED thinks highly of the choice of Cochin China for a French possession—"Placed at the doors of the Chi-"nese Empire, and on the high road from Europe to the "extreme East, Cochin China is at once a political position "of the first rank and a colonial establishment, of modest "importance, it is true, but of certain prosperity. From a "political point of view, it supplies an admirable *point* "*d'appui* for our naval forces, thanks to the port of Saigon, "which is rendered accessible to our vessels by a deep river, "while a few torpedoes are sufficient to defend it; and from "a colonial point of view we have the remarkable fertility "of the soil, and a certain market assured for its produc-"tions amidst the three to four hundred millions of people "who inhabit China." The fitness of the soil for the production of silk, tobacco, cotton, cocoa, and sugar, as well as rice, the splendid means of water carriage by innumerable canals, and the character of the population, supply M. SIEGFRIED with the materials of a brilliant sketch of the French delta in Cochin China. "We have there," says the report, "a "sufficient field to enable us to show the world that we, the "French, also understand colonisation."

Of the original administration of the settlement M. SIEGFRIED speaks in high terms, but he is evidently not sanguine of the future, and *hopes* that the EMPEROR will in time give it a civil government, instead of the military regime which has proved so injurious to the colonies of France. He shows that the management of the natives is in the hands of young officers, who have not been specially instructed in their duties, and that after very short periods these are called away for promotion, and are again replaced by young and inexperienced men. Such a system cannot work; but the subject does not specially interest our readers.

As regards commercial arrangements the port is free, with the exception of a duty on opium, and the ships and productions of all nations are on an equal footing. But even here, says the author, the French merchants hold quite a secondary position; the chief export trade is in the hands of the Chinese, Germans, and Americans, and only two or three French houses take a small share in it; the English have, as yet, not interfered in the trade of the colony. The principal imports are made by the Chinese, who purchase English goods at Singapore and undersell the European merchants. The exports for 1867 are given as follows:—3,200,000 piculs of rice, of the value of nearly a million sterling; dried fish, £60,000; and silk, £14,000. The imports consisted of cotton goods of the value of £260,000; opium, £60,000; and a few other unimportant items. Nearly the whole of the cotton goods are English. Rice is the grand staple of Cochin China, but this being in the hands of the Chinese, something more is necessary for European trade, and M. SIEGFRIED insists urgently on the necessity of introducing the cultivation of silk, cotton, coffee, tobacco, and other products which make the wealth of the East. The population is, however, insufficient; quantities of land lie out of cultivation, and any one may obtain it at a rate equal to five shillings per acre. In short, nothing is wanting apparently to make Cochin China a fine colony but colonists.

In his diary M. SIEGFRIED says that the number of Europeans in Saigon is not more than 400 or 500, the army not included; while the Chinese in the whole of Cochin China are stated to amount to about 40,000. The environs of Saigon, says M. SIEGFRIED, are not beautiful, nor are the lands in the immediate neighbourhood fertile; for rich soil the settler must go more inland. One of the great advantages held out to colonists is the character of the native population, who are described as essentially agricultural, easily managed even by strangers, and as caring little for country, but clinging fondly to their local rights and habits, which are said to be founded on a well-conceived system.

M. SIEGFRIED'S notes upon Canton, Macao, Shanghai, and other ports of China, as well as Japan, are interesting; but his report on India, and especially the notes made during his stay there, will perhaps form the most acceptable portion of the volume for English readers in general. We have few sketches of India from a French point of view, and while M. SIEGFRIED never hides his opinions, his view of the British dominion in India is, on the whole, one of the most gratifying we have ever met with.

## THE LANGUAGE OF COCHIN CHINA.

THE Minister of Public Instruction in France has appointed the well-known Oriental linguist, M. ABEL DES MICHELS, professor of the Annamite language, and that gentleman opened his first course the other day in the new high school attached to the Sorbonne. From this introductory address we propose to make a few extracts. The French were in close communication with the Annamites on the eve of their great revolution, and there exists a dictionary in Annamite and Latin by the French Bishop of ADRAN, who died in 1799. This work was augmented by the Bishop of ISAUROPOLIS, and is the sole dictionary in existence printed in Annamite characters. To it the latter ecclesiastic added a grammar, a dictionary in Latin and Annamite, dialogues, a Cochin Chinese poem, and other works, and the whole form together a complete course of instruction.

This work was printed by MARSHAM, at Serempore, under the auspices of the British East India Company. Some time later an Annamite colony was founded at Bangkok, and the French missionaries founded a press there, and produced a number of works printed in the Annamite tongue. There is now a printing-office at Saigon, and an Annamite journal has been established, which the natives are said to read with avidity. The books printed at Bangkok were in the *cursive* character, and those first produced at Saigon in Latin characters, but the Imprimerie Impériale of Paris has now engraved a complete set of Annamite type.

The writing and printing of Annamite in Latin characters is said to be making great progress in the schools conducted by the French priests, and a former pupil of the missionaries, TRU'O'NG VINH KY', an Annamite of great intelligence and solid instruction, has composed grammars for the use of both French and Annamites, and translated orations and other productions into excellent French. M. des MICHELS has already

Digitized by Google

published a series of dialogues for the use of merchants and others visiting Cochin China, and announces four other works as being in preparation, viz. :—"A Table of the Keys and "Phonetics of the Sinico-Annamite and Chinese Languages, "Compared both as Regards Pronunciation and Accent;" "A "Manual of Phrases, in the Annamite Character, to Aid the "Study of the Particles and the Acquisition of the Cochin "Chinese Language; Generally;" and, lastly, "A Poem, and "Annamite Fables in Figurative Character." A certain knowledge of the French language is so common now amongst Englishmen that the great majority of those who visit Cochin China will be able to make use of M. des MICHELS' handbooks, so that they may be considered as prepared for the use of all educated Europeans; and should their reproduction in an English dress be deemed requisite, their author has left but a simple task to be performed, and we should recommend him to add to those which have not yet appeared an English version, side by side with the French, as some other French Oriental scholars have already done in the case of Japanese works, such as the "French-English and Japanese Dictionary" of the Abbé MERMET de CACHON, aided by MM. A. le GRAS and LEON PAGES.

IN the final debate on the Navy Estimates, the proposed reduction in the China squadron was again discussed. Mr. CORRY ably vindicated the course of the late Government in opposing the reductions urged by the Liberal party, and in building a special class of vessels for the repression of piracy; and he forcibly deprecated the proposed change at a time when both Sir HARRY PARKES and Admiral KEPPEL were jointly advocating the necessity for a powerful force being maintained in those waters. Mr. CHILDERS, knowing he had a strong majority at his back, of course did not deign to argue the point, but loftily said that as the present Admiralty and the Foreign-office were in accord on the question, the views of the late Government were of no importance whatever. So the matter dropped, and the squadron will be cut down.

ON Tuesday, the 6th instant, arrangements had been made for a deputation from the Peninsular and Oriental Steam Navigation Company, consisting of Mr. P. D. HADOW (Chairman), Admiral Sir W. H. HALL, the Hon. RONALD MELVILLE, and others, to have an interview with Lord GRANVILLE on the subject of improvements to the harbour at Point de Galle. His Lordship was unfortunately called away to attend a meeting of the Privy Council, so was unable to fulfil his engagement; the deputation however were received by Mr. MONSELL, and explained their views. Lord GRANVILLE will appoint another meeting at an early date to give his reply.

OUR first impression on reading Mr. LOWE'S financial statement, was that the present Budget would make no alteration in any duties affecting China or Straits produce, for we interpreted the proposal to remit the duty on "Corn" as affecting ordinary cereals only. By the wording, however, of the formal resolution subsequently proposed by Mr. LOWE in Committee of Ways and Means we find that arrowroot, sago, semolina, and tapioca are all included in this category, and will consequently be exempted from duty when the new system comes into operation.

IN another column we reprint from the *Morning Post* a very ably written review of the recent revolution in Japan. Being from the pen of a gentleman who has had the best possible opportunities of acquiring information, and who possesses the highest qualifications for turning it to profitable account, the article is well worthy of perusal.

## THE PENANG RIOTS.

We have received a copy of the Report of the Commissioners appointed to inquire into the Penang Riots. The Report is a lengthy one, and with the appendices, containing full minutes of the evidence taken, makes a quarto volume of some 140 pages. The general conclusions arrived at are, however, thus summed up:—"That the riots had their origin in a trifling quarrel between two rival Mahomedan Societies during the Mohurrum Festival, and that they were fostered by two other rival Societies of Chinese, with one of which each of the former had joined in alliance. That all these Societies joined in the riots by the direction, and under the instigation of their respective head men or office-bearers, who directed their principal movements, and who, from the funds of their Society, supplied them with provisions and arms, with rewards for the heads of their enemies, and with gratuities and pensions for the wounded and for the relations of those who were killed when fighting. That the organisation and discipline of the Societies appear to be as complete as that of any disciplined force of the Government. That it is therefore evident that these Secret Societies are extremely dangerous to the peace and welfare of the community. A notable circumstance, and one which has rendered these Societies more harmful of late, is, the combination of the Mussulmans and Hindoos with the Chinese, with whose customs their religious prejudices are so much at variance." The Commissioners appear to think it would be dangerous to attempt the entire repression of these Societies, as such a measure might lead to more secret and still more dangerous combinations. But they recommend a more complete system of registration, with strict supervision, and heavy penalties, rigorously enforced, for all breaches of the regulations. The Report is issued in London by Mr. G. Street, 30, Cornhill.

## THE HISTORY OF THE REVOLUTION IN JAPAN

(MORNING POST.)

The close of the revolution in Japan is announced, and duly certified under the hands and seals of the several foreign Ministers resident in that country, in notifications which were received by the mail on Monday. Diplomatists are not prophets, and one of the six ports—the northernmost—is still in the hands of outlaws affected to the Tokugawa family, led and prompted by a few foreign adventurers. Still, the declarations of the Ministers may pass for what they are fairly worth, namely, public indications of their belief that the struggle is fairly over—that the resistance maintained by the Tokugawas in Yedo is not likely to be formidable, and will probably die out as soon as the Condottieri, whose presence now maintains the contest, have settled with the Imperial Government the price for which they are to be bought over. It is to be hoped that the judgment of shrewd men with ample local experience will not be falsified by the result, even in a country so volcanic and perturbed as Japan.

It has taken the Japanese six years to effect and complete this fundamental change in their system—that is, counting from the edict issued in 1863, which abrogated the forced residence of the Daimios in Yedo. It is to the honour of the Japanese that a system which has been in existence for nearly three centuries, among an armed population led by numerous and discordant feudal chiefs, has been removed and given way to another entirely different, with an amount of bloodshed and hostility which, as compared with any other revolution of modern Europe than our own in 1688, may fairly entitle it to the epithet of pacific, whereas we might reasonably have expected bloody fights, partisan assassinations, judicial suicides, and wholesale confiscations. All we have witnessed have been a few skirmishes, two or three homicides—the result rather of outbreaks of individual fanaticism than systematic cruelty—and a few moderate sentences in which the punishment of antagonistic chieftains has been tempered by tenderness for the rank and position of the families to which they belonged.

To us as to other Western nations this revolution ought to be singularly interesting, for it has grown out of the causes which have led to and is the direct effect of the changes which have culminated in the opening of Japan. The dynasty of Kubosama was established on the Conservative principle of Japan for the Japanese, on the exclusion of foreigners, on the extinction of the spirit of enterprise, and entombment of the intellectual vigour of a warlike, ardent, and novelty-loving race, whose higher tendencies, however, have proved themselves stronger even than their intense sensuality. The impetus given by the first opium war with China step by step led to the opening up of foreign relations with Japan. The inventions of steam and improvements in ordnance gave the Western Powers a superiority of which they speedily made use to initiate a new policy of intercourse. The first steps were cautiously made, and requirements were limited, both by the Americans and ourselves, to the hospitable treatment of foreign castaways and the supply of provisions to whalers and other vessels. If it had been possible to rest at this point, the Mikado might still have been playing the part of Merovingian Emperor in the midst of his harem at Kioto; for such intercourse as the Perry and Stirling treaties authorised brought foreigners in contact with Japanese merely as strange animals to be looked at, admired, and shunned. But progress could not be stayed, and the second Chinese war supplied motives and considerations which Mr. Towsend Harris cleverly availed himself of to arrange a real treaty of commerce with Japan.

If for three centuries the feudal princes of Japan had submitted to the grinding tyranny and repressive rule of the triumvirate Gosankios, and if they were content to see their legitimate Sovereign shut up in a semisensual and conventual seclusion, it was because the family and laws of Iyeyas represented and embodied a policy of exclusion which exempted them from the influences of innovations believed to be dangerous and productive of internal disturbance. Was Kubosama to rule them with a rod of iron, and to let in the hated foreigner, taking tithe of their goods to his own exclusive profit, working a revolution in the monetary and industrial life of the country? This was precisely what the Shiogoonate tried to do and failed. They tried to work the treaties for their own behoof, prevented the Daimios from introducing their produce into the open ports, insisted on levying a heavy duty on whatever the princes wanted from abroad, and oftener attempted to prevent them from getting such articles at all. It excited intense jealousy to observe the Shiogoon's officers laying up stores of foreign munitions, availing themselves of fireships and military instructors, and, in a word, greedily striving for the material power and knowledge which were to rivet still more firmly the customary bondage. Concurrently

Digitized by Google

with this observation came great changes in the daily life of the people. The values of the precious metals, settled by one of the most extraordinary chain of circumstances known in history on a basis purely fictitious, which made the relative ratios of gold and silver about 6 : 1, were revolutionised. The man who owed six ounces of gold, instead of being able to pay his debt with thirty-six ounces of silver, found nearly eighty were required. No man knew against what moneys the necessaries of life were to be exchanged. The Shiogoonate did their best to provide remedies and apply palliatives for such a state of affairs, and the great Daimios, each for himself, did what seemed good in his own country; but the immediate distress and discontent unsettled all the ordinary relations of life.

It was not to be wondered at that the great feudal princes should form combinations to compel the Shiogoonate to admit them to some share in the administration of affairs by which their interests were so nearly affected. The first step was taken in conjunction with the discontented Gosankio branch, the house of Mito, between whom and the Ikammonis, the hereditary regents, there was an ancient feud. The Gotairo was murdered at the gates of the palace occupied by his boy ward. But soon the princes of the Southern Confederacy, regardless of the dynastic views of the Mitos, determined to act for themselves, and claimed the right of exemption from residence at Yedo. Chafed at the denial of his demand, and furious at the resistance made by the Foo-dais (descendants of Taikosama's generals), Shimizo, the father of the nominal prince, but himself the real head of the Satsuma family, left Yedo, August 14, 1862, vowing vengeance, which he was prepared to gratify by embroiling his country. A party of exercise-seeking foreigners fell in the way of his procession. An over-zealous attendant, knowing well that his master's wrath was connected with the questions arising out of the presence of the hated foreigners in Japan, raised a shout of rage, and the unhappy party were set upon and hewed down by his armed henchmen. Such were the first strokes that introduced the Japanese revolution.

We do not propose to take our readers through the history of the last few years step by step; to show how the Shiogoon's Government might, by adopting a manly, intelligible policy, have established its power securely on the new element of foreign relations; and why, by trimming its sails now to the Conservative party and now to the foreign Ministers, and afraid to break with either, it lost the golden opportunity of raising its head from the mayoralty of the palace to the substantive sovereignty of Japan. The chiefs of the Southern Confederacy saw their object more clearly before them. They knew that the influence of the Mikado was necessary to their purpose. They were willing to purchase it at the price of all they could take from the Gosankios to give to the ravenous Court of Kioto. They were more than doubtful of being able to shake off foreign influence, so they went in frankly for making use of it, showing they could effectually forget past hard knocks and rubs, and bury them, in the hope of present neutrality and future aid.

It is greatly to the credit of the foreign Ministers, particularly our own representative, that they have steadily persevered in a policy of neutrality, and they were fortunate throughout in being countenanced by their Governments. There was, indeed, a tendency to deviate from this safe and easy policy in 1865 and 1866, when a former French Minister, in pursuit of what he called his personal policy, all but entangled his Government in relations with the Shiogoonate which, but for the sounder appreciation of the Minister at Paris, would have separated him from his colleagues. The motive was laudable, though one-sided—the delusive hope of engrossing for his countrymen the supply of the Japanese Government with its stores, and the bulk of the raw material which forms the first of the staple industries of France. But the delusion speedily vanished, and during the last two years there has been no notable divergence in the political views of the foreign representatives.

Our sketch of the Japanese revolution, slight as it is, has almost outrun the limits of an article. Our excuse for wearying our readers is the real importance of the events themselves, as demonstrating the capacity of the Japanese, whose position as an independent self-governing race it is of high importance should be maintained to effect a great change in their system of government and administration in a quiet, sensible, and business-like way, without useless bloodshed or unnecessary severity. Let us think of what would be a parallel case in our own history if such a thing were possible—say a reunion of Tory-Jacobite families to restore the Duke of Modena. Yet, fantastic as the idea may seem, it is hardly more so to us than the statement would have been to a Japanese in 1854, that in half a generation the Shiogoonate which had lasted three centuries would be destroyed, and a sensualised high priest, chiefly known to the mass of the people in the illustrations of licentious prints, should be called from his seclusion to exercise the imperial authority of his remote ancestors.

## MISGOVERNMENT IN THE STRAITS.

(STAR.)

The reckless legislation of the nominated Council of the Straits Settlements aroused the Duke of Buckingham, on the eve of his departure from office, to the necessity of exercising that salutary authority which, so long as Crown colonies remain Crown colonies, should be vested in the Colonial Minister. But if it had not been for the courage and good sense of the Chief Justice, Sir Benson Maxwell, it is more than probable that an Act as dangerous in its tendency as its provisions are foreign to the spirit of English law would have remained in force, without any attempt being made to secure its amendment or to divest it of its more obnoxious features. It is proper to observe that the Act was originally passed in 1867, its operation being limited to one year. It was re-enacted in 1868 at a single sitting, and without any previous notice being given to members of Council—not even to the Chief Justice. Sir Benson, in a clear and explicit letter to the Duke of Buckingham, dated the 1st of September last, stated his objections to the Act. He objected to it because it gave power to the Governor to deport both aliens and naturalised subjects of the Crown, of the Chinese race, "without even the check of a written information to justify his action, without its being even in his opinion necessary for the preservation of the peace, without any hearing of the party to be deported, and without appeal." It seems absolutely incredible that any Secretary of State should have advised the Crown to sanction a measure which is so entirely at variance with the natural principles of justice, and for which no parallel can be found in the Alien Act of 1848, or in any other measure passed by the Imperial Parliament at a time of political danger. We regret to say that the late Colonial Minister exhibited a very scant appreciation of the sound constitutional principles for which the Chief Justice contended. Ignoring the right of a British subject to a trial by jury, to a writ of Habeas Corpus, and even to an appeal against what might justly be deemed an oppressive act of severity, the Duke was only willing to concede that the order of deportation "should not be put in force against any person except upon a written information, and that provision should be made that the person to be removed should be summoned before the Executive Council, and, if he chose, be heard before them, and that there should be a written record of their opinion that his removal was required with a view to the public safety." Does the late Colonial Secretary really think that this concession will have the effect of wooing back the panic-stricken Chinese who have already fled from Penang, or that it will allay the reasonable apprehensions of those who remain, or that any check which a nominated and official Council is likely to impose on the will of a Governor will compensate for the removal of all those restraints with which the English law hedges round the Executive authority, and which are quite as necessary in a Crown colony as they are in this free country? The Act is full of provisions equally monstrous. The Chief Justice objects to the Act that it would authorise the killing of rioters without necessity—that its provisions would justify the firing upon them even if they offered no resistance to authority, and were ready to disperse on the call of the magistrate. The Duke argues that some modification of this and of other clauses, which read like the resolutions of a Californian vigilance committee, is necessary, but he is very far from apprehending the gravity of these departures from the common law of England, or exhibiting that impartiality towards men of another race which it should be the aim of an English statesman to enforce. The fact, however, that he is constrained to direct that the law shall undergo extensive alterations, and that some of the safeguards which have been swept away shall be restored, is a proof that the Legislative Council, as at present constituted, is quite unfit to exercise the enormous powers which are entrusted to it. There is one passage in Sir Benson Maxwell's letter which deserves to be held in permanent remembrance, and which may, at all events, be submitted with confidence to the present Secretary of State for the Colonies. "I have now administered the law of England," he says, "in these settlements for upwards of twelve years, and I have often reflected with admiration on the prosperity and happiness which that law, with its noble respect for human rights and its safeguards for personal liberty has diffused among the various Oriental races which compose the bulk of our population. And my admiration has not been unmixed with something of national pride, when I contrasted the freedom and protection which those races found here, and whilst they repaid by respect and attachment to our rule, and by an abundant contribution to the material well-being of the colony, with the oppressive rigour to which they are subject in the colonies of other European nations. I should therefore deeply regret, not only for the Asiatic inhabitants of the colony, but for ourselves, if such principles as are embodied in this Act were to be now introduced into our law. Nothing could more conclusively demonstrate the utter absence of anything like sufficient reason for the exceptional legislation against which the Chief Justice protests than the language now quoted—unless, indeed, no weight whatever is to be attached to the deliberate judgment of the head of the judiciary in the Straits Settlements, and he a man whose character and services have long adorned the bench upon which he sits.

Some time ago we called attention to the financial grievances of this over-taxed colony—a state of things which appears to have grown up under the administration of Sir Harry Ord, the present Governor; and we are glad to learn that these grievances have been very fully set forth in a memorial which has been addressed to Lord Granville by the Straits Settlements Association. Another illustration is to be found in connection with the cost of erecting a new Government House. In July 1867 the expenditure of a sum of one hundred thousand dollars for a mansion, in which Sir Harry Ord might reside with all the dignity of a representative of royalty, was sanctioned by the Legislative Council. His Excellency is said to have promised that more money should not be spent. We now find in the *Straits Journal* a report of six columns, in which the colonial engineers elaborately prove that instead of the original estimate being enough, a further expenditure of nearly sixty thousand dollars will be necessary. Of this sum twenty thousand dollars will, it is estimated, have to be expended in order to get the building ready for the Duke of Edinburgh when he makes a flying visit to the colony in October. His Royal Highness will only remain one single night in Singapore, and we feel sure that if he had any voice in the matter he would not authorise such an expenditure solely on his own account—especially in view of the excessive burthens which have already been placed on the shoulders of the European and Chinese taxpayers of the colony. The colonial engineers give very good reasons for the increased expenditure; but that does not at all improve the position of the executive, or reconcile those who have to find the money to the extravagant tastes of their virtually irresponsible rulers. We observe that there is a difficulty in filling up the vacancy occasioned by the resignation of some of the independent members of the Legislative Council. Several of the merchants have declined to accept office, and it would be well to inquire into their reasons for taking this course. Men of their class are not disposed to assume legislative responsibilities unless they can enjoy personal freedom of action, and any attempt to impose conditions upon them—if such an attempt be made—calls for the interference of the home authorities.

# Naval and Military.

The Basilisk, 6, paddle-sloop, 1,031 tons, 400-horse power, Captain W. Nathan Wright Hewitt, V.C., has arrived at Sheerness from China. She was commissioned on the 18th September, 1865, and has therefore been rather more than three years and a-half absent from England. The Basilisk was employed most of her time on the Japanese coasts, and remained very healthy. In December, 1867, she was in danger of destruction by fire, occasioned by the accidental oversetting of a can of turpentine. A few months afterwards, on the 27th of April, 1868, the vessel was again in danger from having got ashore in an almost unknown harbour to the southward of Shanghai. She sustained extensive injuries, and was detained three weeks in dock, nearly 120 feet of her keel having been knocked off. The Basilisk was one of the squadron present at the opening of the new ports in Japan on the 1st of January, 1868, and she was frequently employed in conveying the Admiral and the British Minister from port to port. Her cruising extended as far as the mouth of the Amoor. Singapore was her last port, and on her homeward passage she called at Java, Algoa Bay, Simon's Bay, St. Helena, Ascension, St. Vincent, Madeira, and Lisbon. Between Hong Kong and Spithead she burnt nearly 1,500 tons of coal. The Basilisk was paid off on the 13th inst. in the steam basin, Chatham, into the fourth division of the Steam Reserve in the Medway, under the superintendence of Capt. the Hon. A. A. Cochrane, C.B.; David Williams, boatswain's mate, and Joseph Hammond, ship's cook, were awarded by the Admiralty each a silver medal, with gratuity, for long service and good conduct. During the time the Basilisk was in commission—a period of three years and seven months—she was attached to the China squadron, and was employed in cruising in the China seas and adjoining waters. Most of the officers, including Capt. Hewett, who left England in the Basilisk, return with her. By order of the Admiralty she has been completely stripped, and most of her internal fitments and bulkheads removed, as it is not intended to again place her in commission, but either to break her up or sell her out of the Royal Navy. On being paid off the continuous service men among the crew were granted the usual period of absence for their run ashore.

## NEW WAR-STEAMER FOR JAPAN.

Messrs. Hall, of Aberdeen, have just launched a large steam corvette, an order from the Japanese Government. The vessel is a fine specimen of the workmanship of the builders of the famous clippers, and is greatly admired for compact strength and beauty of outline. The corvette, which was christened by Mrs. Charles Glover the *Iho-Sho-Maru*, is of 1,500 tons register, with engines of 250-horse power, measures 210ft. keel, 38ft. beam, and has a depth of 29ft. from the upper and 21ft. from the main deck. The *Iho-Sho-Maru* is to carry ten guns of large calibre, and is constructed after the model of a British man-of-war. The vessel is built of British oak and teak, will be full ship rigged, and is intended to sail under steam and canvas combined, or either singly. The upper deck is laid on iron diagonals for lightness, while between wind and water for a depth of 4½ft. the corvette is to be iron-plated 4½ in. thick, this shield being backed by 6in. of teak. *Iho-Sho-Maru* is the second vessel built by Messrs. Hall for Japan, under orders through Messrs. Glover. The corvette, which is to be commanded in the first place by Captain James and Lieutenant Inglebach, has been built at an expense of some £65,000.

## EARTHQUAKES.

(To the Editor of the *London and China Telegraph.*)

SIR,—In the *Standard* of the 15th of September last I notice a leading article mentioning three principal lines of Earthquake territories into which the globe can be divided; but the coincidences which I have noted on this subject during the past year have led me to believe that there must exist a volcanic region of vastly greater proportions than any of these. I give two of the most notable instances which have fallen under my observation. On the 18th December last, at about three o'clock in the morning, a severe shock of earthquake was felt throughout Vermont and New York in the United States, and extended through Canada to the shores of the Atlantic, and the summary of the various accounts given would indicate it as coming from the S.W. On the 18th December, at about 10.20 A.M., I was startled by a very severe shock of earthquake here, which increased in intensity for about twenty seconds to half a minute. Books and ornaments were thrown from the tables, and the lamps suspended from the ceiling were swung round about until they nearly touched it. Making my way to the compound I witnessed the destruction of about a quarter of the town, which fell in two successive crashes; burying many people among the ruins and causing much loss of life; here the shock appeared to come from E. to N.E. After this first shock I counted at least fourteen minor ones during the day. At Kelung, a port on the north-east side of the island, the shock was still more severe; the town was laid in ruins, and the harbour ran dry, the water returning in one huge wave, overturning the junks and washing up far beyond its usual limits. At the same time there was a submarine volcanic eruption of steam at the mouth of the harbour; that however ceased almost immediately. Much damage was also done to the villages. The whole north end of this island is highly volcanic, and exhibits traces of having been subjected to terrible disturbances. The two mountains which stand on either side of the entrance of this harbour are extinct volcanoes.

The second instance to which I refer is the late series of terrible earthquakes in Peru and Ecuador, which occurred on the 13th August. On the previous day I noted here a very remarkable state of the atmosphere. The air was unusually heavy, great banks of murky clouds were lying out at sea, all round the horizon, and among the slopes of the mountains, yet overhead it was bright sunshine; the wind came in strong gusts, sometimes warm, and at others chilly and damp, and from time to time throughout the day hollow subterranean rumblings were distinctly audible. Two days after the earthquake came the series of enormous waves rolling on the coast of Southern California. There would appear to be scarcely a doubt that these simultaneous manifestations are owing to the agency of some tremendous volcanic forces, which are of sufficient power to shake the world's crust from the shores of China to the American coasts of the Atlantic; the above mentioned earthquake of the 18th December was felt all through this island, on the mainland as far as Shanghai, and south as far as Chaou Chowfoo. It is impossible to say how far inland. At the time of the shock the aneroid stood at 30° 45′, the thermometer at 65°; at 4·50 P.M. aneroid 30° 37′, thermometer 69°. I send you, as they may not be without interest in future investigation on this subject, a few notes on the principal earthquakes which have taken place since the date of the first one above mentioned.—

| | | | | | |
|---|---|---|---|---|---|
| 1867. | | | | | |
| Dec. 20. | 6.20 A.M. | A severe shock. | Aneroid 30° 38′; | thermom. | 68° |
| 1868. | | | | | |
| July 5. | 7.32 P.M. | Do. 20 sec. | do. 30° 16′; | do. | 81° |
| — 12. | 4.00 P.M. | Shock about 5 sec. | do. 30° 12′; | do. | 82° |
| — 16. | 6.00 A.M. | Sharp shock; heavy rains and a hurricane blowing. | | | |
| — 22. | Afternoon. | No shocks. | | | |
| — 25. | | Slight shock. | | | |
| — 26. | | Do. Earth very tremulous all day. | | | |
| Sept. 14. | 12.05 P.M. | Sharp shock. | | | |
| — 27. | | Slight shock. | | | |
| Oct. 27. | 3.25 P.M. | Sharp shock. | Aneroid 30° 22′; | thermom. | 75° |
| Nov. 26. | 2.30 A.M. | Do. | do. 30° 76′: | do. | 64° |

These observations taken about 50 feet above sea level.

It will be observed that, after the two shocks of the 18th and 20th December, 1867, nothing of any importance occurred until the 5th of July. On this occasion the principal shock was followed by at least forty minor tremblings; and at intervals of about twenty minutes huge rollers broke over the bar, passing far above the usual water-mark. The weather on the 27th October was very unsettled, the wind increasing rapidly, blowing principally from N. to N.E., but very wild and gusty, the horizon closed in by walls of heavy peculiar coloured clouds, the mountains buried in mist. Prior to the earthquake on the 26th of November we had been having a series of heavy N.E. gales, for about ten days; it will be noticed that on this occasion the aneroid is marked at 30° 76′, which is two-tenths higher than I have ever seen it here before. It may be well to observe these data in connection with any earthquakes which may have taken place since September.

Formosa, January 1, 1869. HENRY F. W. HOLT.

## IMPORTANT TEA-BROKING CASE.

AN important tea-broking case was brought before the Court of Aldermen last week. Messrs. Francis Peek, Winch. and Co., tea dealers in Rood-lane, stated that a short time ago Messrs. Ripley Brothers and Andrews, brokers in Mincing-lane, whom they had for some time employed as brokers to purchase tea for them, sent them samples of broken-leaf Congou tea by the ship *Diamond*, which the merchant to whom the tea belonged wished to dispose of in the usual course of business. On February 18 they employed the Messrs. Ripley to buy the tea at certain stated prices, which Mr. Ripley, the senior partner, said were fair, and would at once submit to the merchant. About two hours afterwards Mr. Ripley called upon Mr. Francis Peek and told him that the merchant would not accept the prices offered, but that they could have them at other prices which were named, and which Mr. Peek, on behalf of himself and his partners, agreed to give. During the interview a clerk called and told Mr. Ripley that his partners had sold the tea elsewhere, upon which Mr. Ripley declined to carry out the transaction for Messrs. Peek. Meanwhile, it was alleged, persons in the employ of the Messrs. Ripley had been endeavouring to obtain other offers for the tea, although they were then acting as the brokers of Messrs. Peek in the transaction, and this conduct the Messrs. Peek complained of as altogether inconsistent with the duty of the Messrs. Ripley as sworn brokers of the City of London. The reply of those gentlemen was that, though they had had many transactions with the Messrs. Peek, they had never acted as brokers for them. The course of business in the tea trade, the Messrs. Ripley stated, was for a merchant desirous of selling tea to give instructions to a broker, who thereupon obtained a sample and sent small portions to such dealers in the trade as he might think likely to make offers for the tea. The dealers exercised their own judgment as to what price they would offer for the tea, and they did not consult with or in any way act upon the opinion of the broker, who was employed by and acted for the owner of the tea. As soon as the price had been fixed the broker made an entry of the transaction in his book, and prepared bought and sold notes, and ordinarily the broker received payment from the buyer and paid over the moneys thus received to the merchant, less brokerage at the rate of £1 per cent. The broker also received brokerage from the buyer, at the rate of 10s. per cent. In the instance complained of by the Messrs. Peek, the Messrs. Ripley alleged that they had no interest whatever in the transaction beyond their ordinary brokerage. The Court of Aldermen decided that there were not sufficient grounds for their interference.

BREAKFAST.—EPPS'S COCOA—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.

# Monetary and Commercial.

The subjoined table shows the relative value of our exports to certain British Colonies and Foreign Countries in the East, for the years 1867 and 1868. It will be seen that the figures for Hong Kong and Singapore during the latter year show a decrease, and for Ceylon a slight increase. China shows an immense increase, amounting in fact to an addition of between 30 and 40 per cent. on the preceding year; Japan and all the other countries named show a falling off. In the more comprehensive table from which these extracts are taken, Hong Kong and Singapore rank fourth and fifth among British possessions, the figures against them being only exceeded by those for India, Australia, and Canada. Among Foreign countries, China takes the sixth place, yielding precedence to America, Germany, France, Holland, and Turkey:—

DECLARED VALUE OF EXPORTATIONS.

| | 1867. | 1868. |
|---|---|---|
| British Colonies:— | | |
| Hong Kong ... ... | 2,471,899 | 2,186,100 |
| Singapore ... ... ... | 2,068,910 | 1,513,397 |
| Ceylon ... ... ... | 771,879 | 835,798 |
| Foreign Countries:— | | |
| China ... ... ... | 4,996,469 | 6,312,866 |
| Japan ... ... ... | 1 545.386 | 1,106,069 |
| Manila ... ... ... | 1,042.468 | 955,554 |
| Java, &c. ... ... ... | 1,329,485 | 851,620 |
| Siam ... ... ... | 4,244 | 3,072 |
| Cochin China ... ... | 612 | 431 |

Bills of exchange on the Government of Ceylon [for 250,000 rupees were disposed of on the 8th inst. by tender at the offices of the Crown Agents for the Colonies. The minimum fixed was 1s. 11½d. per rupee, and the whole amount was taken at and above that rate.

At the meeting of the Rotterdam Bank on the 18th ultimo, Mr. F. A. Muller was elected president and Mr. J. Canters and Mr. G. Van der Kors were appointed directors. A commission, consisting of thirty shareholders, was formed to assist the Board of Commissaries in effecting some modifications in the statutes, and any proposals this commission may have to make will be submitted to the shareholders at a general meeting to be held next month. In place of Messrs. Koch and De Monchy, Messrs. Cantzlaan and Van Weel were elected members of the Board of Commissaries, the two former gentlemen declining to retain office on the ground that the new statute by which the practice of re-election is abolished will shortly come in force. The balance sheet and statement of accounts appear in our advertisement columns.

## THE AGRA BANK.

The annual meeting of the proprietors of this bank was held on the 14th inst., Mr. J. Tompson in the chair.

The Chairman, in moving the adoption of the report, said that the duty which devolved upon him on that occasion, although one of pleasure and satisfaction, was not free from anxiety, for whilst it was gratifying on the one hand to speak of profits realised and dividends paid, it was grievous to think of losses sustained and hopes disappointed. He wished he could say that no losses had been sustained during the past year in the working of the bank. They had had some losses, although not to any material amount, which had been mainly incurred upon bills remitted from Calcutta to this country. The drawers and acceptors of those bills at home had both suspended payment, and their estates appeared to promise to yield an unsatisfactory return; and they must, therefore, look mainly to the sale of the securities they held for the payment of the advances made upon them. The total amount of the loss for that account was estimated at about £3,000. They had sustained a further loss, which was estimated at £1,000, by a failure in India, bringing the total loss up to £4,000, which had been written off against profit and loss, leaving no asset in the balance-sheet of a questionable character. If it had not been for those losses they would have been able to carry over to the credit of the B assets, in round numbers, £7,000. The accounts before them had been made up with the anxious desire to make them speak for themselves. Referring to the Agra and Masterman's Bank, he said that large advances had been made to the old establishment by the new bank, in order to pay its creditors and transfer the house property account—that was included in the accounts. The directors were satisfied that the assets to secure those advances were sufficient to secure their due repayment. Otherwise they would have considered it their duty to make a call upon the B shareholders to make up the deficiency. He, however, could assure the B shareholders that it would not be necessary to make any call upon them. In addressing himself to the B scripholders he said no one could lament more than he did that the financial position of their affairs was not more promising than the report and accounts submitted represented them to be. They, however, had the satisfaction of knowing that they would not be called upon to pay another shilling, and if they had not received the £10 per share as was expected, there was every reason to hope that they would before long receive £5. The gigantic losses of the late bank were almost inconceivable, and it had been brought to light that they had been in part occasioned by the unscrupulous operations with the bank's funds by one of its principal managers, and by his negotiations of bills of an objectionable character in order to prop up parties who were not deserving of support. Those transactions occurred without the knowledge of the directors as a body. Before the amalgamation with the firm of Masterman and Co. the bank was in a favourable position, but about that time it seemed to have got round it a very unsatisfactory connection. Messrs. Masterman and Co., in consideration of the transfer of the business and the premises in Nicholas-lane, received an equivalent to £500,000 in money. The premises in Nicholas-lane were entered in the books at the sum of £120,000. The sum of £100,000 was paid to them in cash and the remainder in shares. This payment, he felt, was out of all proportion to the benefits derived, and he was not prepared to say that the bank might not have been prosperous at the present time but for its subsequent management, but their ruin would not have come about had it not been for the amalgamation. He then at some length went into the details of some of the chief accounts under which the old bank had sustained loss, and referring to the capital of the Agra Bank he said three-fourths of it had now been completed, and he had no doubt the whole of it would be taken up.

Mr. J. Stuart seconded the motion, and it was unanimously carried.

The dividend of 9 per cent. recommended by the directors to be paid to the A shareholders, being in full the balance of the preferential dividend due to them for the two years ending 31st December, 1868, was sanctioned to be paid.

The retiring directors, Mr. Tompson and Mr. Stewart, were re-elected, and Mr. Harvey Rankin was elected to fill the vacancy at the board occasioned by the death of Mr. Sclater.

The retiring auditors having been also re-elected,

The meeting resolved itself into a meeting of the Agra and Masterman's Bank, when the report of the shareholders' committee was adopted, and thanks accorded them for their past services.

The accounts as audited having been adopted,

Mr. Nicol moved, "That the committee of shareholders be requested to apply by letter to Messrs. Masterman and Co. to pay the amount of their written guarantee, notwithstanding its legal invalidity."

The resolution was seconded and carried, and a vote thanks to the chairman brought the proceedings to a close.

## FREIGHTS AND CHARTERS.

**We have no change to note in berth freights to the Eastern Ports since our last issue.**

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 45s. weight, 50s. meast. To Hiogo: 60s. weight or meast. To Tientsin: 60s. meast. To Chefoo: 60s. weight or meast. To Newchwang: 55s. meast. To Shanghai: 40s. weight, 30s. meast. To Hong Kong: 40s. weight, 30s. meast. To Manila: 40s. weight, 70s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 25s. weight or meast. To Penang: 40s. weight or meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £42. For Shanghai: £42. For Hong Kong: £32. For Singapore: £25. For Galle: £23. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2 7s. For Shanghai: £2 3s. For Hong Kong: £1 13s. For Singapore: £1 5s. For Galle: £1 5s.

## CASUALTIES.

Advices from Amsterdam, dated April 3, state that 635 bags of coffee and 119 canisters of sugar, damaged, had been sold, ex Henriette Gerardina Susanna, Dam, from Batavia to Rotterdam, which vessel put into Simon's Bay, Jan. 5, leaky.

The Kandanghauer, Zeelt, from Pasaroeang, which vessel arrived at Texel April 3, reported having experienced very bad weather, during which she lost an anchor and chain.

The Continental, Erving, from Cardiff to Yokohama, which was taken into Gibraltar, after being on shore in the Bay, March 15, has been again under survey, and recommended to discharge the remainder of her cargo.

The Auffredy, Guillore, from Saigon to Rotterdam, which lost her anchors, March 20, in Belle Isle Roadstead, put into St. Nazaire, March 28, with damage to rigging, and to replace anchors.

Advices from St. Helena, dated February 20, state that the Caroline Bourhis, from Saigon, which put in there January 28, leaky, was again surveyed, February 25, and ordered to discharge the remainder of her cargo, the leak not having been found; a large quantity of the cargo was damaged, and a portion sold, February 22.

The Susanna Johanna, Heyrick, from Banjoewangie to Rotterdam, put into Mauritius, Feb. 26, for repairs, having encountered very heavy weather in 6 S., 80 E., during which she sprung a leak, and lost bulwarks and sails; 4,000 bags of coffee had been discharged, of which about 1,600 were badly damaged, and 250 had been sold.

The John George, Barrow, of and from Sunderland, to Hong Kong, with coals, put into Harwich, April 9, with damage to starboard bow, having been in collision.

The Estafette, Oepkes, which arrived at Texel, from Batavia, April 7, had sustained some damage.

Advices from St. Helena, dated March 12, state that the Caroline Bourhis, from Saigon, which put in there Jan. 28 leaky, had discharged the whole of her cargo (with the exception of about 600 bags recommended to be thrown overboard), and was being repaired.

Advices from Mauritius, dated March 10, state that the Johannes Antonius, v.d. Straaten, from Batavia to Rotterdam, had put in there to stop a leak and repair damage sustained during a cyclone.

## LAUNCH.

Messrs. Blackwood and Gordon have launched from their building yard, Port Glasgow, an iron clipper, of the following dimensions:—Length between perpendiculars, 170 ft.; breadth, 30 ft. 6 in.; depth, 19 ft.; register, 756 tons. This vessel is classed AA1 at Lloyd's, and twenty years in the Liverpool Underwriters' book. She is also fitted with all the most recent improvements, including steam power for working the pumps and windlass. She was named the Hirondelle. This vessel is the property of Messrs. Mors le Blanch and Co., of Liverpool and Glasgow, and is intended for the East India and China trades.

The *Zemindar*, owned by Messrs. Nicholson and M'Gill, of Liverpool, has arrived in the West India Dock from Shanghai with the largest cargo of tea ever brought to this country by a sailing vessel, being 1,502,260lbs. She had also on board 161 bales of silk.

HOLLOWAY'S PILLS. — HEALTH'S FOUNTAIN.—It cannot surely be necessary to remind any intelligent reader that the purity of the blood determines every invalid's health and vigour. Holloway's Medicine searches out the slightest taint in the vital fluid, and neutralises or expels it, so that the circulation supports the system in place of sowing the seeds of decay. When epidemics are advancing, and disease is steadily on the increase, it behoves every one to have a restorative like these Pills ready to set right any irregularity in stomach, liver, bowels, or kidneys. Holloway's treatment is especially suitable for the young, delicate, and nervous, who are most susceptible of any prevailing sickness, and whom violent measures would endanger little less than the epidemic.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of

STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receive vessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops, an

ENGINEERS' WORKSHOP,

fitted with lathes and tools driven by steam,

AN IRON FOUNDRY

for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz., engineer, blacksmith, and shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in the dock.

Amoy, 16th December, 1867.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

The Bank grants DRAFTS upon and negotiates or collects BILLS at any of its Agencies or Branches; also receives DEPOSITS for fixed periods, at rates varying with the period of deposit.

## HONG KONG AND SHANGHAI BANKING CORPORATION.

NOTICE IS HEREBY GIVEN, that in accordance with a resolution passed at a general meeting of shareholders, held at the head office of the Corporation at Hong Kong, on the 15th day of February last, a CALL was made of 25 dollars per share on the new shares of the Corporation, and will be payable at this office on the 1st day of July next upon all new shares registered in London, at the rate of 4s. 6d. per dollar, being equal to £5 12s. 6d per share.

For the convenience of shareholders, payments will be received in anticipation of the above call, and interest allowed thereon at the current Bank of England rate, until the 1st day of July next.

The remaining unpaid capital will be called up at the following dates, viz.:—1st July, 1870, call of 25 dollars, or £5 12s. 6d. per share; 1st Jan., 1872, call of 25 dollars, or £5 12s. 6d. per share; 1st Jan., 1873, call of 25 dollars, or £5 12s. 6d. per share; and may, either in whole or part, be similarly provided for at the option of the shareholders, interest being allowed in lieu of dividend on such prepayments at the rate of 5 per centum per annum, payable half-yearly until the respective calls become due, when the sums so called up will be admitted to participate in the distribution of dividends.

W. H. VACHER, Manager.

32, Nicholas-lane, Lombard-street, London, April 16, 1869.

## ORIENTAL BANK CORPORATION

Incorporated by Royal Charter, 30th August, 1851.

## NEW MUSIC.

BRAG. Serio-comic Song. Written and Composed by ALFRED SCOTT GATTY.

PUT IT DOWN TO ME. Comic Song. Written and composed by ALFRED SCOTT GATTY.

WHEN THE ROSES BLOW. Song. Written by R. REECE. Composed by G. B. ALLEN.

THE DAYS WERE SWEET IN SUMMER TIME. Song. Written by R. REECE. Composed by G. B ALLEN. Post free for 19 stamps each.

Messrs R. COCKS and Co., New Burlington-street.

We have had occasion to favourably notice Mr. Gatty's comic songs, and the two under notice do not alter our opinion of their character. "Brag" is a comic song of a mild order, but hardly to be ranked as serio-comic. It is all fun. "Put it Down to Me" is more pungent, and broader in tone, but without approaching coarseness. It is sung nightly by the St. George's Hall Christy's, and hardly ever fails to be warmly encored. Both songs are in marked contras, with the music-hall type, and deserve a wide circulation. "When the Roses Blow" is a ballad which has also obtained much favour with the Christy's, and it well merits it. The melody is very taking, and quite equal to any of Mr. Allen's uniformly excellent settings. "The Days were Sweet in Summer Time" is another excellent song, and if it reaches a front place in the thousand and one new compositions before the public it will fully deserve it.

HAMILTON'S MODERN INSTRUCTIONS for the PIANO. 673rd Edition. 70 large folio pages. 4s.—Order of all Musicsellers and Booksellers; and of the Publishers.

CLARKE'S CATECHISM of the RUDIMENTS of MUSIC.—121st Edition. Free by post 13 stamps. "Every child learning music should have this book."—Morning Chronicle.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

## BOMBAY, CALCUTTA, MADRAS, SHANGHAI, AND PORT PHILIP.

GELLATLY, HANKEY, SEWELL and CO. will despatch the following high-classed SHIPS from the East India Docks, as under:—

| Port. | Ship. | Class. | Tons. | To Sail. |
|---|---|---|---|---|
| Bombay..... | Thomas Bell | AA1 | 838 | April 30 |
| Calcutta..... | Calcutta..... | A1 20 yrs. | 1039 | May 5 |
| Do. ..... | Savoir Faire | AA1 | 1396 | May 20 |
| Do. ..... | Clive ..... | A1 13 yrs. | 591 | To follow |
| Madras ..... | Lobella ..... | A1 13 yrs. | 823 | April 17 |
| Do. ..... | John Masterman ... | A1 13 yrs. | 602 | To follow |
| Shanghae ... | Ornate ..... | A1 10 yrs. | 739 | April 25 |
| Do. ..... | Lauderdale . | A1 15 yrs. | 851 | To follow |
| Port Philip . | Zenobia ..... | A1 15 yrs. | 1145 | With des. |

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., No. 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

To sail on the 5th May.

FOR SHANGHAI, the splendid Clipper SHUN LEE. A1, fourteen years, 640 tons register; JOHN JAMES MILBANK, Commander; East India Docks. Has superior accommodation for passengers.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

JOHN C. CAMPBELL will despatch the following splendid first-class VESSELS:—

| Destinatn. | Ships. | Class. | Tns. | Dock. | Date of Sailing. |
|---|---|---|---|---|---|
| Colombo .. | Ocean Rover..... | A1 16 yr. | — | W.I.D. | April 26 |
| Bombay ... | B. Lawn ... | A1 11 yr. | 551 | E.I.D. | Do. |
| Cochin, Calicut, Cannanore, & Mangalore ... | Antipodes . | A1 9 yr.. | — | — | Withdes |

No. 22, Great St. Helen's, E.C.

CHINA & JAPAN.—NORRIS and JOYNER will despatch the undermenentioned first-class Clipper Ships as under:—

| Ports. | Ships. | Class. | Docks | Last Shipping Day. |
|---|---|---|---|---|
| Shanghai ... | John Lidgett | A1 17 yrs. | E.I.D. | April 24 (unless previously full). |
| Tientsin and Chefoo ... | Belle ..... | A1 10 yrs. | W.I.D | With des. |
| Hiogo and Yokohama... | Westbury ... | A1 10 yrs. | E.I.D. | With des. |

For Freight or Passage apply to NORRIS and JOYNER, 60, Cornhill, E.C.

To follow the Passover. Will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful clipper ship OCEAN ROVER, A1 16 years, 548 tons register; WILLIAM HAMMOND, Commander; West India Docks. This splendid high-classed vessel, built in 1867, is considered one of the fastest afloat, and offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Malabar Coast. First season ship. Will meet with the usual quick despatch.

DIRECT for COCHIN, CALICUT, CANNANORE, and MANGALORE, the beautiful clipper ship ANTIPODES, A1 9 years, 420 tons register; J. DUNN, Commander; West India Docks. This splendid vessel offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Mate's receipts must be left before bills of lading can be signed.

L. H. and B. will not be responsible for demurrage on craft sent alongside without their instructions.

With Immediate Despatch.

DIRECT FOR BOMBAY, the well-known clipper BOLDEN LAWN, A1, eleven years; W. HOPPER, Commander; 551 tons register. East India Docks. This splendid vessel (newly coppered), having a large portion of her cargo engaged, offers a first-rate opportunity to shippers of fine goods.

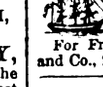
For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Regular line of Packet Ship. To Sail 24th April.

FOR HONG KONG, the well-known favourite clipper, INVINCIBLE, A1 13 years, 657 tons register; CHARLES BEECHING, Commander; West India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship. To follow the Invincible.



FOR HONG KONG, the splendid Clipper RIVER EDEN, AA1, 508 tons register; ROBERT VALDER, Commander; East India Docks.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

## THE CHINA & JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China and Japan. Orders for Furniture, Stores, Books, and Personal Requirements of every description promptly executed, either by Overland Route or Clipper Sailing Vessels. The articles in all cases are carefully selected by persons who have had personal experience of the wants of residents in China and Japan. No commission is charged to Subscribers to the "LONDON AND CHINA EXPRESS" on the execution of Orders for personal requisites. To Non-Subscribers the terms are Two-and-a-Half per cent. on Orders over £50, and Five per cent. on Orders for a less amount. Purchases and Sales of Bank or other Shares, Government Securities, &c., effected at ¼ per cent.

Orders should be accompanied either by a remittance, or a reference for payment in London. All communications to be addressed, and remittances made payable, to

### THE MAILS, &c.

There will be four inward mails this month; the present (delivered two days in advance of its due date); the French mail, with Hong Kong dates to March 30, due on Saturday or Monday next; and the P. and O. mails of April 6 and 20, and due here on the 17th and 31st respectively.

Our latest telegraphic advices from Hong Kong are to April 6, received here on the 26th ult. From Shanghai, telegrams to the 14th April came in *via* Kiachta this morning.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, Per P. and O. steamer *Poonah*, arrived April 29.—From Shanghai: Mr. Love. From Hong Kong: Mr. and Mrs. Krokaviski, Mr. Larquetil, Mr. Carbarcos, Mr. Cerquero, Mr. Wallis, Mr. James. From Singapore: Lieut. Olano and child, Lieut. Altango and child, Mr. Mackenzie, Mr. and Mrs. Martin, two children and servant, Mr. Hunt. From Penang: Mr. Wilson. From Batavia: Col. Coke. From Galle: Mrs. Karslake, Lady Ousely, Mr. Looss.

To Southampton, per P. and O. steamer *Nyanza*, expected to arrive May 7.—List not to hand.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Delta*, from Southampton, May 1.—To Hong Kong: Mr. W. A. Whyte, Mr. A. Falconer. To Ceylon: Lieut.-Col. and Mrs. Drewe.

Per P. and O. steamer *Poonah*, from Marseilles, May 9.—To Shanghai: Mr. B. Powell Seare, Mr. E. J. Hogg. To Hong Kong: Mr. H. D. Williams, Mr. W. T. Lay, Mr. and Mrs. E. Hitchcock. To Singapore: Mr. and Mrs. J. Campbell, Miss Hamilton, Mrs. Lessler and two children. To Ceylon: Mr. and Mrs. G. Vane and child, Miss Vane, Miss Lee, Mr. C. Roberts.

Per P. and O. steamer from Suez, May 16.—To Ceylon: Mr. W. H. Anderson.

Per P. and O. steamer *Pera*, from Southampton, May 15.—To Yokohama: Mr. F. L. Pollard. To Hong Kong: Mr. George Collingwood, Mr. G. A. K. Honey. To Ceylon: Major-Gen. and Mrs. Renny, Capt. Chichester.

Per P. and O. steamer *Ceylon*, from Marseilles, May 23.—To Ceylon: Sir Hercules Robinson, Lady Robinson, two children, and two Misses Robinson.

Per P. and O. steamer *Delta*, from Marseilles, June 4.—To Shanghai: Mr. Brodie.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Our advices from this port extend to the 10th March. The English mail of Jan. 1 arrived out on the 24th February. The latest telegraphic news from London was to Feb. 3, received *via* New York and San Francisco, from which port the P. M. S. S. *Japan* arrived on the 4th March. The news by the present mail is meagre. The *Japan Times* says:—

We have positively no political news whatever to note on this occasion except the completion of the transfer of the *Stonewall*. Mr. Lowder has reached his post at Nee-e-gata, but remains there a Consul without any "nationals," and, as the weather is severe at this season and the coast dangerous, is likely to remain so for some time to come.

From Hiogo and Osaka we have no news of any importance. We are sorry to have to report the death of Mr. A. C. Phelps, agent for the P. M. S. S. Company, at Hiogo. He died suddenly, after a few hours' illness only, on the 5th instant. At Hakodadi everything remains as when we last wrote. Our local newspapers have had, therefore, to fill their columns with reports and comments on matters of merely local interest. Chief among these has been the sanitary state of the Settlement, which is now very unsatisfactory. Typhoid fever has broken out among us, and some deaths have occurred. At this season of the year some form of epidemic fever is generally prevalent in Japan, and the natives suffer dreadfully, all sanitary precautions being quite neglected. Hitherto, Foreigners have escaped almost unscathed, but this year our total neglect of the streets of the Settlement, the want of drainage, and imperfect scavengering are beginning to tell. The ground is saturated with decayed animal and vegetable matter, the wells are poisoned, and typhoid fever is the result. A meeting was held on the 6th inst. to promote the establishment of a sufficient hospital, the temporary accommodation having been destroyed by fire last November, and about 1,700 dollars were subscribed on the spot for the purpose. One speaker very properly demanded a postponement of the discussion until it was ascertained what our Japanese landlords were willing to do towards fulfilling their engagements to drain the Settlement, and proposed hiring premises instead of building, until we could ascertain what amount of accommodation was required; but a "funk" had been established, and Mr. Hughes found no one to second his sensible proposal.

H.M. *Ocean* has gone down to Hiogo for a change. The movement has no political object. H.M. *Pearl* has arrived from Hong Kong, and the *Icarus* from Hiogo. The former had very bad weather coming up, losing a boat and some sails. The season is, indeed, remarked to be an unusually stormy one.

#### OSAKA AND HIOGO.

The steamer *Sunrise* has been sold to the Mikado's Government for 55,000 dols. She is to be made, so we hear, a sort of tender for the new lighthouse service.

The steamer *Fe-loong* has been sold by Messrs. Adrian and Co. to the Prince of Simabara for Rios 60,000—equal to about 69,500 dollars.

A smart shock of an earthquake has been felt at Hiogo. Lamps and doors swung to and fro, beams and windows creaked, and a rush for the street was made by several timid, or rather we should say cautious, individuals.

Mr. James J. Enslie has taken charge of H.B.M.'s Vice-Consulate at Hiogo.

A large fire was raging in Simonoseki when the *Fe-loong* passed that city on the morning of March 19. From the direction and the force of the wind it was feared that the whole of the city would be destroyed.

Digitized by Google

From the *Hiogo Herald* we learn that theForeign population at Osaka now numbers forty, besides a floating populaiton of nearly a score.

A free fight has occurred at Osaka, between some coolies and the members of Mr. Spahn's hong. The latter used his own coolies in transporting goods, in preference to outsiders. A collision occurred between the two parties. Mr. Spahn came to the rescue. The coolies collected reinforcements, and came to the attack, but were again beaten off. They then went to a temple for weapons; but by this time assistance was got, and some of them were arrested. Residents there and at Hiogo are growling as vigorously as at Shanghai, about the registration tax.

Messrs. Alt and Co., of Nagasaki, announce that they have opened a branch of their firm at Osaka and Hiogo, where they are represented by Mr. W. Mourilyan. The business previously carried on by Mr. Mourilyan at Hiogo is now merged in that of Messrs. Alt and Co.

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, March 16, 1869.

The P. and O. steamer *Ganges* arrived on the 5th inst. with the English mail of January 15, and telegrams to the 5th February. On the 11th the M. I. steamer *Phase* brought in the French mail of January 23, and telegrams to the 11th February. By the *New York* on the 14th we received the 5th February mail from San Francisco, but the telegraphic news had all been anticipated. Finally, the private steamer *Suwonada*, which arrived in Shanghai yesterday, brought on telegrams to the 18th February, which are now our latest advices.

The *Ganges*, which leaves this to-morrow morning at daylight, carries 446 bales China and 39 bales Japan.

The P. M. S. Company will commence to-morrow their fortnightly service between China and the Japan ports.

On the 4th inst. the steamers *Szechuen* and *Yuentsze-fei* arrived in port, being the first steamers from the North. I hear that the S. S. N. Company have fixed the freight from Shanghai to Tientsin for the present at Tls. 4 per ton.

The new tea-clipper *Thermopylæ* came in on the 12th, after a passage of twenty-eight days from Newcastle, N.S.W., to Wosung. Her run from London to Melbourne (fifty-nine days) is the quickest on record. She may, therefore, be expected to prove a formidable competitor to the *Leander*, which is now the favourite here for the ocean race.

The ship *Everest* from Liverpool went on shore on Yangtsze Cape on the 7th inst., and as soon as she was reported a tugboat with lighters was despatched to her assistance. On the 9th she floated off without damage, and on the 11th she arrived safely in port.

H.M.S. *Salamis*, with Admiral Keppel on board, left on the 9th for the Yangtsze. Messrs. Michie and Francis, who are delegated by the Chamber of Commerce, and Mr. Swinhoe, appointed by Sir Rutherford Alcock, have gone up in her for the purpose of exploring the Poyang Lake, and the great river as far as Chungking in Szechuen, a distance of 720 miles from Hankow. The gunboat *Opossum* will be placed at Mr. Swinhoe's disposal, and the little steamer *Faust* has been lent by Messrs. Jardine, Matheson and Co. for the use of the Chamber of Commerce representatives.

Much difficulty has been experienced in obtaining gentlemen willing to serve on the Municipal Council for the ensuing year, and it was at one time resolved to postpone the election until the meeting of land renters in April. However, on the 13th the following notification was issued:—

ELECTION OF COUNCILLORS FOR THE MUNICIPALITY OF SHANGHAI.
Take Notice.

No. 146.—That whereas the number of persons nominated for the office of Municipal Councillors is the same as the number to be elected, the following persons are hereby declared elected Municipal Councillors for the year 1869-70:—

Frederick E. Adams, 4, Hankow-road, merchant.
R. Beckwith Baker, 2, Kiukiang-road, banker.
Edward Cunningham, 5, Yangtze-road, merchant.
M. S. Gubbay, 16, Yangtze-road, merchant.
Heinrich Hoppius, 19, Yangtze-road, merchant.
John Irwin Miller, 6, Hankow-road, merchant.
Mathew Tyson Yates, French Settlement, merchant.

Dated, Council Room, No. 15, Honan-road, Shanghai, this 13th day of March, A.D. 1869. ALEX. JOHNSTON, Secretary, M.C.

I mentioned some weeks ago that the crowds of beggars in the English Settlement had become so serious a nuisance that, after due notice, the Council transported them by boatloads to Pootung. Soon after their landing thefts and robberies in the villages on that side became so frequent that the local mandarins collected the beggars again and shipped them back to us. The streets are now almost as impassable as ever

The system of chain-gang labour, adopted for some months with the happiest effect on the morals of natives in foreign employ, was abolished a while ago by the Council in consequence of its expense. Yesterday, however, after some arrangement with the native officials and Consuls, it was again put in force.

The event of the fortnight has been a murderous assault made by a party of villagers at Pootung upon a number of foreigners. The case has been investigated by the Chinese magistrate, the English Consul, and the English assessor of the Mixed Court. Several arrests were made by the water police under Superintendant Penfold's direction, but very little beyond the fact of the attack has yet been elicited. The case is fully reported in the daily papers, and I therefore need merely tell you that a Mr. Grant was severely wounded, and tied hand and foot, one of his arms being broken in the *melée*, a Mr. Gamwell was badly cut on the head, and three others were more or less slightly injured. The Foreigners maintain that they were walking quietly along the bank of the river at dusk, on the evening of the 7th inst., and gave no provocation whatever, when Mr. Grant, having stayed behind for a few moments to find a bridge over a little creek, was set upon by a crowd of Chinese, armed with bamboos, hoes, &c. The others, hearing the row, returned, and would probably have been overpowered, but for the landing of a body of water police, and the arrival of a party of sailors from the naval yard. Some of the Chinese, on the contrary, say that the Foreigners were drunk, and chased two natives into a house, the door of which they broke in. Other native witnesses accuse the Foreigners of assaulting some women who were worshipping in a temple. It is worthy of remark that nothing whatever was broken in the village, and that the house which it was said the Foreigners broke into remains quite intact. So the matter remains at present. The investigation will be renewed to-morrow. It is supposed that the villagers took this opportunity of revenging injuries thoughtlessly inflicted by sportsmen during the shooting season, but that there was no immediate provocation.

A meeting of shareholders in the Shanghai Steamship Navigation Company was held on the 6th inst. The report has been published, but probably the best notion of the importance of the company's operations will be obtained from considering that in the working account there appears an amount of Tls. 49,000, representing a return of five per cent. to shippers on gross freights for the year 1868. But as these returns to shippers commenced only in October, it follows that the company's gross annual freight cannot fall far short of four millions of taels. The amount at credit of profit and loss account was Tls. 165,635, of which Tls. 112,500, being a dividend of six per cent. for six months, was ordered to be paid to the shareholders.

The Registration "squeeze" is now creating much ill feeling, a Mr. Tootal having suffered himself to be summoned for the amount, and permitting a distress warrant for the fee, with fine, costs, &c., to be executed in his house. The matter is a very paltry one, but it is annoying, and the feeling of the community is now in favour of subscribing to appeal a case to the Privy Council.

Five men suspected of being implicated in the robbery on board the Russian barque *Amur*, at Chefoo, last January, are now in custody. Three claimed American protection, but two of these subsequently turned out to be Scotchmen. The four British subjects have been committed for trial on the evidence of the American.

The Shanghai papers record the arrival at that port of the new clipper-ship *Thermopylæ*, which has made one of the most wonderful passages on record. She left the London Docks on November 6th, 1868, parted with her pilot on the 8th, and arrived in Shanghai on March 12th, that is, making a passage *via* Melbourne and Newcastle in 124 days, including 30 days in port. The passage to Melbourne in 59 days is the fastest on record. On seven different days of passage she made over 300 miles, and on one did as much as 336 miles, or 14 knots an hour.

Chinese rumour has it that Ting, Futai of this province, is dead, but as yet there is no confirmation of the report. It is certain that Ting has recently fallen out of the good graces of the Peking Court, probably in consequence of Tseng Kuo-fan's influence at the capital. Tseng and Ting are now bitter enemies, in consequence of Ting having, immediately after his accession to office, forwarded large sums to Peking, Tsen and Li Hung-chang having previously been in the constant habit of reporting the impossibility of squeezing any money out of the impoverished province. Ting has applied for permission to repair to Peking, and obtain an audience of the Emperor. This step shows that he considers his case desperate, for the term of his sojourn at the capital will be pretty well filled up by determined attempts upon his purse, which will probably leave him nearly destitute before he can escape.

The new church is nearly completed, and the question of pew allotment is now engaging attention. Several proposals have been made with a view to solve the difficulty; among the rest, auction, ballot, allotment by a committee, separation into classes at different rents, and finally, perfect fredeom, the support of the Church being made dependent on voluntary contributions to the weekly plate. But that there is no unwillingness to devote money to Church purposes has just been proved by the promptitude wherewith the debt on the Seamen's Church at Pootung has been paid off. Appeals were issued, and the money was subscribed in about a fortnight.

A capital race meeting is promised for this spring, a large number of presentation cups being already on the list. The Race Club held its annual meeting on the 3rd inst., but did nothing save adjourn to the 6th. On the latter day it was decided to raise the minimum weight for ponies of 12 hands from 9 st. to 9 st. 7 lbs.,

Digitized by Google

with an increase of 3 lbs. for every additional inch, the standard height for ponies being made 13 hands 3 inches.

The Philharmonic Society gave a most successful concert on the evening of the 4th inst.

The council of the North China branch of the Royal Asiatic Society have issued a circular, calling for subscriptions to defray the expenses of their recent purchase of the Wylie collection of books, and proposing to open a public library under the trusteeship of the council *pro tem.* Failing the council, it is proposed to vest the library property in the Consuls of Great Britain, France, America, and Prussia, and the Commissioner of Customs.

The Temperance Society have opened their series of lectures with one on "Reading," by Dr. Jamieson. The Rev. E. W. Syle, the Rev. Canon Butcher, and Dr. Macgowan, are to follow.

On the 5th inst. the Amateur Dramatic Club gave their thirteenth performance. The entertainment commenced with the broad farce, "Found in a Four-wheeler," followed by the translation of "Ruy Blas" which first introduced Mr. Fechter to a London audience. The papers are loud in praise of the company; but there is a somewhat absurd tendency to compare the merits of our local amateurs with those of the professionals of the London stage.

It is stated that a statue of the late Admiral Protet is expected to arrive shortly from France, and that the question of locality, whether in the French Consular grounds or in front of the Municipal Hall, is the only one awaiting settlement.

The insufficiency of tea-leads has recently been painfully brought before us by correspondence from your side. It is little wonder that there should be complaints when the mode of manufacture is considered. Two boards covered with leather are used, the lower being fixed upon a block of wood on the floor and the upper being detached. The workman has a small charcoal fire by his side, over which the lead is melted. He places his foot upon the upper board, raises it with his left hand, and taking a ladle full of the melted metal, pours it between the two services, shutting the boards together as sufficient lead is inserted. It is evident that the least air bubble or irregularity in the metal will, in this operation, leave a hole in the sheet; and further, that as the lead cools sufficiently to become solid almost as soon as it is poured between the boards, the shutting of the upper one like the lid of a box upon the semi-fluid metal will produce a wavy structure with cracks in places, which prevent the finished "lead" being impervious to moisture, if there is not sufficient thickness to counteract these defects.

The *Recorder* gives further particulars regarding the murder of the Catholic missionary in Szechuen, reported by last mail:—

"Two missionaries, it seems, were stationed in the town and held their services in a house between the Chihien's and the Tartar Commander's Yamens. Their teaching had given umbrage to a wealthy individual of the gentry class, who, apparently unable to get up a disturbance in the town, or perhaps fearing to raise the people, hired a mob of peasants from the country round. These entered the town, assembled in front of the house where one of the missionaries was performing service, attacked it, and forced an entrance. The missionary being at the altar they seized him, deliberately cut off his hands and feet, and then beheaded him. His companion, who was fortunately absent at the time, hearing of the event, fled in disguise, and so escaped. As at Yangchow, the officials entrusted with the good government of the city took no steps to prevent the outrage being carried on actually under their eyes."

Among the arrivals by the French mail are Senor de Quevedo, the new Spanish Minister at Peking, and Mr. Dabry, who will replace M. Brenier de Montmorand in the French Consulate General of Shanghai.

A war between sinologues on the question of translation into Chinese is now being waged, one party condemning the plan of rendering foreign scientific books into a "Eurasian jargon," the other as stoutly maintaing that it is only by translating Newton's "Principia" and such like into Chinese that science can be taught. I need hardly tell you that the general public take little interest in the matter. The people, competent and incompetent, that are employed make a very good thing out of it, and they would, of course, bitterly regret any change in the existing system.

From Kiukiang we hear of the murder of a Protestant missionary named Johnson, on the 14th October last, by the people of a village forty *li* from Joo-ning-fu, in the south east of Honan, No particulars have transpired, the mere fact having been learned by the Catholic Mission at Kiukiang. News of the death of Dr. Lethbridge, of that port, has arrived to-day.

Li Hung-chang, the new Governor-General of the Two Hu, arrived at Hankow, *en route* for Wuchang, on the 26th February. At the annual meeting of Hankow land renters the only business of importance transacted was the carrying of the following resolutions:—

"That wharfage dues be abolished, and that a tax called import and export dues be levied in their place; that merchants having their places of business on and adjoining the Concession pay the above dues, irrespective of the goods having entered their godowns, and that the assessment list on present scale be made up from the books of the Custom-house.

"That in view of the income not having equalled the expenditure of last year, H.B.M.'s Consul, with such aid as he may desire, be requested to assess the amount of taxes which ought to be paid for the past year by those who have their places of business on the Concession, and who have not paid a just proportion of wharfage dues.

"That the House and Land Tax be collected on the same basis as last year."

The Hankow Chamber of Commerce has communicated to the Shanghai Chamber a very valuable paper of notes compiled by a recent traveller in Szechuen, having reference to the cities of Chungking, Yoh-chew, Shahsi, J-chang, Suchew and Kiating. This paper has been published in all the local journals.

The only item of interest from Tientsin is an account of a visit paid to the foreign settlement by some of the eunuchs of the Imperial Palace. These gentlemen were very liberal with their money, having, as an example, given 500 dols. for a Geneva watch. The Mahomedan rebels, about 400 miles from Peking, are in their chronic condition of turbulence. Eleven spies were recently discovered in Peking, where they had bought and sent off no less than 5,000 saddles. They were sentenced to death without delay, and chopped into small pieces.

The Ningpo Book Club is continuing its series of lectures, the last having been delivered by Dr. McCartee, who gave a very comprehensive sketch of his experiences in China since the year 1844.

## HANKOW.

The following is a copy of the Memorial of the Hankow Chamber of Commerce on the subject of "subsidiary" ports:—

Hankow General Chamber of Commerce,
Hankow, Jan. 26, 1869.

SIR,—I beg to acknowledge the receipt of your despatch No. 1, of the 4th inst., enclosing copy of one from H.M. Minister, addressed to H.M. Consul at Amoy, having reference to the opening of "subsidiary ports."

The subject was under discussion before the meeting of members called for that purpose on the 18th instant, and it was resolved that the Chamber should recommend the opening of the city of Chungking, in Szechuen, to foreign trade. The great commercial importance of this large city has been amply testified by all the explorers who have recently visited it.

With the limited information possessed by the Chamber, however, it would be presumptive and indiscreet to offer any decided opinion on the merits and advantages of the other several ports on the Upper Yantsze, and it was decided that the committee should wait on you, for the purpose of requesting you to recommend a special Government survey of the Yangtsze from Hankow to Chungking, to inquire into the trade and the anchorages, &c., &c., of each place on the route, and also of the Tungting Lake, with the view of ascertaining the practicability of access for foreign vessels to the large mart of Siangtam, in Oonam.

Should it be determined to open Chungking, other places in the route thereto will naturally suggest themselves as important calling stations, such as are now meditated on the Lower Yangtsze.

Commending the suggestion of this Chamber of Commerce to your favourable consideration.—I have the honour to be Sir, your obedient servant, Signed, JOHN A. HANDY, Secretary.

G. W. Caine, Esq., H.B.M. Consul, Hankow.

## FOOCHOW.

COPY OF CHAMBER OF COMMERCE DESPATCH ADDRESSED TO THE BRITISH, AMERICAN, FRENCH, AND RUSSIAN CONSULS, JAN. 29, 1869.

For some time past, but more especially during the Tea Season just brought to a close, it has frequently happened that Teas have been sold to Foreigners by Chinese from chest musters purporting to represent certain chops in the country already packed, and in course of transmission to this port. On the arrival of the Teas, however, they have proved in numerous cases to be very different, and invariably inferior, to the musters from which they were originally bought.

Very great difficulty is usually experienced in adjusting these cases, and, as they have been of so frequent occurrence of late, it was unanimously decided at a general meeting of this Chamber that the matter should be brought to your notice and that of the other Treaty Consuls, in the hope that you might collectively, and in conjunction with the Chinese authorities, be able to take steps towards remedying the abuse.

The chief evil resulting from this is, that the buyer can seldom obtain an adequate allowance for the inferiority; the Chinese usually insisting that the purchase should be cancelled, and the Teas given back. This method is obviously unfair to the foreign buyer, as, having bought the Tea on the good faith that the bulk should turn out satisfactorily, he will necessarily have passed over other chops procurable at the same time, and which would have suited his purpose equally well, and in case of having bought for a special order, he may have lost his opportunity of acting under it. Further, should the market have advanced in the meantime, the seller will have a still greater inducement to decline a satisfactory adjustment.

The most reasonable course to follow in such cases is, in the opinion of the Chamber, that, failing a satisfactory settlement of any dispute with the seller, the matter shall be referred to two competent Tea Inspectors (and an umpire if necessary), one to be chosen by the buyer, and one by the seller, the finding of such arbitration to be accepted by both parties. Should the quality of the Tea prove wholly unsuited for the purpose for which it was bought, and the buyer not be in a position to supply its place on equally good terms, the arbitrators shall have the power of making any award as compensation which in their opinion they may consider fair and reasonable.

Should these proposals meet with the approval and support of the Treaty Consuls and Chinese authorities, the Tea trade at this port will be placed on a much more satisfactory footing than has hitherto been the case.

## AMOY.

The residents at this port have sent in a Memorial giving their views on the propriety of opening "subsidiary" ports, of which the following is a copy :—

SIR,—We have much pleasure in responding to your request that we should give you our views regarding certain questions contained in H.E. Sir Rutherford Alcock's despatch to you, dated Peking, 11th of December, a copy of which you have circulated for our information. These questions are four in number, viz. :—

1. Are more ports required for British trade at present on the coast of China?
2. What do you mean by subsidiary ports in our Memorial of the 18th of October, 1867?
3. What ports do we propose should be opened as subsidiary?
4. How do we propose they should be worked without consular and customs establishments?

After due deliberation we beg now to lay before you the following answers :—

1. This question concerns the whole mercantile interests on the coast of China, and we are scarcely prepared to put forward an opinion upon it further than as concerns our own immediate neighbourhood. We are distinctly of opinion that unless the whole coast of China is opened to Foreign trade, there is no port between this and Foochow, on the one hand, and Swatow on the other, of sufficient importance to call for its being opened as a regular treaty port. We have already advocated the opening of the port of Wanchew, and we adhere to what we stated in our Memorial on the subject. We gave to your predecessor statistics of the trade that was done with Wanchew before the opening of the Custom-house here; these were unavoidably very incomplete, but they proved that a considerable business has been done, and we do not doubt that were Wanchew opened as a treaty port, the trade would revive and vastly increase. It is but fair to state, however, that probably the mercantile communities at Foochow and Ningpo would be equally able to judge of the desirability of opening Wanchew, and we think the opinions of those communities on this point ought to have as much consideration as ours.

2. By subsidiary ports we mean all ports which are not already open to Foreign trade, and which can be supervised by the existing consular and customs establishments, with the exception of those which, by reason of their importance, offer such advantages to general trade as would warrant the expense of additional Consular and Custom-house, as well as mercantile establishments.

3. In answering the third question, we confine ourselves to the vicinity of our own port, and we are of opinion that all ports, whether accessible by vessels of light or heavy draught, from Tong Sau inclusive on the south, and Huig Uha inclusive on the north, should be opened to Foreign trade to and from Amoy; and also all inland waters accessible from the coast between these two ports.

4. We conceive that subsidiary ports could be worked without Consular or Customs establishments with as little chance of smuggling as there is under the present coast trade system, were rules such as the following strictly enforced :—

1. To attach these subsidiary ports to the nearest treaty port, and give the Consular and Custom-house authorities jurisdiction over them.
2. The Custom-house to have an efficient steam revenue cruiser for each treaty port and its dependencies.
3. To have a rigorous system of bonds and penalties through which the slightest deviation from the rules, if any intention to defraud the revenue could be proved, would be severely punished, and disentitle the persons and vessels who break the rules to continue in the trade.
4. To prohibit any cargo from being taken to or brought from the dependencies except through the treaty port to which they are attached.
5. To stipulate that the vessels in the trade with the dependencies must be owned in the treaty port to which they are attached, and that no person shall proceed to any of the dependencies without giving security to the Consul, and obtaining special permit from him, countersigned by the native authorities.

These rules, together with such other as could easily be framed by the Inspector-general of Customs, would, we imagine, enable the trade to go on satisfactorily.

It appears, however, to be almost needless for us to enlarge upon this subject, as H.E. Sir Rutherford Alcock states in his despatch that the Chinese Government will not voluntarily consent to open any port without stipulating for the residence of Consular agents, and without themselves placing a Customs establishment at each place, and if this be the case the matter is at an end.

His Excellency in the paragraph immediately following states that the advantages sought by subsidiary ports are likely to be conceded to some extent in another manner. On looking over the paragraph it seems to us that the contemplated concession is restricted to the inland waters, and the vessels to be used must not be propelled by steam. This right we have already under the existing treaty if the trade under transit certificates could be properly carried out. His Excellency however considers that the concession, if ultimately agreed upon, "would enable merchants settled at any treaty port to trade directly with all the places along the coast, or up the rivers in the vicinity of their own ports, and in boats of their own, which they can build large or small, according to the ascertained requirements of such local trade."

This is very much what we asked for in our Memorial, but it appears to us that there is a want of distinctness about the contemplated concession which we would be glad to see removed, in order that there may be no possible cavilling about its clear meaning, as there has been about trading into the interior under transit certificates; and we should also be glad to see the clause framed so as to allow Foreigners to make use of native as well as foreign-owned vessels belonging to the treaty ports, and to include steamers. There is also another thing necessary to make this clause of practical use. Many of the large inland cities in the neighbourhood of this port—and doubtless the same applies to other ports—though accessible by water in boats of very small draught to within a very short distance, are not accessible by water the whole way, and there are others to which the water communication is not direct, that is, goods leaving the treaty port, after going some distance up one river have to be carried a few miles overland and reshipped on another river. To prevent extortion it would therefore be necessary so to frame this clause that goods should be exempt from imposts during their overland transit as much as during their transit by water, and that the coolie hire for carrying such goods should not exceed the customary tariff of the locality.

We earnestly trust that his Excellency will push the matter to a satisfactory conclusion.—We are, Sir, your obedient servants,

(SIGNED BY THE BRITISH RESIDENTS.)

Amoy, Feb. 8, 1869.

## SWATOW.

The following communication from one of the leading Firms in Swatow contains some valuable information regarding the origin and probable results of the stirring events that have recently taken place in the vicinity of this Port :—

SWATOW, Feb. 25, 1869..

From the Hong Kong papers you are doubtless aware of all the circumstances attending the attack with firearms on the boats of H.M. gunboat *Cockchafer*—out for exercise in this neighbourhood, under the command of Lieutenant Kerr—and of the subsequent measures for redress adopted by Commodore Jones, and as such account is very correct we need not refer to it here; but we may add—

That for many years we had been expecting a climax such as this to the disregard for and contempt of Foreigners exhibited on many previous occasions by the villages of this neighbourhood, and which was either apathetically overlooked or but partially and unsatisfactorily curbed. And to the Chinese authorities—who, when the port was first opened to foreign trade, instigated that class of Chinese known as literati to imbue the various villages with anti-Foreign sentiments—may be laid all the petty annoyances and outrages that have since occurred, culminating in what, but for the courage displayed by Lieutenant Kerr and his men, might have been the murder of some twenty of our countrymen.

The chastisement now inflicted by Commodore Jones on the offending villages, which from their position considered themselves beyond the reach of punishment, will prove most beneficial in its effects, and being tempered by leniency and clemency it merits not only the approbation of all Foreigners here, but has also its supporters among the mercantile classes of the Chinese, to whom these villages have been a constant source of terror by their feuds and "black mail," and who have long deprecated the action of the authorities and literati in instilling prejudices, though powerless to oppose it of themselves.

The able manner in which Mr. Consul Alabaster has smoothed the way of negotiations, and concluded what remained to be done after the display of force, deserves the highest commendation, and will, we hope, be favourably noticed by the Foreign-office—his quiet determination, combined with a sagacious knowledge of the motives which rule the Chinese in their dealings, possessed by but few in an equal manner, having resulted, as we but lately experienced, in a complete change in the attitude before adopted by the villagers; while the Chinese authorities, no longer able to conceal the true state of matters, find in performing their duty to Foreigners their own power established on a firmer basis.

Just as the anti-Foreign sentiment is readily fomented, so it is as easily allayed among the ignorant people who inhabit the villages of this neighbourhood, whose knowledge of events is confined to a radius of perhaps twenty miles, who are perfectly indifferent to what occurs elsewhere, and we have but little doubt that, with the wholesome lesson now taught them, time will unveil no more such tragedies as were enacted on the boats' crews of the *Cockchafer*. But we must, nevertheless, advocate a constant watch on the actions of the Chinese authorities, a class notoriously corrupt and unscrupulous, who never hesitate to advance deliberate falsehood as a cloak for their own ends, who willingly shield themselves by the sacrifice of the innocent when it so suits them, and who have pecuniary reasons to bewail the advent of Foreigners, accompanied as they are by the foreign collectors of Customs. Hence, if they are able to inflame the populace against Foreigners, and, with a show of regret which they are far from feeling, advance this sentiment to the British authorities as a potent reason for closing certain ports and marts for trade, the chances are they obtain a hearing in high quarters, their statements are believed and respected, and Foreigners are enjoined to deal kindly with a prejudice which in reality, or at least originally, did not exist, but which is fomented by the authorities as long as they can, till the irresistible march of time, pregnant with new inventions, ideas, and progress, either causes the overthrow of the barriers that had been raised, or, as in the recent course of events here, arrogance at length, with long impunity, reaches a point which brings with it its own downfall.

Such are our views regarding the recent occurrences here and what will be their probable result; but there are a few other points on which we should wish to touch; viz. :—

1st. The difficulty experienced here and elsewhere in enforcing just claims on Chinese subjects :—

Digitized by Google

If a Foreigner owe money to a Chinaman his remedy is simple, for he has only to go to the Consulate, lodge his claim, and, if established, payment is forthwith ordered and enforced. But reverse the case, and let the Chinaman owe money to the Foreigner. He also states his claim to the Consul, who forthwith forwards it to the proper Chinese authority, and this official at once promises action. A runner, or policeman, is despatched to the delinquent, who, like his employer, being susceptible of bribery, ascertains how much they are likely to be gainers by the side they espouse, and having received his fee, makes his report accordingly. The Consul is meanwhile informed that measures are being taken to enforce payment; but in the course of time, as the Foreigner hears from unofficial sources that nothing is being done in the matter, he ventures again to request consular interference, with probably the same result; and unless the Consul be very energetic we have known many cases protracted for years, till at length, from very weariness, they are either dismissed or compounded. Governed as China is at present by corrupt officials, the reference of such matters to Peking is simply additional delay, and the only remedy that occurs to us is—

That if, after close investigation, the Consul finds such claims just and reasonable, and that they fail to be met owing to the negligence of the Chinese authorities within a reasonable time, it shall then be competent for him to stop the amount of the claims out of the Maritime duties collected at the port.

An order such as this would, we think, soon become a "dead letter," as the officials connected with the duties having to make good any such amounts subtracted, would quickly find measures to reimburse themselves, and probably take care not to incur in future any such responsibilities.

2nd. The disadvantages a Port incurs as soon as it is "opened," by which term of course the right of Foreigners to trade there is meant—The advent of foreign trade must now be marked by the collection of duties under Foreign superintendence, and the tariff dates are supposed to be substituted for what were before in force. As pressing equally on all, there at first sight appears no great hardship in this; but its effect is gradually to direct the trade to other neighbouring ports through which there may be access, even though difficult, with the consuming districts, and in which the officials still collect duties on a different and lighter scale; while, not having to account so rigidly to the Imperial Government for these, they do all in their power to foster the trade, which is thus gradually being absorbed from the open Ports.

Debarred from the same source of revenue at the open Ports, where the tariff duty is collected and accounted for to the Imperial Treasury, the local authorities devise measures to make up for the deficiency in their treasury by a tax called Lekim, too well-known now to require any description, which adds to the tendency of trade to withdraw to other places where such imposts are unknown; and the Foreign merchant who may have bought land and built warehouses finds that he is the possessor of a gradually depreciating property as the trade of the place dies away, and consequently falls into other and pettier hands.

Assuming that the collection of duties under Foreign superintendence is now a necessity of the times and of the Chinese Government, the remedy for this is to be found only in the Custom-house itself, which should be compelled to see that the same tariff prevails throughout the coast and is enforced by an effective coast-guard service. Were such protective measures taken in earnest there would be little advantage gained in opening other than perhaps one or two more ports; but otherwise we must advocate throwing open the whole coast of China, which attended, as it must be, by the establishment of the Foreign Custom House at each place as it developed itself, would probably be more expensive to the Chinese Government than a few efficient steamers under intelligent commanders.

3rd. Our last observation is perhaps premature; but as we have the disadvantages just enumerated, and support the Chinese Government by the faithful collection of maritime duties with a mixed service of Foreign and Chinese officials, it may be a matter for consideration whether a similar executive, civil, and military service would not, by administering justice without partiality or venality, attain the ends we have in view, and open up the country more efficaciously than any edict promulgated from Peking.

## HONG KONG.

From this port we have advices to the 23rd March. The outward mail of Jan. 29 arrived on March 12.

A correspondent writes:—Capt. George E. Lane, who has been in command of the Pacific Mail Company's steamer *Japan*, has been appointed by the directors to take charge of the Hong Kong agency, and this arrangement was effected on the 15th March. Mr. Bowman, the late agent, proceeds to Shanghai to open a special agency, in place of Messrs. Russell and Co. The company's steamers still cause much dissatisfaction by their long passages. The last steamer left San Francisco on Feb. 4, and arrived here on the 13th March, say thirty-seven days, while it is often done by sailing vessels in thirty-five to forty. Some change in the working of the line must be devised to reduce the time to twenty-five or twenty-six days. The narrative of the journey from Liverpool to Yokohama by this line, announced to appear in the next number of *The London and China Express*, is looked forward to with interest.

The *China Mail* expresses surprise that no official intimation has been published of the intended visit of the Duke of Edinburgh to that colony, although in the Singapore papers there appears a despatch to Governor Ord, announcing the *Galatea's* visit to the Straits Settlements.

Judgment has been given by the Chief-Justice in Regina *v.* Saint, for defendant, with costs of all the proceedings. It fills seven columns in the *China Mail*, so cannot be reproduced here in its entirety. It is, however, in all respects favourable to the proprietor of the *China Mail*, and shows that he has been most unjustly prosecuted. The decision has given great satisfaction in all quarters.

The *Mail* says:—"We hear that the steam yacht which was launched the other day for Government use in this harbour is to be disposed of. The new Ministry at home seem to be enemies to needless expenditure."

The prisoners accused of the murder of the late Mr. Holworthy have been committed for trial.

### CHAMBER OF COMMERCE MEETING.

The meeting of those interested in the opening of additional ports in China, called by the Committee of the Chamber of Commerce, was held on the 11th March. This meeting, it had been notified, was called for the purpose of discussing the draft letter proposed to be sent by the Committee to Consul Robertson, in reply to a despatch from Sir Rutherford Alcock, British Minister at Peking. Mr. Bryans, Chairman of the Chamber, was in the chair: and there were present:—Hon. J. B. Taylor, Messrs. Duncanson, Rowette, Pyke, Helland, Kresser, Delbanco, Macaulay, Olmstead, G. Heard, R. S. Walker, Crighton, Zimmern, Joost, Arnhold, Linstead, Belilios, C. D. Williams, H. Davis, W. M. Morgan, Chas. Morgan, Sandilands, Moss, Degenaer, Francis, and others.

There was a long discussion as to the extent to which the recommendations or requirements of the Chamber should go, but the results will be sufficient for our readers, and these are of course shown, in the letter itself, which (as ultimately adopted) reads as follows:—

Hong Kong General Chamber of Commerce, March 1869.

Sir,—1. In reply to your communication of the 12th January last, receipt of which I had the honour to acknowledge on the 23rd idem, covering despatch from his Excellency Sir Rutherford Alcock to Her Majesty's Consul Pedder, of Amoy, in which his Excellency invites an expression of opinion from the mercantile communities of China upon certain points of great importance likely to be raised in the revision of the Treaty of Tientsin, I have, on behalf of this Chamber, to express satisfaction that a subject of so much importance as the opening up of the country of China to foreign enterprise is likely so soon to be brought under discussion.

2. The system of subsidiary ports, as referred to by the Amoy memorialists, this Chamber thinks one which, if established upon a satisfactory basis, would be of considerable benefit to foreign trade.

3. His Excellency states that it is in contemplation to open to foreign boats or vessels not propelled by steam all inland waters within the limits of any Customs' district.

4. While hailing with pleasure any step likely to increase the facilities of direct intercourse with the inland marts of China, the Chamber cannot but express its disappointment and dissatisfaction that the means of communication is to be limited to boats *not* propelled by steam; such a limitation must nullify, in its opinion, to a great extent, the development of trade and the security to the same, which the conveyance of goods in vessels propelled by steam would afford.

5. The Chamber would particularly urge that steamers should be allowed to ply on the West Coast, including Hainan, as far as the Gulf of Tonquin; on the West River; on the river above Canton, and also the Eastern branch of the Canton River, for purposes of foreign trade.

6. The opening of subsidiary ports on the River Yangtze is a step which the Chamber cannot impress too strongly upon the attention of his Excellency, but as this subject has been so fully entered upon in the reply of the Shanghai Chamber of Commerce, of 1st February, to his Excellency's despatch, and as their knowledge of the requirements of trade in that great artery of China, from their juxta-position to it, must necessarily be much greater than that of the residents in the South of China, this Chamber merely ventures to give a general expression of its opinion as to the desirability of such a measure being adopted to the *fullest* extent possible, without entering into details.

7. With regard to the question of opening more ports on the coast, this Chamber would strongly recommend that those named by his Excellency should be opened to foreign trade, and while expressing this opinion, would not wish his Excellency to infer that the Chamber desires to limit the number of ports that should be opened to those specified in his Excellency's despatch, but would record it as its opinion that all ports which from the magnitude of their trade claim any pretensions to first class trading ports, should be thrown open to foreign enterprise.

8. The Chamber would specially call attention to the port of Kiungchow (Hainan), which, although provided for in the Treaty of Tientsin, of 26th June, 1858, has since remained to all practical purposes a closed port, owing to the almost prohibitory regulation imposed by the Maritime Customs, requiring that vessels bound to that port shall obtain their clearance at the port of Canton, under pain of confiscation. The Chamber feels convinced that a growing and important trade with this colony has been crushed by the restrictions above referred to.

9. The Chamber advocates the opening of more coast ports, without restriction, on general grounds, feeling assured that the more points at which Foreigners and Chinese come into direct commercial contact the cheaper will cotton manufactures and other merchandise be obtained by the consumers, and the larger will the consumption of such imports be. The same would be the inevitable results in regard to exports from the ports which may be opened.

10. In addition to the benefits which would accrue to the importers of Foreign goods, and the producers on this side—in short, the merchants,

Digitized by Google

both Foreign and Chinese—shipowners, and the Chinese Customs Revenue, could not fail to be also largely benefited.

11. This Chamber would respectfully point out that it would not be necessary to incur the expenses of full Consular establishments on the opening of such ports, as agents could doubtless be chosen from the merchants who would settle at such places, and who, under the supervision of the nearest British Consul would be able to attend to all necessary business.

12. Intimately connected with the opening of new Ports is the system of Transit Dues, now conducted, this Chamber unhesitatingly asserts, upon the most unsatisfactory footing; and the Chamber cannot too strongly impress upon his Excellency the necessity of a radical change in the manner of levying such.

13. The boon intended to be secured to trade by Rule 7, appended to the Treaty of Tientsin, has, the Chamber need hardly point out, become null and void, by the heavy exactions made upon Imports in their transit from the Treaty ports to the places of consumption, and upon Exports in their transit from the districts of production to the port of shipment; and as a means towards the suppression of said illegal taxes, the Chamber would advocate strongly the opening *freely* of Inland marts to Foreign merchants, and the development of inland communication.

14. To secure the greater freedom of transit of goods into and from the interior the Chamber would strongly advocate the introduction of railways, and that permission should be granted to navigate the inland waters of China by steamers.

15. The Chamber is convinced that these are two of the most important concessions that ought to be insisted upon in the revision of the Treaty, and that the removal of the restriction put upon the navigation of the inland waters by steamers, and the introduction of railways, would be productive of inestimable advantage to Foreigners and Chinese generally, and do more to break up the present system of unreasonable imposts upon goods in transit than any compact which may be entered into with a weak and crippled Government, such as that of China.—I have the honour to be, Sir, your most obedient servant, W. J. BRYANS, Chairman.

D. B. Robertson, Esq., C.B., H.B.M.'s Consul, Canton.

# Commercial Report.

## STRAITS, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—Since the close of the New Year holidays a little business had been done, and prices had in some instances improved; but the aspect of the market was still far from encouraging. In Yarns and Grey Shirtings business had been done, and the market closed firm. There was some inquiry for best qualities of Black Velvets only; the Chamber of Commerce had taken Assorted out of their list. A small business had been done in T. R. Cloth and Victoria Lawns; other fancy cottons not asked for. All Woollen goods quite stagnant; prices for Camlets nominal, with nothing doing. Metals generally dull, except Hoop Iron. Quotations:—Cotton Yarn: Nos. 16-24, per picul, $46 to 47; 28–32, $48 to 49. Grey Shirtings, 7 lbs., per piece, $2.50 to 2.60.; 8-4 to 8-8 lbs., $2.80 to 2.87½; White Shirtings, $2.80 to 3.60. T-Cloths, $1.70 to 2.20.; Camlets, S, per piece, $14 50 to 15; SS, $13.50 to 14; Long Ells, $8 to 9.50; Cloth, Broad, per yard, $1.50 to 2; Blankets, per lb., $0.50 to 0.55; Iron, nail rod, per picul, $3.40 to 3.70; hoop, $3.10 to 3.40; bars, $3.30 to 3.60; pig, $1.05 to 1.15; wire, $6.50 to 7; Lead, $7.50 to 8; Tin, $17 to 18; Tin plates, $6.75 to 7.

SHANGHAI.—Cottons: A large business in Plain Cotton Goods had been transacted. Foreign speculators had operated to a considerable extent, having in many instances made their purchases from native dealers. Importers generally were firm holders. The bulk of the stock of Cotton Goods was in the hands of Foreigners. Grey Shirtings had been sold at prices ranging from Tls. 2.1.9 to 2.2.5 for 8¼ lbs.; Tls. 1.9.5 to 2.0.0 for 7 lbs.; and Tls. 3.0.0 to 3.2.0 for 9 10-12 lbs., but at the close quotations were rather higher for the two former weights. Heavy Shirtings had been in good inquiry. T-Cloths had been in request, and advanced rates had been obtained. White Shirtings were in demand, and higher prices than those ruling last mail were offered for all qualities. Drills: American and English had not met with much attention. Fancy Cottons: A very small business had taken place in these, but inquiry was better, and prices firmer for most kinds. Woollens and Worsteds: These goods were dull of sale, and quotations show but little alteration. Camlets were only in little inquiry. Metals: Nail Rod Iron—Considerable sales of good assortments had taken place at rather higher rates. Demand was good, and stocks were much reduced. Bars scarce, and firmly held for prices which the trade declined to pay. Hence there are no transactions reported. Lead may be quoted at last mail's rates, with a little more desire on the part of holders to sell. Shipments of River and Coast had been large, being 8,818 piculs during the month, or something in excess of the import. Coals: The market remained inactive, and sales had been effected in small quantities only. The arrivals had been:—From Great Britain, 1,031 tons; Australia, 1,030 tons; Japan, 552 tons; in all, 2,613 tons. The current quotations at the departure of the mail were as follows:—Grey Shirtings, 7 lbs., per piece, Tls. 1.9.8 to 2.0.2; 8.4 to 8.6 lbs., Tls. 2.2.0 to 2.2.7. White Shirtings, Tls. 2.2.0 to 3.1.0. T-Cloths, 6 lbs., Tls. 1.4.0 to 1.8.0; 7 lbs., Tls. 1.6.5 to 2.1.0; 8 to 8.4 lbs., Tls. 2.0.5 to 2.5.5; Camlets, English, S.S., Tls. 12.5.0 to 12.7.5. Spanish Stripes, per yard, Tls. 0.5.8 to 0.8.0. Medium Broad and Habit Cloths, Tls. 0.9.0 to 1.6.0. Iron, nail rod, small size, per picul, Tls. 2.2.0 to 2.3.0; Fair to good Assorted, Tls. 2.4.0 to 2.5.5; Hoop, Tls. 1.8.0 to 1.9.0; Flat and Round, Tls. 2.5.5 to 2.7.0; Lead, Tls. 5.9.0 to 6.3.0; Tin Plates, per box, Tls. 4.3.0 to 4.8.0; Steel, per tub, Tls. 8.5.0 to 8.6.0. Coals (cargo quotations afloat), Cardiff, per ton, Tls. 10 to 10.5; North. Wales, Tls. 9.5. to 10; English, Tls. 9 to 9.5.; Anthracite, Tls. 10 to 10.5.

HANKOW.—A large business in Cotton Goods at somewhat higher prices had been transacted, and Woollens had met with rather more attention. Plain Cottons: Considerable sales had been made of 8¼ lbs. Grey Shirtings at Tls. 2.1.6. to 2.2.3., and 7 lbs. and heavy makes have been in good inquiry at an advance of one mace per piece on former rates. Closing quotations: Tls. 1.9.4. to 1.9.6. for 7 lbs., Tls. 2.1.6 to 2.2.2. for 8¼ lbs., and Tls. 2.8.5. to 3.0.8. for 9 10-12 lbs. T-Cloths: In better request, and rates slightly higher. White Shirtings had improved, and an advance of 5 candereens per piece was established. Drills: In no demand. Fancy Cotton Goods: In moderate inquiry, and prices steady. Woollens and Worsteds: Camlets continued in demand at previous quotations, and large sales were reported. Long Ells: Scarlet higher, and assortments in better favour. Figure Lustres: Quotations are rather better, but little had been done in these goods.

FOOCHOW—The transactions during the interval had consisted of 360 piculs. Lead at $9.50 per picul, and 120 pieces Camlets at $17 per piece.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated 22nd March:—Cotton Yarn.—Transactions have been on an increased scale, but some slight concessions have been made in prices of Nos. 16 to 24, stocks being very large. A sale of 600 bales Nos. 28 to 32 was made to one buyers—Chinese—at $131 to 135, delivery in three months, and this has given tone to the market for the higher numbers, which are now slightly dearer. Piece Goods: Grey Shirtings have been taken to a moderate extent only, but 7 lb. to 8.4 lb. and 9.12 lb. to 10 lb. goods are very firmly held, while 8.8 lb. to 9.8 lb. are quoted 5 cents lower, former values being considered relatively higher than those of other weights. 6 lb. to 7 lb. T-Cloths have been dealt in to a fair extent at improved prices, sales of the latter weight embracing 5,000 pieces of superior quality, but 8 lb. to 10 lb. are somewhat lower. Within the past few days a sale of 32,000 pieces 8 lb. is reported to have been made at $2.63 to 2.75, and though there is no doubt that this quantity of goods has changed hands, the terms of the sale are by no means certain. White Shirtings are still wanted, and 54 to 66 reed command still higher values. White Brocades and White Spots have advanced with them, and Turkey Reds have been in some request for Japan at an advance of 10 cents per picul. Most of the lately arrived parcels of American Drills have been forwarded to Shanghai, and the small parcels remaining of Drills and Sheetings are not on offer. English Drills are again dearer, but Dutch have been selling on easier terms. In addition to the sales of the latter on the spot, some 2,500 pieces have been sold to a foreign House, "to arrive" at $4.95 per piece. These English and Dutch imitations of American Drills are interfering with the sale of the latter on this market, the imitators placing on them the same marks as the American goods bear. Woollens: The market is very dull, and Long Ells, Spanish Stripes, and Blankets have declined in value. Purple Long Ells could be sold at $9.30 to $9.50, but Importers are unwilling to break their assortments. Lastings, Crapes and Camlets are unchanged in value, but the latter only are in any request, and importers have been willing sellers. Dark blue are much wanted, and some 500 pieces have been re-sold by Chinese at $15.50 to 15.75. Metals: Nail rod, Bar, and Hoop Iron have recovered a portion of the decline last noted. Wire is again lower. Steel without material change. Lead was very dull during the first half of the interval, and sales were made at figures under our quotations, but there has been more inquiry in the past few days, and the market closes firm. Tin is weak. Tin Plates lower. Small sales of Quicksilver have been made at higher rates. Coals: The arrivals have been 650 tons West Hartley, and 680 tons Sydney, the latter to consumers. No sales have transpired. Ginseng: Dealers being in want of supplies, and unable to bring about any decline from former rates, have re-entered the market, and a good business has been done at fully previous prices. Sales amount to 24 barrels Crude at $116¼, 74 casks do. at $122, and 20 packages superior root at prices ranging from $140 to 270 per picul. Holders are very firm.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—The market had been in an inactive state during the fortnight: a few small transactions, chiefly of medium grades, had taken place. The causes assigned in our last report, viz., smallness of stocks and firmness of holders, continued to affect the market, prices continued high, no concession having been obtained. Settlements were estimated at about 500 piculs, all for America. The John Norman and Brilliant, for New York, have sailed with 762,772 lbs., making the export to 9th March, nearly two-and-a-half million pounds over that at the same time last year. The J. Godfrey, for New York, was the only vessel loading. Quotations:—Common, $19 to 23 per picul; good common, $24 to 25; medium, $26 to 28; good medium, $29 to 32; fine, $34 to 37; finest $38 to 39; choice, $40 to 42.

SHANGHAI.—Black: Only one chop had been settled since last mail. Teamen were still firm, and rates had not fallen. Settlements for the fortnight, 300 chests; Reshipments on owners' account, nil; stock, 11 chops, or 3,680 chests. Quotations (duty paid, exchange for credits, 6 months' sight, at 6s. 0¾d. per tael, and freight at £3 10s. per ton) were for Ningchow 1s. 1¼d. per lb. Green: Some buyers, attracted by the decline in prices noticed in our last, entered the market during the early part of the fortnight, and a large business had been done for both England and America. As stocks were much reduced, this had given Teamen confidence, and they now held for, and had in most instances obtained, rather higher rates. Settlements: 16,420 half-chests Moyune and Teenkai, at Tls. 27 to 42; 2,616 half-chests Fychow, at Tls. 23¾ to 34; and 3,527 half-chests Shanghai-packed, at Tls. 23 to 30. Settlements for the fortnight, 22,563 half-chests; re-shipments on owners' account, 187 half-chests; stock, 62 chops, or 33,380 half-chests. Quotations (exchange, &c., as above) were as follows:—Gunpowder, 1s. 6d. to 3s. 7d.; Imperial, 1s. 2d. to 2s. 10d.; Young Hyson, 11½d. to 3s. 2d.; Hyson, 1s. 1½d. to 3s. 8d.; Twankay 8½d. to 1s. 6d. per lb.

HANKOW AND KIUKIANG.—No business had transpired during the interval.

FOOCHOW.—The business of the interval had been confined to the purchase of 500 chests Congous at previous rates. The arrivals had been 270 chests.

### SILK.

YOKOHAMA.—The business of the interval had not reached 50 bales. The owners of Silk had for the most part remained away, and silkmen were so little induced to meet buyers by a reduction, that the greater proportion of the stock was not offered for sale. Arrivals had been 150 bales, making the entire stock 850 bales. The quotations were quite ominal.

Digitized by Google

SHANGHAI.—The following is from Messrs. C. J. Skeggs and Co.'s Circular:—Business has continued to be very moderate and dragging throughout the fortnight, settlements, including shipments on native account, being only estimated at from 500 to 600 bales. Chop Silks may be placed 5 taels lower by the purchase of a few "Dragons" at Tls. 560, Donkeys at Tls. 550, and Blue Flags at Tls. 500, the latter being rather common for chop; Medium and Common sorts have not followed this decline, last mail's prices being maintained, whilst exchange has advanced; Re-reels have been sold at easier rates; Trams at Tls. 500 to 510; and some Common Organzines at Tls. 530.

## ARRIVALS.

At YOKOHAMA.—From London, March 5, Jeddo; from Cardiff, 8, Alexandra.

At SHANGHAI.—From London, March 8, Chinaman; 12, Weymss Castle; from Penarth, 8, Minden; from Liverpool, 10, Everest.

At HONG KONG and CANTON.—From London, March 21, Falcon; from Falmouth, 16, Ceres, Magdalena; from Bremen, 18, Johanna Smidt; from Touron, 16, Albatross; from New York, 11, Old Dominion.

At MANILA.—From Liverpool, March 12, Rosa de Turia; from Cardiff, 13, Cavalier.

At SINGAPORE.—From London, March 26, Belle of Southesk; from Liverpool, 18, Ribbleton; from Cardiff, 16, Insulaire; 17, Andreas; 21, Rusoer, Lizzy; 22, Queen of India; 29, Eastham; from Swansea, 16, Esperance; from Sunderland, 20, Ottercaps; 25, Foxglove; from Shields, 20, Attila; from Rotterdam, 27, Van der Palm; from Bordeaux, 28, Amiral Protet; from Milford, 21, Chaturanga; from Newport, Kanagawa; April 7, Agamemnon (str.), reported by telegram.

## DEPARTURES.

From YOKOHAMA.—For New York, Feb. 28, John Norman; for Boston, Brilliant; for Callao, 6, Brewster.

From FOOCHOW.—For Boston, March 3, Gabalva.

From HONG KONG and CANTON.—For London, March 14, United Service (str.)

From MANILA.—For London, March 5, Sarah Scott; for Liverpool, 4, Estrella; 13, Olano; for Cadiz, 10, Ercilla; for Cork, 4, Channel Queen; for Boston, Mutlah; for New York, 9, Harriot Erving, Agra; 13, Golden Fleece.

From SINGAPORE.—For London, March 28, United Service (str.); for Hamburgh, 29, Madagascar; for New York; 22, Sydpolen.

From PENANG.—For London, March 19, Vanguard; 23, Ulva; 26, for Falmouth, Ilmari.

## VESSELS LOADING.

At YOKOHAMA.—For London, Chrysolite; for New York, J. Godfrey.

At SHANGHAI.—For London, Undine, Everest; for New York, none.

At FOOCHOW.—For New York, Surprise.

At AMOY.—For New York, Rebecca, Benefactor.

At HONG KONG and CANTON.—For London, Amur.

At MANILA.—For London, The Sir Jamsetjee Family, Sir Henry Havelock, Solent; for Falmouth, Cissy; for Havana, Flora; for New York, Agnes, Bengal, Mindoro.

At SINGAPORE.—For London, Belle of Southesk, Queen of India; for Liverpool, Ribbleton; for Boston, Dunmore; for New York, Chaturanga.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, per sailing vessel, £4 per ton of 50 cubic feet; to New York, £2 15s. to £3 per ton of 40 feet.

At SHANGHAI.—To London, £3 10s.; to New York, £3.

At MANILA.—The Sir Jamsetjee Family takes some 14,000 quintals tobacco at £4 10s. per 50 cubic feet, to London. The Sir Henry Havelock (Brit.), takes a full cargo of coffee to London, at £4 per ton of 20 cwt.

At SINGAPORE.—To London, £2 15s. dead weight, £3 light freight; to Liverpool, £3 dead weight, and £3 5s. light cargo.

## SHIPPING POSTSCRIPT.

—o—

ARRIVALS NOT IN THE TABLES.—April 7, at St. Nazaire, from Saigon, Plata; 30, off Portland, from Bankok, Arica.

DEPARTURES.—From Rotterdam, for Java, Hoek van Holland; from Hamburg, for Hong Kong, Maria Louisa Antoinette; 24, from Newcastle, for Sourabaya, Oceanus; 27, from Penarth, for Singapore, Ravenscliff.

LAID ON.—At London, for Yokohama, Rockliff; at Liverpool, for Shanghai, Mikado.

SPOKEN.—Pegasus (of Liverpool), London to Shanghai, April 24, 50 N., 7 W.; Aurelia (Dutch barque), Batavia to Rotterdam, Feb. 18, 25 S., 54 E.; Culloden (ship), Bangkok to Falmouth, March 24, 2 N., 23 W.; Jerfalcon (of Greenock), Glasgow to Penang, March 20, on the line, 22 W.

CASUALTIES.—Advices from Antwerp, dated April 29, state that the North American, Mitchell, from Batavia, to Rotterdam, which was beached at Belem, March 13, discharged and floated, had been condemned at Lisbon.

## LATEST TELEGRAMS.

—o—

(RECEIVED VIA GALLE, APRIL 26.)

### CHINA.

SHANGHAI, March 31.—Advices from Peking state that Sir Rutherford Alcock has entirely repudiated the assertion of Mr. Burlinghame to the effect that the Chinese desire progress. Sir Rutherford is about to proceed on a tour of exploration in the province of Sechuen, with a view to collecting information for the use of the treaty revisers. It is reported that some Catholic missionaries and several hundred native converts have recently been murdered in the province of Sechuen.

A second telegram says:—A despatch from Sir R. Alcock to the British Consul at this port, has been published on the subject of the introduction of railways and telegraphs into China. Sir Rutherford says that, notwithstanding the promises made by the Burlinghame Mission to Europe and America, the Central Government at Peking shows no desire for progress according to Western ideas and desires, but, on the contrary, will not yield to the introduction of any such projects except under pressure and coercion.

HONG KONG, April 5.—The death of General Brunker has been confirmed. Consul Swinhoe has been recalled on account of his proceedings in Formosa.

### COMMERCIAL.

SHANGHAI, March 31.—Grey shirtings, 6½ catties, 8¼lb., 2.28 tls. Cotton, Shanghai, 15¼tls. Silk firm. No. 3 tsatlee, 570 tls. Silk settlements since departure of last mail, 560 bales. Export to date, China and Japan, from commencement of season, 62,500 bales. Exchange on London—Bank bills, six months, 6s. 0½d. Freights—tea, £4.

HONG KONG, April 5.—Grey shirtings, 6½ catties, 8¼lb., $2 85c. Water twist, 16-24, $1 25c. Cotton, Bengal, fair medium, $17. Tea nothing doing. Total export, China and Japan, 138,000,000lb. Exchange on London—Bank bills, six months, 4s. 6d.

### RECEIVED APRIL 27.

### JAVA.

GALLE, APRIL 21.—Contradictory private advices have been received from Java reporting the outbreak of a general insurrection twelve miles from Batavia. Some Europeans are said to have been killed.

The Batavian newspapers have been prohibited from publishing particulars of the outbreak.

## BIRTHS, MARRIAGES, AND DEATHS.

—o—

### BIRTHS.

BOYD—On the 18th April, at Largo, Fifeshire, the wife of F. D. Boyd, Esq., merchant, Amoy, China, of a daughter.

FOBES—On the 5th March, at Shanghai, the wife of Mr. A. S. Fobes, of a daughter.

JÖRSS—On the 24th April, at Westfield Chapel, Allerton, near Leeds, the wife of H. F. Jörss, Esq., of a son.

WOOD—On the 9th April, at Barnsbury, North London, the wife of Joseph Leach Wood, Esq., of a son.

### MARRIAGES.

DUNCAN—LEAVESLEY.—On the 13th March, at the Union Church, Hong Kong, by the Rev. D. B. Morris, Mr. Robert Duncan, Superintendent of Aberdeen Docks, to Rose Hannah, daughter of Mr. Thos. Leavesley, late of Coventry. No cards.

JOHNSTON—CAZALY.—On the 16th March, at St. John's Cathedral, Hong Kong, by the Rev. Canon Beach, M.A., W. Cunningham Johnston, Esq., of Amoy, to Emily Alicia, youngest daughter of William Cazaly, Esq., London. No cards,

NEUFFERT—WEEKS.—On the 15th April, at St. James's, West End, by the Rev. Dr. Hatherell, Auguste Adolphe Heinrick Neuffert, Esq., of Edinburgh, to Emma, eldest daughter of John Weeks, Esq., Commander P. and O. Co.'s service, R.N.R., of Glen Lea, West End, near Southampton. No cards.

### DEATHS.

MORRISON—On the 6th March, at Jaffna, Ceylon, in her 25th year, Lizzie Constance, the beloved wife of Charles Morrison, of the Oriental Bank Corporation.

HALL—On the 12th March, at Shanghai, Mr. Hall, of the *Fen Wan. Shan* Force.

KOFOD—On the 11th March, at Hongque, Margaret, the beloved wife of Captain Charles E. Kofod, only daughter of the late Captain Trannack, of the Imperial Chinese Service, aged 28.

MCPHERSON—On the 1st March, at Yokohama, Captain McPherson, of the British ship *Chrysolite*, of typhoid fever.

MOSCROP—On the 12th March, at Shanghai, Mr. Henry Moscrop, of the P. and O. Company's steamer *Ottawa*, aged 29.

ORD—On the 13th March, at sea, on board the *Candia*, on his passage from Madras to Calcutta, Augustus W. Ord, Esq., formerly of Manchester.

RENNELL—On the 8th March, at Shanghai, Lydia Wallace, the wife of Thornton B. Rennell, Esq., Harbour-master.

WILLIAMSON—On the 12th April, at Bridge of Allan, Alexander Williamson, Captain P. and O. Company, son of the late Benjamin Williamson, M.D., Aberdeen, aged 39. Friends will please accept of this intimation.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.

*LONDON, SATURDAY, MAY* 1, 1869.

## THE TRUE SOURCE OF CHINESE HOSTILITY TO FOREIGNERS.

IN two articles, published in December last, devoted to the "Yangchow outrage," *The Times* stated with great emphasis that such attacks entirely originate in excess of zeal and want of discretion on the part of the missionaries, who are described as being ignorant of, or indifferent to, the modes of thought of the people whom they try to convert; as habitually assailing in the public streets the dearest convictions of the Chinese, and thereby rousing "furious antagonism" against themselves and their doctrines, which ever and anon boils over in the form of popular demonstrations, of which the sacking of the missionaries' houses at Yangchow, and the outrages committed on their persons are cited as examples.

Now, no picture could be more untrue than this. The Chinese are a remarkably utilitarian, unfanatical race; their irreligion, indeed, is a constant subject of reproach against them by propagandists of all creeds. Their "dearest convictions" have reference to comfort or wealth, and even their mythological systems are scarcely addressed to any less material instincts. The sacredness which they attach to their religious beliefs may be illustrated by an example taken from their New Year ceremonies. At the close of the year the kitchen god, represented by a rude picture on paper, is rolled up and burnt, and so despatched to the Celestial to make his report on the doings of the family during the year. The interrogatories that are addressed to him by the gods are—first, if the family have done evil? and, secondly, if they have done well? That he may give favourable answers to these questions, the family, before despatching him, feed him on candy and then on fruit. The candy makes his lips stick together, so that in answer to the first question he can only say "mg," which means "no;" but when it comes to the second the lips are free again, and the recollection of the last dish prompts him to say "fruit," which happens to mean "yes" in Chinese. That is a fair specimen of their so-called religious observancies. No one imagines that a practical people like the Chinese can attach any real importance to the belief in such a system of mere trickery. The ancient childish customs are perhaps thought innocent, if not amusing; they at all events afford opportunities for feasting and gaiety, but have no more to do with the "dearest convictions" than has the practice of throwing a pinch of salt over one's left shoulder when the salt-cellar has been upset. The worship of ancestors, again, which has been held up to so much admiration as the fundamental religion of the Chinese, amounts to little more than a bribing, by means of offerings of clothes and money, of the spirit of the dead not to molest the living. It is not veneration for the departed that prompts these observances, but a utilitarian idea of buying off their malevolent influences.

There are races of men who have convictions that are dear to them, and who are capable of being roused to frenzy by opposition to their beliefs; but the character of the Chinese is the antithesis of this. Persons in Europe can scarcely conceive such indifference to religion of any kind as is exhibited by these people. The four great systems which exist among the Chinese, so far from exciting furious mutual antagonism, live together in perfect harmony. Nay, more, the same individual is frequently an adherent of at least three out of the four. Confucianism, Taouism, Bhuddism, and Mahommedanism are held to be each good in its kind. If it can be imagined that the people of England could be reduced to a state of colourless latitudinarianism, in which no sense of incongruity would prevent them from owning a common allegiance to Dr. MANNING and Mr. SPURGEON, to the Comtists and the Ritualists, then some parallel would be found for the condition of the people of China. But in such a case it would be manifestly absurd to suppose that the preaching of one more doctrine among such a people would be received otherwise than with philosophical indifference.

It is true that the Chinese, in an argumentative mood, assert that their own systems contain all that is necessary to morality and religion; but they have also for the most part or until quite recently tried to believe that all knowledge is wrapped up in their old classics. And the teaching of the doctrines of electricity and the power of steam excites an opposition much the same, in kind, as that which the missionaries meet with in preaching Christianity. In fact, there is not, nor has there ever been, any feeling of antagonism to Foreigners, whether in the capacity of merchants or missionaries, on the part of the Chinese people. Every outburst of popular feeling that has occurred has been instigated by the ruling powers—at least the fact of such instigation has been proved in so many cases that we are warranted in assuming it in all instances of which we are imperfectly informed. The most formidable antipathy to Foreigners that ever has been experienced was that of Canton and the famous ninety-six villages; and the feeling was carefully nursed for many years by the high authorities of the province. Even there, however, the populations became civil and friendly the moment the power of the mandarins was suspended by the Anglo-French occupation of the city, thus showing that the people themselves bore no hatred to Foreigners, and were only made use of by the authorities to terrify the strangers from seeking to penetrate into the country. At Swatow also, where the inhabitants have earned a reputation for turbulance and for active dislike to Foreigners, it has been found that when they are left to themselves they are perfectly friendly to Europeans of all classes. Mr. Consul ALABASTER states that it was only when intending visitors to the city of Chao-chao-fu gave notice to the authorities that they were mobbed and insulted, and that when they made their way thither without such notice the people were found remarkably well disposed. The same experience is testified to by every traveller in China, and it is an old maxim with such that there is never any trouble if only you keep clear of the mandarins. Whatever conflict of opinion, therefore, may be found between the missionaries and the Chinese, it has never developed into personal hostility, and is never likely to do so.

Nor is it at all surprising that the Chinese people should be favourably disposed towards foreigners. Nothing can gratify any commercial community so much as the opportunity of cultivating relations with another commercial community. Englishmen and Americans are pre-eminently and of necessity commercial, and if in the passion for the interchange of commodities they are excelled by any other people in the world, it is by the Chinese. Trade is the ruling principle of the Celestials, in a greater degree even than of any European races. When the Foreigner shows himself in the distant interior he is eagerly asked, above all things, what he has to sell. Every labourer and domestic servant is a merchant in embryo. Their great ambition is to save a few dollars from their wages to open a shop. To whatever part of the country the master may travel the servant is certain to have scraped some capital together to enable him to carry, stowed amongst the baggage, the products of his native place for sale at a distance, and to bring home other commodities in return. In one province hats are good and cheap; in another shoes, or silks, and so forth. The remarkable circumstance is that the poorest and least educated amongst Chinese are conversant with the usages of trade, and the values of all kinds of goods, in all manner of places. The Foreigner is often astonished to see the menial who has been for years blacking his boots, and standing behind his chair, suddenly develop into an accomplished merchant, knowing in all the technicalities of his craft, and as impervious to the assaults of fraud as if he were to the manner born. But, indeed, they are born merchants. The universal trading instinct and almost intuitive faculty of acquiring commercial knowledge which we see among the Chinese is scarcely equalled in the world. HODGE in the furrowed field and JEAMES in the pantry are fit to discuss

Digitized by Google

financial prospects with ROTHSCHILD as soon as they have exchanged their cotton garments for the silken textures conventional to men of commerce. If, therefore, we had no practical experience of the Chinese people, we should infer from their character that they would receive strangers with open arms, if their visits were for purposes of trade. With an engrossing passion for buying and selling, a person with whom to deal must always be a desideratum. What conveys more pleasure to the shopman than a constant relay of customers? But while we might with certainty have predicated of the Chinese that they would receive foreign merchants with tokens of welcome, we are not left to a mere deduction, for the fact itself has been proved a thousand times. From every corner of the Empire concurrent testimony has been furnished that the people of China, when left to themselves, receive foreign visitors with demonstrations of friendship, and the truth of this testimony is not in the least affected by occasional rudenesses which have been experienced at the hands of unpaid, ill-disciplined, and mutinous soldiery. And it may further be admitted, without invalidating the general statement, that certain class interests may be opposed to foreign intercourse where the special is antagonistic to the general welfare. As for example, if an individual or a class enjoyed a monopoly, say in salt, that class would naturally oppose foreign or any other competition in that particular article. But, on the broadest view of the subject, the people as a whole would welcome all foreign traders to every town and market in the Empire. The Chinese are intelligent enough to see that the *foci* of foreign trade have outstripped all other centres of wealth and prosperity in the country, and they would only be too glad to see similar ameliorations effected in the inland cities. It ought not to be necessary to repeat such common-places as these, but unfortunately the truths which they contain are constantly forgotten, at least practically so; and when we hear rumours of Foreign traders being prohibited from going where their presence is "inimical," it is time to point out that, so far as the mass of the people is concerned, such places do not exist in China.

Yet there is, in another quarter, a hatred to Foreigners, an opposition to increased intercourse, and a strong desire even to curtail that already established. The governing class in China resists the influx of Foreigners into the country, not so much from ignorance of their character and their purposes as from a perfectly intelligible dread of progress and change. The vast amount of trouble the Government have taken to stop further intercourse proves how much they have the matter at heart. First of all they have sent Mr. BURLINGHAME with his "associate envoys," inspired after the manner of the prophets of AHAB, to persuade the European Governments. The objects of that mission are but thinly disguised. Two subordinates from the Peking Foreign-office, with Mr. BURLINGHAME as their mouth-piece—all three bearing the title of envoys, but none of them probably possessing the authority which the title implies—are despatched to Europe to watch and report, to use what influence they may acquire in staving off the question of extended intercourse, and in making the impending revision of the Treaties as restrictive and retrogressive as possible. If Mr. BURLINGHAME or his associate envoys were tempted to go beyond this, and commit the Chinese Government to any engagement, his or their acts would be as conveniently repudiated, at the proper time, as was the creation of the Lay-Osborn fleet. The retrogressive character of Mr. BURLINGHAME'S mission is proved by the fact that since the news of his reception in the United States and of the treaty which he made there reached Peking, it has been remarked that the Foreign Board there have become less conciliatory, and more impracticable. That is a matter of fact, and it is important as showing what the Chinese mean by a mission to Europe. And while the Peking Government have thus resorted to a very costly, and wholly unprecedented expedient to propagate their views abroad, they have also organised a most elaborate system at home by which to create arguments to support the retrogressive policy. The cardinal doctrine which Mr. BURLINGHAME is instructed to preach in Europe is that the Chinese Government are willing to open the country to Foreigners, so far as they can do so with safety, and with a due regard to the interests, wishes, and prejudices of the people. There are not wanting symptoms that such a doctrine will meet with credence in England; and if the Chinese Government once succeed in gaining credit for so much good faith, it will only remain for them and their agents to obtain or create facts to show that at such and such places the presence of Foreigners is objectionable. This task they have accordingly set themselves to do with a diligence most remarkable.

The English Treaty provides that British subjects shall be free "to build or open houses, warehouses, churches, hospitals, or burial-grounds, and shall make their agreement for the land or buildings they require, at the rates prevailing among the people equitably." (Treaty of Tientsin, Art. 12.) To the exercise of this right the authorities make no open objection; but when it comes to their knowledge that a British subject is in treaty for a house beyond the limits of the space usually occupied by Foreigners, they at once warn the owners of the property that they must not complete the transaction, which is in consequence there and then broken off. Sometimes, however, negotiations may have proceeded several stages further. The owners (who are generally very numerous) have agreed, the price has been paid, and the deed of transfer signed. All that remains is to take possession of the premises and to have the deed of sale registered in the official records. At this point the mandarins become aware of the circumstances, and, enraged that the preliminary negotiations should have escaped their vigilance, they put their machinery of falsehood and intimidation energetically in motion, and in a few days they have reduced some one of the joint proprietors to such a state of abject fear that he forswears his action, either declaring that his alleged signature to the deed was a forgery, or that it was obtained under compulsion; anything, in fact, that he is made to say he will say. The Foreigner resents this official interference, and claims the protection of his Consul. The matter is then "investigated," as the phrase goes, but the poor Consul is thoroughly bamboozled by the evidence of the sons of Belial, and in despair the matter is referred to the Minister at Peking, where the following farce is enacted:—

Minister, to high Chinese official:—"Why do you not allow my people to buy or rent houses according to treaty?" Chinese official:—"We have given stringent orders that the treaty shall be everywhere respected, but in this case it appears the British subject attempted fraudulently to take possession of the property without the owner's consent. Please tell all your people that they may buy up the whole country if they like, if only they can make their bargain with the rightful owners." The Minister is non-plussed, as the Consul was, and such is the tyranny of diplomatic etiquette in China, that Sir RUTHERFORD ALCOCK not only affects to believe what has been told him, but even stoops to the hypocrisy of addressing to the British subject a kind of reprimand, which is duly published in the newspapers, and so the mandarins are appeased. All this happened, not long ago, at Chefoo, and the main features of it are of frequent occurrence.

But the mandarins are sometimes taken so unawares that the premises are actually occupied by the Foreigner before official notice has been attracted to it. The matter is then, of course, more serious; ejection in that case can only be effected by personal violence; but as that might compromise the authorities, great caution must be used. This was the case at Yangchow. Mr. TAYLOR and his party were in peaceable possession of their house in that city, when the literati, moved by a higher power, excited the populace by means of the foulest libels to commit the outrage which has since become so famous. The literati, it must be remembered, are quite a different body from that which would go by the same name in England. If CARLYLE, FROUDE, TROLLOPE, DICKENS, GLADSTONE, DISRAELI, KINGLAKE, STUART MILL, DEAN STANLEY, and such like men happened to form a society, say at Scarborough, and we heard at a great distance that they had all taken one side in some "row," of which we could only learn the merest outline, we should reasonably enough conclude that, though we could not understand the merits of the case, yet somehow these men must be in the right. But there is no analogy between the literati of England and the so-called (or so-translated) literati of China. All candidates for Government employ in China must take a literary degree, and no man would think of so doing except with a view to seeking such employment. The literati are therefore as a class perfectly identical with the mandarins, being either candidates for appointments or men

Digitized by Google

who have retired from public life to enjoy the wealth they have accumulated while in office.

The ringleader of the literati at Yangchow was one Yen, who, having been a viceroy, had, while in active service, become enormously rich, and had settled there with his family. Whatever is done by the literati in China is done by the governing class. It was they that set on the mob at Yangchow; but it is well-known that they were themselves instigated by TSENG-KWO-FAN, the Viceroy. No intelligent Chinaman doubts this, and it must have been known to Mr. MEDHURST, when he asked the Viceroy to punish the offenders, that the Viceroy had himself planned the whole scheme, though, here again, etiquette compelled him to negotiate on a basis which both parties knew to be false. Similar outbreaks to that at Yangchow, though on a smaller scale, have occurred in other parts of the country, but have not received their share of public attention, in consequence of their happening at a distance from newspapers. They all tend in the same direction, and widely separated as are the scenes, the organisation of the attacks afford evidence of a common origin.

The ability to manœuvre a mob is a recognised accomplishment in Chinese state-craft. The official class think and talk of the people as sheep, to be driven by whomsoever possesses the skill to manage them. The bugbear of the savagery of the inhabitants of Canton and the ninety-six surrounding villages, which the mandarins kept up for a quarter of a century, has already been alluded to. But the most interesting exhibition of the mob tactics is the one which has recently occurred at Swatow. The natives there have for centuries borne a character for turbulence. When Swatow was first made a treaty port it was thought unsafe to approach nearer than to a place called Double Island. By-and-by, however, mercantile houses were opened in Swatow, and the unruly temper of the population was found to be a myth. But the city of Chao-chao-fu, higher up the river, which was the real Consular station according to the Treaty of 1858, remained closed to Foreigners until 1868, in consequence of the representations made by the authorities of the animosity of the populace. It was precisely an analagous case to that of Canton, which was kept closed for more than twenty years by the same kind of false representations. The Foreign representatives, however, at last determined to test the value of these reports, and in December last the city of Chao-chao-fu was formally opened. The population, as usual, proved to be friendly. So far everything seemed satisfactory, and the mandarins were sadly disconcerted. Towards the end of January, however, a strange movement was observable among the villages lower down the river and behind Swatow. The boats of the *Cockchafer*, when out for exercise, and without known cause of quarrel, were attacked by the natives, compelled to defend themselves, and to fight for their retreat. From this one thing led on to another, until some five thousand natives banded themselves together, erected mud forts, armed themselves for war, and in the most reckless manner defied the foreigners offering rewards for their heads. Reparation for the first outrage was of course scornfully refused, and matters were only brought to a head by a squadron of British vessels being brought to the scene. The hostile villagers were then soon dispersed, and some of the villages of the ringleaders burnt, with apparently little loss of life on either side. Some foolish accounts of the proceedings have appeared in the Hong Kong papers, calculated to give an impression of levity and wantonness to the affair. That is a common misfortune of colonial newspapers. But the facts are simple enough. The authorities excited the people by secret means to make this hostile demonstration, they themselves keeping in the background or professing to be trying to arrange matters. The "braves" naturally refuse to hear reason; and the mandarins shrug their shoulders and lament their inability to control their people. It is nothing more than the old, old story, which has been repeated scores of times, and it is as certain that the authorities are at the bottom of this otherwise unaccountable outbreak at Swatow as that they incited the populace of Canton in former days to insult Foreigners. The murderous attack on two foreign merchants in Formosa in October last, by a band of coolies, for the nominal offence of occupying a house in a new district partakes of the same character as those already described. This was clearly shown by the insulting manner in which the native authorities received the Consul's complaint of the assault. In short, Foreigners have received no molestation at the hands of the Chinese that has not been organised by the Government.

Seeing, then, that there is no absolutely new features in the attacks on Foreigners now enumerated, what is it that gives these occurrences their peculiar interest at the present moment? Simply this, that such an unusual number of anti-foreign demonstrations happening within the space of six months in every part of China, from Shantung to Kwangtung, is the result of a comprehensive plan, specially designed to influence the crisis in Chinese foreign relations which is believed to be impending. A secret edict has undoubtedly gone forth from Peking, which has set these various forces in motion in one direction. The important object with the Government at the present moment is to check the progress of European intercourse with China. This they will seek to do by both fair means and foul, by Mr. BURLINGHAME and by the village braves. Mr. BURLINGHAME is taught to deprecate the opening of China at a faster rate than the Government desire it. He is taught to warn the Governments of Europe against permitting Europeans to go where they are not liked, and where the authorities cannot guarantee them protection. It is, moreover, considered by the statesmen of Peking that a general popular outcry against Foreigners at the present juncture would strengthen their agent's hands, and enable him to prove that the extension of foreign intercourse would be fraught with much evil and danger. The American Treaty, it must be allowed, gives them grounds to hope for success in the policy of aggression and outrage which they have pursued so consistently for the last six months.

If the Chinese rulers trusted the lessons of experience, they would know that such outrages as have lately taken place not only lead, sooner or later, to retaliation, and the humiliation of the Government, but they give Foreigners a pretext for demands which they would not otherwise have thought of advancing. And since they are so much at fault in comprehending the meaning of events that have happened in their own country, and in which they have themselves been actors, it is not to be expected that they will be more fortunate in interpreting the views expressed by the organs of Foreign Governments. When they hear of non-interference in China insisted on as a principle of policy, they ignorantly assume that they may treat Foreigners as they please, and that no notice will be taken of it. Thus the doctrine preached by certain politicians is a mere crying of peace when there is no peace. A firm uncompromising attitude towards the Chinese is the only guarantee for peace and friendship. Concessions on the part of Foreign Governments have always led to, and will always lead to, one result, aggression and insult on the part of the Chinese, which in turn may lead to reprisals which are to be deplored on all sides. If, as appears to be the case, the new American treaty be considered by the Chinese as an indication that Foreign Governments can be satisfied with platitudes, and if some similar success is achieved by Mr. BURLINGHAME in Europe, there is too much reason to fear that the inevitable consequence will be disastrous, in the first place, to foreign residents, but ultimately to the Chinese Government, in whose supposed interest the retrogressive policy is promoted.

## CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

The fifteenth ordinary general meeting was held on the 21st ult., at the London Tavern; Mr. T. A. MITCHELL, M.P., in the chair.

The report, which has been published, was taken as read.

The CHAIRMAN moved its adoption, observing that it stated accurately the actual position of the bank, which was satisfactory, the profits made being at the rate of 11½ per cent. for the year. They had to sustain a severe competition with neighbouring institutions, and had suffered, like all who were engaged in trade, by the commercial depression which had extended all over the world, but they could still congratulate the shareholders on maintaining pretty nearly the same dividend as heretofore, and occupying the same position as they did at that time last year. So far as the credit of the bank and its position in the East was concerned there was no change, or, if any, it was a change for the better. (Hear, hear.) They had not in the report brought in the word capital, because as they were now become an old established concern, they thought it supererogatory to state every year that the capital of the bank was unimpaired. It had been thought that this ought to have been stated in the report, but he did not think it necessary; at all events he assured them that the capital and position of the bank were unchanged. They had written off from the old bad debts account a further sum of £21,213. Every year, before balancing the books, they went deliberately and carefully into the outstanding bad debts, and valued them according to the best information they could obtain at the time. The old bad debts arose

Digitized by Google

mainly from three concerns—to two of these he had alluded on former occasions. In the one which he had not hitherto mentioned they had obtained a judgment in the Consular Court in China; but two years ago the case was transferred, on appeal, to the Privy Council here, which had decided against the bank, and the consequence was a loss of £6,500, which, however, was included in the £21,213. The second was the Commercial Bank, and until the matter was finally settled, the directors had a right to assume that the Commercial Bank, being an unlimited liability corporation, would pay 20s. in the pound. Now that the estate was in course of final settlement and early payment, it appeared that 17s. in the pound would be realised instead of 20s., and the difference upon the gross claim of £38,000 necessarily involved a considerable deduction. The third loss was in connection with a house of world-wide reputation in the East, which they had every reason to believe when they calculated their bills, as had been done, at one-half that they would pay in full. A certain sum had been written off this debt twelve months ago, and a further sum was written off now, because there was some doubt whether the realisation would come up to the estimate previously made; but the amount to which the debt was now reduced was so limited as compared with the dividend already received from the house in question that he hoped no further deduction would have to be made. Such was the explanation of the difference in the amount of bad debts now as compared with the estimate of twelve months since. In October last he informed them that in recommending a dividend at the rate of six per cent. the board anticipated from the rate of profit they were then making they would be able to place a handsome addition to the reserve at the end of the year. The directors were still of opinion that the prosperity of a bank depended very much on its credit, and that for the purposes of that credit it was necessary to build up as rapidly as possible a substantial reserve. (Hear, hear.) At the same time they had no notion of building it up by adding to it fictitious sums; and as they had made a fresh bad debt since then, they had not thought it right to add fictitiously any part of the £21,300 to the reserve, but had left it contingent, to be applied hereafter as the affairs of the bank might warrant. This new bad debt had occurred at Batavia. Though he did not think it advisable on that or any other similar occasion to go into details of figures, anyone who imagined that the loss was so great as to be in any way likely to impair the credit or the resources of the bank was mistaken. The firm in question was Morgan, Melbourn, and Co., an English house of forty years' standing in Batavia. For two or three years the bank refused to open an account with that firm, but six or seven months ago, in consequence of further information, an account was so far opened that the board authorised their manager not to take the bills of the firm, or give credits on the London branch, but to take what securities they had to offer, being mainly bills drawn under credits on houses in Europe, and chiefly in London. The liabilities the bank had incurred arose almost entirely from these, and they held under these credits bills taken by their manager in Batavia, which had not been honoured by the parties who lodged them. There was one amount of £10,000, by a party at Bremen, lodged with a great commercial house here, which refused acceptance, stating that the credit had been withdrawn two days before the bills were presented for that purpose. All these claims were in existence, but they were so mixed up with questions of English, Dutch, and German law that it was impossible at present to say to what extent payment of the credits could be enforced, or what would be the final result. It was, however, satisfactory to know that, whatever the result, it could scarcely be injurious to the bank. It was impossible in a business such as theirs, conducted in a peculiarly speculative part of the world, to avoid occasional losses; but such losses were met by occasional large profits; and they had every reason to be sanguine as to the future of the bank.

In reply to Mr. HUGGINS, Mr. COLES, and other Shareholders,

The CHAIRMAN added that the credits against the debt of the Batavian firm were to a large amount in sugar and other produce in transit, and of which they held the bills of lading. He could not say positively that the £21,300 would cover the entire of the losses from the old bad debts, but if it should be necessary to write off anything beyond it would be but a very small sum as compared with the usual scale of profits. The Batavian affair had occurred since the date of making up the accounts, 31st Dec., and was not included. The total amount of the bad debts on the 31st Dec. was £56,000, and during the past five years they had written off £289,000 bad debts, and all the time maintained a good dividend, the capital being intact. Of the 17s. in the pound paid by the Commercial Bank, 7s. in the pound remained to come in.

The motion was then put, and, having been seconded by Mr. JONES, was unanimously carried.

The dividend, at the rate of 6 per cent. per annum, payable on and after the 28th ult., was agreed to, the retiring directors and auditors were re-elected, and the usual compliment to the chairman and directors concluded the business.

# PARLIAMENT.

## HOUSE OF COMMONS.

—o—

### RANGOON AND WESTERN CHINA.

(April 22nd.) Colonel GRAY asked the Under Secretary of State for India if any, and, if any, what steps were being taken by Her Majesty's Government to promote the communication between Rangoon and Western China through a portion of the Shan States; and if the survey of that route was being proceeded with.

Mr. G. DUFF: Nothing further has been done with regard to promoting communication between Rangoon and Western China since the survey was discontinued, in 1867, after it had been carried on for 245 miles, nearly to the extreme boundary of our territory. I hope the Government of India will see its way to renew the unfinished work. If it does so we shall be glad. But, at the same time, the Secretary of State for India would not dream of pressing the Government of India to continue that survey if they were deliberately of opinion that by doing so they would be involved in grave political complications or incur any very great expense. The whole question of communication between India and Western China, of which the project for a communication through the Shan States is merely a fragment, and not a very large fragment, is one of very great interest; but it will, I think, become of greater practical importance to the next generation than to ours. But, interesting as it may be, and important as it may become, I think the hon. gentleman, and many hon. members connected with the North of England, who are interested in this question, will admit that in the Chinese Peninsula, as in Abyssinia, we may possibly buy gold too dear. Some papers that will presently be laid upon the table will more fully explain the present state of the question.

### RELATIONS WITH CHINA.

(April 29th.) Mr. DILKE asked the Under Secretary of State for Foreign Affairs whether his attention had been called to a telegram, dated Shanghai, March 31, and published in the London newspapers of yesterday, in which it was stated that in a despatch from Sir Rutherford Alcock to the British Consul at Shanghai, the former says that "The Government of Peking shows no desire for progress according to Western ideas and desires, but, on the contrary, will not yield to the introduction of any such projects, except under pressure and coercion;" and whether such a despatch from Her Majesty's Minister in China to a Consul had been published by the authority of the Foreign-office.

Mr. OTWAY said the Government had only seen the statement in the papers, and, therefore, they could not have authorised its publication. From another portion of the telegram, to which his hon. friend had not referred, he thought it very likely that such a despatch had not been sent. The China papers would soon be on the table, and from the first despatch his hon. friend would see how clearly Lord Clarendon laid down the policy of this country towards China.

## THE COMING TEA SEASON.—BROKERS' CREDITS.

(To the Editor of the *London and China Telegraph.*)

SIR,—Having read the leading article in your issue of the 19th inst., headed "The Coming Tea Season," with great interest, I cannot help pointing out to you one feature in the Tea trade as now conducted that has a very material bearing upon its want of prosperity, and which you apparently are either not aware of or have overlooked. It is the practice of Tea Brokers in London furnishing large amounts of credits to young men in China for the purpose of buying tea to be consigned to them here for sale.

Much has been written lately upon the subject of banks interfering with merchants in the Australian trade by advancing upon wool consigned to the head office in London for sale, and it seems to be generally agreed upon that the system is a wrong one. Not so, however, is the system of banks, which you allude to in your able article as follows:—"Many are disposed to blame the banks for too readily affording facilities to buyers who are devoid of capital." It is quite competent to banks to purchase bills of exchange upon London offered for sale abroad, it is also quite within their province to contract to purchase bills that it may be notified are likely to be for sale in course of a season in China, under such conditions as they may think fit to impose for their own safety. In neither case do they interfere with the business of the merchant.

The case of the Tea Broker granting facilities to buyers in China is as much an interference with the business of the London merchant as the system reprobated in the wool trade, and it is one that, so long as practised, must have a prejudicial effect upon the prosperity of the tea trade. Young fellows fresh from school—at all events the school of tea—are sent out to China with most liberal salaries, in return for which they engage to fulfil the duties that may be imposed upon them by their employers. Before they can possibly know even the rudiments of the business to which they are annexed, they receive from England a credit for ten, twenty, thirty, or perhaps fifty thousand pounds, to be employed in buying tea for consignment to the broker who has sent it; the temptation is too great, and the precipitation with which the money is spent is not to be wondered at.

I do not think it will be found an exaggerated estimate of the extent to which brokers supply credits to young men and others in China if put at a million sterling, which sum is about a tenth of the value of the season's export of tea to the United Kingdom. If this is fair and legitimate, well and good, but it naturally leads one to inquire what are the functions of a broker, and why should a broker have the double advantage of being both broker and merchant, while the merchant can only follow one vocation? If it is because the broker binds himself in a penalty of £1,000, finding two sureties of £250 each, "to truly and faithfully execute and perform his office and employment between party and party, without fraud or collusion," then the sooner the merchant binds himself to do the same, and adds broker to his title, the sooner shall we have the tea trade conducted on a clearer footing.

I cannot, however, help thinking that there is something wrong in this double system of business, and I shall be very glad if any of your correspondents can enlighten on the subject.—Your obedient servant,

A CHINA MERCHANT.

London, April 28, 1869.

# Monetary and Commercial.

The annual meeting of the proprietors of the Oriental Bank Corporation was held on the 22nd instant, at the offices, Threadneedle-street, Mr. J. Blyth in the chair, when the report was adopted, and a dividend at the rate of 12 per cent. per annum, free of income-tax, declared. The retiring directors and auditors were re-elected, and on the motion of Sir H. Anderson, seconded by Dr. Thom, an unanimous vote of thanks was accorded to Mr. Gordon, the late chairman, for his past services.

The annual meeting of the Chartered Bank of India, Australia, and China was held on the 21st April, Mr. T. A. Mitchell in the chair. The directors' report was adopted, and a dividend declared at the rate of six per cent. per annum. The chairman explained that a further sum of £21,213 had been written off the old bad debts account, but a new bad debt had been incurred in Batavia, which, however, was not of sufficient magnitude to injure the position of the bank, which remained as good as ever, and with its capital intact. The statement was received with satisfaction, and the retiring directors re-elected.

The report of the Singapore Gas Company states that the profits for the half-year ending the 31st of December last were £1,227 after writing off for depreciation of works and plant at the rate of three-quarters per cent. per annum, which, together with a balance of £40 from last half-year, made the available balance £1,267, out of which the directors recommended the declaration of a dividend at the rate of 7½ per cent. per annum on the amounts paid up on the original capital, free from income-tax, leaving a balance of £25. Mr. E. J. Wells, the manager, stated in his report that the Labuan and Australian coals worked very well together. For the half-year the gas produced was 9,090 cubic feet per ton of coals. The whole of the coke and nearly all the tar had been disposed of. The total number of lights burning on the 31st December last was 6,245.

The Secretary of State for India in Council has given notice that tenders for Bills of Exchange on Calcutta and Madras will be received at the Bank of England on Wednesday, the 5th of May next, on the usual terms, to the amount of 35,00,000 rupees.

In view of the resumption of the drawings by the India Government there has lately been less demand for bar silver, and sales have been effected during the last few days at 60½d. Mexican dollars have been settled at 59⅜d., and being scarce are now firm.

Messrs. Sanderson and Co., of 14, St. Helen's-place, announce that Mr. Thomas Smith, late of China, became a partner in their firm on the 1st of January last, and that from the 1st of May next he will be a partner also in their China house (Messrs. John Silverlock and Co., Foochow.

Mr. R. S. Butterfield, of Bridgehouse-mills, Haworth, and of Bradford, has notified his retirement from the business hitherto carried on under the firm of R. S. Butterfield and Co., which will be continued by Messrs. Redman and Holt, in their own name.

At a meeting of creditors of Messrs. William Dickinson and Sons, cotton spinners, manufacturers, and machinists of Blackburn, held last week, the statement of affairs submitted showed liabilities of £73,604, of which about £40,000 is secured. The assets show 10s. 6d. in the pound. A committee of four was appointed to investigate, and report to a future meeting.

A meeting of the creditors of Messrs. Ogden and Co., and Messrs. Oldfield and Co., of Halifax, the former in business as woolstaplers and the latter as worsted-spinners, Mr. Ogden being a partner in both, has been held. The liabilities are stated at £45,000. The assets, it is said, will amount to not more than £5,000.

The suspension has been announced of Mr. William Bottomley, of Grove-mill, Bradford, stuff manufacturer, with liabilities said to be large.

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the past month, which contain details of the quantities and value of the cotton manufactures and yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Penang, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th April of the present and two preceding years :—

### HONG KONG AND WHAMPOA.

PLAIN COTTONS.—Export for the month ended 16th April, 1869, 1,432,940 yards; for the twelve months 1869, 46,074,327 yards; for the twelve months, 1868, 62,845,251 yards; for the twelve months 1867, 37,003,115 yards. Decrease for 1869 against 1868, 16,770,924 yards.

COLOURED COTTONS.—Export for the month ended 16th April, 1869, 78,515 yards; for the twelve months 1869, 1,295,724 yards; for the twelve months, 1868, 2,650,587 yards; for the twelve months, 1867, 2,717,775 yards. Decrease for 1869 against 1868, 1,354,863 yards.

PRINTED COTTONS.—Export for the month ended 16th April, 1869, 2,000 yards; for the twelve months 1869, 1,829,738 yards; for the twelve months 1868, 1,216,685 yards; for the twelve months, 1867, 914,816 yards. Increase for 1869 against 1868, 613,053 yards.

COTTON YARN.—Export for the month ended 16th April, 1869, 224,000 lbs.; for the twelve months 1869, 5,060,390 lbs.; for the twelve months 1868, 8,031,466 lbs.; for the twelve months 1867, 4,207,868 lbs. Decrease for 1869 against 1868, 2,971,076 lbs.

## FREIGHTS AND CHARTERS.

Berth freights remain without change; Coal freights from the Northern outports still continue low, although for one or two ports there is a slight advance.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 45s. weight, 50s. meast. To Hiogo: 60s. weight or meast. To Tientsin: 60s. meast. To Chefoo: 60s. weight or meast. To Newchwang: 55s. meast. To Shanghai: 40s. weight, 30s. meast. To Hong Kong: 40s. weight, 30s. meast. To Manila: 40s. weight, 70s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 25s. weight or meast. To Penang: 40s. weight or meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £43. For Shanghai: £43. For Hong Kong: £32. For Singapore: £24. For Galle: £23. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2 7s. For Chefoo: £2 2s. For Shanghai: £2 4s. For Hong Kong: £1 13s. For Singapore: £1 5s. For Galle: £1 5s.

The Admiralty have invited tenders for the conveyance of small stores to Colombo and Hong Kong.

## MISCELLANEOUS.

The opium clipper steamer Hindostan, built for Messrs. Apcar and Co., of Calcutta, by Messrs. J. Wigham Richardson and Co., of Newcastle-upon-Tyne, and engined by Messrs. Thompson, Boyd, and Co., has been tried at the measured mile, and has attained a speed of 12½ knots, on a mean draught of water of seventeen feet, and the impression was that had the vessel been fifteen inches by the stern a much greater speed would have been attained. The cylinder of this vessel's engines has a diameter of 64 inches, with a three feet stroke, and developed an indicated horse power of 1,440. The dimensions of this splendid steamer are:—Length, 300 ft. 6 in.; breadth, 35 ft. 2 in.; depth, 22ft. 6 in. The saloon is fitted to accommodate forty first-class passengers, and, together with the sleeping berths, is most elegantly furnished and decorated; and every care appears to have been taken to adapt everything to the climate for which the vessel is intended. From her trial we may look with confidence for a very rapid passage of the vessel out to India, and on her arrival out the residents of the Far East may consider such an addition to the available means of transit a very great boon.

At ST. VINCENT, C.V.—April 1, C.J. Textor (s.s.), from London, and left 4 for Japan.

At CAPE OF GOOD HOPE.—March 31, Nestor (s.s.), from Liverpool, for Mauritius, Singapore, China, &c.

At TENERIFFE.—Diomed, (s.s.), from China, Singapore &c., and left April 24, for Liverpool.

Advices from Gibraltar, dated April 24, state that the Continental Erving, from Cardiff to Yokohama, which was towed in there previous to March 29, after being on shore, was advertised for sale by public auction on May 5.

The Wallasea did not arrive at Liverpool from Singapore, April 6, as reported in our last issue.

## LAUNCHES.

Messrs. Steele and Co. launched from their yard at Greenock on the 14th ult. a handsomely-modelled China clipper, named Wylo, of 799 tons register. She is the property of Messrs. Killick, Martin, and Co., London, and is in every respect the same as the Woosung.

Mr. W. Pile, North Sands, Sunderland, has launched the Miacho, a very fine clipper composite barque, of 700 tons O.M., 500 tons register, classed 16 years; 165 feet length, 30½ feet beam, 17½ feet hold; built for Messrs. Killick, Martin, and Co., London, and intended for the Japan trade.

On the 28th ult. Messrs. Charles Connell and Co. launched from their west shipbuilding-yard at Overnewton a finely modelled composite sailing ship of 1,174 tons, named the County of Nairn, to class 16 years A1 at Lloyd's. She is owned by Messrs. R. and J. Craig, of Glasgow, and is intended for their Java line of packets.

HOLLOWAY'S OINTMENT.—NEURALGIC AND RHEUMATIC DISORDERS will prevail more or less at the change of seasons. All aches and pains in the nerves, muscles, and bones, which often compel the man of business to neglect his usual avocations, may be speedily subdued by this powerful Ointment. It should be well rubbed into the parts affected. The action of the Ointment is expedited by previous fomentation with warm water. The Ointment is then as easily made to pass into the human frame as salt is made to pass into meat, and none need apprehend any injurious after-effects from it, for its cures are worked without the aid of a particle of mercury, or any other noxious substance.

# PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receive vessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops, an ENGINEERS' WORKSHOP, fitted with lathes and tools driven by steam, AN IRON FOUNDRY for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz., engineer, blacksmith, and shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in the dock.

Amoy, 16th December, 1867.

# COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

MANAGER.—G. ietsch.

SUB-MANAGER.—Theod. Dromel.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct Banking business of every description with the Continent, India, China, &c., upon terms to be ascertained at the Office.

# SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

GROOM, EDWARD HARRISON, and RYLE HOLME, under the firm of GLOVER and Co., of Japan and Shanghai, ceases this day by efflux of time. The business in Shanghai will be conducted on and after the 1st Jan., 1869, under the style of GLOVER, DOW, and Co., in which Firm FRANCIS A. GROOM and JAMES DOW will be partners.

Shanghai, Dec. 31, 1868. GLOVER AND Co.

## NEW MUSIC.

BRAG. Serio-comic Song. Written and Composed by ALFRED SCOTT GATTY.

PUT IT DOWN TO ME. Comic Song. Written and composed by ALFRED SCOTT GATTY.

WHEN THE ROSES BLOW. Song. Written by R. REECE. Composed by G. B. ALLEN.

THE DAYS WERE SWEET IN SUMMER TIME. Song. Written by R. REECE. Composed by G. B. ALLEN. Post free for 19 stamps each.

Messrs. R. COCKS and Co., New Burlington-street.

We have had occasion to favourably notice Mr. Gatty's comic songs, and the two under notice do not alter our opinion of their character. "Brag" is a comic song of a mild order, but hardly to be ranked as serio-comic. It is all fun. "Put it Down to Me" is more pungent, and broader in tone, but without approaching coarseness. It is sung nightly by the St. George's Hall Christy's, and hardly ever fails to be warmly encored. Both songs are in marked contras, with the music-hall type, and deserve a wide circulation. "When the Roses Blow" is a ballad which has also obtained much favour with the Christy's, and it well merits it. The melody is very taking, and quite equal to any of Mr. Allen's uniformly excellent settings. "The Days were Sweet in Summer Time" is another excellent song, and if it reaches a front place in the thousand and one new compositions before the public it will fully deserve it.

HAMILTON'S MODERN INSTRUCTIONS for the PIANO. 673rd Edition. 70 large folio pages. 4s.—Order of all Musicsellers and Booksellers; and of the Publishers.

CLARKE'S CATECHISM of the RUDIMENTS of MUSIC.—121st Edition. Free by post 13 stamps. "Every child learning music should have this book."—Morning Chronicle.

| Do. ..... | Savoir Faire | AA1 | 1396 | May 20 |
| Do. ..... | Brit. Envoy | AA1 | 1265 | June 5 |
| Madras ..... | John Masterman ... | A1 13 yrs | 602 | May 10 |
| Shanghae ... | Ornate ..... | A1 10 yrs. | 739 | May 5 |
| Do. ..... | Lauderdale . | A1 15 yrs. | 851 | To follow |
| Port Philip . | Zenobia..... | A1 15 yrs. | 1145 | May 12 |

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co, No. 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

JOHN C. CAMPBELL will despatch the following splendid first-class VESSELS:—

| Destinatn | Ships. | Class. | Tns. | Dock. | Date of Sailing. |
|---|---|---|---|---|---|
| Colombo .. | Ocean Rover..... | A1 16 yr. | — | W.I.D. | May 15 |
| Bombay ... | B. Lawn ... | A1 11 yr | 551 | E.I.D. | May 4 |
| Cochin, Calicut, Cannanore, & Mangalore ... | Antipodes . | A1 9 yr.. | — | — | May 5 |

No. 22, Great St. Helen's, E.C.

CHINA, JAPAN & BRAZIL.—NORRIS and JOYNER will despatch the undermenentioned first-class Clipper Ships as under:—

| Ports. | Ships. | Class. | Docks | Last Shipping Day. |
|---|---|---|---|---|
| Tientsin and Chefoo ... | Belle ..... | A1 10 yrs. | W.I.D | With des. |
| Hiogo and Yokohama... | Westbury ... | A1 10 yrs. | E.I.D. | With des. |
| Ditto ..... | Crest of the Wave ... ..... | A1 13 yrs | E.I.D. | With des. |
| Pernambuco | Rio Grande | A1 10 yrs. | L.D. | With des. |

For Freight or Passage apply to NORRIS and JOYNER, 60, Cornhill, E.C.

BOMBAY DIRECT (to sail on the 5th of May), the splendid, Clyde-built, clipper ship THOMAS BELL, AA1, 838 tons register; GEORGE WYLIE, Commander; loading in the East India Docks. This magnificent vessel presents a most desirable opportunity to shippers of fine goods. Last outward passage, Liverpool to Bombay, 79 days. Has room for a few more first class passengers.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, London, E.C.

CALCUTTA Direct (to sail punctuall on the 5th May), the magnificent clipper ship CALCUTTA, A 1 20 years, 1,039 tons register; A. YOUNG, Commander; loading in the East India Docks. This vessel's last five passages from London to Calcutta and back have averaged 95 days.

For Freight or Passage, apply to GELLATLY, HANKEY SEWELL, and Co, 8, York-street, Manchester; or 27 Leadenhall-street, E.C.

MADRAS DIRECT, first ship, will receive goods all day Friday April the 30th, the magnificent fast sailing clipper ship LOBELIA, A1 13 years (owned by Messrs. John Lidgett and Sons); 924 tons register; T. R MOWATT, Commander; loading in the East India Docks. This splendid vessel is strongly recommended to shippers.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

DIRECT for COLOMBO, the beautiful clipper ship OCEAN ROVER, A1 16 years, 548 tons register; WILLIAM HAMMOND, Commander; West India Docks. This splendid high-classed vessel, built in 1867, is considered one of the fastest afloat, and offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Malabar Coast. First season ship. Will meet with the usual quick despatch.

DIRECT for COCHIN, CALICUT, CANNANORE, and MANGALORE, the beautiful clipper ship ANTIPODES, A1 9 years, 420 tons register; J. DUNN, Commander; West India Docks. This splendid vessel offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Mate's receipts must be left before bills of lading can be signed.

L. H. and B. will not be responsible for demurrage on craft sent alongside without their instructions.

With Immediate Despatch.

DIRECT FOR BOMBAY, the well-known clipper BOLDEN LAWN, A1, eleven years; W. HOPPER, Oommander; 551 tons register. East India Docks. This splendid vessel (newly coppered), having a large portion of her cargo engaged, offers a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Regular Line of Packet Ship. With despatch.

FOR HONG KONG, the splendid Clipper RIVER EDEN, AA1, 508 tons register; ROBERT VALDER, Commander; East India Docks.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

To sail on the 5th May.

FOR SHANGHAI, the splendid Clipper SHUN LEE, A1, fourteen years, 640 tons register; JOHN JAMES MILBANK, Commander; East India Docks. Has superior accommodation for passengers.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

FOR HONG KONG (to sail on the 20th May, last shipping day 17th), the splendid composite clipper ship ELMSTONE, A1 14 years, 698 tons register; TOMLINSON, Commander; lying in the East Indian Docks. This magnificent vessel, well known in the China trade for her rapid passages and sound delivery of csrgo, offers a favourable opportunity to shippers of fine goods.

For Freight or Passage apply to J. W. JONES, 19, Chapel-walks, Manchester; or to MARTIN MOORE and JORDISON, 147, Leadenhall-street, E.C.

### THE MAILS, &c.

The present inward (French) mail reached Marseilles at noon on the 6th instant, and should have been delivered early this morning, instead of coming in by instalments through the day. The fault, of course, is not with the Messageries Imperiales, as they delivered it a day before its due date, but with the French postal service.

The next inward mail will be that leaving Hong Kong April 6th, which reached Suez yesterday morning, and is due here on Monday, the 17th inst.

Telegrams were yesterday received *via* Galle in advance of the mail with Hong Kong dates to April 20th; and *via* Kiachta, from Shanghai, to the 21st April (only sixteen days in transit).

## List of Passengers.

### PASSENGERS INWARD.

Per *Diomed*, steamer, which left Shanghai 10th Feb.; Hong Kong, 20th; Singapore, 28th; Mauritius, March 17th; Cape, 31st; Teneriffe, April 24th; and arrived at London, May 4.—From Shanghai: Mr. and Mrs Aitken and three children, Mrs. Smith and three children, Mrs. Jamieson and one child. Mr. Hudson. From Hong Kong: Revs. J. Cox and W. Rogers, Mrs. Holworthy and three children, Mrs Clark. Government passengers: Lieuts. Noel and Dickson, Sub-Lieuts. Goldney and Deane, Assistant Paymaster Tongue, R.N., Assistant Surgeon Hains, R.N., Lieut. Huntley, 10th Regiment, Staff Assistant Surgeon Jackson, Messrs. Coope, Jeffries, Cooper, White, Herring, Harvey, Isaac, Thompson, Atkinson, Harris, Jones, Searle, and 157 men, 48 invalids, 22 women and children, 3 distressed seamen. From Singapore: 21 men, soldiers and sailors, 4 women and children.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Delta*, from Southampton, May 1.—To Shanghai: Mrs. Stokes. To Hong Kong: Mr. W. A. Whyte, Mr. A. Falconer, and four second-class passengers. To Ceylon: Col. and Mrs. Drewe, and one second-class passenger. To Calcutta: Mr. F. Berkeley, Rev. Mr. and Mrs. Allan Ramsay, Asst. Surg. Reynolds, Mr. C. E. Gouldsbury, Mr. Donaldson, and ten second-class passengers. To Bombay: Mrs. J. H B. Hallen, Mr. and Mrs. A. F. J. Fisher, Mr. Beeston, Capt. A. M. Lockie, Capt. Sproule, Mr. W. Hodding, Mr. D. T. Maclean, Mr. W. Macbay, and nine second-class passengers. To Madras: Capt. and Mrs. J. Gordon, Mr. Dacres Thomas, Mr. and Mrs. J. Reid and two children, Mr. Sutherland, Mr. Hugh Crawford, and four second-class passengers.

Per P. and O. steamer *Poonah*, from Marseilles, May 9.—To Yokohama: Signors Vigano, Bassani, Bossoli and Civetta. To Shanghai: Mr. B. Powell Seare, Mr. E. J. Hogg. To Hong Kong: Mr. H. D. Williams, Mr. W. T. Lay, Mr. and Mrs. E. Hitchcock, and servant, Mr. G. W. Stiles, Mr. F. Burgess Smith. To Singapore: Mr. and Mrs. J. Campbell, Miss Hamilton, Mrs. Lessler, two children and servant. To Ceylon: Mr. C. Roberts, Mr. T. Blew. To Calcutta: Mr. H. J. Phillips, Mr. W. Young. To Madras: Mr. C. V. McSwiney, Major and Mrs. C. S. Hearn, Mr. J. Rohde, Major R. A. Clementson. To Bombay: Mrs. Tanner, child and servant, Capt. T. M. Harris, Mr. E. de C. Williams, Mr. J. Hyde Edwards Mr. G. C. Watson, Mr. J. H. Adams.

Per P. and O. steamer from Suez, May 16.—To Yokohama: Mr. Mazzocchi, Mr Vinetich, Mr. Damioli. To Ceylon: Mr. W. H. Anderson. To Madras: Captain E Berkeley. To Bombay: Capt. H. G. Paski.

Per P. and O. steamer *Pera*, from Southampton, May 15.—To Yokohama: Mr. F. L. Pollard. To Hong Kong: Mr. George Collingwood, Mr. G. A. K. Honey. To Penang: Mr. G. Clemen. To Ceylon: Major-Gen. and Mrs. Renny, Capt. Chichester, Mr. and Mrs. R. W. Jenkins, Mr. and Mrs. G. Vane and child, Miss Vane, Miss E. Iron, Mr. Corfe.

Per P. and O. steamer *Ceylon*, from Marseilles, May 23.—To Hong Kong: Mr. H. C. Heywood. To Ceylon: Sir Hercules Robinson, Lady Robinson, two children, and two Misses Robinson, Mr. and Mrs. W. Sabonadière and two children.

Per P. and O. steamer from Suez, May 30.—To Yokohama: Dr. Orio, Signor Velini.

Per P. and O. steamer *Delta*, from Marseilles, June 4.—To Yokohama: Mr. Andreis. To Shanghai: Mr. Brodie. To Batavia: Mr. Otto Sielcken.

## Summary of News from the Far East.

### CHINA.

#### SHANGHAI AND THE NORTH.

From this Port we have advices to the 23rd March. The outward mail of Jan. 29 was received March 17. Our correspondent's letter appears to have miscarried, but there is little news, the following items being all we can glean from the local papers. From Japan we have no advices whatever.

The chain-gang system of punishment is revived again. As it is much dreaded by the natives, we believe it will have a good effect in lessening the numerous instances of petty theft by house-boys, which occupy so much of the magistrates' attention at the Mixed Court.

Chen, the Chinese magistrate, has expressed his private opinion that for the recent attack on Foreigners at Pootung there was not the remotest provocation, but that much ill-feeling has been raised among the villagers by the bad treatment offered to themselves and to their property by the sportsmen who frequented the place during the late shooting season.

An adjourned inquiry into the Pootung outrage was held on the 14th, but nothing of importance was elicited except that one of the party seemed under the influence of drink.

The *Evening Courier* says, "There is every prospect of a good Spring Meeting this year, and a large number of presentation Cups are on the list of those to be run for. The German Cup will, we hear, worthily represent the liberality of its donors. The Compradores give a plate, and the sons of Nimshi contribute of their spoils. The Hunt Cup will be also subscribed for, and a 'heavy weight' presents a prize in the name of the Jockeys, for ponies and riders who have never won a race. In addition to these is the attraction of the Ladies' Purse, the annual favour of the fair patronesses of sport."

It is stated that the Mahomedan Rebels, who have for many years possessed Suchau, the capital of Kansuh, were severely defeated on the 15th of January, by Ling Suh, the Major-General of Wu-lu-muh-tsi, or Oroumsti, a town in Gourgiaria. It appears that the Major-General, hearing that the Rebels were in a state of exhaustion for want of food, took advantage of the opportunity to attack them, and his victory resulted in the capture of Sun Fook and other rebel chiefs, the recapture of the city, and the extirpation of the rebellion.

The northern papers contain the news of the appointment of Vcte. Brenier de Montmorand, the Consul-General for France at Shanghai, to the port of Consul-General at New York. This promotion is well-merited, but will be heard of not without feelings of regret, by those who know how well qualified Vcte. Brenier is to fill the post which he at present occupies, and how little likely it is that so able a man can be found as his successor. Vcte. Brenier de Montmorand combined with great tact and knowledge of the world, in his conduct towards his countrymen and other foreign residents, an accurate appreciation of Chinese character; and, on more than one occasion, did good service by his just estimate of the subtlety and finesse with which attempts

Digitized by Google

at encroachment on the rights of foreigners were made by the Chinese. His departure will be a subject of regret, both in his public and private capacity, as by it the community will lose not only an able official and diplomatist, but a courteous and refined gentleman, who by his simple but graceful kindliness and dignity won to himself the esteem and affection even of those who differed with him upon public questions. The worthy gentleman is a passenger by the present French mail.

H.B.M.'s gunboat *Insolent* has, we hear, been sold to Messrs. Janssen, Vassmer and Co., of Chefoo, for the sum of Tls. 5,000.

The *Costa Rica* took 2,500 dozen eggs for the San Francisco market, where by last advices they were selling at four cents each.

The party of foreigners on whom the attack at Pootung was recently made, have presented Sergeant Mellor, of the river police, with a splendid gold ring, as an acknowledgment of their appreciation and gratitude for the timely assistance which he rendered them on the occasion of the attack.

Several private memorials on the subject of opening new ports are in the course of publication. The text of the first, from Mr. F. M. Canny, of Chinkiang, appears in the *S. C. and C. Gazette* of the 20th inst. Mr. Canny advocates generally the advisability of opening up the country to further intercourse with Foreigners; specifies several ports which he considers should be opened as subsidiary ports on the Yangtze; and then passing on to the question of transit dues, suggests, first, that the whole revenue arising from these dues be handed over to the provincial authorities for the government of their various jurisdictions; secondly, that the present amount of 2½ per cent. *ad valorem* be raised to 4 or even 5 per cent., if necessary—thus bringing the whole amount levied as import and transit traffic on British merchandise to 10 per cent. *ad valorem*; and thirdly, that some guarantee be obtained from the Government for the due fulfilment of whatever new stipulations may be agreed upon regarding this question.

His Excellency the United States Minister had arrived at Shanghai.

A meeting of the silk inspectors took place on the 19th inst., at which the following resolutions were passed:—Resolution 1. That in order to assimilate, to some extent, the practice of China to that of foreign countries, no smaller weight than one pound avoirdupois be used in weighing silk, and that a bale weighing 107 lbs. is to be held to weigh 80 catties only, and nothing over allowed for. Resolution 2. That muster bales be taken at actual weights. Resolution 3. That a committee of reference of five be chosen by ballot by the present meeting to receive any complaint or grievances from both Foreigners and native silk dealers, to be laid before a meeting to be called every six months to discuss all questions relative to the trade. That the committee appointed be requested to have the resolutions printed in English and Chinese, and copies be delivered to those silk brokers and dealers who signed the Circular of May, 1865. Resolution 4. That the committee be requested to ascertain the average loss of weight on the different kinds of silk to the different European markets. Resolution 5. That an allowance for tares on Throwns and Re-Reels be made a universal custom in the silk trade. Resolution 6. That the resolutions with regard to weighing and tares, take effect from the 1st June. Resolution 7. That the committee be requested to communicate with the Commissioner of Customs and the agents of the mail steamers to endeavour to arrange for a more convenient mode of paying the export duty on silk than that at present in vogue. Resolution 8. That the proceedings of this meeting be sent to the Chamber of Commerce for the information of that body.

An interesting and amusing case with reference to registration has been before the Supreme Court, Mr. Robinson, solicitor, being the defendant, and raising all the points he could; but being, nevertheless, fined 10 dols. and costs.

## TELEGRAPHS IN CHINA.

Dr. Macgowan has reopened the subject of telegraphy in China by addressing a despatch through the U.S. Consul to the U.S. Minister at Peking, a copy of which was also forwarded to Sir Rutherford Alcock, who, in the course of a reply, gives utterance to words which seem the utter abandonment of all hope of progress in China, except such as the officials are forced to.

The following is the full reply from Sir Rutherford Alcock to the despatch from Doctor Macgowan, concerning telegraphs in China:—

British Consulate, Shanghai, March 20, 1869.

Sir,—I have the honour to forward for your information the accompanying copy of a despatch, which I have received from his Excellency Sir Rutherford Alcock, K.C.B., in reply to mine, submitting your communication to me of the 19th ultimo, in which you advocated the expediency of continuing to press upon the attention of the Chinese Government the uses and benefits of telegraphy.

You are at liberty to make any use of the enclosure which you may think fit.—Your obedient servant, W. H. MEDHURST,
Dr. D. J. Macgowan. H.B.M. Consul.

---

PEKING, March 12th, 1869.

Sir,—I have received your despatch No. 17, of the 22nd February, with its enclosure from Dr. Macgowan, advocating the expediency of continuing to press upon the attention of the Chinese Government the uses and benefits of telegraphy. As to the expediency of this course, that must in some degree depend upon the probability of any beneficial result following. So far the effect of all the arguments adduced and the constant representations made of the advantages to be derived from railroads and telegraphs has not been such as to encourage any sanguine hopes of progress in this or any other direction.

You may inform Dr. Macgowan, however, that there is no argument in favour of telegraphy referred to in his letter which has not been repeatedly and earnestly pressed upon the attention of the Ministers of the Tsung-li-Yamen; and no objection to it, on the part of the Chinese, that has not been met, in the way he would indicate, by my colleagues and myself. You may also add that, of the desire for progress which the Chinese Mission, now in Europe, assured Dr. Macgowan's countrymen was so ardent and general with the rulers in China, there is no evidence here. If any hopes are built upon its existence, therefore, I fear there is nothing but disappointment in store for those who indulge in them. Projectors of telegraphic lines, railroads, and other plans for the sudden development of the resources of this country, are but losing their time, while the Government here shows no disposition to entertain their projects. I think it is in the interest of all who are occupied, that they should know the truth, than be deluded by false hopes, and expectation of changes which are still far in the distance.

It seems to be forgotten that all treaties hitherto made with China have been such as were dictated by Foreign Powers, and in accordance with their views rather than those of the other contracting party. The revision at present in contemplation will take place under totally different circumstances. Nothing new can find place therein which is directly contrary to Chinese views of their interests in relation with Foreign Powers. If the rulers of China cannot be made to see the advantage to themselves and the nation, as well as the practicability and safety of inland steam navigation, railroads, and telegraphic lines, or the working of mines, and residence of merchants in the interior with exterritorial privileges attaching, it is very certain they will not yield to any force of argument and reason, or earnestness of friendly counsel. And if these do not prevail, what other means remain, apart from the employment of force and means of coercion? But this would be to make the refusal to listen to our suggestion and demands for increased advantages a *casus belli*. It cannot be necessary to remind Dr. Macgowan that, so far as this ultima ratio of Governments and nations is concerned, the United States of America could be no party after the signature of the "additional articles," and the assurances they contain. It is quite certain they will not force telegraphy or any other improvement upon an unwilling Government here. And, I may add, it is equally certain that such a course would be contrary to the tenor and spirit of the instructions of the British Government, and opposed to the whole course and tendency of public opinion at home. Whatever, therefore, may be the desire of the best friends of China, and of foreign merchants, to see her advance in the path of progress and enjoy the increased prosperity which the adoption of the several improvements referred to would do so much to secure, I cannot feel justified in the present aspect of affairs in holding out any hopes of material modification in the policy or disposition of the Chinese Government in regard to telegraphs and other similar innovations on established customs and habits.

You are at liberty to forward a copy of this despatch to Dr. Macgowan for his information.—Your obedient servant,
W. H. Medhurst, Esq., &c., &c. R. ALCOCK.

## THE CUSTOMS' TRADE RETURNS FOR THE YEAR 1868.

The *Shanghai Recorder* thus sums up the main features in the above:—

The first feature to be noticed in the new returns is the very great expansion of foreign trade (pure and simple) which has taken place since the year 1864, and which has increased from the value of Tls. 105,000,000 in the former year to Tls. 140,000,000 in the latter, being an increase of one-third within five years. This increase is all the more satisfactory that the statistics of the five years show that it has been gradual, and that there does not seem any need of seeking for its causes in accidental or temporary circumstances. The second feature is the very satisfactory position which Great Britain occupies in the field. Of a total of exports and imports, amounting to the value of 140 millions and a quarter, no less than one hundred and twenty-two and a-half were either direct with Great Britain or her dependencies, representing therefore 87 per cent. of the entire. Next to Great Britain comes the United States, the entire of whose trade amounts to the sum of less than seven and a half millions, or a fraction over five per cent. Of this amount the trifling item of Tls. 833,000 represent the value of the imports into China from the United States. Curiously enough, while the value of the English trade with China has increased from Tls. 97 millions in 1864 to 122½ millions in 1868, or nearly thirty per cent., that of the United States has actually decreased. We recommend these figures to the notice of the *New York Herald* and the other newspapers which have been assuming on behalf of the States an influence comparable with that of Great Britain. Another noteworthy feature is the decrease in the consumption of foreign opium, the quantity imported having decreased from 64,500 piculs in 1866 to 54,000 in 1868. This decrease in the importation is, however, as has been shown by a contemporary, probably more than counterbalanced by the increased consumption of the

Digitized by Google

native drug. In shipping England cannot claim the same pre-eminence as in 1866. This is of course principally to be attributed to the increased number of American steamers plying on the river Yangtsze or on the coast in connection with the Hankow trade. The opening of the Pacific Mail line has likewise had a considerable effect. In the former year 57 per cent. of the tonnage entering and leaving Chinese ports was British. In 1868 this had diminished to 51 per cent., with an actual decrease in the gross tonnage. A considerable increase however in both tonnage and number of vessels has taken place since the year 1864. Next to British and American shipping, and composing about 8 per cent. of the whole, comes that of the North German States. The gross tonnage of vessels under the German flags, even with a portion of the Danish shipping transferred after the cession of the Schleswig-Holstein provinces, showed, contrary to general belief, an actual though slight decline.

The document is in every respect an interesting one; the tables have been arranged to give at a glance information most required. It is satisfactory to find, in the face of all that has been predicted, that the China trade still shows signs of healthy increase.

At the head of the first table in the Trade Returns the pithy sentence appears:—"It has to be remembered that the want of trade statistics at Hong Kong makes the returns of the Treaty Ports but an imperfect statement of the imports and exports of China," and adds:—"In this opinion we most cordially concur; we cannot but look upon it as a disgrace that with all the Governmental machinery at work in that colony no proper trade returns have ever been kept. Hong Kong is the great distributing centre for southern as Shanghai is for northern China. Without tables of its imports and exports we have advanced only half way towards a set of perfect statistics."

## HANKOW.

A correspondent at Hankow writes us as follows:—Excepting the arrival of Li Footai, nothing worthy of note has occurred here lately. He encamped outside the city, where, I am informed, numbers of Chinese officials did homage to him in the most obsequious manner. He has been similarly toadied throughout his entire passage up the river, many of the mandarins preparing sumptuous banquets, brilliant pageants, &c., only one of which he deigned to honour with his presence. It is stated that he sent up from Shanghai a small quantity of water, intended, I presume, as a hint that he wished the late Viceroy's palace to be well cleansed for his reception. Li has disbanded most of his army. He brought with him only two hundred of his body guard and a number of officers. He remained on board his junk, which has no "pesky bilers," during nearly the whole time of his passage up, she being towed by the *Tung-Chi*. I hear he purposes removing the Nanking arsenal up to this place, but, I presume, will first have to induce the Emperor to second the motion, which, for obvious reasons, he may not be inclined to do.

## HONG KONG.

The present mail left on the 30th March. The outward mail of January 29 was received March 12. The following items are from the *China Mail* and *Daily Press*:—

It is understood that Mr. E. W. Goodlake, who has now for some time been one of the magistrates of this colony, goes home on sick leave. Mr. Goodlake has received ten months' leave, and will, it is stated, go home in H.M.S. *Perseus*, for the benefit of the sea voyage. The name of Mr. Goodlake's successor has not transpired, but it would appear that some difficulty will be found in getting a suitable legal gentleman to take up the position of the departing justice.

The death of Major-General Brunker, commander of H.M.'s Forces in China, and Lieut.-Governor of Hong Kong, has caused deep regret in this colony. Although for some time he had not been in good health, no idea of his indisposition being of a dangerous nature was entertained, and his demise was a shock as sudden as it was severe. Major-General Brunker was gazetted as a cornet in 1825, and a Major-General in Nov. 1865. His service in the army thus extends over forty-four years. His career was one of unpretending usefulness and dignity; and, if not marked by any great military achievements, is nevertheless one that will long and respectfully be remembered on account of his personal qualities and considerate and kind disposition. The wife of Major-General Brunker died about nine months ago, and since that time he appeared more and more depressed. Shortly after Mrs. Brunker's death he went to Japan, and returned to this colony somewhat improved; but he seems never to have recovered from the shock which his wife's death occasioned.

The remains of the late Major-General Brunker were interred in the Cemetery at the Happy Valley with full military honours. The procession was marshalled on the Parade Ground, and started punctually at half-past three. A field battery led the way, and then, to the solemn strains of the "Dead March in Saul," the 75th Regiment marched slowly into the Queen's-road and towards the Cemetery. They were followed by the band of their regiment and that of the 29th Native Infantry. Then came the coffin, placed upon a gun-stand, and covered with the national ensign, the pall bearers consisting of Colonel Gore, Commandant, Doctor Hefferman, Inspector of Hospitals, Colonel Delsults, commanding the Royal Engineers, Commodore Jones, R.N., the Hon. J. Gardiner Austin, and Captain Raby, R.N.V.C. Following next to them, according to a touching custom in military funerals, the General's old charger was led by two soldiers of the 75th, and immediately behind were his Excellency the Governor, Captain Maxwell, D.A.A.G., Captain Shaw, D.A.G.G., and Captain Thompson, A.D.C., the chief mourners. The members of the Executive Council came next, and after them the 29th Regiment Native Infantry, followed by a large number of English, American and other naval officers, and, finally, by the civil servants of the colony, who were all in attendance, and a large number of private gentlemen.

The crowd at the parade ground was very large, and the road to the cemetery was nearly the whole length lined with spectators. The procession slowly wended its way in time to the music, broken by the booming of the minute guns, and passing the Guard-house, turned to the Praya, and marched by that route to the Cemetery. The hills surrounding the Wong-nei-chong valley were covered with spectators. On reaching the cemetery the soldiers of both regiments were told off on either side of the road, leaning upon their reversed muskets. The remainder of the procession followed the coffin to the chapel, while the soldiers took up their position outside the grave destined to receive the mortal remains of their late commander. The service was impressively read by the Rev. Canon Beach, assisted by the Revs. J. Piper and Kyle; and the coffin was then brought out and borne to its last resting place. As it was lowered into the grave the men of the 75th fired three volleys, which were answered by the minute guns hard by, and the impressive ceremony being closed, the troops were marshalled, and the procession returned homewards.

In addition to those mentioned as taking part in the ceremony, a large number of persons of distinction were present, among whom were Rear-Admiral Rowan, U.S.N., and Capts. Row and English, U.S.N.; the Hon. J. Smale, chief justice of Hong Kong; Sir Edmund Hornby, chief judge of the Supreme Court for China and Japan; M. Du Chesne, Consul for France; Mr. Helland, Danish consul; and Mr. Overbeck, Austrian consul, in their official uniforms; Mr. Pollard, Q.C.; Mr. Hayllar; Dr. Murray, colonial surgeon, and others. The 29th Regiment was under the command of Major Ritherdon, Capt. Grant, and Adjutant Prendergast. Captain-Superintendent Deane, who took command of the police, did good service, and was ably seconded by Mr. Assistant-Superintendent Creagh, who took charge of the Sikhs, and by Deputy-Superintendent Jarman, who was also very busy.

The Postmaster-General of Hong Kong has published a report, showing that reforms of a very extended nature have been made. The amount of orders transmitted from Hong Kong to the United Kingdom, in the course of the three months during which the system has been in operation, is £2,150; from Shanghai, £442; and from Yokohama, £220. A feature by no means unworthy of notice is the large amount that has been realised by the sale of postage stamps. Probably few people would be inclined to believe that as much as 133,802 dols. worth of stamps were sold at Hong Kong and the ports during the year 1868.

The report of the Union Insurance Society is issued in readiness for the meeting appointed for the 1st April. It shows a credit balance of 395,408.89 dols., in addition to the paid-up capital of 250,000 dols., and shows satisfactory progress, the business for the first quarter of 1869 showing an increase of 30,000 dols. on the corresponding period of the previous year.

The *China Mail* says, referring to some comments in the *Daily Press* on the gambling question, "Our contemporary this morning indulges in a homily on the vice of gambling, *apropos* of the last interview between the Secretary for the Colonies and the deputation from the Social Science Association on the subject of the gambling farm in Hong Kong. But it condemns the sins it is opposed to for the sake of those it is inclined to. It denounces the vice of gambling, but makes not the slightest allusion to the sin which the association denounces, namely, the deliberate utilization of that vice for the purposes of the Colonial Revenue. It is simply childish thus to avoid what is the real grievance in the complaint against his Excellency's policy in this respect. We believe, as we have said before, that it is necessary to legalise gambling among the Chinese in this colony in order to regulate it and keep its powers of mischief within a minimum area; and this may be done effectively without Her Majesty's Government here profiting in any other than a proper social and moral sense. As thus—Let the same number of houses be licensed as now exist; but instead of taking from the licensees a fee for regular absorption into the public revenue, let it be held as a cautionary deposit to be forfeited in the event of a breach by them of the Government rules, and conditionally on their affording assistance to the Government in discovering unlicensed gambling houses—an assistance which it would be obviously their interest to render, in order that their monopoly might be complete. The money thus forfeited might be absorbed in the general revenue, inasmuch as it would accrue as a fine for a breach of law, as a fine for drunkenness does, and would not be the direct result of legislation for revenue. To this mode of 'repression' Earl Granville would not object, and the suggestion we make may possibly remove the difficulty felt by the *China Express* and other home papers, as to what should be the shape of our repressive legislation in the matter of gambling. There would then be, no doubt, a defi-

Digitized by Google

ciency in the colonial revenue to a very serious extent; but there are two modes open to his Excellency by which he may recoup himself. He can apply the elastic qualities of the Stamp Act to the emergency, and bring into operation what he deems its chief merit as being the fairest mode of taxation in a colony like this; and he may reduce Government expenses, which we think on inquiry will be found utterly out of proportion to the actual requirements of the colony, either for the despatch of its enormous business, or in any respect of its Imperial position. But that will be a topic for discussion when the disgrace of the gambling revenue is removed—as we hope it will be soon."

The Portugese troop ship *Maria Pia*, which is daily expected from Lisbon, has on board about 200 soldiers for the garrison at Macao. Only two vessels now remain at Macao for despatch to Havanna with coolies. The present Governor, Admiral de Souza, has taken very strict precautions against the abuses which formerly existed in this traffic. The Emigration agent at Canton for the West Indian Committee (Mr. Sampson) has not sent any coolies forward this year, owing to the restrictions laid down in Sir R. Alcock's notification.

At a public meeting, held on St. Patrick's-day, the Governor made some rather disparaging remarks on the Chamber of Commerce, and these have led to a long and somewhat acrimonious controversy. The following letter will serve as a specimen:—

"Sir,—Is it possible that, after the Governor's remarks the other evening, no one will come forward to advocate a Representative Government? Are we men, are we infants, or are we fools? Is there no one amongst the leading merchants who will be bold enough to stand up and ask for a remedy against such a glaring evil as we have, official members of the Council (five to two against us) being *compelled* to vote for the Governor's measures? If no other person will 'bell the cat,' I will do so myself, but surely it is the province of the Chairman of the Chamber of Commerce, not personally, but *ex-officio*. I do not wish to endorse the Governor's remarks about the inefficiency of the Chamber, but I certainly will if some movement is not at once made in this very important matter. At present we are a set of children, with Sir Richard as our 'papa.'—I am, Sir, your obedient servant, "T. N. M."

### HONG KONG MARKETS.

The *Daily Press* of March 30 gives the following:—

A very large business has been doing to-day in the market for piece goods, and transactions have been on a large scale, especially for T-Cloths. The largest purchasers have been foreigners, on speculation, but the natives have also been liberal buyers. The Chinese have also been anxiously inquiring for yarn, but they invariably refuse to come up to the demands of holders. Upon the whole, the market must be considered to have slightly improved, both in tone and in rates, although some of the goods placed today have hardly realised a satisfactory return. Sales amount to 7,500 pieces 8-4 Grey Shirtings at 2.77½dols. to 2.85dols.., 500 pieces 7lbs. at 2.55dols., 9,850 pieces 7lbs. T-Cloth, fine quality, at 2.40 dols., 7,500 pieces Mexicans at 2.32½ dols. to 2.34 dols., 2,000 pieces Eagle chop at 2.26½ dols., 10,100 pieces ordinary quality, at 2.20 dols. to 2.24 dols., 3,000 pieces Singapore Cargo, 56 reed, at 2.15 dols., 1,000 pieces 7-8lbs. at 2.55 dols., 7,000 pieces 6lbs. at 1.90 dols., and 5,000 pieces 8lbs., 36 inches, at 2.87½ dols., 600 pieces 10lbs. T-Cloths at 4 dols., 250 pieces White Shirtings at 3.25 dols., and 400 dozen Blue Handkerchiefs at 73 cents. Raw Cotton is still very quiet, but the market is very firm, and prices advancing. There has not been much doing in shares. Small lots of both Old and New Banks have been placed at yesterday's rates. A small parcel of Steamboat found a buyer at 8 premium.

## COCHIN CHINA.

—o—

### SAIGON.

Advices by this mail come down to the 4th April. The demand for rice, the chief staple of export, had slackened, owing to the absence of demand for China. The crops in China being ample—this, of course, is due to the absence or the quelling of the rebellion, for which the Chinese have to thank England. The vessels now loading here are for Japan, and include the *Black Prince*, *Guinevere*, *Northfleet*, &c. Some are loading, also, for Europe, but the prices are not encouraging. Great progress is making here in buildings, &c., and in a short time Saigon will be quite a large place.

The European residents already number some five hundred, and the naval and military forces about eight thousand. There are new docks talked of, although the floating one of Randolph, Elder, and Co. still works well. Rice mills have also been erected by Mr. Nelson, an English engineer.

The telegraph wires, besides connecting the various stations for some ten or twenty miles, also extend to the entrance of the river Cape St. Jacque, and in a few months will be extended to the Gulf of Siam, from whence they can be connected with the India lines. Samples of silk go home by this mail reeled at Saigon. Indigo and cotton will soon be produced in quantities.

But fancy the freedom of the press in a new colony being so burked that nothing can be commented on—what a mistake!

The British Consul, Mr. Caswell, gets on smoothly, and it is supposed a U. S. Consul will be appointed soon.

## BORNEO.

—o—

### LABUAN.

Advices from this Colony are to the 25th March. The birth of a son to the Governor is announced, who was baptised on the 17th of March by the Very Rev. Padre Cuarteron, and called John Patrick Hope Hennessy. The sponsors, by proxy, were Mr. Monsell, M.P., and the Princess Sulkowska.

A correspondent writes under the above date:—"The Legislative Council Session for 1869 opened to-day, for the first time in public, on the occasion of the colony being no longer in dependence on a grant-in-aid from Parliament, and the event will be further inaugurated by the lighting of the town on the night of the 1st April next. From that date Victoria Town will be placed solely under the charge of the municipal commissioners, consisting of six of the principal native merchants, who highly appreciate the confidence reposed in them by Government. The colony remains healthy, and new roads are being made, leading to all parts of the island. There is a mania among the natives for land, in lots varying from 20 to 50 acres, for agricultural purposes, owing to the abolition of the land tax and the disturbances in Brunei. Numbers of Kadyans, with their families, are removing from Brunei."

"The Sulu trade continues to increase. The past year was a very profitable one to the traders here. The general trade of the colony is healthy.

"The coal mines are steadily improving, and good coals are being now obtained. The company's steamer *Vine* left for Saigon on the 20th inst., with a cargo of coals."

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

Dates hence are to April 7. The outward Mail of Feb. 26 was received on the 2nd April. The following items are from the *Singapore Daily Times*:—

It is stated in some quarters that the Governor will most likely leave the settlement for Europe at the close of the year, having applied for leave of absence.

We learn from the late home papers received by last mail that the Straits Settlements are to be placed under the See of Hong Kong, and not under that of Madras, as was formerly intended.

A fine steam-boat was launched from the works at Tanjong Pagar Dock, with steam up, and immediately proceeded on her trial trip. She is the property of a gentleman of this place, and is intended chiefly to visit the neighbouring islands in search of rare species of Orchids, and is therefore characteristically called the *Orchid*. The trial trip was very successful, the boat attaining a speed of seven knots with 45 lbs. of steam. Although costing only about one-third of the price of the new Government launch, the *Mata Mata*, the *Orchid*, contrasts favourably with that boat both in point of speed, and the superior finish of the work, which reflects great credit on the builder.

There is hope that Government House will be ready after all in time for the reception of Prince Alfred. According to the China papers Sir Harry Keppel has written home strongly recommending the postponement of H.R.H.'s visit to China until the cool weather sets in. There is a chance, therefore, that H.R.H. may make a longer stay in Australia or New Zealand or Japan so as to escape the hot weather of Shanghai and Hong Kong in August. We hope so, in order that longer time may be allowed to finish Government House, because we very much fear that the hurry-scurry with which the work is being pushed on at present will leave anything but a satisfactory result, and, besides being more expensive in itself, will entail far more expense from the endless repair which will hereafter be found necessary.

In connection with the Council, we have to note that there are now two seats of unofficial members vacant. There have never been more than four unofficial members appointed. But the charter constituting the colony contemplated the appointment of five. The honourable Dr. Little has resigned his seat, and no

Digitized by Google

one has yet been named in his place. The public are very anxious who will be appointed. The delay in filling the vacancy is attributed to the difficulty of finding any one willing to take the appointment, which is a significant indication of the estimation in which the Council is held by business men.

During the latter part of the fortnight considerable talk has been caused by the arrest of the two partners of Messrs. Locke, Hong Ghee, and Co. in whose store the fire which took place on the 17th ultimo originated, on a charge of arson. A coolie in their employ deposed circumstantially that he actually saw one of the partners setting fire to some straw in the back part of the store just before shutting up. The defendants were liberated upon bail for 10,000 dollars each, and the case came on for investigation before the sitting magistrate yesterday. The coolie then swore that his previous deposition, under which the arrest was made, was totally false and without any foundation. The defendants were liberated at once, and the coolie committed for perjury. It is to be hoped that he will be made an example of.

The *Daily Times* publishes the half-yearly report of the Tanjong Pagar Dock Company, and adds: "It is satisfactory to find this company continuing in its course of prosperity." At the meeting, the Chairman explained that the wharf having been by 6,430.02 dols. less profitable than during the half-year ending 30th June ultimo, mainly through the decrease in coal business, the showing of the balance sheet was not as satisfactory as could be desired. Beside which, the dock having been open but a little over two months, and the competition during that time having been most severe, the profits, though increased to the extent of 2,085 dols. from this source, were insufficient to cover the deficiency. In reference to an inquiry made by the Honourable Dr. Little, it was explained that the expenditure for the construction of the works being, with the exception of a very small outlay for dredging the dock entrance, now finished, a system of accounts which would be much more explicit was initiated, from which the shareholders would learn the exact amount of profit derived from each source more readily and satisfactorily. The directors again waived their claim to remuneration for services during the past half-year, and the report was adopted.

The Ocean Company's steamer *Agamemnon* arrived on the 3rd April, from Liverpool, and would sail from Hong Kong on the 8th.

# Shipping Intelligence.

## ARRIVALS.

At SHANGHAI.—None.

At HONG KONG and CANTON.—From Cardiff, March 26, Trega; from Newcastle, 28, Ille et Vilaine; from Rotterdam, 23, Constance.

At SINGAPORE.—From Liverpool, March 31, Eleanor Dickson; April 3, Agamemnon (str.); from Cardiff, March 30, Joseph Holm; from Newcastle, March 31, Mohely; April 1, Sidonie.

## DEPARTURES.

From SHANGHAI.—For New York, March 15, Monkchester.

From HONG KONG and CANTON.—None.

From SINGAPORE.—For Liverpool, April 3, Ribbleton; for Hamburg, March 30, Madagasca; for Boston, April 3, Dunmore.

## SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.— —, off Dungeness, from Akyab, for Antwerp, Chancellor; May 5, at Spithead, from Macao, for Hamburg, Glenisla; at Falmouth, from Samarang, for Amsterdam, Standard; from Colombo, Pacific; 6, at Deal, from Singapore, Bristow; from Foochow, Sovereign of India; 7, at London, from Colombo, Oriental; at Deal, from Foochow, James Shepherd; 6, at Motherbank, from Manila, Ardanza; at Falmouth, from Foochow, Victoria; from Saigon, Patria; from Bangkok, Psyche, West Australian; 7, from Maulmain, Almira; 3, off Scilly, from Batavia, for Rotterdam, Susanne; 4, from Philippine Islands, Cyclone; April 30, at Gibraltar, from Bangkok, Deucalion; 22, at Boston, from Foochow, Kjobenhavn; 24, from Singapore, Elizabeth; May 7, at London, from Maulmain, William; —, off Portsmouth, from Cochin China, Paulus; 7, at Falmouth, from Saigon, Princess Somawatty; April 28, at Boston, from Singapore, Margaret; May 7, at Falmouth, from Bangkok, Mary Tatham; off Dungeness, from Java, Golden City; —, at Crookhaven, from Bangkok, Florence Nightingale.

DEPARTURES.—From Newcastle, for Java, Regina Maris; from Rotterdam, for Singapore, Tollens; May 7, from London, for Batavia and Sourabaya, Sperwer; for Shanghai, Shun Lee; for Cardiff and Hong Kong, Serafin; 6, from Liverpool, for Yokohama, Grenadier; April 3, from San Francisco, for Hong Kong, Akbar.

LAID ON.—At London, for Shanghai, Beemah, Bristow; at Liverpool, for Shanghai, Aracan.

CASUALTIES.—The Burnside, Pendergrace, from Shanghai, arrived at New York, April 22, with loss of lower foretopsail, and other damage sustained during a cyclone, April 14.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

BAKER—On the 20th March, at Shanghai, the wife of Mr. Geo. Baker, of the Astor-house, of a son.

BRERETON—On the 16th March, at Rangoon, the wife of Lieut. C. W. Brereton, Adjutant, Royal Artillery, Pegu Division, of a son.

DOW—On the 23rd March, at Shanghai, Mrs. James Dow, of a son.

GOIS—On the 30th March, at Pearl's-hill, Singapore, the wife of Mr. H. E. Gois, of a son.

HENNESSY.—On the 7th of March, at Government-house, Labuan, the wife of his Excellency Governor Pope Hennessy, of a son.

JOAQUIM—On the 15th March, at Tanjong Pagar, Mrs. P. Joaquim, of a daughter.

LEWIS—On the 31st March, 1869, at Labuan, Mrs. J. W. N. Lewis, of a son.

PEAKE—On the 22nd April, at 13, Ladbroke-road, Notting-hill, London, the wife of Arthur Peake, Esq., of a daughter.

RITHERDON—On the 26th March, at Hong Kong, the wife of Major A. W. Ritherdon 29th Regt., M.N.I., of a son.

TARN—At Singapore, the widow of the late Capt. E. R. Tarn, of a daughter.

### MARRIAGES.

JARDINE—BORROW.—On the 23rd April, at St. Mary's, Renfield-street, Glasgow, by the Rev. J. Palmes, rector of Escrick, Yorkshire, uncle of the bridegroom, assisted by the Rev. R. Oldham, incumbent, Manfred L. P. Jardine, 67th Regt., younger son of the late J. Bruce Jardine, Esq., of Hallside, Lanarkshire, to Jane, daughter of William Geddes Borrow, Esq., of Seafield Tower, Ayrshire, N.B.

KOENITZ—PETERSON.—On the 11th March, at Sarawak, by the Rev. C. Hawkins Andrew Light Koenitz to Miss Alice Judith Peterson.

### DEATHS.

BRUNKER—On the 24th March, at Headquarter-house, Hong Kong, suddenly, Major-General Brunker, aged 62.

CANNON—On the 25th March, at Sinpapore, Ada Henrietta Toop, the beloved wife of Sampson Cannon, Sergeant Major, Royal Artillery, aged 30 years.

ROYLE—On the 17th April, at Lisbon, on board H.M.S. *Penelope*, Thomas Royle, Esq., aged 31, Paymaster of the Royal Navy and Secretary to Rear-Admiral Ryder.

WALTER—On the 22nd Feb., at Shanghai, China, in his 42nd year, after a long and painful illness, Theodore, fourth son of the late Joseph Walter, Esq., marine artist, of Bristol.

WOOD—On the 13th March, aged 34, John Key Wood, Esq., of San Francisco

WOODS—At Singapore, on the 7th April, the wife of R. C. Woods, Esq.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.

## GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, May 4.

After the defeat of Count Bismark on the question of appointing responsible Federal Ministers, one would have thought he would have been cautious of provoking further opposition from the Parliament, instead of which he has produced some new measures for raising the wind, the result of which appears to me to be very problematical. As the army and navy, as well as a few other branches of the public service, are now supported by the Confederation, the expenses are very heavy, and greatly exceed the revenue. The latter, indeed, consists of only one or two heads, principally the receipts of the Custom-house (or rather the share of the Confederated States out of the proceeds of the Zollverein) and the surplus of the Post and Telegraph-offices, so that the deficit in the last two annual Budgets had to be made good by means of what in German official financial jargon is called a *matricular-umlage*, which is a division of the sum amongst the separate States in the proportion of their population, leaving it to the different Governments to tax their own subjects in any way they liked best, so that the money was forthcoming. Count Bismark, however, who—with all respect for his thorough knowledge and experience of diplomacy be it said—has never paid much attention to the subject of finances, now appears in the new character of a Federal financier, and makes his *debût* before the Parliament with the proposal to create Federal taxes in partial mitigation of the above-mentioned mode of repartition. With this object his mind takes a wide range of articles suitable for taxation according to his notions, but in which he will probably be met by much determined opposition. They embrace spirits, beer, stamps, petroleum, and gas. In bringing in the Bill Count Bismark, on the part of the Federal Council, stated that money was required for the purposes of the Confederation, and gave them to understand he was not particular as to where it came from, so that they might make their choice of objects proposed to be taxed. It is proposed to fix an import duty of fifteen groschens (half a dollar, or 1s. 6d.) per centner on petroleum, and raise an inland tax of 2½ groschens per 1,000 cubic feet of gas, which is considered the equivalent, it being assumed that 1,000 feet of gas of the usual average quality give as much light as from 17 to 20 lbs. of refined petroleum. This tax is calculated to produce an annual revenue of 500,000 dollars per annum, and, if passed, is to come into operation on the 1st of September next. It is further proposed to make all contract notes for the sale and purchase of goods and merchandise of all descriptions, as well as of funds, shares, and other securities dealt in on the Stock Exchange, liable to a stamp-tax of one groschen. This is estimated to produce 300,000 dollars annually, it being taken as the basis of the calculation that at Berlin 5,000 such contract notes are made out every day, which in three hundred business days would give 100,000 dollars, whilst the other 200,000 dollars would be raised at Hamburg, Bremen, Frankfort, Cologne, Breslau, and Leipzig. These measures have for the present been referred to the Committee for Finances, to be examined and reported on, with what result remains to be seen.

An amusing scene was acted in the sitting of the Federal Parliament last week, when the proposed law for the abolition of franking letters and telegrams was under discussion. When the Parliament was created, three years ago, the members had the privilege of receiving and franking letters to an unlimited extent, but this was subsequently found to interfere so materially with the revenues of the Post-office, that the Federal Council required the members of Parliament to renounce their privilege. This was agreed to, but with the amendment of Count Renard, that the Chancellor be requested to bring in a Bill for a general revision of the existing exemptions. The provisions of this new Bill limit the right of receiving and transmitting letters and telegrams to the Heads and Members of the Sovereigns of the Confederation, the Federal authorities, and the Federal Parliament. For the present, however, the naval and military authorities are to retain the privilege, but all other exceptions are to be abolished. Dr. Becker, member for Dortmund, in proposing an amendment, complained of the loss of revenue by these privileges of franking, which amounted last year to no less than two and a-half millions of dollars. In support of his amendment he exposed some of the abuses that more especially required putting down, among which, not the least one, was that the free telegrams took precedence of those that were paid for, which was very inconvenient for the public, as the traffic was now so large, the number of telegrams now forwarded being just five times as many as ten years ago. "And it is truly wonderful," said the Doctor, "how the authorities understand spinning out their telegrams, and how they make use of the telegraph for the most trivial purposes. If, for instance, a soldier remains absent a day after the expiration of his furlough, down comes a telegram to the Burgermeister requiring him to hunt him up and send him to head-quarters. If it was necessary to have him back it may be right to telegraph for him, but surely it did not require a message containing sixty-two words. It is but right and courteous that the Sovereigns and princes of reigning dynasties should enjoy the right of free telegraphing, but it is certainly an abuse to delegate this privilege to their servants and suite. These telegrams are of the most promiscuous description possible to conceive. If the cook of a grand duke requires parsley for his master's sauce he telegraphs for it. He writes out the message and signs it with an S—the understood sign of its being free—and gets one of the officers of the household to countersign it, and furnish it with the Royal Seal, and then the parsley can be telegraphed for without payment, though there may be hundreds of paid telegrams waiting to be sent off. This was my own case once, when I was put to great inconvenience by having to wait a long time before I could send off an important despatch because the cook of a Prince telegraphed to the President of Police, in a city on the Rhine, to buy a fish for a dollar; that telegram, which I saw with my own eyes, bearing the signature and stamp of the department of the kitchen of the Prince's household. This immunity is also enjoyed by his gardener, his gamekeeper, the director of his Court theatre, and the Master of his Horse. Amongst the thousands of such telegrams the number of those on the real service of the State are very few. During the forty-eight hours that have elapsed since the draft of the Bill was put into my hands I have not yet been able to ascertain from the 'Gotha Genealogical Calendar' (here, to the great amusement of the House, he produced from his pocket a copy of that indispensable work) how many princes and princesses there are in the North German Confederation. I have only got as far as the letter L, and there I find more than fifty princes and princesses of the House of Lippe alone, who all enjoy the privilege of writing and telegraphing to an unlimited extent without any expense to themselves." After some remarks by the Government Commissioner the Bill was read the first time.

In the same sitting a resolution was moved by Herr Heubner for the suppression of lotteries in all the States of the Confederation, but it was opposed by the Government Commissioner, Count Schwerin, who doubted whether Parliament had the right of interfering with the financial arrangements of the separate States. The motion was negatived without a division.

The Naval Department has proposed that the time of officers and crews of ships of war serving on stations between the tropics shall count double as in time of war.

The President of the German Confederation has signified to the Governments of the European States having political and commercial relations with Japan, his intention of establishing a naval hospital for German sailors of the navy and the merchant service, on a plot of ground presented for the purpose by the Government of Japan, and situated at Yokohama.

The Nautical Association at Bremen has worked out the details of a plan for the establishment of a Federal Admiralty Court, with its seat at one of the seaports, having under its control all disputes on matters connected with shipping, charters, salvage, bottomry, marine insurances, consular jurisdiction, and prize-money. It will be forwarded to the Federal Council, and supported by a strong recommendation of the Senate of Bremen in favour of its being adopted.

### COMMERCIAL.

As the stock of Rangoon rice has been much reduced and importers were disposed to sell, the following sales were effected:—5,500 bags per Octavia, 12,000 bags per Helios, 8,000 bags per Aline, and 11,000 bags per Cameo. Full prices were paid. There is but little doing in cleaned grain. The Tea market is calm; common and good ordinary Congou may be quoted a shade higher. Amongst the sales of Green were 100/8 chests of Hyson, 900 boxes Imperial, and 200 boxes Gunpowder. In Spices there is no alteration to report, the demand for all descriptions being slack. Pepper: Well supported. Of China Galls a parcel of 200 chests lately arrived has been sold by importers at full rates. Spelter has been totally neglected, and no sales are recorded; but to-day the article appears to command some attention, and negotiations for several parcels have been entered into, though, as yet, none have been perfected. Discount, 4¼ per cent.

### SHIPPING.

ARRIVED.—Skjold, from Foochow (4,559 packages tea).

SAILED.—Mozambique, for Bangkok; Touy, for Singapore and Penang.

LOADING.—J. W. Lorenzen, for Singapore; Lola, for Manila; Herzog Ernst, Hong Kong, and Randers, for Hong Kong; Gustav and Figaro, for Shanghai.

### ARRIVALS AT BREMERHAVEN.

Johanna, from Batavia and Indramayo (9,860 bags rice, 571 kranjangs sugar, 731 bags curcuma, 9,202 bundles rattans); River Dee, from Bassein (12,677 bags rice, 1,436 chests cutch).

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, May 3.

One of your contemporaries stated some days ago (I believe it was the *Morning Star*) that a Ministerial crisis was about to break out in the Hague, the First Chamber having refused to aid the India Railway Company by guaranteeing the payment by the State of the interest of the last loan. Another paper stated, most authoritatively, that a "Reform Bill" had been carried by the Second Chamber. Of course I need not now trouble to contradict the statement that our Lords had outvoted the East India Railway Bill, as in a former letter I had the opportunity of communicating that it had been carried. All the statements in your contemporaries about a "Ministerial crisis" are entirely without foundation; and as regards the "Reform Bill," it is a fact that Mr. Heemskirk, ex-Minister, whom I may term the "Dutch Disraeli," has proposed such a measure, but only by way of amendment, so that the members declined to discuss the question.

Amongst the Bills which have passed the Second Chamber appears that by which all instructors and schoolmasters are exempted from paying the license tax. This is an important step to appease the anti-instruction law agitators. According to the statements of the Minister of the Financial Department it is probable that this tax will be entirely annulled next year, in order to promote trade and industry. The Sea-letter Bill passed also, after a very lengthened debate, from which I gather that when this Bill becomes law permission will be granted our Consuls to allow foreign ships to sail temporarily under our flag. It was stated by the Minister that this stipulation was necessary on behalf of the coast and river trade in China and Japan.

The Opposition is greatly annoyed at the success of the Government in carrying the East India Railway Company's Bill. After it had passed, Mr. van Goltstein interpellated the Minister about the manner

Digitized by Google

in which the loan was contracted. Of course his endeavour had no effect; neither had the interpellation of Mr. van Sypesteyn about the actual state of the West Coast of Africa. We only know that the Government will not at present send either a military or a naval expedition to that colony. The First Chamber met some days ago for the despatch of business.

Among political parties a general confusion prevails. Mr. Groen van Prinsterer has published pamphlets in which he urges the anti-revolutionary party not to support the Conservatives. Of course his followers will obey their leader. The Roman Catholics, who are supporters of the Conservatives, are also malcontents. One of the Roman Catholic members lately pointed out, as an urgent necessity, that the nation ought not to be represented according to their political convictions, but according to the number of persons belonging to each faith. In this case the Roman Catholics, Mr. Hoffmanns stated, should be represented by thirty members, instead of the fifteen who now sit in the *Binnenhof*. The Clerical and Liberal papers are filled with articles about this nonsensical reasoning. The Conservatives, however, do not move in the matter, which makes the Roman Catholics most indignant, and a rupture is not improbable. Then a sort of programme was published of a Radical-India party. It was inserted in a pamphlet by Mr. Des Amorie van der Hoeven, addressed to all "faithful Christians." Our Liberals are, the author says, Conservatives when there is any question about India affairs; all that India can do is to pay a yearly contribution to the Netherlands. The ex-editor of the *Bataviaasch Handelsblad* condemns Mr. Myer, the Governor-General, and the Colonial Minister, and foretells that we shall lose our rich empire in India unless Radical measures are introduced. This *brochure* was published the day after Mr. Reuter's telegrams announced that a revolution had broken out in Java, in the neighbourhood of Buitenzorg, and the little book made, in consequence, an enormous sensation. We, however, cannot know the real value of that telegram with any degree of certainty, and, perhaps, the papers by the next mail will make us no wiser than before, the telegram stating that the Java papers were forbidden to communicate any particulars.

The general agitation prevailing amongst the English and Belgian workmen begins to operate in our country also, and in several places a strike is looked upon as inevitable. The ship carpenters at Amsterdam have declined further work unless their wages are increased and the work hours decreased. In Walcheren disorder prevails amongst the navvies. The Dutch try to expel the Belgians because the last named incline to work for lower wages. Several serious *emeutes* have taken place, in which lives were lost. The turf makers in Friesland are also declining to work without increased pay; the compositors are organising a strike, and, in one word, there is general discontent among the workmen.

The Dutch India Gas Company has issued its prospectus for a loan of 300,000f., at an interest of 6 per cent.

I hear that Mr. de Bosch Kemper, the leader of the conciliatory party, will shortly resign his seat in the Second Chamber.

According to the report of the Chamber of Trade, at Euschede, the cotton manufactories have not given a good result during the year 1868. The fluctuation of the prices of raw cotton and yarns, large exports to the E. I. market, important bankruptcies in the East, and the pernicious influence of the culture system, by which the wealth of the India population has been decreased, and buying on the part of the Javanese rendered nearly impossible, are given as the reasons that our Dutch Manchester is not in a flourishing condition. The manufacturers, it is stated, are seeking other markets for their goods, especially those of China, Japan and Singapore.

According to the *Middleburger Courant*, the Minister of the Colonial Department will shortly lay before Parliament a Bill to regulate the cultivation of sugar in our E. I. colonies.

Mr. de Graeff van Polsbroek, our minister-resident in Japan, arrived some days ago at the Hague, and was received by the King.

The medical officer of the Japanese Government, Mr. Itoo Gempak, has been appointed physician in ordinary to the Mikado. He studied here at the Marine Hospital of Nieuwe Diep, and the hospital in this town.

I regret that I have to record the death of one of our ablest dictionary composers, the well known J. Kramers, Jr., from Gonda.

## COMMERCIAL INTELLIGENCE.

The tone of the Money and Stock Markets has been generally dull, several circumstances having occurred on which to base operations for the fall. Home funds improved somewhat at the closing of the market. Dutch Two-and-a-Half per Cents., 54⅛; Three per Cents., 64; Four per Cents., 86; Trading Company, 127⅛; Netherlands India Railway, 49; ditto (guaranteed), 92¼; International Bank, 40⅜; Rotterdam Bank, 82½. The Netherlands Bank has again raised the rate of discount, which is now fixed as follows:—Discount bills, 3 per cent.; acceptances, 3½ per cent.

## PRODUCE MARKETS.

COFFEE.—Since my last report the market has been very dull, and there is not much demand for the lots resulting from the last Trading Company's auction. It was thought that the prices paid should be higher. The private transactions include 894 b. Java, ex Bilderdyk, at 44 to 44½c.; 500 b. do., ex Garibaldi; 2,700 b. do., ex Johanna; 1,500 b., ex Jennie Eastman; 1,160 b. ex Isaac da Costa, at 40½ to 47c.; 2,300 b. Padang, ex Jacoba Helena, at 42½ to 47½c.; 383 b. Java, at 25 to 38½c. The unsold stock of the Trading Company is 385,800 b., and the stock on warrants 172,915 b. The total stock is 650,000 b., whilst 162,200 b. East India coffee are floating.

SUGAR (RAW).—The Trading Company has announced its auction, which will take place on the 25th inst., when 70,400 b. Java sugar will be offered. The market remains very dull, and the transactions are limited; they only include 2,449 mats Samarang, ex Jennie Eastman, No. 14; 697 mats Sourabaya, ex Johanna Kepler, No. 11½, at 35f.; 445 mats do., ex do., No. 9½, at 34½. The stock in bond was on the 15th ult. 40,942,065 kilo.

RICE.—There is a good demand; 2,660 b. Java, ex Noach II., and 2,182 b. table rice, ex Kinderdyk, having been sold. In Amsterdam the following parcels have changed hands: 658 b. Java, ex Emilie, at 7⅛f.; 248 b. do., ex do., at 7⅜f.; 2,636 b. Sourabaya, ex Robertus Hendrikus, at 5½f.; 1,063 b. Java, ex Johanna.

SPICES.—Without transactions, whilst the quotations are unaltered. In public sale 35 chests Nutmegs and 23 chests Mace, ex Bremen, were offered. The unsold stock is 973 casks Nutmegs, 306 c. Mace, 390 casks Cloves, 1,143 b. Pepper; and the stock on warrants 3,944 casks Nutmegs and 366 c. Mace.

TEA.—The market is very firm. The 531/4 and 384/12 chests China, ex Mountain Ash, were sold in auction at 93c. to 134c. for superfine Congou, and 226c. to 229c. for finest flowery Pekoe.

TOBACCO.—Generally very dull; only 291 b. Java B ▼ L R sold.

MANILA CIGARS.—On the 29th April were sold in auction 500 mille, 2a Cortados 1868, at 13f. to 26½; 300 mille, at 22½f. to 36½f.

INDIGO meets with a regular demand, but there is want of stock.

BANCA TIN.—The market is dull; in the last days of April the quotation was 82½f., whilst at the closing of the market 2,500 slabs sold at 78½f. The unsold Trading Company's stock is 26,955 slabs, and on warrants 56,822 slabs. The stock of Billiton is 4,300 slabs.

HIDES.—A fair business has been done since the departure of last mail. 905 p. Passaroeang Buffalo, ex Noord Brabant, sold at 31⅛ to 32¾c.; 1,031 ps. Passaroeang Rinder, ex ditto, at 51⅝ to 53½c.; 505 ps. Macassar Buffalo, and 45 ditto Rinder, ex Vrachtzoeker; 1,500 ps. Passaroeang Rinder, ex Jannetje; 807 ps. Padang, ex Maria Sarah 500 ps. Samarang Rinder, ex Isaac da Costa.

MISCELLANEOUS.—Camphor unaltered, but holders decline to operate at the current quotations. Sago-meal, 80 b., ex Maria Sarah, sold at 8¾f. Long Pepper nominal, at 18c. Rattans, 140 piculs, ex Noord, Brabant, sold; likewise 75 piculs, ex Johanna, and 275 piculs, ex D. H. Wätjen. Gum Damar, 300 chests, floating, per Damio, sold by inscription at secret prices.

## SHIPPING INTELLIGENCE.

ARRIVALS.—April 21, at Brouwershaven, from Banjoewangie, Alblasserdam; from Saigon, Lalla Rookh; at Texel, from Batavia, Admiraal de Ruyter; from Passaroeang, Aldeboran; 28, at Texel, from Batavia, Grefve Berg; 27, at Brouwershaven, from Banjoewangie, Joutsen; 28, at Brouwershaven, from Banjoewangie, Jedo; May 3, at Texel, from Banjoewangie, India.

DEPARTURES.—April 22, from Brouwershaven, for Batavia, Tonia; for Sourabaya, Vier Gezusters; from Zierikzee, for Melbourne, Vooruit; 25, from Brouwershaven, for Batavia, Kosmopoliet II.; 26, from Hellevoet, for Batavia, Hoek van Holland; from Texel, for Samarang, Schelde; 28, from Texel, for Batavia, Djawa, Ida Elizabeth; 29, from Texel, for Sourabaya, Juno; April 30, from Texel, for Batavia, Jan Pieterszoon Koen; from Brouwershaven, for Java (via Cardiff), Patriarch Samhiri, L. J. Enthoven.

PASSENGERS INWARD.—From Java: Per Aldeboran, Mr. J. Dekkers; per Johannes Lodewyk, Mr. P. Sheltema, Bouduin and family; per Alblasserdam, five soldiers.

PASSENGERS OUTWARD.—For Java: Per Tonia, Messrs. H. W. Z. Sikman and family, J. C. Brugman and family, A. Burger and family.

## NEW YORK MARKETS.

### TEA.

The total receipts of Tea from China and Japan in the United States from the 1st January to the 21st April, 1869, were as follows:—Greens, 10,923,924 lbs.; Japans, 6,258,628 lbs.; Souchongs, 940,985 lbs.; Oolongs, 4,322,065 lbs.; other sorts, 204,500 lbs.; total, 22,650,102 lbs. The stock on the 1st January was 9.577,014 lbs.; which, added to the above total, gives a result of 32,227,116 lbs. Subtracting from this total the exports from 1st January to the 21st April, 1,162,550 lbs., and the withdrawals for home consumption during that period, 14,328,969 lbs., there remains a total of 16,735,597 lbs., representing the stock on the last-named date. The receipts from April 7th to April 21st amounted to 3,651,783 lbs., the withdrawals for home consumption to 1,557,758 lbs., and the exports to 267,527 lbs.

The following is from Messrs. Beebe Brothers' Circular:—

Since our report of the 9th April the ruling feature of the tea market has been one of dulness, and transactions (other than in Japans) quite moderate. These have been in demand for export to Canada, and buyers for that market have taken during the fortnight about 16,000 half-chests, mostly of low and medium grade, and including the entire cargo per Unison, from Nagasaki. Prices realised show a decline of one to two cents per lb. In Greens, less than the usual amount of business has been done, and quotations show a further reduction in cargo kinds. For Oolongs the demand continues limited, and the bulk of sales reported are from the cargo of old crop Amoy goods, ex N. B. Palmer. Nothing further has been done in new crop Foochow teas, the views of the trade being too far below those of importers to permit sales for the present. The sales of the fortnight, reported from first hands, are 5,300 half-chests Green, 21,500 half-chests Japan, and 6,600 half-chests Oolong. The market generally closes without animation, the trade limiting purchases to the supply of immediate wants.

Current quotations (in gold, duty paid):—Congou and Souchong: Dusty and common, 43c. to 48; good cargo, 51c. to 53; superior, 56c. to 58; fine, 62c. to 65; extra fine to finest, 70c. to 90. Foochow Oolongs: Fair cargo, 50c. to 52; good, 53c. to 55; superior, 58c. to 60; fine, 62c. to 65; extra fine and finest, 75c. to 100. Amoy Oolongs: Fair cargo, 48c. to 50; good, 52c. to 54; superior, 56c. to 58; fine, 60c. to 63; extra fine and finest, 65c. to 70. Japans: Common, 52c. to 54; medium, 57c. to 60; good medium, 61c. to 62; fine, 64c. to 66; finest, 68c. to 70. Greens (Moyune, Twankay, and Fychow), Gunpowder, 75c. to 118; Imperial, 63c. to 105; Young Hyson, 50c. to 105; Hyson, 58c. to 100; Hyson Skin, 50c. to 62.

---

Velocipedes (says the *Shanghai News Letter*) have ceased to be a novelty in the streets of that city; the untaught Chinese ponies have become so used to them that they are no longer frightened.

## TERMINATION OF THE CIVIL WAR IN JAPAN.

IN the Japanese calendar the year "Tatsû" corresponds with our year Anno Domini 1868; though commencing and ending about six weeks later, it is of the same annual duration. That year will, in all probability, be the most memorable in the annals of Japan, from which future generations in the "Land of the Rising Sun" will date a new era in their political condition that may in time completely change the destinies of the nation. At its commencement the administrative power that had held the reins of government through the semi-hereditary and elective Shiogoons was superseded, and the post—which had become sacred through an existence of three centuries—was abolished by order of the MIKADO, as sole hereditary Sovereign of Japan. Then arose a sanguinary internecine war between the partisans of the deposed SHIOGOON and the adherents of the MIKADO. The struggle at times was desperate, and reached its culminating point in the environs of Kioto—hitherto the metropolis of Japan and city of the MIKADO—when the destiny of the nation was trembling in the balance. Victory came to the arms of the MIKADO'S forces through the defection of a Daimio in the SHIOGOON'S army, who came over with his retainers to the legitimate cause at the eleventh hour. This was the signal for a retreat upon Osaka; but before they reached half way it was cut off by a force in ambuscade, the enemy were put to the rout, and the SHIOGOON fled in disorder to his chief stronghold in the City of Yedo. There YOSHI HISA repined over his adverse fortunes, until his noble nature caused him to repent of having taken up arms against his legitimate sovereign, and in a spirit of humility he sent in his resignation as the last of the SHIOGOONS. He then left Yedo, that his forefathers had made, not only the most populous and flourishing city in Japan, but in all Eastern Asia. This the youthful MIKADO and his new Government acknowledged by proclamation on the seventh moon in the memorable year Tatsu, as follows:—"Being now established in "my reign and in the government over all the people of "Japan, I have taken into consideration that Yedo is well "adapted for the seat of Government, inasmuch as it is the "greatest, the most populous, and the wealthiest city in the "Eastern Empire. I therefore decree that Yedo shall be "the seat of my Government, and the city shall henceforth "be called *Toukéi*, or the Eastern Capital. This I do be-"cause I consider my whole empire as but one body, and "therefore I am anxious to show no partiality to either the "Eastern or Western provinces." Following up the declaration of undivided sovereignty announced in this proclamation, the MIKADO entered his new capital in person on the ninth moon—corresponding to December. There, in the Hall of the Shiogoons, he established his throne, which in the eyes of his subjects was crowning the edifice of his supreme power. This was acknowledged in the month following by the representatives of all the foreign Treaty Powers with Japan, who on the 5th January had a solemn audience of the youthful monarch, whom they addressed as his Majesty the MIKADO of JAPAN, and exchanged addresses made on behalf of their own sovereigns and president, to which gracious replies were given, and the treaties of amity and commerce thereby finally ratified.

This audience, and interchange of diplomatic relations, was significant for both parties; while it virtually ended the revolution on the one hand, it strengthened the hands of the MIKADO, in being officially recognised by the Representatives of Foreign Powers. Hitherto Ministers had issued declarations of neutrality towards the contending parties, but these were withdrawn immediately after the audience, thereby recognising his Majesty the MIKADO as the legitimate sovereign, and friendly ally of Foreign Treaty Powers. These are the incidents, briefly stated, which mark the commencement, culmination, and termination of the Civil War in Japan. But it was not without a desperate resistance on the part of the disaffected Daimios and their followers, who refused to surrender with the ex-SHIOGOON, that so much was accomplished. AIDZU, the leader of the malcontents, held out for a long time, until he and his retainers, at the fortified city of Wakamatz, were besieged, and had to surrender in the face of famine. He was taken to Yedo, where he was treated with respect by his offended sovereign, on account of his noble birth and actions. The Royal clemency was extended towards him and other leading Daimios who had surrendered. Still, at the close of the year, there was a considerable body of insurgents in arms against the MIKADO'S cause, led on by ENNOMOTO, admiral of the foreign-equipped fleet under the SHIOGOON. With him were eight French officers, naval and military, some deserters from their own service, who continued, by their presence and acts, to fan the lingering embers of rebellion, which, in all probability, but for their countenance would have ended sooner. This remnant of the opposing forces against those of the MIKADO consisted of four thousand men, with four transports and two ships of war. After the defeat of AIDZU, and the capture of Ne-e-gata and Wakamatz, ENNOMATO sailed with his fleet for the island of Yesso, attacked the treaty port of Hakodadi, and took possession of the place. Here it is worthy of note that the French officers were the leading men in the attack, as described by our correspondent at Yokohama. "The landing party," he stated, "was headed by Captain BRUNET, a French officer in "the service of the SHIOGOON. The rebel force consisted of "Captain BRUNET and seven others, with a Japanese corvette, "the *Kayomaru*, 25 guns, *Eagle*, 8 guns, and four transports, "carrying 4,000 troops. These troops landed in Volcano "Bay, and after several skirmishes fought their way through "thick snow to a strong battery called Kamittor. This bat-"tery was taken by storm, and an entrance into Hakodadi "followed—the MIKADO'S troops taking shelter in a steamer, "and proceeding to Tougono, on the other side of the island "of Yesso." Here they took their stand, and issued quasi-proclamations, announcing the establishment of a Republic in the island, and requesting the Foreign Powers to acknowledge their supremacy in that part of the MIKADO'S territory. These overtures ended in smoke, though they levied taxes upon Foreign merchandise entering the harbour, and it became evident that the forces of the Foreign Powers would have to interfere for the protection of their own rights and privileges. Whether this contingency being apparent to the French adventurers with the insurgents does not appear, but we learn that the main body have evacuated Hakodadi, and taken possession of the small isle of Sado, on the west coast of Nippon, in the Japan Sea. Arrived at this place, their forces have been seriously crippled by the loss of "the *Kayomaru*, "a splendidly-equipped and most solidly-built new Dutch "frigate, sold to Japan the year before last, having gone to "pieces on the coast a few miles north of Hakodadi." Thus the fortunes of the desperadoes who still hold out against legitimate authority are at a very low ebb, and we may look to an early date for their complete suppression, with the restoration of peace to the Land of the Rising Sun.

---

IT seems there is to be another change in the United States Mission at Peking. Mr. J. ROSS BROWNE is not considered a sufficiently good Republican to hold office under the new Administration, so he is to make way for Mr. HOWARD, whose nomination for the post has already been confirmed by the Senate. Under the curious system in vogue at Washington such appointments as this are made or cancelled solely on party grounds, and apparently with little regard to individual merit.

---

M. DE LESSEPS has arrived in Paris with an official invitation from the Viceroy of Egypt to the Empress EUGENIE, to be present at the inauguration of the Suez Canal, and to preside at the Fêtes that are to celebrate the occasion. The ceremony is now fixed for the 16th of October.

## THE STRAITS SETTLEMENTS ASSOCIATION.

Under the auspices of this Association, a deputation of gentlemen connected with, or interested in, the Straits Settlements, waited on Lord GRANVILLE on Tuesday last, the 4th inst., for the purpose of calling his lordship's attention to the condition of the Colony, and asking for some reforms in its government. An account of the proceedings which has appeared in a daily contemporary conveys a very inaccurate idea of what took place; we are not quite prepared with an accurate and full report ourselves, but can promise one in our next issue. In the meantime it will be sufficient to say that the deputation was very courteously received; that with regard to the first point urged by the deputation, namely, the extravagant expenditure of the local Government, Lord GRANVILLE said he had already communicated with Governor ORD; and that the other principal points, namely, the reform of the Legislative Council and the independence of the judges, should have fair consideration. The proceedings took a conversational turn, and in the course of them Lord GRANVILLE adduced some arguments in favour of the existing system on which we shall offer some comments when we present a full report.

Among the gentlemen present were—Mr. J. B. Smith, M.P.; Mr. E. M. Richards, M.P.; Colonel Gray, M.P.; Mr. J. D. Nicol, M.P.; Major Waterhouse, M.P.; Mr. Horsman, late M.P. for Stroud; Mr. W. Napier, Mr. James Guthrie, Mr. W. Paterson, Mr. S. Gilfillan, Mr. P. F. Tidman, Mr. James Frazer, Mr. E. Boustead, Mr. Young, Mr. J. Little, Mr. J. Harvey, Mr. C. R. Rigg, &c.

---

A TELEGRAM from Hong Kong, dated April 5, and published by Mr. Reuter, says, "Consul SWINHOE has been re-"called on account of his proceedings in Formosa." How any action of Consul SWINHOE's in connection with the recent events in Formosa could have justified his recall, even in the eyes of the present curiously-constituted Cabinet, was quite unintelligible; but a short letter in *The Times* from a relative of that gentleman throws some light on the affair. Mrs. SWINHOE writes, "The Earl of CLARENDON has autho-"rised me to deny the report. Mr. Consul SWINHOE has not "been recalled, and certainly not on account of any act of his "in connection with the late disturbances in Formosa." So the telegram probably refers only to the already-known removal of Mr. Consul GIBSON, the confusion of names originating in carelessness on the part of the sender of the telegram.

---

IN the shape of a pamphlet, and under the title of "A Reply to the Charges brought against Protestant Missions in China," there has just been published a letter written by the Rev. CARSTAIRS DOUGLAS, M.A., of Amoy, and addressed to the Editor of *The Times*. It is introduced by a preface from the pen of Mr. DONALD MATHESON, one of the Committee of the English Presbyterian Church Mission, to which Mr. CARSTAIRS DOUGLAS belongs. The pamphlet only reached us at a late hour yesterday, so we must reserve our comments for a future issue.

---

MR. BURLINGHAME is still in Paris, and has, we hear, been suffering from a slight illness. It is believed that the Mission will visit Berlin and St. Petersburg before returning to London, but nothing is definitely settled as yet. The ball of the Chinese Mission has been a nine days' wonder, but with regard to its diplomatic achievements nothing has transpired.

---

THE new Persian Gulf cable, which has been reshipped on board the ship *Calcutta*, has been discovered to be defective in both coils, and must be discharged for further examination to ascertain the mischief. It is reported that a new cable will be required to be constructed to take its place, the defects being so extensive.

---

IT was stated the other day in the Italian Senate that a through train between Susa and Brindisi will be established next month, but that no arrangements will be made for forwarding the Indian mails by the line until the completion of the Mont Cenis tunnel.

---

THE *Army and Navy Gazette* states that Major-General WHITFIELD, late of the 2nd West India Regiment, will succeed the late General BRUNKER in command of the troops in China and Japan.

## THE TRADE-ROUTE TO WESTERN CHINA.

At a recent meeting of the Council of the Morley Chamber of Commerce, held at the Town Hall, Morley, on Tuesday evening, a number of gentlemen were present who had been invited to meet Captain Sprye, a gentleman well known amongst commercial men in the district, and indeed throughout the country, for his untiring exertions through many years to effect, through the medium of the English Government and the Government of India, the opening up of a route to Western China; Mr. S. KAYE, President, in the chair.

The PRESIDENT rose and said it was with great pleasure that he was present that evening, more especially as a gentleman was with them who had been long engaged in promoting the interests of commerce abroad, and who had kindly attended in order that he might point out to them the new route which he had thought for several years ought to be opened to Western China. He (the speaker) had long taken a deep interest in Captain Sprye's exertions to effect this, and was fully persuaded that they had been of no ordinary character; in fact, that there was no one but himself who knew the difficulties he had had to cope with in the shape of red-tapeism at home, and official obstructiveness at Calcutta, where commerce with India had ever been discouraged by the ruling authorities. He was, however, glad to think the project was nearer being carried out than was expected some time ago. He recollected reading some years ago that Captain Sprye and his son had proved the feasibility of making a railway and roads to Western China, and that the people dwelling in the districts through which it was proposed they should pass were favourable to the project. The Indian Government, however, obstructed the carrying out of the scheme, and ordered the survey of another route, which was, so far as he was able to judge, a very circuitous one, and utterly incapable of serving the *commercial* purposes for which it was required; and after being at considerable expense in prosecuting that survey, the work of opening a trade route by it to Western China was deemed impracticable, and abandoned. He believed the non-success of Captain Sprye in seeking to effect his object was attributable to that red-tapeism that had prevailed in this country for a long time, and which he hoped would soon be abolished. He had great pleasure in introducing Captain Sprye to the meeting.

Captain SPRYE, who had received a cordial welcome from the gentlemen present, proceeded to point out, on maps which he had with him for the purpose, the route which he had striven for the past ten years to induce the English and Indian Governments to open out to Western China. He called attention to the thorough practicability of such a project, and refuted allegations made to the contrary by the Indian Government and members of English Ministries. He next showed the great impetus which English commerce would derive from the carrying out of his project, there being not fewer than a hundred millions of human beings dwelling in the countries which the route would commercially command, who had never seen English manufactures, and who would gladly purchase them. The numberless efforts which he and his late son had made to promote the opening up of the route, Captain Sprye also alluded to, and in turn spoke of the rebuffs which they had met with at the hands of the Indian Government and members of the English Ministry. He condemned the self-seeking of the former in obstructing his efforts, and deprecated the apathy and inertness of the latter in not having long since surveyed the route and thereby ascertained whether the project was a practical one or not; and whether the commerce of this country would be benefited by its adoption. In conclusion, he said the question was whether English commerce was to be for ever shut out from Western China and the extensive adjacent countries with which the Western Chinese regularly traded in caravans, and observed that if the commercial men of this country were desirous that they should find markets there they must let the House of Commons know their wishes, and impress upon it the necessity of opening up a route to that country. The Chambers of Commerce of Halifax, Wakefield, Bradford, Huddersfield, and other important manufacturing districts, were all in favour of the project, and he believed that of Leeds was also. One of them had already petitioned the House in its favour, and others were about to do so; and then they would get a discussion upon it in Parliament and drive the truth into those Government officials who had hitherto, for mere obstructive purposes, declared the project impracticable. At the India-office he was of course not a very popular man, and unless he was supported by the great commercial interests of the community his individual efforts must continue to be in vain.

On the motion of Mr. WATSON, seconded by Mr. STOCKWELL, a vote of thanks was accorded to Captain Sprye for his able address, and it was resolved that the Chamber should give the important subject which he had laid before it its earnest consideration.

## A RATHER SUGGESTIVE PARALLEL.

"Advices from Peking state that Sir Rutherford Alcock has entirely repudiated the assertion of Mr. Burlinghame, to the effect that the Chinese desire progress. Sir Rutherford is about to proceed on a tour of exploration in the province of Se-Chuen, with a view to collecting information for the use of the treaty revisers. It is reported that some Catholic missionaries and several hundred native converts have recently been murdered in the province of Se-Chuen."

"* * * He trusted that the stringent instructions which he had sent out, and the good sense of the missionaries themselves, would bring about a better state of things, and for this no moment could be more favourable than the present, for he had received a telegram from Sir R. Alcock informing him that order was restored in all quarters; that the instructions recently sent out had been communicated to the Prince of Kung, that the best understanding existed between the Prince and the

Digitized by Google

"A despatch from Sir R. Alcock has been published on the subject of the introduction of railways and telegraphs into China. Sir Rutherford says that notwithstanding the promises made by the Burlinghame Mission to Europe and America, the Central Government at Peking shows no desire for progress according to Western ideas and desires, but, on the contrary, will not yield to the introduction of any such projects except under pressure and coercion.' — *Reuter's Telegrams, dated Shanghai, March* 31.

Foreign Ministers, *that there was no more cause for anxiety in any point*, and that our relations with China had never been more satisfactory." — *Lord Clarendon's Speech in the House of Lords, April* 5.

## THE COMING TEA SEASON.

(To the Editor of the *London and China Telegraph.*)

SIR,—Your article on this subject on the 19th ultimo, and the letter from "A China Merchant" in your issue of the 1st inst., will be much appreciated by all readers desiring to see the China Tea Trade once again conducted on sound and reasonable mercantile principles. Of late years it has been a simple scramble, all reference to quality for price, supply, and demand having been lost sight of in a general rush to ship tea. The season now closing, with its enormous losses, may induce more cautious action; if not, let the prudent trader stand aside whilst the reckless man of straw pursues his career, adding to his debit balances, already probably heavy, in the books of those who, for the sake of a commission, are willing to obtain, somehow or other, facilities for the prosecution of business to an extent that men of credit, standing, and capital would not engage themselves.

The system of private trading by tea-tasters, and the granting them large credits, as some of the merchant brokers do, cannot be too much reprobated, and might, I think, be remedied by the principals of firms taking a decided and uncompromising stand in the matter.

1st. I would forbid unconditionally all private trading when making terms with a tea-taster. When he has proved himself worthy of assistance beyond his salary, no firm would object to his having a small interest in their shipments. Under the present system the most worthless are those who obtain the greatest facilities, because they are unscrupulous how they obtain and how they use them. Of recent years merchants' houses have in many cases harboured men who, living free of expense and being well paid, have been their employers' great antagonists. This dishonest state of affairs has been fostered, as it was initiated, by the merchant broker.

2nd. I would urge importers to refuse support to any broker who identified himself or in any way countenanced the system above alluded to. Let him renounce his title of broker and become merchant if he desires to do merchant's business.—Your obedient servant,

London, May 3, 1869. OLD CANTON.

## MR. LAURENCE OLIPHANT IN AMERICA.

Under the heading of "A Strange Colony," a correspondent of the *Buffalo Express* writes:—"Brocton, a quiet place, fifty miles westward of Buffalo, and hitherto known only for its superior wines and grapes, has recently attained celebrity as the residence of Laurence Oliphant, the British diplomatist and legislator. The report that he had disappeared from the fashionable world of London, and from Parliament, and joined a semi-religious, semi-socialistic community has been extensively circulated. Yesterday (March 24) I made a flying visit to the grounds of the community to which he belongs, and of which he is the cashier and business agent. While passing through the village we met a lady and gentleman in a sleigh. The latter, in spite of his plain attire, in no wise different from the working clothes of any farmer, bore about him the unmistakable air of breeding and culture which distinguished him at a glance. He halted and engaged in conversation with Mr. Ryckman, an introduction from whom confirmed the surmise that the gentleman was no other than the former star of Belgravia and petted companion of Royalty; Mrs. Oliphant was with him. Arrived at the office, we were joined in a few moments by Mr. Oliphant, who at once proposed to exhibit the grounds. The first visit was to a greenhouse. He then proceeded to show us vineyards. To the north of the office, and close by the bank of Lake Erie, is the old Millet homestead. The house has been removed, and on its site an elegant cottage *ornée* erected. Here Mr. Oliphant lives with his family. The entire grounds of the society embrace 1,600 acres, lying mostly between the main road and the lake. The head of the organisation is Mr. Harris, a nephew of T. Harris, United States Minister to Spain. Mr. Harris came here two years since, and going from one farmer to another obtained refusals of their respective farms. No one was aware of the general sweep he was making, and when he had completed his negotiations the entire farming community of a region embracing nearly three square miles discovered that they had sold out. In the course of the season the entire colony of over twenty families came on and took possession. Mr. Harris was a resident of Duchess-county. He is the originator of a new system of theology, which resembles the teachings of Emmanuel Swedenborg. The members of the colony are converts. The property is held in common, but in other respects there is nothing socialistic in the system. The family is sacredly guarded. While they are frank in their business intercourse with the world, they are reticent in all matters peculiar to themselves, nor do they cultivate social relations outside their community. So strong is the desire to seclude that they are removing the highway from its former course. The intervening space thus created between their dwellings and the road will be laid out in park. The almost exclusive branch of industry is grape growing, with a share of attention to other lines of horticulture. Thirty acres are set to one variety of grape—though other varieties are cultivated. It is evident that the accession of so much capital, industry, and intelligence will add greatly to the wealth. A few years of skilful management of the place will convert the entire tract into one of the loveliest and most productive places in the country. It is not known where Mr. Oliphant first came in contact with the religious teachings which brought about so strange a revolution in his life; but it is thought he first met Mr. Harris in Japan, where he was Secretary to the British Embassy, and from him he imbibed the doctrines. He expresses entire satisfaction with his action.'

# Monetary and Commercial.

The Bank rate of discount was yesterday raised from 4 to 4½ per cent. For some days a change had been anticipated, the demand for money in connection with the India, China, and South American trades being largely on the increase, while the supply was rather short. The discount market has consequently been tightening, little or no business being done under 4 per cent, which has been the rate for India and China Bank paper.

The Hong Kong and China Gas Company, Limited, has just declared an interim dividend at the rate of six per cent. per annum for the half year ending 30th September last.

In the Court of Bankruptcy a first sitting has taken place under the failure of George Melbourn, merchant, of London and Batavia, trading, with William Lichtenberg and Robert Peile Tolson, under the firm of Morgan, Melbourn, and Co. It was mentioned that Lichtenberg has absconded from Batavia to San Francisco, and that Tolson, who is now in Jersey, denies his alleged partnership in the firm. The liabilities were stated at no less than £700,000.

The suspension has been announced of Messrs. Whiteley and Brough, manufacturers at Bradford, with small liabilities.

Considerable excitement prevailed in Mincing-lane last Tuesday, owing to a rumour being prevalent that several of the large houses in the wholesale tea trade intend in future to buy their teas in the public sales direct, instead of employing a broker, as is the custom, and paying him ½ per cent. commission. Accordingly at eleven o'clock the sale-room in Mincing-lane, where the tea auctions are held, was crowded by a number of people connected with the tea trade, and Messrs. R. Gibbs and Co. commenced to offer the teas printed in their catalogue. Several purchases were made by certain firms without the customary intervention of a broker, the proceeding giving rise to not a little uproar and discussion amongst the members of the trade.

At the biddings for £350,000 in bills on India at the Bank of England, the amounts allotted were—to Calcutta, £335,900; and to Madras, £14,100. The *minimum* price was fixed at 1s. 11d. on both presidencies. Tenders on both presidencies at 1s. 11¼d. will receive about 29 per cent.; those above that price in full.

## BOARD OF TRADE RETURNS.

The Board of Trade Returns of imports and exports for the month of March have been issued. The following shows the declared value of the exports of British and Irish produce and manufactures for March in the last three years:—March, 1867, £15,148,707, March, 1868, £14,829,249, March, 1869, £15,697,465. These figures are more satisfactory than might have been anticipated from the reported dulness in nearly all branches of business, and especially in Lancashire. The declared value of our exports shows an increase of £868,216, or about 6 per cent. over the corresponding month of last year, and about 4 per cent. over March, 1867. Of cotton yarn the shipments have been 18 per cent. less, both in value and quantity, than those of March last year; but of cotton manufactures, although there has been a decrease of 10 per cent. in quantity, the value has been almost precisely the same as at that time. In the shipment of yarns generally there has been a falling off, which seems to indicate a sluggish state of foreign industry, the reduction in linen yarn being 10 per cent., and in woollen yarn 28 per cent.; but in nearly every important class of manufactured goods there has been a satisfactory increase. In earthenware it has been 20 per cent., in hardware 16 per cent., in haberdashery 3 per cent., in machinery 19 per cent., in iron 32 per cent., in linen goods 13 per cent., in silk goods 49 per cent., and in woollen goods 46 per cent. In the large class of unenumerated articles there has likewise been an increase of 5 per cent.

The declared value of our exportations during the first quarter of the present year shows an increase of 3¼ per cent. compared with the same three months of 1868, and 1 per cent. over 1867, the figures standing as follows:—Three months 1867, £42,381,621; three months 1868, £41,422,916; and three months 1869, £42,803,605.

The value of the imports during the month of February is returned as follows:—1867, £15,871,175; 1868, £15,494,140; 1869, £18,148,799; and for the two months ended 28th February as follows:—1867, £25,940,930; 1868, £24,983,632; 1869, £29,642,204. As regards the imports for the month of March, of which the quantities only appear in these returns, the arrivals of wheat have been 2,230,378 cwts., which is about 35 per cent. less than the total in the same month last year, but only 5 per cent. less than in March, 1867. Of cotton the arrivals have been 798,658 cwts., which is 40 per cent. less than the total of last year, and 10 per cent. less than in 1867.

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East:—

## ARTICLES OF IMPORT.

—o—

### TEA.

The market during the interval has become even more depressed than ever. The anxiety to realise on the part of importers has again been manifested by another large series of public sales, comprising about 35,000 packages, without reserve, which began on the 4th inst. and will occupy all the week, the previous series and those of Indian tea having only closed the latter end of last week. This has almost stopped business by private contract, the amount of sales in this way having been unusually small, and at prices, whilst tolerably firm for common teas, showing a heavy decline in medium to fine black and red-leaf Congous, many parcels of medium Congou only realising ½d. to 1d. per lb. above the price of common.

CONGOUS.—Siftings show no material alteration. Broken-leaf have been steady. Fair to good common must be quoted rather lower, at 1s. 0½d. to 1s. 1d. per lb. Fair to good flavoury kinds and medium to good Kaisows have been much depressed, and have sold with difficulty at from 1s. 1d. to 1s. 3d. per lb. Fine Kaisows have also sold at a considerable reduction, whilst the few extra fine parcels which have still kept their quality are saleable in small quantities at full prices. Pak Lin kinds have been inquired for at the low rates current, 1s. 2d. to 1s. 3d. for half-chests, and 1s. 3d. to 1s. 4d. for boxes. Amoy kinds have been sold at from 11½d. to 1s. 0½d. per lb. for common to good

Digitized by Google

quality. Common to fair black-leaf kinds have been better supported, the exporters still being in the market, but in these sales have been made at a decline of ½d. per lb. Fair to good medium kinds have been difficult of sale at a decline of 1d. per lb. Good to fine kinds have been freely offered, and sales made at 1s. 7d. to 1s. 9d., with some difficulty, of early arrivals, reported to have cost in China from 2s. 3d. to 2s. 6d. per lb., and even at these figures there are more offering than can at present be quitted. In new-make Congous some sales have been made at rather lower prices; some finer kinds have been sold from 1s. 9d. to 2s. per lb. In Oolongs there is no improvement, all kinds, except the common to fair for price, are very difficult to move. In Souchongs and Flowery Pekoes there has not been much done. Scented Teas: the supplies of Canton Caper have been larger than the trade could take off, and prices have given way a further ½d. to 1d. per lb. Foochow kinds remain dull. Orange Pekoes, Canton kinds, still remain difficult of sale, and prices of those sold out of recent arrivals have been in buyer's favour. Foochow kinds, at public sale, without reserve, have again sold lower for medium quality; fine show no alteration. Uncoloured Japans have been taken at full prices. Green Teas: The demand for these has become less, and the quantity offering being large, prices have given way for nearly all descriptions. Some parcels of Moyune Hyson have sold at full prices. Canton-make show no material alteration.

The following is from Messrs. Shepard, Harrison, and Rehden's Circular:—The anomalous position of the Tea market has undergone no change during the past fortnight, and transactions have again been limited, and chiefly in teas for price, say 1s. 0½d. to 1s. 2d. per lb. The fortnightly series of public sales commenced on the 4th inst., and are passing at easier rates for all grades of Congou over common. China advices to the 15th April give no addition to shipments, the export standing at 138,000,000 lbs. Of Indian growth considerable supplies have been offered, including many parcels of extra fine teas; Pekoes have sold at 2s. 6d. to 3s. 4d. per lb., Souchong and Pekoe Souchong at 1s. 8d. to 2s. 4d. per lb., Congou at 1s. 2d. to 1s. 7d. per lb. Low quality and imperfectly cured teas sell at irregular rates, and much under current quotations for ordinary imports. Deliveries show a great increase in the export department, consumption on the Continent being stimulated by the low prices ruling for medium to fine Congous.

| | 1869. | 1868. |
|---|---|---|
| Home consumption for London from 1st Jan. to 30th April ... | 25,420,000 ... | 30,900,000 |
| Export do. do. ... ... | 14,600,000 ... | 8,550,000 |
| Sent coastwise do. ... ... | 11,200,000 ... | 11,550,000 |
| | 51,220,000 ... | 51,000,000 |

BLACK.—The grades of red-leaf below common, with black-leaf dust and siftings, have not been wanted, and to effect sales lower prices have been accepted; inferior and good flavoury kinds have been sold at 1s. 0¼d. to 1s. 0¾d. per lb., and many parcels of first crop, ex Ariel and other early ships, mostly ex public sale, at 1s. 1d. to 1s. 1½d. per lb., and fine and finest Kaisow up to 1s. 8d. per lb. Imitatton Kaisow made from Tayshan leaf, supplies are much beyond requirements, and lower prices rule, except for superior quality, ex Roslin Castle, which have been sold at about 2s. per lb. Black leaf.—Common Oonam, ex Harlow, has been sold at 1s. to 1s. 0¼d. per lb., the quotation for good common country packed stands at 1s. 0½d., preferable to medium kinds at 1s. 1d. to 1s. 2d., Pekoe flavoured second-class Oopacks at 1s. 3d. to 1s. 5d., fine and finest at 1s. 6d. to 1s. 8d. per lb.; Ooanfas and Monings, first crop, fine to finest 1s. 8d. to 2s. per lb. Souchong has been sold at 1d. to 2d. per lb. decline. Oolong: There is no alteration. Scented Tea: Canton Orange Pekoe: The few transactions have favoured buyers. Caper: Common to medium has given way another 1d. per lb., but fine and finest, being in small supply, command full rates. Foo Chow Orange Pekoe: Moderate transactions at no alteration in prices on last month's quotations.

GREEN.—The quantity offered has been small, but demand is limited at present, unless for Moyune teas, dealers being fairly well in stock, and shipping demand less active than for some time past. Japan leaf: In coloured there is nothing new;—uncoloured: the bulk of the Johanne Marie's cargo has been sold at extreme rates.

## SILK.

For the last three weeks, and, indeed, since the Easter holidays, the market has been in an extremely quiet state, having relapsed from a period of activity and large business into one of those pauses which now seem a necessary feature of the Silk market. There is no reason for this beyond the natural desire of all buyers to know somewhat of the probabilities of the European crops before operating further, and it is this cause alone which induces the present existing quiet; holders as a rule, refrain from pressing, and thus prices are well supported; the only forced business showing a decline of about 1s. to 1s. 6d. on Tsatlees from the quotations of March; deliveries are daily good, and it is evident that consuming demand is running upon Asiatic Silk, so that when there is some positive information about the French and Italian crops, a return of business may confidently be expected—this can hardly be for another fortnight or three weeks at the earliest. As to the prospects of the crops it is too early to offer any opinion with confidence. In Canton Silk as well as in Shanghai Silk there has been and still exists the same flatness; and in Japan also, the medium qualities of which are quite neglected. Bengal Silk is equally quiet, and the difficulty with this silk is to find suitable qualities, so limited is the assortment. The deliveries from the London warehouses in April were 3,008 bales China, 418 Canton, 653 Japan, and 586 Bengal —total, 4,665 bales.

According to Messrs. Arles, Dufour, and Co., the transactions in the Lyons silk-market have been very limited, partly in consequence of the large purchases made in the previous month, which, combined with the delay caused by the weather at the opening of the Spring season for silk goods, have enabled manufacturers to abstain from buying. At present interest is concentrated on the prospect of the new crop in Europe. The result of the hatching of the seed will this year have more importance than usual, in consequence of the immense supply of seed from Japan and other countries.

COTTON.—The Liverpool market has been in a dull and unsatisfactory condition throughout the interval, and prices generally are about ⅛d. per lb. lower. During the past few days the demand from consumers has been extremely limited, while nothing has been done for speculation. The current quotations are as follows:—Surat, 7⅞d. to 11¼d.; Madras, 9d. to 10¼d.; fair Dhollerah, 9⅞d.; fair Oomrawuttee, 10⅛d.; fair Broach, 9⅛d.; fair Bengal, 8½d.; fair Egyptian, 12¾d.; fair Pernam., 12⅜d.; middling Boweds, 11¾d.; middling Orleans, 12d. The business done "for arrival" of late has been very restricted. The latest rates paid have been:—New Orleans, low middling, shipping by steamer, 11¼d.; Texas, good ordinary, shipping, 11d.; Broach, good fair, ginned, April sailing, 10¼d.; and Oomrawuttee, fair new merchants, April sailing, 9⅛d. The London market has exhibited a dull tone throughout, with a corresponding decline to that established at Liverpool.

COFFEE.—The quieter tone of the market noted in our last report has been followed by decided flatness, and with tolerably free sellers prices have again given way 2s. to 3s. per cwt. Plantation Ceylon has been brought forward in considerable quantities, the bulk of which sold at the above decline. At fully the same reduction a moderate business has been done in Native, but there is no general buying. The latest auctions have gone off at the following terms:—Plantation Ceylon, triage, 50s. to 57s. 6d.; fine ordinary and low middling, 70s. to 73s. 6d.; middling, 76s. 6d. to 79s.; good middling, 79s. 6d. to 83s. 6d.; pea-berry, 82s. 6d. to 87s. Native Ceylon, bold, 66s.; good and fine ordinary, 61s. to 63s. The stock of Ceylon in the United Kingdom on the 1st inst. was 61,824 packages, against 78,451 packages at the corresponding date last year.

CAMPHOR.—Prices for both China and Japan descriptions are slightly lower, there being a limited business on the spot at £5. 7s. 6d., and to fair extent for arrival at £5 to £5. 2s. 6d. per cwt. Stock, 2,403 packages, against 2,085 in 1863.

COCOA-NUT OIL.—The market continues dull, and rates have undergone no material change since our last. Stock, 4,555 tons, against 3,058 tons last year.

GALLS.—The market both for China and Japan remains extremely flat. There has been no business of any importance during the interval.

GUMS.—Benjamin: Quiet; of 36 cases Sumatra at auction a few only sold at £7 15s. to £8 7s. 6d. per cwt. for false packed 2nd quality, and £5 15s. good 3rd. Copal: Hard has gone back 2s. to 3s. per cwt., with further supplies; soft is firm. Of 1,186 cases recently arrived, at auction, three-fourths sold at 39s. 6d. to 47s. for middling to good hard, and 32s. to 32s. 6d. very good soft. Damer: Steady; 17 boxes sold at auction at 82s. 6d. to 84s. per cwt. for fair in sorts. Gamboge: Steady; 16 cases at auction sold at £16 to £16 10s. for good pipe rather caky.

HIDES AND SKINS.—Messrs. Dyster, Nalder, and Co. report as follows:—The sales of East India hides during the past month have been 179,163 hides. Although the quantity offering has been moderate the demand has not been active, and prices have ranged from those current at the close of March to ½d. per lb. decline. Batavia: The sales are confined to 200 Java buffalo hides at 6½d. per lb. Singapore, &c.: The quantity offering has been small and met only a limited demand. The sales are confined to 504 Penang cow hides—thirds at 5¾d. to 6d. per lb., and 276 Singapore buffalo hides, seconds 4½d. per lb.; thirds 3½d. per lb.

INDIA RUBBER.—At auction 108 baskets Borneo offered were all bought in.

JAPAN WAX.—The supplies on offer having been larger, prices have receded 5s. per cwt., 2,059 boxes at the public sales having realised 70s. to 85s. 6d. for middling watery to fine saucers. The latest price paid for fine has been 79s. to 81s. per cwt.

MANILA HEMP.—The market is steady, there having been a moderate business during the interval without material change in prices. Stock 1,925 tons, against 1,841 tons in 1868.

MUSK.—In tolerable demand, at slightly lower rates; 62 caddies Tonquin sold at auction, at 30s. 6d. to 38s. 6d. per oz for fair, 21s. 6d. to 22s. 6d. middling rough, and 17s. 6d. to 19s. pickings; 6 tins Cabardine retired, and of 12 tins Grain, two sold at 53s.

PEPPER—Black: Demand very sluggish, at present rates; only 670 bags Penang sold at auction, one-third sold at 3⅞d. per lb.; very limited transactions privately. White: Very quiet, with scarcely any demand on the spot, and none for arrival; of 80 bags indirect, at auction, 10 bags only sold, at 7d. per lb.

PLUMBAGO.—The market for Ceylon is very dull, the supply being largely in excess of the demand. Prices are again lower, except for very superior quality. Of 1,114 barrels at auction, one-third sold at 17s. to 28s. 6d. per cwt. for middling to fine lump; 12s. 6d. chips; and 10s. to 13s. dust; a few lots extraordinarily fine, however, realised 30s. to 39s.

Digitized by Google

RICE.—This article has still a downward tendency, and the business on the spot is of trifling amount, at moderate prices. 935 bags and 930 pockets Bengal in auction, were withdrawn for want of biddings. For floating cargoes of the new crop the inquiry continues, and three have been sold as follows:—1,200 tons Rangoon, at 9s. 6d. for Liverpool, 500 tons at 9s. 7½d. landed here, and one of 500 tons Nakrenzie at 10s. open charter. In addition, a cargo of 900 tons Rangoon, spring shipment, was sold some days since at 9s. 6d. for the Continent, and 100 tons good white Bengal arrived off the coast, have been sold at 14s. 9d.

RHUBARB.—The market for China remains very flat; of 159 chests at auction, a few chests only found buyers, at 2s. to 3s. 8d. per lb. for ordinary to middling. The stock of China is 1,614 chests, against 901 in 1868.

SUGAR.—The attention of buyers is directed almost exclusively to West India descriptions, for which slightly better terms have been obtained. For the small quantity of East India descriptions sold former prices have been paid. By private contract 10,000 bags clayed Manila (duty 8s.) realised 30s. 6d. to 31s. per cwt.

SAPANWOOD.—Rather more steady; of 19 tons Ceylon at auction, two-thirds sold at £10 5s. to £10 10s. per ton, and 8 tons Manila at £8 10s.

SPICES.—Cassia Lignea and Buds: Without change. Cinnamon: We quote 1st sort 2s. 2d. to 3s. 7d. per lb.; 2nd, 1s. 10d. to 3s. 6d.; 3rd, 1s. 8d. to 3s. 2d.; 4th, 5th, and Jungle, 1s. 3d. to 2s. 2d. Steady: 151 bales at auction sold, but chips are again rather cheaper, and 1,623 packages offered, mostly sold at 3d. to 1s. 2½d. Cloves: Of Penang, 12 cases offered at auction and retired; of Zanzibar, 1,571 bags brought forward, and all sold upon previous terms—3¼d. to 3⅜d. per lb. for ordinary to good; 2,200 pockets clove stems sold at 1½d. to 1⅝d. Mace: Very firm, with inquiry; of 24 cases Penang and 44 packages Batavia at auction, two-thirds sold at 1s. 9d. to 2s. 7d. per lb. for low red to good reddish. Nutmegs: Firm, but quiet, and nothing of any importance doing.

TERRA JAPONICA.—During the month of April there was no import of Gambier. The deliveries of the month are 750 tons. Present stock, 4,500 tons. Prices are 10s. per ton lower than at the beginning of April, and the quantity now afloat for London is much larger than it was a month ago, being 2,868 tons against 1,384 tons on 1st April; the total quantity now on the way from Singapore for England and the Continent is 3,748 tons. Cutch is somewhat easier in price. The deliveries of the month are 280 tons. Stock, 1,129 tons.

TIN.—The dulness of the market for Straits tin reported in our last became more marked, and prices receded to £130 10s. on the spot, and £125 afloat. Subsequently the demand improved, and prices advanced to £133 to £133 10s. on the spot, and £130 to £133 afloat, which are the current quotations. Banca is quoted £135 to £136 per ton. The stock of Straits on the 1st inst. was 1,302 tons, against 1,720 tons at the corresponding date last year; the quantity afloat was 1,360 tons, against 1,724 tons, and the price of Straits tin is £133, against £93 10s. in 1868.

## ARTICLES OF EXPORT.

—o—

### METALS.

The following is from Messrs. French and Smith's Circular:—

The activity experienced in this market the first three months of the year appears quite at an end, and again we have to record that consumers and merchants are indisposed to operate except for immediate wants. This observation, however, does not apply to Railway Iron, for which there is great enquiry, and makers are full for some months to come. Welsh Bar Iron is steady, and Staffordshire, of all descriptions, in moderate demand. Scotch Pig has fluctuated but slightly.

COPPER.—The price of Chili has gone back to £70 to £70 10s., which is a decline of £2 10s. per ton during the past month. This, in a great measure, is owing to the impression produced by the large charters telegraphed—equal to 2,500 tons fine to the 16th March, and 2,200 tons for the fortnight following. It seems unfortunate so much importance should be given to these despatches, as it is well understood that many of the ships chartered may not receive their cargoes for months after the date of the advices. Parcels floating would be a better guide to operators. The trade is dull generally. The demand for India very light. We quote: Chili Slab £70; Wallaroo and Burra £80 to £81; other Australian brands £78 to £80; English Tough £75

TIN PLATES continue quiet, makers are badly supplied with orders, and the prices cannot be very remunerative at the best placed works. The shipments in April were 234,000 boxes, against 205,000 boxes same month last year.

LEAD is easier. We quote the price about 2s. 6d. per ton lower—say L.B. £19 12s. 6d.; other best brand, £19 7s. 6d.; Spanish, £18 17s. 6d. to £19 ex ship.

SPELTER has continued to decline. We quote the price to-day £20 5s., dull.

QUICKSILVER is without change. The imports from January to March were 106,806 lbs.; exports, 577,101 lbs.

### MANCHESTER GOODS.

The market during the interval has been completely devoid of animation; offers formerly refused are now freely accepted, but without producing any marked increase in the demand. Prices are slightly lower than at the date of our last report, the decrease being most perceptible in the lower qualities of Yarns and Goods.

The following is Mr. Sam Mendel's report of the trade during the month of April:—The business of the past month opened under depressing influences. The almost simultaneous announcement of an advance in the Bank rate, of some important failures in the manufacturing districts, and of large arrivals of Cotton at Liverpool served to check the buoyant tone that prevailed at the end of March; and notwithstanding the more favourable accounts we have been receiving from the East, the market has not recovered itself, and we have had a dragging and unsatisfactory business throughout the month, unrelieved by a single day's activity. The increasing stringency in the New York Money Market has evidently weakened the capacity of the holders of cotton, and more eagerness is now evinced to avail themselves of present prices, as is evidenced by the great increase in the shipments from America and India, and the pressure to effect sales in Liverpool. The remainder of the crop is coming forward faster than speculators had anticipated, and their hope to force up prices higher appears now to be less sanguine. Prices here for some months past having been mainly supported by the position of cotton, and not by the extent of the demand for goods, the weaker feeling that has lately become apparent in Liverpool has extended itself to this market, and buyers have been exercising extreme caution. Although prices have moved in sympathy with the raw material, spinners and manufacturers, not being burdened with stocks, have lowered their quotations with great reluctance, while the decline that has been established has failed to induce business, and the genial weather has not produced any improvement in the home-trade demand. Notwithstanding the great curtailment in production, it is still fully equal to the consumption of goods, and the position of producers is a most disheartening one, as there does not appear to be much prospect of an early amendment, and a feeling of depression pervades the trade. The decline in cotton during the month amounts to ¼d. per lb., on yarns ½d., and on shirtings 3d. per piece, according to quality and the position of producers, the lower kinds having been the most difficult to dispose of. Water twist and the better qualities of shirtings and T-cloths having been in demand for China, the prices for such goods have been comparatively well supported, while the lower makes suitable for India have been neglected, and manufacturers towards the close of the month became rather pressing sellers. The partial relief afforded to trade by the Home and Indian Budgets for the present financial year, added to other favourable circumstances, such as the continuance of seasonable weather and the consequent prospect of a good harvest, the settlement of strikes in some of our important industries, may gradually ameliorate the state of trade; but permanent prosperity will not return to this neighbourhood until we receive a more plentiful supply of cotton, the prospects of which appear to be as problematical as ever.

COUNTY OF AYR, Clyde to Batavia, March 14, 2 S., 22 W.
SCHOONDERLOO, Cardiff to Singapore, March 20, 1 N., 24 W.
MIN. FRANZEN V. D. PUTTE, for Java, April 22, off the Lizard.
CHARLES GRANT, Shields to Singapore, March 20, 2 N., 25 W.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports are a little firmer, and tonnage is not so plentiful, the arrivals having been but few, owing to the easterly winds which have lately prevailed. There has been more doing in coal from the Northern outports, but rates have not much improved.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 40s. weight, 50s. meast. To Hiogo: 50s. weight or meast. To Tientsin: 60s. weight or meast. To Chefoo: 60s. weight or meast. To Shanghai: 35s. weight, 30s. meast. To Foochow: 50s. weight, 45s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Amoy: 50s. weight, 45s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £43. For Shanghai: £43. For Hong Kong: £32. For Singapore: £25. For Galle: £23. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2 4s. For Shanghai: £2 4s. For Hong Kong: £1 14s. For Manila: £1 1. For Singapore: £1 5s. For Galle: £1 5s.

The Admiralty have invited tenders for the conveyance of small stores to Colombo and Hong Kong.

## CASUALTIES.

Advices from Antwerp, dated April 29, state that the North American, Mitchell, from Batavia to Rotterdam, which was beached at Belem, March 18, and afterwards discharged and floated, had been condemned at Lisbon.

The Etha Rickmers, Davidson, from Shanghai, which arrived at New York April 19, reported having experienced a heavy revolving gale, during which she lost tiller and rudder-head.

The Queen of the Age (ship), Clyma, from Yokohama to Boston, via New York, which was reported by telegram as having been ashore at Cape Cod, got off without assistance or damage, and arrived at Boston April 18.

The Dolores Ugarte, Saul, from Havana to Hong Kong, was towed into Key West, April 9, in a sinking state, after collision.

Intelligence from Batavia, dated March 23, states that the Maria Elizabeth, Genel, from Rotterdam to Singapore and Hong Kong, which arrived at Anjer March 16, had on board the crew (twenty-two hands) of the Tamaris (French ship), Raunier, whom she had picked up at sea; the Tamaris, bound from Macao to Havana, had on board 800 Chinese coolies, who mutinied, took possession of the vessel, and kept the master on board in irons.

The Atlanta (British ship), Bangkok to Falmouth, which was spoken with Jan. 5, in 24 S., 66 E., had lost long boat, life-boat, and sails, during a typhoon, Dec. 16.

## MISCELLANEOUS.

At St. VINCENT, C.V., March 26, Nautilus (S.), Hodges, from Boston, and left, April 1, for China; Walrus (s.s.), Waston, from Boston, and left 31 for China.

At TABLE BAY, March 22, Hopeful, Buttrey, from Bangkok and sailed 26 for Falmouth; 27, Star of India, Chaston, sailed for Yokohama; 31, Nestor (s.s), Drenning, from Liverpool, for Singapore, China, &c.

## LAUNCHES.

There was launched from the yard of Messrs. Walter Hood and Co., Footdee, on the 28th ult., a fine clipper ship, named the Centurion, of the following dimensions:—Length, 208 feet; breadth, 35 feet; depth 21 feet; 1,209 tons B.M., 959 tons N.M. This vessel is to be commanded by Captain Thomas Mitchell, late of the Queen of Nations, and will form another addition to Messrs. George Thompson, jun., and Co.'s line of Australian and China packets.

Messrs. Alexander Stephen and Son launched at Dundee, also on 28th ult., a composite clipper full-rigged ship, named the Laju. The frames of the vessel are of iron, and the lower part of the hull is of rock elm, the upper part being of East India teak. The ship is copper-fastened throughout, and is sheathed with yellow metal; she is classed 17 years A 1 at Lloyd's, and is of the following dimensions:—Length of keel and forerake, 162 feet; extreme breadth, 28 feet; depth of hold, 17½ feet; and registered tonnage, 562 tons. The Laju is to be commanded by her principal owner, Captain Scott, of Crantitt, and will be employed in the India and China trade. It is intended to have a paddle, worked by steam, fitted up on the vessel, so that she may be propelled in calm weather.

The same builders have launched the fine new composite ship Norham Castle, 850 tons, and 17 years A 1 at Lloyd's. The vessel has been built for Messrs. Thomas Skinner and Co., and is to be employed in the Singapore and China trade.

Messrs. Harland and Wolff, of Belfast, have launched a large ship which has just been finished by them. The new vessel is about 1,300 tons register, and destined for the China trade.

Seven ships, two barques, and one schooner, aggregating 10,143 tons, built at ports in the United States, are now offering for sale at Liverpool.

THE BEST ROOFING MATERIAL.

BRABY & CO. ALSO MANUFACTURE SHEET AND PERFORATED ZINC, ROOFING FELT, GALVANIZED BUCKETS, AND ALL OTHER ZINC AND GALVANIZED IRON GOODS, ILLUSTRATED LISTS OF WHICH WILL BE SENT FREE ON APPLICATION.

RAWLING, MEDLEN, & CO.,
ARCHITECTS AND CIVIL ENGINEERS,
HONG KONG,

BEG to inform their CLIENTS and Others interested in Landed or Household ESTATES in CHINA, that Mr. J. STUDD, of their Firm, who has had seven years' professional experience in HONG KONG and the COAST PORTS will be returning to the East in April, 1869, and will be open (meantime) to meet by appointment parties desirous of consulting him respecting improvements or other matters connected with their property.

ADDRESS
20, WESTBOURNE PARK CRESCENT, HARROW ROAD, PADDINGTON, LONDON.

HOLLOWAY'S OINTMENT and PILLS.—ULCEROUS SORES AND SCOFULOUS ERUPTIONS of the worst kind, for which all sorts of established prescriptions have been tried in vain, have been thoroughly cured in an almost incredibly short time by Holloway's Ointment. The common topical applications are mere palliatives; but this unrivalled unguent penetrates the source of the evil, destroys the secret virus, and gets rid of the disease for ever. In ordinary cases the Ointment should be rubbed into the parts affected; but if they are too tender or irritable for this process, they should be gently smeared with it at least twice a-day. The most inveterate external diseases will yield sooner or later to this ointment.

COWASJEE DINSHAW.
Close to the Landing Place, Depot of

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

Sold by all Italian warehousemen, chemists, grocers, ship chandlers, and provision dealers.

**NEW MUSIC.**

BRAG. Serio-comic Song. Written and Composed by ALFRED SCOTT GATTY.

PUT IT DOWN TO ME. Comic Song. Written and composed by ALFRED SCOTT GATTY.

WHEN THE ROSES BLOW. Song. Written by R. REECE. Composed by G. B. ALLEN.

THE DAYS WERE SWEET IN SUMMER TIME. Song. Written by R. REECE. Composed by G. B. ALLEN. Post free for 19 stamps each.

Messrs R. COCKS and Co., New Burlington-street.

We have had occasion to favourably notice Mr. Gatty's comic songs, and the two under notice do not alter our opinion of their character. "Brag" is a comic song of a mild order, but hardly to be ranked as serio-comic. It is all fun. "Put It Down to Me" is more pungent, and broader in tone, but without approaching coarseness. It is sung nightly by the St. George's Hall Christy's, and hardly ever fails to be warmly encored. Both songs are in marked contras, with the music-hall type, and deserve a wide circulation. "When the Roses Blow" is a ballad which has also obtained much favour with the Christy's, and it well merits it. The melody is very taking, and quite equal to any of Mr. Allen's uniformly excellent settings. "The Days were Sweet in Summer Time" is another excellent song, and if it reaches a front place in the thousand and one new compositions before the public it will fully deserve it.

HAMILTON'S MODERN INSTRUCTIONS for the PIANO. 673rd Edition. 70 large folio pages. 4s.—Order of all Musicsellers and Booksellers; and of the Publishers.

### THE MAILS, &c

The next homeward mail will be that leaving Hong Kong on the 20th April, due here on the 31st inst. Telegrams in advance of it were received on the 8th instant, and those of the succeeding mail (Hong Kong, April 23rd) came in yesterday. Shanghai telegrams to the 27th April, *via* Kiachta, were received at the same time. The latter line is now working admirably.

Per P. and O. steamer, from Southampton, June 26.—To Singapore: Mr. J. D. Vaughan.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Advices from this port are to the 24th March. The outward mail of Jan. 15 (P. and O.) arrived on the 10th March, the French mail of Jan. 21 on the 13th, and the P. and O. mail of Jan. 29 on the 23rd. The latter conveyed London telegrams to Feb. 19. The *Japan Times* says:—"The unvaried punctuality with which the P. O. Company has performed the mail service under the new contract was a theme of general remark and commendation." From the same paper we extract the following items of general news:—

In our last we had to report an outbreak of typhoid fever, from which more than one death had resulted, and a consequent hospital meeting, at which it was determined to erect a permanent building of considerable size, in provision against future attacks of epidemic. A far larger sum than is likely to be necessary, as it seems to us, has been subscribed for, particularly as we are happy at last in having received the long-expected scheme for the drainage and improvement of our streets. This is the work of Mr. R. H. Brunton, Chief Civil Engineer to the Government of Japan, who came hither last year notably to erect lighthouses on the coast, but whose services have also been given to the community for this highly important sanitary reform. To readers abroad the details of his scheme would possess little interest; it is enough to say that it is able, practical, and economical, and that we anticipate little difficuly in its execution. Our friends at home may, therefore, reassure themselves regarding the health-risks that we run here, and if we fortunately get through the coming hot season unscathed, we may again claim for Yokohama the credit of being, what it ought always to have been, a sanitarium for India and China.

We had nothing to report last mail in politics, and on this occasion, though certain information is in our possession regarding the movements against the ex-Tokugawa pirates in Hakodadi, for obvious reasons we cannot yet give it to the public. It has been stated that the gold mine island of Sado had been taken by them, but there is no truth in the report; nor is there in the statement that a fresh rising had taken place near Nee-e-gata, the origin of this rumour being a riot among the peasantry, who conceived certain interests of theirs would be injured by the cutting of a canal intended to connect two branches of the river. From the North we hear that the French engineers have strongly fortified Hakodadi, and are preparing torpedoes for the *Stonewall*, should she attempt to enter the harbour. Forewarned is forearmed, however, and torpedoes are not beyond the reach of drags. Rice and ammunition they have in plenty, but no money, and as the large majority of Enomoto's soldiers are not inspired by any fanatical enthusiasm for anything except *boos*, this want is found to be a serious one. Emissaries of the late Shiogoon are at work amongst them, too, and signs of disunion have already manifested themselves in their camp. There is a reasonable prospect, therefore, that serious fighting will be avoided; if not, as Enomoto has but

Digitized by Google

6,000 men in all to resist the whole force of the empire, the result of a campaign is in no way doubtful.

The currency question appears to be exciting attention in the South, and the *Hiogo News* has an article on the subject. As, however, the writer bases his argument on the theory that Foreign Powers in treaty with Japan should force the Japanese Government to put its Mint under Foreign control, prohibit any issue of paper money, and compel a strict adherence to a standard, we cannot go with him. The control of its currency is the chief prerogative of a Government, and, however our trade may suffer, it would be a frightful breach of the law of nations for us to do more than reason with our ally and point out the inevitable result of his present suicidal policy. We can support our arguments with the most telling examples drawn from our own national histories and by the exhibition of coins from every numismatic museum in Europe far more debased than has ever been the boo, or by bank notes, assignats and greenbacks that have been at a discount much lower than that ever reached by the kinsats. If they take warning from our folly and use our experience to avoid the evils which we have suffered, they will indeed have a claim to be called "a remarkable people." But we must not talk of compulsion.

His Majesty the Mikado will leave Kioto for Yedo about six weeks hence, and it is believed that his purpose is to take up his permanent residence in the Northern capital. The Prince of Uwajima, Minister for Foreign Affairs, arrived by the *Sultan* on the 22nd instant, accompanied by Goto Shiojiro, the officer killed a month ago by our Yokohama and Hiogo contemporaries.

A strange rumour is current among the better classes of Japanese to the effect that several principal Daimios have it in contemplation to give up their sovereign rights as Princes into the hands of the Mikado, their armies and navies to become state services, and thus to create a strong central power. This idea has as yet assumed no definite shape as a proposition, but it is significant that it should even have been mooted. We shall discuss the subject fully in our next.

The Japanese Government have resolved to place copper on the same footing with other articles of trade, and to allow its free exportation at an *ad valorem* duty of 5 per cent. This step has elicited much satisfaction in mercantile circles.

---

### HIOGO AND OSAKA.

The *Hiogo and Osaka Herald* says:—"Osaka at present (11th March) is in somewhat of a feverish condition; rumours of an expected rising and other reports of an equally alarming nature are current. It is impossible, however, to give a reliable account of the cause of these statements, as no two native officials will give the same version of what is stirring or is likely to happen in the city and its neighbourhood. One account, which we think can be pretty well depended on, is that numerous bands of Yokugawa-ronins are endeavouring to incite the populace to revolt. Yokoi's murder is attributed to these masterless samourai, and the native authorities are taking the strongest precautions in case these misguided savages, whose numbers are unknown, shall break out into open revolt. In the Foreign settlement soldiers are posted in the Custom House and Bonded Warehouses, and eighty men that Falstaff would have rejected are billeted at H.B.M.'s Consulate. Numerous bodies of troops are often seen moving about, and a general feeling of disquietude can be noted on the faces of native officials and others. Business, no doubt owing to these causes, is at a perfect stand-still.

"In Kioto it is reported that disturbances have already taken place, but no authentic intelligence has as yet been received here.

"A Japanese hotel, bearing the euphonious appellation of Vauxhall Gardens, has been opened. It is intended for the accommodation of Foreigners, and great care has been taken that the creature comforts peculiar to Foreigners are of a satisfactory nature. As we have not yet had time to make a personal inspection of the kitchen and bar-room, we shall forbear criticising the *cuisine* and *internal* accommodation department."

---

### NAGASAKI.

The following, apparently the only item of news from this port, is from the *Nagasaki Times*:—

"We are sorry to learn that a few days ago a well-known resident was drawn upon by a Yakunin in the Custom-house of Megasiki. The gentleman in question was there by appointment to meet several officers of Kaga, and to receive from them a sum of money due to him. Some dispute took place concerning the amount, and in the midst of the discussion one of the Yakunins (the captain of the *Kangi-no-kami*), we are told, rushed to the sword rack, and seizing his weapon, drew it from its sheath, and flourished it about the head of the surprised Foreigner. The gentleman kept very cool, and told the interpreter present that he was not afraid of the sword, and it would be better if his friend would put it up. It is much to be regretted that the Foreigner had not a revolver, for we are almost longing to see an example made of some of these cut-throat gentry. Complaint was made to the Japanese authorities through the gentleman's Consul, but of course without any redress being obtained. The Yakunin is now gone to Kaga."

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, March 30, 1869.

By the Pacific mail, which left this on the 20th inst., you learned that the English mail of the 29th January arrived here on the 18th, two days before its time. The mail of the 12th February is due to-day, but up to the present has not been signalled.

An abstract of the trade and Customs revenue for the past year, as compared with the previous four years, has just been published by the Inspectorate. During this period of five years the total foreign trade with China yielded a revenue increasing from Tls. 6,145,432 in 1864 to Tls. 8,002,751 in 1868. In this there is an allowance made for native produce carried in foreign ships. The total annual value of the trade with different countries is estimated at Tls. 140,235,946, deducting the re-exports to foreign countries; the imports being Tls. 71,121,213, and the exports Tls. 69,114,733. But, in addition to these, Tls. 7,029,900 worth of opium is stated to have passed into the country under the notice of the Foreign Customs Establishment.

The tonnage dues for the past year amounted to Tls. 203,767.

Ying, Taoutai of Shanghai, has been promoted to the Acting Provincial Treasurership, and T'u, a native of Kiangsi, who has hitherto had no dealings with Foreigners, replaces him.

On the 24th inst. the flags of the Foreign Consulates were placed at half-mast, as a token of respect to the late Duke of Brabant, whose death was officially announced on that day.

A Court of Inquiry into the cause of the grounding of the *Everest* was held on the 18th inst., and the pilot in charge of the vessel, having been on board the *Jubilee* when a similar accident happened, was reprimanded and his certificate suspended for two months. Several vessels have been lost near the Yangtsze Cape, where the *Everest* was on shore, and had the weather been rough that ship might not have been saved. She appears, however, to have sustained little or no damage, having been examined in dock; but the expenses incurred in anticipation of the vessel requiring assistance will necessitate the payment of a general average. The pilot of the *Everest* has sued the captain for Tls. 89 pilotage. The claim was withstood on the ground of incompetence, but the Court held that the charge of unfitness was not proved, and gave judgment for the amount claimed.

By the French mail which left on the 24th inst. Viscomte Brenier de Montmorand, late French Consul-General, returned home. M. Brenier's departure is universally regretted, both by his colleagues and by the Chinese merchants resident in the French Concession. Before leaving he was presented with a pair of *Wan-min-san*, or State umbrellas. He is succeeded by M. Dabrey, who has hitherto been Consul at Hankow.

The following will give you and your readers an idea of the value of property in Shanghai. On the 22nd inst. was sold the Fung Mow property, including the hong known by that name, another dwelling house, godowns, &c., the whole standing on about 10 mow 9 fun of ground, for Tls. 27,000; after which fifteen shares in the Shanghai Gas Company were disposed of for Tls. 100 each, five shares in the same company for Tls. 98 each, and two shares in the Shanghai Race Course for Tls. 114 each. On the 25th the following prices were realised:—Twenty-three shares in the Shanghai Gas Company at Tls. 99 per share, and a lot of ten in the same company at Tls. 98; two shares in the Union Steam Navigation Company, with a dividend of 10 per cent. guaranteed for the past year, sold at Tls. 256 each; two other lots, consisting of three and five shares respectively, were sold without dividend guarantee at Tls. 254 per share; and a third lot of three sold at Tls. 253 each; ten shares in the French Gas Company went at Tls. 25 per share. Two shares in the Shanghai Club were also offered; but there was no bidding.

A new branch of trade has sprung up in Shanghai, the *Costa Rica* having taken 2,500 dozen eggs on her last trip, for the San Francisco market, where by last advices they were selling at four cents each.

A meeting of silk inspectors and others was held on the 19th inst., when the following resolutions were adopted.

I. That in order to assimilate, to some extent, the practice of China to that of foreign countries, no smaller weight than one pound avoirdupois be used in weighing silk, and that a bale weighing lbs., 107 is to be held to weigh 80 catties only, and nothing over allowed for.

With respect to this it was shown that on an average export of 60,000 bales there was, by taking fractions into account, an annual loss of no less than Tls. 67,500.

II. That muster bales be taken at actual weights.

III. That a Committee of reference of five be chosen by ballot by the present meeting to receive any complaint or grievances from both Foreigners and Native Silk Dealers, to be laid before a meeting to be called every six months to discuss all questions relative to the trade.

That the Committee appointed be requested to have the resolutions printed in English and Chinese, and copies be delivered to those silk brokers and dealers who signed the circular of May, 1865.

IV. That the Committee be requested to ascertain the average loss of weight on the different kinds of silk to the different European markets.

Digitized by Google

V. That an allowance for tares on Throwns and Re-Reels be made a universal custom in the silk trade.

VI. That the resolutions with regard to weighing and tares take effect from the 1st June.

VII. That the committee be requested to communicate with the Commissioner of Customs and the agents of the mail steamers to endeavour to arrange for a more convenient mode of paying the export duty on silk than that at present in vogue.

VIII. That the proceedings of this meeting be sent to the Chamber of Commerce for the information of that body.

Messrs. Miller, Helbling, Annett, Brand, and Peters were elected members of the committee appointed by Resolution 3.

It was stated by one gentleman present that every bale pays 28 dols. at Nanzing, as follows:—Tax to mandarins, 16 dols.; tax for Hangchow Wall, 2 dols.; tax for mandarin's household expenses, 2 dols.; tax for the poor, 2 dols.; tax for Li Footai, 6 dols.; total, 28 dols.

The bachelors of the Settlement entertained their friends on the evening of the 18th inst. at a ball held at the Shanghai Club. In spite of a terribly inclement evening, the attendance of ladies was very numerous, and the ball a triumphant success.

On the 23rd the second of the Temperance Society's lectures was delivered before a very large audience by the Rev. E. W. Syle, on "The Countries We Visit." The U.S. Consul-general kindly placed his court room at the society's disposal for the evening.

I mentioned in my last that an official expedition had been sent up the Yangtsze to explore the river, with a view to estimating the capabilities of the various proposed new ports. In consequence of the accidental non-arrival at Hankow of the little steamer *Faust*, Admiral Keppel asked Li Hung-chang, now Governor-General of Huquang, for the loan of a small steamer, the *Dragon*. The Viceroy is said to have refused, on the ground that the proposed exploration was contrary to the treaty. The Admiral, however, intended to push on as soon as the *Faust* should arrive, but in the meanwhile despatches were received in Shanghai from Sir Rutherford Alcock, countermanding the expedition, in consequence of the reported murder of a French bishop in Szechuen. We have yet to learn whether the new instructions reached Hankow before the steamer started.

A letter from Sir Rutherford Alcock to Mr. Medhurst, in reply to an application from Dr. Macgowan for aid in establishing telegraphs, has been published. I would commend the following extracts from it to the attention of the officials who have been talked over by Mr. Burlinghame:—

So far, the effect of all the arguments adduced, and the constant representations made, of the advantages to be derived from railroads and telegraphs, has not been such as to encourage any sanguine hopes of progress in this *or any other direction.*

You may inform Dr. Macgowan, however, that there is no argument in favour of telegraphy referred to in his letter which has not been repeatedly and earnestly pressed upon the attention of the Ministers of the Tsung-li Yamen, and no objection to it on the part of the Chinese, that has not been met in the way he would indicate, by my colleagues and myself. You may also add that, *of the desire for progress which the Chinese Mission, now in Europe, assured Dr. Macgowan's countrymen was so ardent and general with the rulers in China, there is no evidence here.* If any hopes are built upon its existence, therefore, I fear there is nothing but disappointment in store for those who indulge in them. . . . . .

The P. and O. steamer *Sunda* will take with the mails 537 Chinas and 58 Japans, in all 595 bales of silk.

It seems to be forgotten that all treaties hitherto made with China have been such as were dictated by Foreign Powers, and in accordance with their views rather than those of the other contracting party. The revision at present in contemplation will take place under totally different circumstances. Nothing new can find place therein, which is directly contrary to Chinese views of their interests in relation with Foreign Powers. If the rulers of China cannot be made to see the advantage to themselves and the nation, as well as the practicability and safety of Inland Steam Navigation, railroads, and telegraphic lines, or the working of mines, and residence of merchants in the interior with exterritorial privileges attaching, it is very certain they will not yield to any force of argument and reason, or earnestness of friendly counsel. And if these do not prevail, what other means remain, apart from the employment of force and means of coercion? But this would be to make the refusal to listen to our suggestion and demands for increased advantages a *casus belli*. It cannot be necessary to remind Dr. Macgowan that, so far as this ultima ratio of Governments and nations is concerned, the United States of America could be no party after the signature of the "additional articles," and the assurances they contain. It is quite certain they will not force telegraphy, or any other improvement, upon an unwilling Government here. And, I may add, it is equally certain that such a course would be contrary to the tenour and spirit of the instructions of the British Government, and opposed to the whole course and tendency of public opinion at home. Whatever, therefore, may be the desire of the best friends of China, and of foreign merchants, to see her advance in the path of progress, and enjoy the increased prosperity which the adoption of the several improvements referred to would do so much to secure, I cannot feel justified in the present aspect of affairs in holding out any hopes of material modification in the policy or disposition of the Chinese Government in regard to telegraphs and other similar innovations on established customs and habits.

With regard to this letter, the *Supreme Court and Consular Gazette*, which is notoriously under official management, assures its readers that another war is the only possible solution of the present Chinese questions.

From Chefoo I hear that H.M.'s gunboat *Insolent* has been sold to Messrs. Jansen, Vassmer and Co. for Tls. 5,000.

I subjoin translations of some interesting native documents recently published:—

I. *Notification by the Taoutai of Shanghai regarding abusive terms addressed to Foreigners.*

It is well known that the inhabitants of every locality apply nicknames to those of every other, as, for instance, in this province the people of the north bank of the river are called Tai-tzu by those on the south, and those on the south Man-tzu by those on the north; and through long custom and intercourse these epithets give no offence. It must be remembered, however, these terms are only used when speaking of strangers, and in their absence; and we return in all cases to our traditional consideration for each others' feelings when brought face to face with those strangers. It would be out of the question to address any one present by such epithets.

Now, it may very well be that in former time some Chinamen would call all Europeans "Kuei-tsu,"—a far more indelicate phrase than either "T'ai-tzu" or "Man-tzu,"—and this might have been very allowable before the days when Foreigners were allowed to trade in China. China and foreign nations being now, however, bound together by treaties and commercial intercourse, exert themselves to preserve amity; and it is by no means right to adhere to the custom alluded to. It is difficult for any one to take it in good part, when he hears such a term of abuse applied to him.

At the request of the British Consul, I issued this proclamation for the information and guidance of the whole people, civil and military. Should any Foreigner pass near your homes, you must address him as "Yangjên"—and by no other term. Contravention of this proclamation will be visited as severely as the law allows.

The Deputy in the Mixed Court is ordered to do his best towards putting down this obnoxious practice.

II. *Imperial Edict regarding Opium Cultivation.*

Regarding the memorial presented by Censor Yew Pih-chuen, "conveying strict prohibition of the cultivation of the poppy in order to save the people from ruin;" we find that the evils arising from the cultivation of that plant have a serious effect on the livelihood of the people. It first commenced in Kansuh, and from thence extended to Shense and Shanse, and lately the cultivation of the same has been taken up in some parts of Kiangsu, Honan, and Shantung. Ignorant people being ambitious of profit have neglected the evils; they only see what is before them, and the consequence will be that all rich plantations will be covered by that useless weed, which will be very serious to the livelihood of the people. Strict prohibitions were once ordered, and we now again command you, Governors-General and Governors, to give immediate instructions to your officers to notify fully to the people that the prohibition is being enforced; and should any bad characters dare to set the prohibition at defiance they will be instantly visited with the full penalty of the law. Should any magistrate fail to have this properly attended to, and thereby allow himself to be misled by his under officers, and constables under false representations; let his superiors immediately cause him to be reported and punished; and do not you conceal his conduct in the slightest degree.

Let this be full notified throughout the Empire, and obey you, this our command.

Tungchi, 7th year 12th moon, the 20th day,
(1st February, 1869.)

III. *Commission conferring military rank of the fifth grade upon Mr. Rolls, of the Kiangsu Arsenal.*

The Lieutenant-Governor announces that on the 3rd January, 1869, he received a despatch from the Governor-General of Huquang, stating that on the 19th September, 1868, he, being then at Te-chang, in Shantung, forwarded a memorial to the Throne, setting forth that in expelling the rebels from Anhuei, Hupeh, Honan, Shantung, and Kiang-si, several persons proved themselves worthy of reward, and that certain officers of the naval forces, commissariat, and other departments were alike entitled to consideration. On the 26th September, 1868, the Governor-General received a swift despatch, stating that the Imperial will had been declared regarding another memorial; and on the same day a formal despatch dated on the 23rd September, 1868, was received. In this it was stated that the officers recommended were rewarded in the manner indicated.

The Lieutenant-Governor, therefore, taking the names on the list, sends copies of this for the information of the persons concerned.

To Mr. Rolls—the button of the fifth rank. Dated Feb. 15th, 1869.

This rank, it should be remarked, is military. Indeed, Macartney is the only Foreigner who has obtained genuine civil rank from Peking.

Digitized by Google

### THE NORTHERN PORTS.

A Tientsin correspondent writes:—"I expressed a doubt in my last letter as to the degree of importance to be attached to the Emperor's opium edict; and I am now still further persuaded that there is no such definite intention to prohibit the local growth of the poppy, as was reported. You will be glad to hear that Tseng-kwo-fan has not yet come down with his threatened army."

A Newchwang correspondent writes:—"The ice commenced to break up on the 3rd March; but at Tien-chuen-tai, fifteen miles higher up the river, native carts are still crossing. Although at times there is no ice near the settlement, it will not be safe for shipping much before the 20th. Last year the *Miaca* arrived on the 10th, and had to go on shore to save her from the floating masses of ice. Except a few bold fishermen, natives do not launch their boats till after the 15th. Malwa is rising; natives offer to buy at Tls. 540, but holders want Tls. 10 more, on account of news from the South of a rise. Dealers are slowly coming in from the country, and at present are lukewarm in their demands for goods. I hardly think the market for 6⅛c. will open at more than Tls. 2.20 or Tls. 2.25—a poor price for holders of last year's stock. The Customs are looking out for a spot for a lighthouse on the coast."

## HONG KONG.

The present mail brings advices from Hong Kong to the 6th April. The outward French mail of Feb. 18 was delivered on the 1st April. The local news by this opportunity is comprised in the following extracts from the *China Mail*:—

Another "tale of the sea" comes to us illustrative of the piratical doings of manstealers. The Chinese gunboat *Tien-po*, Captain de Longueville, in the beginning of last month, while cruising off the coast of Tonquin, fell in with and destroyed an armed junk, there being evidence of the piratical intentions of the crew. The *Tien-po* lay at anchor in the neighbourhood, and was joined soon after by a large junk, in a very friendly manner, and apparently with the most innocent intention. Captain de Longueville, however, not being satisfied of the asserted authenticity of the papers produced by the junk's master, instituted further enquiries, and found on board a large number of men, who declared they had been kidnapped from San-chuan. Capt. de Longueville, having satisfied himself that the statement was true, took possession of the junk and sent the captured men on shore, giving them some money and provisions, to enable them to reach their homes. The junk and its crew he took to Canton and reported the circumstances to the authorities there. We hear that the crew were beheaded on the 20th instant. It is no joke being defendant in a Crown action of that sort!

Considerable astonishment has been caused by the sudden vanishment of a gentleman well-known in the Colony, who held the position of manager of works to the Union Dock Company. Mr. A. D. Mitchell is said to have taken a chair, in which he and two boxes were transported one evening to one of the wharves, after which a sampan was hailed, and he and his boxes were shoved off. He left orders for his chair-coolies to be in waiting next morning at half-past seven at Wanchai; and in waiting the chair-coolies were accordingly until nine or ten o'clock. Information was first conveyed to the Dock authorities by the chair-coolies referred to, when Mr. R. S. Walker communicated with the Captain of Police, being then under the impression that there had been some accident, or that the absentee had met with foul play at the hands of the sampan men. Further inquiries, however, show results of a different kind. The disappearance of the gentleman evidently was well planned and not unskilfully carried out. His dwelling-house was pretty well weeded of its valuables, his rent was in arrear, and his clothes and private papers have gone with him. It is almost certain that he had steered himself on board the American ship *Shirley* (Captain Ferguson), which vessel sailed on the same day for San Francisco.

There can be little doubt that Mitchell fled from monetary embarrassments which were likely to encircle him in a variety of ways. He was a man who, from a commercial point of view, had "many irons in the fire," and as some of these are spoken of as likely to become red-hot, the explanation of his flight becomes more easy. It is a matter of congratulation to the shareholders of the Dock Company that he has done nothing, and has not had the opportunity of doing anything, prejudicial to the accounts of the company; but the same comfort cannot be given to many with whom the absentee has had personal transactions. Many worthy people mourn his absence, and will not be comforted under a double-figure column of thousands of 7.1.7's. But besides this, there is a feeling of regret that one who had made many friends in the colony should have cut them in a manner so sudden and so equivocal. Recent changes in the management of the Union Dock Company are said to have considerably influenced the gentleman's departure, his opportunity of engaging in private speculations under the company's connection having been much lessened; and this, together with difficulties which loomed in the distance, is said to make up the motives for his hasty flight to California.

A fresh collision has taken place between the savages of the interior of Hainan and the Chinese troops stationed in the south of the island. Two Chinese military officers were killed, and a considerable number of soldiers wounded.

Leave to appeal on the part of the Crown against judgment in demurrer Regina *v.* Saint was opposed on the 30th ultimo, before Chief Justice Smale, by defendant's counsel. The petition was withdrawn, the Attorney-General saying he should apply to the Privy Council direct for leave. Defendant has made arrangements accordingly.

The Registrar-General's report states that the loss to Chinese landlords during the past year, owing to the fall in rents, is put down at one hundred thousand dollars.

The following notes are from a correspondent:—

A telegraphic scheme for connecting the Indian lines with Siam and Saigon, and thence to Hong Kong by a submarine cable, is in progress, under the auspices of Mr. Augustus Heard (American), Mr. Kresser (French), Mr. Pollard (British), in connection with Mr. Parker (a merchant of Saigon). This has caused some renewed activity on the part of Mr. Read, of Singapore, who goes to Bangkok in order to take steps for putting his scheme into operation. Now that he has an opposition he must move along and get his company formed for laying down wires from Maulmain to Singapore and Bangkok. It is high time this matter was carried out.

Visitors to Hong Kong need no longer trouble their friends to quarter them. The Hong Kong hotel is a building of very large dimensions, built to suit the climate, and in every respect a comfortable abode. For a good room and an excellent table the charge is four dols. per day, but for a stay of over a week considerably less is charged.

The *Overland Trade Report* has the following important note on silk packing:—

"Some remarks made by Mr. Barnes, agent to the P. and O. Company, upon the subject of packing, are noteworthy. That gentleman said that the steamer agents had noticed that in some instances silk was much worse packed than formerly. He had seen bales on board the steamer on Shanghai with the rope off already. Consignees in London, of course, bring the state of the bales to the notice of the P. and O. office there, who blame the agents here; whereas the real blame lays with the bad packing. The Japan packing was far superior to anything he had seen in China. Many bales were packed in gunny, and tied with strong rope."

## JAVA.

—o—

### BATAVIA.

Advices from this port are to the 8th April, and announce an outbreak on a private estate at Bukasi, about twenty miles from Batavia. The quarrel arose in the payment of paddy in a wet state, and an official having killed one of the number with a revolver, a rising took place. Some exaggerated accounts have appeared on the subject, but cannot be relied on, as the correct position of things was not known on the departure of the steamer from Batavia.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

From Singapore our advices are to the 13th April. The outward mail of March 12 was just coming in. We gather the following news from the *Straits Times*:—

There has been one meeting of the Legislative Council during the fortnight, at which the only subject under consideration was the desirability or otherwise of introducing the penal code of India to be the criminal law of the Settlements. A fair amount of discussion took place, and though some difference of opinion was expressed, the second reading of the Bill was assented to without division. The proceedings of the Council at this last meeting were, for the first time, reported by a shorthand writer; but the result does not appear to be so satisfactory as was expected, and the report bears evidence of considerable revision and amendment in the production. This may be satisfactory to members whose rhetorical shortcomings are thus screened, but it is scarcely what the public expected by the appointment of a paid shorthand reporter.

The chief subject of general interest which has absorbed attention is the necessity for the adoption of measures calculated to give greater security in cases of conflagration. Many valuable suggestions have been thrown out, and it is to be hoped that the next calamity of the kind which occurs here will find us better prepared for it. A volunteer fire brigade has been organised, comprising in its ranks the great majority of the residents; officers have been named, and its management entrusted to a committee, who will, doubtless, obtain for it from the Legislature some recognised status to render its effectiveness complete. It is also strongly urged upon Government to constitute a Court of Enquiry to investigate the causes and particulars of every serious conflagration occurring in the city. The inconveniences arising from the absence of some such tribunal have had ample illustration in the instance of the late fire, where every effort towards enquiry must partake of a grave criminal character very disagreeable to all concerned.

From Labuan we have the address of Governor Hennessy to the Legislative Council there, which presents a most satisfactory picture of the condition and prospects of that colony. A surplus re-

Digitized by Google

venue, increasing trade, and contentment among the people, are wholesome signs of good government.

A correspondent sends us the following items:—

Mr. Read, the co-concessionaire with Mr. Paterson in the telegraph scheme between Rangoon, Singapore, Bangkok, &c., will shortly proceed by the steamer *Weazel* for Bangkok, with a view of carrying out some further arrangements with the Government, and it is expected that he will shortly be able to send forward the scheme to London in such a state as to form the company, obtain the capital, and have the wires sent out. An opposition scheme is in progress at Hong Kong.

One of the French transports, *La Creuse*, arrived on the 9th from Suez with troops for Saigon. They are generally considered as food for *fever*. Three transports of 3,000 tons are kept going between Saigon and Suez at a prodigious cost.

The P. and O. steamer will take about 250 of the 8th Madras Native Infantry, and the remaining number will go by an early opportunity, leaving here the 7th M.N.I., about 800 strong, and part of the 75th (English), about 450 strong, the head-quarters being at Hong Kong.

Mr. Scott, of Bangkok, who has been released on pardon according to instructions from the Home Government, proceeds to Bangkok previous to leaving for England. It is his intention to promote an inquiry to establish his innocence of the Erin barratry case, on which he was convicted. The Consul at Bangkok, Mr. Knox, was the promoter of his arrest and trial; and will, of course, be deeply interested in Mr. Scott's proceedings.

The Austrian frigates, with the members of the expedition, have not yet arrived, although a month overdue.

It is stated that several of the wealthy Chinese merchants in this colony have it in contemplation to establish a local Marine and Fire insurance Company, and that they have written to China, Penang, &c., to solicit the co-operation of their friends in this important undertaking.

# Commercial Report.

## STRAITS, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—There had been more than one depressing influence to affect the market during the fortnight—the depreciation of the native currency, which had raised the value of the dollar; considerable arrivals, and some rather heavy auction sales of damaged goods. Business was almost at a standstill, home advices and a proper feeling of prudence keeping importers firm, while the Japanese would not give even quoted prices, a small concession on which was necessary to effect sales of almost any staples. During the earlier part of the fortnight a fair business was done in yarns at last mail's prices; Shirtings were but sparingly dealt in, and in other cotton goods little was done. We note sales of good qualities of Black Velvets and some Chintzes, Muslins and Cambrics were sold at low rates. Woollens remained as before, Camlets being still difficult to move and Blankets the same; the small demand for Figured Orleans continued as the only noticeable feature in the market. Current quotations:—Cotton Yarn: Nos. 16-24, per picul, $45 to 46.25; 28-32, $47.25 to 48.50; 38-42, $49 to 50. Grey Shirtings, 7 lbs., per piece, $2.50 to 2.55; 8-4 to 8-8 lbs., $2.77½ to 2.82½; White Shirtings, $2.80 to 3.60. T-Cloths, $1.80 to 2.25; T.R. Cloth 8 lbs. 24 yds. 32 in. per lb., $0.85; Spotted Shirtings, White, per piece, $2.90 to 3; Camlets, S, per piece, $14.50 to 15.50; SS, $13 to 14; Long Ells, $8 to 9.50; Cloth, Broad, per yard, $1.50 to 2; Blankets, per lb., $0.50 to 0.55; Iron, nail rod, per picul, $3.40 to 3.70; hoop, $3.10 to 3.40; bars, $3.30 to 3.60; pig, $1.05 to 1.15; Lead, $7.50 to 7; Tin, $17 to 18.

TIENTSIN.—The market for Grey Shirtings was firm; 6½ Catty Goods had been selling at Tls. 2.2.2. to 2.2.5. White Shirtings were in demand at Tls. 2.2.5 for 56 reed, and Tls. 2.4.5 for 64 reed. 7 lb. Mexican T-Cloths were quoted Tls. 1.9.2 to 2 per piece.

SHANGHAI.—Cottons: Most classes of cotton manufactures had been active during the fortnight, the chief demand having been for T-Cloths and White Shirtings. Grey Shirtings showed an advance of 2 to 3 candareens, and were quoted—7 lbs., Tls. 2 to 2.0.5; 8½ to 8½ lbs. Tls. 2.2.2 to 2.2.8; 9 to 9¾ lbs., Tls. 2.8.5 to 3.2.0. Best 7 lb. T-Cloths had been sold at Tls. 2.1.0, and ordinary and medium makes at Tls. 1.9.0 to 2. White Shirtings were 5 to 10 candareens higher, the demand running chiefly on good 60 to 64 reeds. Drills had not been in much favour during the fortnight, but there was more inqury at the close. Woollens and Worsteds: Business in most kinds had been small, but considerable sales of Figured Orleans are reported. Metals.—Lead had been dull during the fortnight, and rates somewhat easier until the close, when there was some inquiry, and Tls. 6.30 was obtained for L.B. Common brands exchanged hands at Tls. 6.20. Exports since last mail comprised 2,870 piculs to Foochow and river ports. Imports—none by Barbadian, and a small lot of Sheet only by Taitsing. Nail Rod Iron: Holders having slightly given way in their demands, a fair business had been done in Nail Rods at about previous quotations. Bars continued to be inquired after, but importers were still asking more than dealers cared to pay, consequently no transactions had taken place. Coals: Large arrivals of Australian coals had depressed the market for all kinds, and quotations must be considered nominal. The arrivals had been 100 tons from Great Britain, and 4,053 tons from Australia. The current quotations were as follows:—Grey Shirtings, 7 lbs., per piece, Tls. 2 to 2.0.5; 8.4 to 8.6 lbs., Tls. 2.2.2 to 2.2.8.; 9 to 9.12 lbs., Tls. 2.8.0 to 3.2.0. White Shirtings, Tls. 2.3.0 to 3.4.0. T-Cloths, 6 lbs., Tls. 1.5.5 to 1.8.0; 7 lbs., Tls. 1.6.5 to 2.1.0; 8 to 8-4 lbs., Tls. 2.1.0 to 2.6.2. American Drills, 40 yards, Tls. 4.2.0 to 4.4.0. English Drills, 40 yards, Tls. 4 to 4.1.5. Dutch Drills, 40 yards, Tls. 3.8.5 to 3.9.5. Camlets, English, S.S., Tls. 12.2.5 to 12.7.5. Medium Broad and Habit Cloths, Tls. 0.9.0 to 1.6.0. Iron, nail rod, per picul, Tls. 2.2.0 to 2.5.5; Hoop, Tls. 1.9.0; Flat and Round, Tls. 2.6.0 to 2.7.0; Lead, Tls. 5.9.0 to 6.2.5; Tin Plates, per box, Tls. 4.3.0 to 4.8.0; Steel, per tub, Tls. 3.5.0 to 3.6.0. Coals (afloat), Cardiff, per ton, Tls. 10 to 10.2; North Wales, Tls. 9.2.5 to 10.0.5; English, Tls. 9 to 9.2.5; Anthracite, Tls. 10 to 10.2.0.

HANKOW.—This market, both for Cotton and Woollen Goods, had been active during the fortnight. Grey Shirtings at one time reached Tls. 2.2.7 to 2.3.2 for 8¼ lbs., but the closing quotations were Tls. 2.2 3 to 2.2.8. Heavier makes had been in good demand at advanced prices, 9¾ lbs. closing at Tls. 2.9.5 to 3.2.0; 7 lbs. were also in request at Tls. 1.9.8 to 2.0.3. T-Cloths: 7 lbs. to 8 lbs. had met with more attention. White Shirtings were higher by about 15 candareens, and the supply had not been equal to the demand. Drills were still quiet, with few transactions. Fancy Cottons continued in fair demand, and Dyed Goods were quoted higher. Woollens and Worsteds: in Camlets a large business had been done at former prices. Scarlet Long Ells had advanced to Tls. 6.5.0 to 6.6.0 for good chops, and were in demand. Medium and Broad Cloths were more inquired for.

FOOCHOW.—The following comprised the transactions of the fortnight: 2,700 pieces 8¼ lbs. Grey Shirtings at $3.05 to $3.07½ per piece; 1,700 pieces 7 lbs. T-Cloths, at $2.50 to $2.55 per piece; 500 pieces 6 lbs. T-Cloths, at $2.35 per piece; 800 piculs Lead, at $9.50 per picul.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular dated April 5:—Cotton yarn: A gradual improvement has taken place throughout the interval, and an advance of $2.50 per bale has been established; operations have been largest in Nos. 16 to 24, while the demand has been very strong for Nos. 28 to 32, and the increased prices at which these numbers have been held have made the Chinese eagerly take up the inferior parcels offering, to the neglect of the better lots held at higher rates. Piece Goods: The aggregate of the purchases for the fortnight is large, though to a considerable extent swelled by the operations of foreign speculators. Grey Shirtings have been taken to a fair extent, and sales amount to some 30,000 pieces, consisting principally of 8-4 lbs., which are now quoted 2½ to 5 cents dearer; speculative enquiry has existed most in these kinds: 9.12 to 10 lb. goods are in very light stock, and have advanced correspondingly with 8-4 lb. Settlements of 6 to 7 lb. T-Cloths amount to some 55,000 pieces, reducing stocks to a minimum, embracing a fair proportion of good quality, at advanced figures; 8 to 10 lbs. have not been inquired for, though they have shared in the enhanced values with other weights. White Shirtings have continued in demand, and transactions have been restricted to 54 to 66 reed, prices for which, with increased request, have moved upward, while the better qualities have not had equal favour. Turkey Reds have been further dealt in for Japan, and have likewise felt the advance. The market for drills of all kinds is bare, and since the sale "to arrive" last reported no transactions have occurred. Some 1,920 pieces American Sheetings, partially damaged, ex a late arrival, were disposed of at public auction at $4.60 to 4.80 per piece, the competition in the bidding showing a much better feeling for this class of goods, which might now be disposed of privately at advanced rate upon last quotations. Woollens: The market is without life, and sales have been very limited. Purple, green, and dark blue Long Ells are asked for at slightly higher prices, but nothing has transpired, and other kinds are neglected. Lastings are lower; a sale of 360 pieces has been made by a foreign house, showing a decline on previous rates. BBB Camlets may be quoted 50 cents better; Dark Blue are still inquired for, and would easily command last quotations. Metals: A further improvement is noticable in Nail Rod and Bar Iron, while Hoop has receded slightly in value. Steel is quoted 10 cents dearer, a demand for the northern markets having sprung up. For the first several days of the fortnight Lead was taken fairly at former rates, but the inquiry soon ceased, and prices again gave way; holders, however, are looking for a rise in value. Tin is very firm, and there are no lots on offer. Quicksilver is lower. Coal: Arrivals have been—3,623 tons Sydney, and 1,134 tons Cardiff; of the former, 2,346 tons readily found purchasers at $7.50 to $7.75 per ton. Ginseng: No transactions whatever have occurred, and there have been no arrivals to replenish stocks, which are now quite limited. Holders continue very firm, and do not seem at all desirous of courting offers. The following were the current quotations:—Cotton Yarn, No. 16 to 24, per bale, $122.50 to 130.; 28 to 32, $133 to 140; No. 38 to 42, $135 to 140. Grey Shirtings, 7 lbs., per piece, $2.55 to 2.60; 8-4 lbs., $2.78 to 2.87½. White Shirtings, $2.45 to 5. T-Cloths, 6 lbs., $1.99 to 2.15; 7 lbs., $2.20 to 2.60. Black Velvets, 22 in., per yard, $25 to 26. Medium, Ladies', and Habit Cloths, $1.10 to 2. Long Ells, per piece, $8 to 8.50. Camlets, SS. Scarlet, $17.50 to 18; SS. Assorted, $16.25 to 16.50. Blankets, per lb., $0.45 to 0.60. Metals, Iron Nail Rod, per picul, $2.70 to 2.90. Hoop, $2.90 to 3. Wire, $7.25 to 7.50. Lead, per picul, $7.50 to 7.75. Tin, per picul, 27.50 to 28. Tin plates, per box, $6.50 to 6.75. Steel, per tub, $4.20 to 4.50. Quicksilver, per picul, $63 to 63.50. Coals, English, per ton, $10 to 10.50; Welsh, $11 to 11.50.

SINGAPORE.—At the commencement of the fortnight there was a good demand for Manchester staples, and a fair amount of business transpired, but subsequently the market had been very quiet; quotations had been firm, and there was little alteration to report. Grey Shirtings 39 in. 8¼ lbs. sold freely at $2.85 after the departure of the last mail, but there had been a less active inquiry since; stocks of 7 lbs. were light, a limited business had transpired, prices firm; markets nearly bare of 6 lbs. and no sales reported; 45 in. shirtings wanted and stocks cleared. Madapollams enquired for, none in first hands. T-Cloths of all descriptions had met with an active demand and a good business had transpired, rates firmer. Dutch drills quiet, stock light. Yarn of low numbers inactive; No. 40s dull of sale and business limited, quotations slightly weaker. White Shirtings of all qualities had met with a good demand, prices were firmer, and a considerable business had been done; Imitation Irish Linens in active enquiry. Cambrics of fine makes in more request, and No. 24s of low quality also placed to some extent. Figured Shirtings improved in value, and in more inquiry. In Dyed Goods there was little change. Plain Dyed Shirtings and Dyed Figured Shirtings showed no alteration. T. R. Cloth had received more attention, and sales to some extent had transpired, but there was no improvement in values. Prints of good assortments in fair inquiry. Metals: Bar Iron had been placed to some extent at low rates; the stock was heavy. Lead declined in value, owing to lower rates ruling

Digitized by Google

in the China markets. Yellow Metal firmer, and stocks in first hands very light. The market bare of Copper Sheathing. Brass Wire in demand; no stocks. Gunpowder unsaleable in any quantity. Coals dull; consumers had heavy stocks on hand, there was no demand, and prices were nominally much lower.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—The Tea Market, as expected at this period of the season, had been very quiet. Stocks continued limited, and consisted mostly of inferior qualities; dealers were firm, but in the absence of business prices remained unchanged, and must be considered quite nominal. Settlements amounted to about 600 piculs, a large proportion of which consisted of low grades, the remainder being some parcels of good medium and fine for the California market. Quotations:—Common, $19 to 23 per picul; good common, $24 to 25; medium, $26 to 28; good medium, $29 to 32; fine, $34 to 37; finest $38 to 39; choice, $40 to 42.

SHANGHAI.—Black: Since last mail left the business in this kind had been unimportant, but prices remained unchanged. Settlements for the fortnight, 306 chests; re-shipments on owners' account, 103 chests; stock, 8 chops, or 8,265 chests. Quotations (duty paid, exchange for credits, 6 months sight, at 6s. 1d. per tael, and freight at £3 10s. per ton):—Hohow, (common) 1s. 0¾d. per lb. Green: Extensive transactions had taken place for both the English and American markets, leaving few desirable parcels in stock. Prices of common descriptions show little alteration, but in all better grades Teamen had recovered the decline quoted a month ago. Settlements were: 14,259 half-chests Moyune and Teenkai, at Tls. 24½ to 43¼; 1,640 half-chests Fychow, at Tls. 21 to 24½; 606 half-chests Pingsuey, at Tls. 38¼; and 2,600 half-chests Shanghai-packed, at Tls. 21¾ to 26½. Settlements for the fortnight, 19,105 half-chests; re-shipments on owners' account, 496 half-chests; stock, 34 chops, or 17,458 half-chests. Quotations (exchange, &c., as above) were:—Fychow and Moyune Gunpowder, 1s. 6d. to 3s. 8d.; Imperial, 1s. 2d. to 2s. 10d.; Young Hyson, 11¾d. to 3s. 3d.; Hyson, 1s. 1½d. to 3s. 4d.; Twankay, 9¼d. to 1s. 7d. per lb.

HANKOW AND KIUKIANG.—No business reported.

FOOCHOW.—Messrs. Odell and Co.'s Circular, dated March 30, contains the following:—Our last report was dated 12th instant, since when there have not been any transactions in our market, and no additions have been made to stocks. The teamen are making preparations for going into the country for the new season's teas, and the first boats will be despatched in a few days. But few if any contracts have as yet been entered into on Foreign account, and the amount of money advanced on loan is very limited.

### SILK.

YOKOHAMA.—The market was virtually closed. A few buyers had endeavoured to make small purchases, but the pretensions of holders and the inferiority of stocks had prevented more than a trifling business. Settlements were about fifty bales, consisting of Hanks and Oshus; and about fifty more, Sadai and Ida, went forward by M. I. steamer as reshipments from Hiogo. Arrivals 100 bales, making a stock of 900 bales.

SHANGHAI.—Messrs. C. J. Skeggs and Co. in their Circular of the 30th March report as follows:—For the French mail, which left here on the 24th inst., the business amounted to 311 bales, at rather higher prices for chop Silks, common sorts being unchanged; and, with the addition of 500 bales for the present steamer, settlements for the fortnight are estimated at 800 bales. The following prices have been paid for well known chops: Choopings, No. 2, Tls. 600; No. 3, Tls. 580; Donkey, No. 3, 552½; Blue Peacocks, Tls. 480, and Red Peacocks, Tls. 450; the two latter being very common indeed. In Hainins, No. 2 Fatmows have been sold at Tls. 475; a few Ting-Hou Kahings at Tls. 490; and best re-reeled Hainins have fetched from Tls. 560 to 610 per picul. whilst medium and common silks are rather firmer, but show no sufficient change to alter quotations. Trams and Organzines, being scarce, are held for higher prices.

### STRAITS PRODUCE.

SINGAPORE.—Prices generally were firm, and transactions had been limited; supplies of the principal staples were coming in slowly. Gambier advanced in value after the last mail, and had touched $3.12½ per picul, but the market closed easier, and dealers were offering to sell at $3.10 per picul, about 600 tons had been taken up. Black Pepper in good demand, supplies scarce, and the dealers reported the crops nearly exhausted, a limited business had transpired at a slight advance. White Pepper had a weaker tendency; there was some inquiry, and several transactions were reported. Pearl Sago was very firm, and in good demand higher rates had been obtained. Sago Flour had advanced in value, and supplies have been readily taken up; a considerable amount of business had transpired. Tapioca had been quiet. Tin maintained previous rates, and was in demand; a moderate business had been done. Hides in good demand, and prices firm. Horns had been taken up at full rates. Gum Damar much wanted and supplies small. Rattans of the best qualities in active demand; Coti Rattans had risen in value. Gutta-percha again advanced, and in active demand for good quality at high rates. India-rubber maintained previous prices. Coffee nominally higher; no supplies of Bontyne had come forward.

### ARRIVALS.

At YOKOHAMA.—From London, March 14, John Banks, from Liverpool, 15, Anne Wood; 21, Portinscale; from New York, 12, Lorenzo.

At SHANGHAI.—From London, March 28, Taitsing; from Newcastle, 29, Margaret Campbell.

At HONG KONG and CANTON.—From Cardiff, March 23, Ferdinand Brum; 26, Freya; April 5, Queen of the Ocean; from Rotterdam, March 23, Constance; from Callao, April 3, Providenza; from Lisbon, March 25, Maria Pia; from Havana, 24, Cataluna.

At MANILA.—From Liverpool, Hong Kong; from Cardiff, Her Majesty.

At SINGAPORE.—From London, April 7, Nile (str.); 12, Queen of Devon; from Cardiff, March 30, Joseph Holm; April 7, Asiatic; 12, Selim; from Liverpool, March 31, Eleanor Dickson; April 3, Agamemnon; from Newcastle, March 31, Mohely; April 1, Sidonie; from Sunderland, 10, Golden Russet.

At PENANG.—From London, April 1, Corea; from Glasgow, 11, Salado.

### DEPARTURES.

From FOOCHOW.—For New York, March 22, Surprise.

From HONG KONG and CANTON.—For Havana, March 24, Italia.

From MANILA.—For Liverpool, Feb. 27, Feliz; for New York, March 24, White Swallow.

From SINGAPORE.—For London, April 7, Bell of Southesk; for Liverpool, 3, Ribbleton; for Hamburg, March 30, Madagasca; for Boston, Dunmore.

From PENANG.—For London, April 6, Flatworth.

### VESSELS LOADING.

At YOKOHAMA.—For London, Chrysolite (cleared); for New York, John Godfrey.

At SHANGHAI.—For London, Undine (full); Everest, Chillingham; for New York, Chinaman, Anglo-Saxon.

At AMOY.—For New York, Benefactor.

At MANILA.—For London, The Sir Jamsetjee Family, Solent; for Falmouth, Cissy; for Hamburg, Voladora; for New York, Bengal; for Boston, Agnes, Mindoro.

Digitized by Google

At SINGAPORE.—For London, Queen of India; for Liverpool, Foxglove; for New York, Chaturanga; Joseph Holmes, for Philadelphia.
At PENANG.—For London, Corea, Ilione, Dharwar, Salado.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, £4 per ton of 50 cubic feet; to New York, per sailing vessel, £2 15s. to £3 per ton; per steamer, $45 per ton.

At SHANGHAI.—To London, the rate is £3 to £3 10s. per ton; to New York, the rate is unaltered. For the coast there is not much inquiry.

At HONG KONG and CANTON.—For the coast no improvement has taken place either in demand or rates. In home freight only two charters from Zebu to London or Liverpool—the Stirlingshire at private terms, and the Egeria at £3 10s. per ton sugar, and £4 per ton hemp—have to be reported. From the rice ports to Europe there have been no settlements, offers, however, for medium-sized vessels are still obtainable at previous rates. For London and New York direct nothing has been done.

At MANILA.—The Solent, a chartered vessel, takes 250 tons wet sugar at £3 18s. 6d. per ton, and some hemp at £4 10s. per ton, outside freight for London. No other settlements to report.

At SINGAPORE.—To London and Liverpool, £2 17s. 6d. dead weight, £3 to £3 2s. 6d. light cargo. To New York, the same rate per ton of 40 feet.

At PENANG.—The British ship Dharwar, 1,293 tons, has also taken the berth for London at £2 17s. 6d. for pepper and tapioca, £3 10s. for sugar in baskets, and £3 5s. for hides. She has already engaged about half her cargo.

## SHIPPING POSTSCRIPT.

—o—

ARRIVALS NOT IN THE TABLES.—At Queenstown, from Bangkok, Alardus; April 18, at Havana, from Macao, Vistula; 21, Onrust; May 12, at Liverpool, from Rangoon, Oxford; 10, at Texel, from Batavia, Frank Marion; from Banjoewangie, Pieter Adolf; at Liverpool, from Singapore, Naworth; May 11, at Brouwershaven, from Banjoewangie, Johanna Christina; 9, off Holyhead, from Manila, for Liverpool, Amigos; —, at Gironde, from Saigon, Glaneur; April 29, at Boston, from Colombo, Inverary; May 14, at Liverpool, from Zebu, Trinidad; 12, at Cuxhaven, from Rangoon, Charlotte Gladstone; 11, off Dungeness, from Java, for Amsterdam, Atlantic King; 16, in the Downs, from Bangkok, West Australian, Taunton.

DEPARTURES.—May 12, from London, for Amoy and Foochow, Eastern Star; for Shanghai, Antrim; 8, from Cardiff, for Yokohama, Jas. Cheston; 9, for Chefoo, Anevoca; 10, from Penarth Dock, for Shanghai, Mary Whitridge; from Sunderland, for Galle, Anne; May 13, from Glasgow, for Singapore, Kinfauns Castle; 14, from London, for Cardiff and Hong Kong, San Fernando; 12, from Sunderland, for Hong Kong, Sharpeton; 15, from London, for Cardiff and Yokohama, Eastern Empire; —, from Rotterdam, for Batavia, Johanna Maria; 13, from Cardiff, for Singapore, Nouveau Nomade; 13, from Clyde, for Hong Kong, Chili; for Singapore, Eliza Thornton.

SPOKEN.—Willy Rickmers, Falmouth to Shanghai, March 12, 12 S., 35 W.; Codan, Cardiff to Singapore, March 11, 20 S., 30 W.; Peruvian, New York to Japan, March 11, 20 S., 30 W.; Trinculo (barq.), from Singapore, Feb. 24, 35 S., 25 E.; Black Nymph, Japan to New York, Feb. 17, 34 S., 23 E.; Fame, Cochin China to Falmouth, April 12, 23 N., 38 W.; Hermine, Japan to Amsterdam, Feb. 24, 35 S., 22 E.; Willy Rickmers, Falmouth to Shanghai, March 12, 12 S., 35 W.; Codan, Cardiff to Singapore, March 11, 20 S., 30 W.; Peruvian, New York to Japan, March 11, 20 S., 30 W.; Trinculo (barq.), from Singapore, Feb. 24, 35 S., 25 E.; Black Nymph, Japan to New York, Feb. 17, 34 S., 23 E.; Fame, Cochin China to Falmouth, April 12, 23 N., 38 W.; Hermine, Japan to Amsterdam, Feb. 24, 35 S., 22 E.; Ellina, Rotterdam to Singapore, April 5, 4 N., 24 W.; Warwick, Gibraltar to Colombo, March 8, 17 S., 32 W.; Columbus (barq.), for Hong Kong, March 14, 17 S.; Litherland (?), Cardiff to Shanghai, March 25, 1 N., 21 W.; Geraint, London to Shanghai, March 31, 6 S., 26 W.; Fidelitas, of and from Hamburg, for Hong Kong, April 2; Benvenue, London to Penang, March 9, off Martin Vas Rocks; Hylton Castle for Singapore, March 10, 18 S., 29 W.; Sisters, Sunderland to Galle, March 24, on the Line, 20 W.; Antifer, Havre to Saigon, April 1, 1 S., 27 W.; Prudhoe (ship), for Shanghai, 25 days out, April 4, 1 S., 23 W.; Imperatrice (ship), Plymouth to Shanghai, 28 days out, April 8, 15 S., 31 W.; Dudley (barque), bound for China, May 11, 49 N., 8 W.; Humber, Batavia to Falmouth, March 19, 11 S., 19 W.; G. M. Watson, Shanghai to London, Feb. 22, 26 S., 7 E.; Caractacus, Japan to New York, May 1, 22 N., 63 W.; Argo, Rotterdam to Batavia, March 20, 1 S., 29 W.; Sierra Nevada, Hong Kong to Falmouth, Feb. 27, 35 S., 26 E.; Sophia, Banjoewangie to Falmouth, March 14, 14 S., 45 (?) W.; Medea, Rotterdam to Batavia, March 10, 21 S., 29 W.

LAID-ON.—At London, for Hong Kong, Ferndale; for Osaka and Hiogo, Sampan; for Shanghai, Wylo; at Liverpool, for Yokohama, Elleray; for Mauritius, Penang, Singapore, Hong Kong, and Shanghai, Diomed (str.).

MISCELLANEOUS.—At Callao, March 29, Suliote, Soule, from Yokohama, and sailed April 2 for the Chinchas. The Countess Russell has been ordered to be surveyed for the conveyance of stores to Hong Kong.

CASUALTIES.—The Westminster, which arrived at Liverpool, from Yloilo, May 10, is reported as being leaky.

The Isabella, James, which sailed from Cardiff, April 12, for the Philippine Islands, put into Lisbon, May 11, leaky.

The Inverary, Auld, from Colombo, arrived at Boston, April 29, with loss of bowsprit and foretopmast, having experienced heavy weather.

The Tartar, Bush, from Cardiff to China, put into Falmouth, Feb. 13, parted from her moorings on the 14th inst., and drifted on to the bank, inside the breakwater, but would be got off the next flood tide; she was ready for sea with a cargo of patent fuel.

## LATEST TELEGRAMS.

—o—

(RECEIVED *via* GALLE, MAY 15.)

### CHINA.

COMMERCIAL.

HONG KONG, April 23.—Grey shirtings, 6¼ catties, 8¼lb., $2 85c. Water twist, 16-24, $1 30c. Cotton, Bengal, fair medium, $17. Tea, nothing doing; total export, China and Japan, 139,500,000lb. Exchange on London, Bank bills, six months, 4s 6¼d.

SHANGHAI, April 18.—Grey shirtings, 6¼ catties, 8¼lb., 2.28 tls. Cotton, Shanghai 15½ tls. Tea, nothing doing. Silk unchanged. Settlements since departure of last mail, 385 bales. Export to date, China and Japan, from commencement of season, 64,000 bales. Exchange on London, Bank bills, six months, 6s. 1¼d. Freights, tea, £4.

## BIRTHS, MARRIAGES, AND DEATHS.

—o—

### BIRTHS.

EDWARDS—On the 21st March, at Yokohama, the wife of Mr. James Edwards, of a son.
JOHNSTON—On the 26th March, at 15, Honan-road, Shanghai, the wife of Alex. Johnston, Esq., of a daughter.
KING—On the 23rd March, at Hankow, the wife of W. W. King, Esq., of a son.
MCVEAN—On the 22nd March, at Yokohama, the wife of C. A. McVean, Esq., of a daughter.
MOURILYAN—On the 6th May, at Lewisham, the wife of T. B. Mourilyan, Esq., prematurely, of a daughter, stillborn.
MILL—On the 27th March, at Shanghai, the wife of John Thain Mill, Esq., of a son
REID—On the 29th March, at Shanghai, Mrs. D. Reid, of a son.
TAYLOR—On the 15th March, at Shanghai, the wife of Mr. J. T. Taylor, of a son.

### MARRIAGES.

JOHNSTON—CAZLY.—On the 16th March, at St John's Cathedral, by the Rev. Canon Beach, M.A., W. Cunningham Johnston, Esq., of Amoy, to Emily Alicia, youngest daughter of William Cazly, Esq., London.
WINBOLDT—STEVENS.—On the 10th April, at St. Andrew's Church, Singapore, John S. Winboldt, M.A., Trin. Coll., Cambridge, C. E., F. G. S. Assistant Surveyor Straits Settlements, to Christiana Isabella, only daughter of the late Robert Stevens, Esq., M.R.C.S. No cards.

### DEATHS.

GROSSKORD—On the 29th March, at Shanghai, D. Grosskord, aged 32.
RENNELL—On the 8th March, at Shanghai, Lydia Wallace, of Philadelphia, U.S.A., the wife of Thornton B. Rennell, Esq., Harbour Master.
WOODS—On the 7th April, at Singapore, aged 52, the wife of B. C. Woods, Esq., barrister-at-law.

A TELEGRAM from Philadelphia, through the Atlantic Cable, states that the Pacific Railway was completed at half-past two o'clock on the afternoon of the 11th inst. With regard to the traffic on the railway, it appears that the preparations making contemplate a weekly emigrant train at the beginning, to be increased as the demand may require, and at cheap rates. But those cheap rates will not be as low as they have been by the Isthmus route, emigrant tickets by which have been as low as £10 from New York to California. The charges at present contemplated by the railway are approximately estimated as follows:—From New York to Chicago, 960 miles, £3 15s.; Chicago to Omaha, 496 miles, £3 10s.; Omaha to Salt Lake, 1,070 miles, £8; Salt Lake to San Francisco, 775 miles, £15 10s.; total, 3,299 miles, £30 15s. In the statement of distances, adding six miles for ferriage from Oaklands to San Francisco gives a total of 3,305 miles. It is said, however, that the company has promised to reduce rates after the 1st of July next, when the cost of a through ticket will probably not exceed £23. The cost of meals and other incidental expenses are estimated at a total of £5 for the trip; and most third-class passengers would lessen this item by furnishing their own supplies. "At these rates," it is observed, "to say nothing of the labour and fatigue of a railroad ride of three thousand miles, there will not, in the nature of things, be many pleasure travellers, and there is much diversity of sentiment as to the amount of freight, local or through."

THE commercial treaty between Japan and Germany now under the consideration of the *Zollbundesrath* contains the following provisions. The King of Prussia is permitted to send diplomatic agents to Japan, and these are to have the right of travelling freely through the country. The seaport towns, Hakodadi, Hiogo, Kanagawa, Nagasaki, Nee gata, and Osaka, as well as the city of Yedo, are opened to Germans. The Japanese authorities are to render every assistance in their power to German vessels in distress, and men-of-war are to be allowed to take in provisions and deposit stores without paying duty.

*LONDON, MONDAY, MAY* 17, 1869.

## LORD GRANVILLE AND THE STRAITS SETTLEMENTS.

THE deputation recently sent to the COLONIAL SECRETARY by the Straits Settlements Association was a movement of immense importance, not only to the communities immediately interested, but to all those Eastern colonies of Great Britain that enjoy the privilege of being governed by a Legislative Council similarly constituted to that of the Straits Settlements. Our report was not completed in time for insertion in the *Telegraph* of May 8th, so that we had then to dismiss the subject with a brief record of facts; we now present (in another column) a full and accurate account of the proceedings, to which we invite special attention, as the reports which have been published by some of our daily contemporaries are far from being correct. In fact, some of them would rather convey an impression that the Association was not prepared with any well-defined plan to submit to the Colonial-office, whereas this is the very reverse of the truth.

The principal grievances—to use a well-worn term—of which redress is asked, may be classed under three heads. First in importance comes the reckless expenditure of the colonial resources which commenced with the *regime* of Governor ORD, and which to the present day exhibits signs of growth rather than abatement. On this head the deputation had scarcely a fair chance of being heard, for Lord GRANVILLE confessed at once that his attention had already been called to the matter, and that by the previous mail he had sent despatches to Governor ORD respecting it. It would, perhaps, be premature as well as impolitic to press for immediate information as to the exact tenour of these despatches, but we may remark, *en passant*, that they could hardly be too stringent in their tone. The excesses that have drawn forth what we trust will be found to be a stern rebuke, will admit of no palliation. The GOVERNOR recently put forth a statement to the effect that the colonial accounts would be found to show a surplus, and by some dexterous process of manipulation an apparent surplus may, perhaps, be exhibited; but the result of an examination of the Government accounts for the last two years, by an independent committee, shows that there must in reality be a deficit. During these two years the expenditure has increased in the ratio of about £50,000 per annum, and an unparallelled development in the resources of the colony would be needed to admit of this, and even then it would be impossible to justify the objects for which the enormous outlay has been incurred. Lord GRANVILLE did not seem inclined to admit this view of the case; but some allowance must be made for official reticence, and it would be strange indeed if an administration so ferociously economical as Mr. GLADSTONE'S would deliberately sanction prodigality in a distant colony any more than at home.

On the second great question—the burlesque of a free Legislature—his lordship was not prepared to stem the tide of argument, and one or two feeble attempts in that direction proved utterly futile. There can be no question that under the present system the non-official members, who are the only representatives of the governed, are entirely without a voice in the deliberations of the governing body. Indeed, on this point Lord GRANVILLE so far endorsed the views of the Duke of BUCKINGHAM as to own that the rules of the Colonial-office compelled the non-official members to vote *en masse* for all Government measures. His lordship certainly endeavoured to justify this attitude by reviving the ancient official dogma that the Government members of the Legislature properly represent the interests of the mixed Oriental population, as distinct from those of the Europeans—but the fallacy of this was so obvious that it hardly needed to be exposed. Every one who has even the slightest knowledge of the Settlements is aware that Natives of all races regard the non-official members as their true and fitting representatives, and this for an obvious reason. The Chinese of the Straits are essentially a trading class, and as a consequence are in constant and intimate contact with the English merchants; their interests are not only identical, but are acknowledged by the Chinese to be so, in proof of which the Municipal Board—in the election of which these Chinese have a large voice—is invariably found to consist of the leading European residents, generally merchants, planters, or professional men, whose knowledge and experience is derived from (on an average) some twenty years' residence in the colony. Even when these old residents retire, their business, generally carried on in the same name, continues to be the object of the same kindly interest on the part of the Chinese, and there were doubtless many among the gentlemen who composed the Deputation last week whose names are still "household words" among them. On the other hand, the official members of the Council, instead of inspiring this entire confidence, are regarded simply as servants of the GOVERNOR, and probably in many cases not unjustly. They are gentlemen who naturally look for advancement in official life, and as a rule have little interest in the colony besides their pay.

Lord GRANVILLE asked the deputation whether they proposed to adopt the elective principle in the choice of the popular representatives, and if so, on whom would they confer the franchise? And the question instead of placing them in a dilemma, as perhaps his lordship anticipated, was answered most fully and satisfactorily. The elective principle, if adopted (which was not, however, insisted on as a *sine qua non*), might be modified, if thought advisable, by a certain right of veto, vested in the GOVERNOR. The nominations might proceed from the Chamber of Commerce. As for the fitness of a large proportion of the Oriental population to exercise the franchise, it has already been exemplified in the case of the Municipal Board, as noted above; and even the election of a Chinese to a seat in the Council itself need not be fraught with any evil consequences, for they have already sat at the Municipal Board, and as police-magistrates, without inconvenience or dissatisfaction to any one. One thing is certain; by whatever means it is to be accomplished, an equalisation of the two elements in the Council will be the only means of obtaining a fair representation of the Colonists, and maintaining a salutary check on the public expenditure.

Lastly, with regard to the relations between the GOVERNOR and the Supreme Court Judges. It is undoubtedly the fact that in other Crown Colonies the Judges are subject to the Colonial Legislature; and there is justice in Lord GRANVILLE'S remark that to make them entirely independent would be dangerous. But this was not asked for. The Colonial Judges should be responsible to the Home Government, that appoints them, and to the Home Government alone. Besides, Lord GRANVILLE, in his observations on this point, greatly undervalued the checks that exist in Eastern colonies on the action of a judge. The colonial press is by no means sparing of its criticisms; public opinion is strong, and is expressed with considerably less reserve than at home, and members of the English bar practice in the Court. Lord GRANVILLE cast a slur on the colonial judges by assuming their inferiority to the occupants of the bench at home; but at any rate they are fully of the same calibre as the generality of Colonial Governors. Again, it must be remembered that for half a century the Oriental population have been accustomed to venerate the judges for their known impartiality, which was attributed to their entire freedom from any local influence; and the supposed source of this impartiality being swept away, the belief in its continuance is imperilled. They have regarded the judges as nominees of a superior power, sent to administer justice alike between European and native, official and private, suitors; but by being placed under the local government they are entirely deprived of this status in the eyes of a large proportion of

Digitized by Google

the population. Take, for instance, the case of a Chinese—not one of the superior order that we have indicated as being eligible for the magistracy, &c., but one of the lower and more prejudiced class that necessarily form the majority—and let us suppose that he has a disputed claim on, or complaint against, a Government official, or some person likely to command influence with the Government. Formerly, he would have left his case confidently in the hands of the judge, and accepted his decision—even though adverse—with equanimity. But under the new system he would be only too apt to say, "What shall I gain by going to the Supreme "Court? The Judge, like all the rest, is *now* only a servant "of the GOVERNOR." And an adverse decision, however just, would be received with dissatisfaction, as emanating from a source no longer above suspicion.

It is to be hoped that on reflection the COLONIAL SECRETARY will see that, however startling the propositions of the Association may have at first appeared to him, they are in the main just and reasonable. We hear that the leading members expect to have another interview with his lordship shortly, to explain some points on which he has expressed a desire for further information; and these conferences can hardly fail to prove stepping-stones to at least some amelioration of the hardships from which the colonists are now suffering.

## TELEGRAPHS FOR THE STRAITS AND CHINA.

WE expressed an opinion not very long ago that the time had arrived for the merchants of China and the Straits Settlements to join in undertaking a line of telegraph which should bring them into immediate connection with the British-Indian scheme, by means of a submarine cable from Galle to the Straits, and thence to China; a proposition which at first sight may seem rather a bold one, but which, when examined, will be found to present few serious difficulties, for the longest section of the proposed series of cables would be but two-thirds the length of that about to be laid between Aden and Bombay. From an article in the *Bangkok Summary* we gather some particulars of an enterprise promoted by a few merchants of Hong Kong and Saigon, to establish a neutral line of telegraph between Moulmein and Touron, in Cochin China, *via* Bangkok and Saigon, and from Touron to Hong Kong, by a cable 600 miles in length. This, it is believed, may be completed and brought into operation in a couple of years, and as the existing system of Indian telegraphs—such as it is—already extends to Moulmein, China would thus be placed in communication with Europe. Such a line would be most valuable now, and in the future would be rendered doubly valuable by the construction of the one we have advocated, from Ceylon, *via* the Straits. But it seems, according to the *Straits Times*, that this scheme would interfere with the concession already obtained by Mr. READ for a telegraph connecting Moulmein with the Straits by a route which would also include Bangkok and Saigon. As Mr. READ'S company—the Eastern Asia Telegraph Company—is preparing to commence operations, it would be a pity to allow anything else to interfere with it; but could not an amalgamation be arranged to the advantage of both undertakings? It would be a strong combination, and might command any required amount of capital for future extensions.

## THE P. AND O. COMPANY.

OUR prediction that the directors of the P. and O. Company would find it advisable to place their Japan service on a similar footing to that of the Messageries Imperiales, by organising a separate service between Hong Kong and Yokohama, has been fulfilled. It is now announced that steamers belonging to this company will in future perform a fortnightly service on this line in addition to the present service between Hong Kong and Shanghai, and the effect of this will be a saving of five days on the homeward and two or three on the outward passage. Some of the home papers, in announcing the impending change, have inferred that the acceleration would affect the entire route between England and Japan, but this is of course a misconception; the service is continued as heretofore between Marseilles and Hong Kong, and the saving of time is effected by transmitting the mail between that port and Japan direct, instead of *via* Shanghai. We may congratulate the company on their prompt recognition of the expediency of this alteration, and the residents in Yokohama on the undeniable advantages that will accrue to them from it. The change takes effect with the outward mail which left London on the 23rd April, and the homeward one due here August 9, which will bring Yokohama advices to June 16, instead of June 11, as by the old time-table.

At Singapore things appear to work more smoothly, and we no longer hear complaints of an insufficient time being allowed at that port on the homeward route. But anxious as the directors evidently are to give effect to any practical suggestions for improvements, we still hear a "growl" against the company now and then. With reference to the landing of passengers at Marseilles, for example: when the steamers arrive late in the evening, might not some arrangement be made for the accommodation of the passengers on board until the morrow? Our attention has been called to the case of the *Poonah*, which reached Marseilles on the 29th ult., and went alongside the wharf at 9 P.M., a most inconvenient hour to land, especially for ladies and children, who on this occasion formed a large proportion of the *Poonah's* eighty odd passengers. Indeed many of the children were in bed. Yet the whole of the passengers, without exception, were ordered to land at once, even those who pleaded for a night's rest on board being denied the boon. That such treatment as this is in accordance with the spirit of the company's instructions to their commanders, we cannot for one moment believe.

We hear the company has entered into a contract with Messrs. CAIRD and Co., of Greenock, for a new screw steamer of 3,400 tons burthen and 600-horse power, which, when completed, will be the largest vessel in their fleet.

## THE STRAITS SETTLEMENTS.

—o—

### DEPUTATION TO EARL GRANVILLE.

On Tuesday, the 4th instant, a numerous and influential deputation, consisting of several members of Parliament and a number of gentlemen interested in the Straits, waited upon Earl Granville at the Colonial-office to represent the evil results of the system of government as at present existing at Singapore, Penang, and Malacca, and to call the attention of his lordship to the reckless and extravagant expenditure of the present Governor, Sir H. St. George Ord, and the strong feeling of indignation and resentment which he has contrived to excite in the colony within the first two years of his administration.

Among the members of the House of Commons (some of whom, however, were prevented attending by the unexpected morning sitting on the Irish Church Bill) were R. W. Crawford, Esq., Jacob Bright, Esq., Sir Frank Crossley, Bart., Lord E. Bruce, Lord C. Bruce, Viscount Bury, Sir F. Goldsmid, J. B. Smith, Esq., G. Armistead, Esq., J. Beresford Hope, Esq., Colonel Gray, R. Dalgleish, Esq., E. H. J. Crawfurd, Esq., Alderman Lusk, C. Reed, Esq., J. D. Nicol, Esq., the Hon. C. Carnegie, D. McLaren, Esq., R. N. Fowler, Esq., R. Shaw, Esq., P. H. Muntz, Esq., J. Platt, Esq., E. M. Richards, Esq., E. Potter, Esq., Major Waterhouse, J. P. Brown, Esq., &c. There were also present the Right Hon. E. Horsman, Messrs. Wm. Napier, Guthrie, Boustead, Paterson, Gilfillan, Fraser, Little, Harvey, Mactaggart, Young, Davidson, Tidman, Rigg, Shaw, Leveson, R. Wilson, Rodyk, &c.

The Right Hon. E. HORSMAN, in introducing the deputation, spoke as follows:—

"The gentlemen whom I have the honour to introduce to your lordship to-day represent, and most efficiently and fairly so, the colony of the Straits Settlements, a young and thriving community, which has been latterly subjected on the part of the local government to a series of changes and experiments in legislation and finance which had aroused among a people formerly contented and happy a spirit of dissatisfaction and even disaffection." Mr. Horsman then explained the grounds upon which the transfer to the Colonial-office had been advocated, and in reply to a remark of Lord Granville that under the former government there had been complaints made, explained that these were rarely if ever against the local government, and inferred the justness of the complaints from the fact that they had in almost every instance been redressed. He proceeded—"The machinery of the Government that has been put into action has proved anything but a boon to the Settlements. Where you have a governor and a council of your own in a distant colony everything must depend on the character and qualifications of the Governor, and the constitution of the Council. In the Straits, the Council is composed partly of official and partly of non official members, the former being practically as nine to three, but it is the rule of the Colonial-office that all official members must vote as a matter of course with the Governor.

Lord GRANVILLE: No, no; I must correct you there.

Mr. HORSMAN: I will refer your lordship to a despatch of the Duke of Buckingham, your lordship's predecessor in office, and there you will find explicit instructions to the official members to vote in accordance with the views and wishes of the Governor.

Lord GRANVILLE: There would be certain occasions when I confess they would be bound to do so, but I deny that all are expected to vote with the Governor under every circumstance. So far from that being the case, I have known cases where certain official members voted with unofficial members against the Governor.

Mr. HORSMAN: I am very glad to have the opportunity of calling your lordship's attention to the following paragraph in the Duke of

Digitized by Google

Buckingham's despatch:—"A member of the Government will under all circumstances support the Governor with his vote, and I trust, in case he finds it impossible to reconcile such a line of conduct with his wishes or honour, he will not hesitate in resigning his situation, and in the event of his acting contrary to these instructions I shall not be displeased to learn that the Governor had suspended him forthwith from the exercise of his official functions."

Lord GRANVILLE: Notwithstanding what you say, the fact as I have stated it is correct; the official members, upon any important question or orders from the Home Government, would be bound to vote with the Governor, but there are many questions not of such importance, where, as occurs in frequent cases in the House of Commons, the members of the Government are free to pursue their own line of conduct.

Mr. HORSMAN: It is felt that the real value of the Council consists in the unofficial element, which is the only one that represents the wishes and wants of the community, and in the Council of Singapore the official members are in a decided majority.

Lord GRANVILLE: Not so very decided; the numbers are very nearly equal.

Mr. HORSMAN: The officials are eight or nine, and the unofficials three, and it is felt that the Governor in Council has a majority at his back by which he can carry any measure he pleases. The unofficial members, feeling themselves helpless, are growing dissatisfied. One of them has lately resigned, and the Governor cannot fill up his place, although he has endeavoured to induce one or two of the most influential English residents to accept it. I have myself seen a letter from one of the unofficial members protesting most strongly against a continuance of the present state of things, and declaring his intention of never entering the Council Chamber again. I will now ask your lordship's attention to two or three instances of the spirit in which the government of the Straits is being carried on. The new Governor is a military man, and came from a decaying Settlement in the West Indies to a colony, young, healthy and vigorous; and whereas it was the custom of the old Indian Government to leave well alone, his policy has been to leave nothing alone. The Straits Settlements were called upon by the Colonial Office to prove that their revenue equalled the expenditure, and they did prove it, and this was the condition of affairs when the Governor entered upon his functions; but now within two years there is a deficit.

Lord GRANVILLE: We had better postpone any discussion on the finance part of the matter. So far as I am informed, judging from the statement you have been good enough to send me, you are not correct as to the finances. This arises partly from your not knowing that certain estimates were not allowed. The estimate, for instance, to carry out the scheme for building steamers has been suspended, and there are other items under consideration, and which are not likely to be allowed. It would be a waste of time, therefore, to discuss this matter until we have got from Sir H. Ord an answer to the questions addressed to him.

Mr. HORSMAN: The new Governor has certainly talked of increased taxation, which looks very suspicious, but it is a great satisfaction to learn that this most important matter is already receiving your lordship's attention, and I will leave it to refer to another. Before the new Government was formed, the Straits Settlements were absolutely free from all restrictions on trade. But while our neighbours in the East, the Dutch, are gradually retreating from the restrictive policy of which they have seen the folly, the new Governor of the Straits is adopting their retrograde system, and seeking to establish restrictions where none before existed. Mr. Horsman then referred to the Pilotage Bill, the Quarantine Bill, the Passenger Act, &c., and in answer to a remark of Lord GRANVILLE that these were possibly introduced in order to assimilate the system in the colony to the terms of the Merchant Shipping Act, said that the measures complained of were passed by the Legislative Council of Singapore, not by orders of the Home Government; that one, if not more of them, had been returned from the Colonial Office for modification; and that the fact remained that none of the restrictions imposed had been known under the old Government, and the introduction of them could not fail to be vexatious and irritating to both Europeans and natives. He then went on to say: The native temper is a thing to be very much studied by the Governor in these Settlements, but it would hardly appear that he has given himself that trouble. He wanted to raise his revenue, and one mode he hit upon was taxation of native processions of whatever kind, funeral, marriage, or any other.

Lord GRANVILLE: That I understand is given up.

Mr. HORSMAN: I am informed that the inspector of police represented to the Governor that the proposed impost would create so strong a feeling among the native population that it ought to be given up entirely, and the Governor has consented to reduce the tax, though not to repeal it. While on the subject of interfering legislation there is another measure of which I shall be glad to have your lordship's disapproval, as I am happy to know it had that of your predecessor in office. I allude to the Deportation Act of 1867. You have in your office a full history of that measure, in the form of a protest by the Chief Justice, who says it passed the Council at a single sitting, without any previous notice of it whatever being given; and he describes it (I use his own words) as at "variance with the elementary principles of justice, and utterly repugnant to British law." The Duke of Buckingham agreed with that description of it, and he sent back the Act for reconsideration; but is it any wonder that the natives have been stricken with alarm at its provisions, and that large numbers (I hear it stated 2,000) have left the Settlement?

Lord GRANVILLE: That I must tell you is denied by the Governor entirely.

Mr. HORSMAN: There is one other point to which I have to call your lordship's attention. It is not exceptional, because I admit it is the same with other colonies as with the Straits Settlements, but it acts very unfortunately in Singapore, for which not the local but the Imperial Government is to blame. I refer to the removability of the judges by the Governor. Before this change of government took place the system in vogue was most popular and efficacious. Since the change a feeling has grown up amongst the natives that when there are cases in the law courts between them and the executive they cannot rely as before on a just decision. I had a striking confirmation of this two days ago from Mr. Davidson, who has just returned from the Straits. A Chinese tradesman who had repeatedly applied for payment of an account against the Government asked Mr. D. how he should proceed, and on being advised to enter an action, replied, "How can you expect the judge to decide against the Governor? he might be dismissed the next day." Now that represents a prevalent feeling (I am not arguing that it is a sensible one) among the native population, and it is enough to poison the native mind.

Lord GRANVILLE: Notwithstanding what you attest, the system is one that gives very general satisfaction. If you adopt a system in one Crown colony you must adopt it in all; in colonies having a House of Parliament and popular representation the plan may be subject to modification.

Mr. HORSMAN: I quite agree with your lordship as to the propriety of modifying the system according to circumstances, and in the case I am speaking of, if the judges were made responsible to the Home Government only, that would be a great improvement. I am not at all saying that the absolutely independent position held by the judges in England would be desirable in the Straits.

Lord GRANVILLE: I hope that when the natives find the judges do their duty the existing prejudice will wear off.

Mr. HORSMAN: To recur for one moment to the expenditure of the Colony, it does appear very extravagant if we take one illustration of it, and which I believe has already come under your lordship's notice. I refer to the new Government-house. When the present Governor went to Singapore the salary attaching to his office was raised from £4,200 to £5,000 a-year, which is surely quite enough! But it was not thought so by him, for he applied for an increase of £2,000. The late Governor, General Cavanagh, had, previous to the expiry of his office, received the sanction of the Governor-General of India to the purchase of a property suitable for the Governor's residence at a very moderate cost; but the new Governor did not favour it with his approval, and ordered estimates and plans for a palace in a different locality. It is not to the mere fact of a suitable residence being asked that objection is taken: on the contrary, there was every disposition in the colony to meet the Governor liberally and with kind feeling; but there is the gravest objection to the scale on which this building has been carried on and the expense incurred on it. It is calculated that it will cost some £60,000 before it is finished and furnished, and this is one quarter of the revenue of the colony!

Lord GRANVILLE: There will certainly be no sanction to one half of that.

Mr. HORSMAN: Two years ago, before the change of Government, the whole community of the Straits were peaceful and prosperous, whereas now—

Lord GRANVILLE: They were nevertheless always complaining, I think, to the Indian Government.

Mr. HORSMAN: I am well aware that they from time to time made representations to the Indian Government if edicts passed in Calcutta (not by the local Government) were defective or injurious to the special interests of the Straits, and in nine cases out of ten an immediate remedy was applied. They now, however, in reality feel themselves injured by a Government existing in the midst of them. The manner in which your lordship has met the various representations made to you justifies the judiciousness of the course these gentlemen have adopted in coming to your lordship. They might have gone to Parliament first, but out of respect to your lordship they have thought it right in the first instance to seek an interview with you, and I ventured to assure them that, from what I know of your lordship, we had only to convince you that there was a grievance to ensure prompt redress. The subject is one well worth your attention, and if I have succeeded in making that clear to your mind I shall have discharged my duty. We feel that prompt action is required, and we are glad to find you have already to some extent anticipated us. All that we complain of has taken place within the last two years, and the mischief is still going on. Gentlemen just arrived from Singapore and Penang are here, ready to afford your lordship any information you may require. I myself have avoided details, giving you but a bare outline of the case.

Lord GRANVILLE: I am much obliged to the deputation for doing me the honour to wait upon me. To one new to his office the opinion of everyone who knows the colony and is deeply interested in its welfare is exceedingly valuable, and I hope you will come as freely as possible to discuss with me its interests. With regard to the finances, we will postpone that until we are able to give a more full and complete answer to the points. There is one matter referred to by Mr. Horsman which is very important, and if you will be good enough to state what is the notion of improving the Council, I shall be obliged. Mr. Horsman said a vacancy had occurred which it was very difficult to fill up.

Mr. HORSMAN: As regards the number of members in the Council, I am told that in the Mauritius the unofficial members were in a majority, and I asked Mr. Frazer how it was that the Government went on so smoothly as it appeared to do. He says that the present satisfactory state of things dates from the time when a non-military governor, who studied the interests of the colony, was appointed, and that under his administration nothing but good has resulted from the existing constitution of the Council.

Mr. NAPIER: The question was left untouched by the Straits Association as to whether the unofficial members should be elective or otherwise. It is left to your lordship to determine what method should be adopted.

Lord GRANVILLE: I do not think that in an Asiatic colony, where the unofficial members are nominated by the Governor out of a small number of Europeans, that these gentlemen ought to have a preponderating power over the Governor and his officials.

Mr. HORSMAN: The community is a commercial one, in which the interests of the Chinese and other traders are fully represented by

Digitized by Google

Europeans; the prosperity of both is derived from one and the same source.

Lord GRANVILLE: Is the selection of the unofficial members by the Governor to be limited to the Europeans?

Mr. HORSMAN: Oh, no; there is no reason why he should not make selection from among the Chinese.

Lord GRANAILLE: Do you recommend he should?

Mr. HORSMAN: I should leave it to your lordship; there are eminent natives fit for the position, whether he choose to nominate them or not. I am told that Chinese are actually elected to the municipal board. But the fact is that the Chinese are wishful to see Europeans in the Council.

Mr. NAPIER: I think your lordship would best get over the difficulty by reducing the number of official members of the Council.

Lord GRANVILLE: The point is whether you should give an absolute majority in the Legislature to the non-official members of it, these being the most intelligent, richest, and most respectable men there, but still a very small class, there being some eighty or ninety thousand natives you have to govern.

Mr. HORSMAN: It is so in some other colonies — Mauritius and Trinidad, for example.

Lord GRANVILLE: But I am told the Mauritius Legislature does not work so smoothly as is represented. Mr. Horsman has stated that there is no complaint whatever against the members that have been already nominated to the Council.

Mr. NAPIER: Certainly not; the appointments referred to have met the highest approval both of Europeans and Chinese.

Lord GRANVILLE: As regards the cost of Government House, have they opposed it?

Mr. NAPIER: The original vote of 100,000 dollars was proposed by one of the unofficial members and seconded by another, and an additional vote since taken to account of the house has also been sanctioned by them, and for the reason, as one of them expresses it in writing to a friend, that were the building not carried on to completion it would remain a standing monument of their folly. It must be borne in mind that on the Governor's first arrival there was every disposition to treat him with the greatest kindness and liberality, and the unofficial members seem to have been surprised into the original vote.

Lord GRANVILLE: I hope the gentlemen of the deputation will bear in mind that when I argue a little against their views it is not in the least degree because I am at variance with their representations, but with a view of as far as possible seeing both sides of the question. You may take it that we are looking as sharply as possible after the expenditure. The European community in the Straits are very lightly taxed, I believe?

Mr. NAPIER: Irrespective of taxation on excisable articles, the assessments on houses paid by Europeans are very heavy—ten per cent. on their rental. From £50 to £75 a-year under this head is a common thing.

Mr. HORSMAN: I am sure the gentlemen of the deputation are very glad to find that your lordship's interest is excited in the matters before your notice to-day, and more especially so that on one of the most important points—that of the increased expenditure—your lordship has already anticipated them.

The usual courtesies were exchanged, and the deputation withdrew.

# Foreign Intelligence.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, May 18.

Parliamentary affairs are dull, public attention being chiefly directed to the forthcoming elections, which are to take place early in June. Half the members of the Second Chamber of the States-General must resign, and most of them will offer themselves for re-election. Messrs. Lidth de Jeude, de Bosch Kemper, and J. J. Rochussen have, however, declined to become candidates again. I need not say that the papers are even now filled with articles in favour of or in opposition to candidates; and it is of no use to add that this paper war is a most unmitigated nuisance. It is even more tiresome than it used to be, as the number of M.P.s will be augmented by five, and most of the established papers are enlarged, while at the same time a great number of new ones have been started, now that the stamp-duty is on the point of being abolished.

The ex-Minister Heemskerk has interpellated the Cabinet about the disturbances which, according to a despatch of Mr. Reuter, have occurred in the neighbourhood of Batavia. I have already informed you of the statement of the Minister that he had received a telegram, saying that disturbances had occurred at Bekassi, which had been subsequently suppressed, and the last assertion was confirmed by a private telegram received by the *Nieuwe Rotterdam Courant*. But nevertheless the public is anxiously waiting for the next mail, which is expected on the 16th inst., when particulars of the affair will probably become known. The curiosity is the more excited in consequence of the Minister's statement that he could not publish the entire tenor of the Batavia telegram. It is quite natural that the public thinks the matter worse than it will perhaps turn out to be.

In the last sittings of the Second Chamber the Budgets of the West-India Colonies passed, and Mr. van Goltstein once more interpellated the Cabinet about the mode in which the India Railway Company contracted for its last loan guaranteed by the State, to which question the Minister gave a satisfactory reply.

The papers are discussing with great vigour the last *brochure* of Mr. des Amorie van der Hoeven, which I alluded to in my last letter. The Liberal papers defend their policy as well as they can; but I think that this little book represents the first step which must inevitably lead to a rupture amongst the liberal party.

The *Vaderland* says that the Cabinet intends to lay before the members a Bill, by which the system of promoting naval officers will be altered. Till now promotion has gone by seniority; but should this Bill become law it will be conducted by selection alone.

The *Jason* will sail in a few weeks with troops for India. Mr. J. N. Servaas has been appointed Consul at Saigon. At the last meeting of the Dutch Missionary Society the financial returns were published. The receipts amounted to f.24,354.19c., and the expenditure to f.26,312.92½c. Messrs. P. L. Gysman, S. A. Schilstra, and L. J. Seegers, will shortly leave for Tjandjoer, Cheribon, and Indramajoe as missionaries.

### COMMERCIAL INTELLIGENCE.

The discount market continues very unsettled, and the tightness of money is on the increase. The general aspect of the market gives rise to the belief that rates will still be higher, and that a further advance in the official minimum will be made in a short time. There has been some fluctuation in the home funds. The tone of the foreign stock market has been very heavy, notwithstanding the better prices on the other Continental markets. Most descriptions show a decline, a belief that we are on the eve of still dearer money being the main cause for sales being pushed. Dutch Two-and-a-Half per Cents., 54½; Three per Cents., 63¾; Four per Cents., 86; Trading Company, 128½; Netherlands India Trading Bank, 62; India Railway Company, 49; do. warranted, 92½.

### PRODUCE MARKETS.

COFFEE.—The market is very dull, and prices have declined. Holders, however, refuse to operate at the cheaper rates, so that no transactions have taken place. The only one to report is 4,485 b. Java, ex Garibaldi. The prices did not transpire. Good ordinary Java is now quoted nominally 40 to 40½c.

RAW SUGAR.—The market is rather dull, and a very small business is being done. A few transactions have taken place in the Amsterdam market, viz., 1,356 mats Sourabaya, No. 14, ex Petronella, at 35½f.; 829 mats Passaroeang, No. 12 to 13, at 35¼ to 35½f.; 1,775 mats Passaroeang, ex Golden City, No. 12, at 35½f. The stock in bond was on the 30th April 40,463,698 kilo., and the unsold stock of the Trading Company 96,705 mats, of which 70,400 mats are to be offered in public sale on the 25th inst. The private stock was 11,298 mats.

RICE.—No alteration in prices, the business being dull and limited. Sales 1,050 b. Java, ex Johannes Lodewyk; 1,086 b. do., ex Noach II.; 4,060 b. Java, ex Dageraad. The prices did not transpire.

SPICES are very dull, a little business passing in nutmegs, No. 1 and 2. The present quotations are:—Nutmegs, No. 1, 96 to 97c.; No. 2, 87 to 88c.; mace, D, 145c.; E, 140c.; Amboyna cloves No. 26½, 29½c.

TOBACCO.—There has been no improvement in the market since the departure of the last mail; the demand for all Java growths is very firm. Holders of the finer classes, of which there are but little offering, are firm at high rates. The stock of Manila is not important, and we may thus wait for improved rates. The stock of Java amounts to 4,262 bales.

DRUGS.—Camphor very quiet, and but little offering. Cubebs may be bought at 22 to 23c. Long Pepper: The stock is small and nothing can be bought under 18 to 19c. Cassia Fistula: Floating parcels are on offer. Cassia Lignea: Nominal, 77 to 78c. Cassia Vera, 647 b., ex Maria Sarah, sold at secret prices. Preserved Ginger is quoted 77 to 78c. Inferior, 75c. Vanila meets with a good demand, and prices are much higher, owing to the advices from Java.

RATTANS.—100 piculs, ex Isaac da Costa; 170 piculs, ex Jannetje, and 63 piculs, ex Noach II., have changed hands.

INDIGO.—Prices are firm, but transactions very limited. Of the 145 b. Caracas offered in auction; 52 b. were sold at 130 to 310c.; 93 b. were bought in.

BANCA TIN has been very quiet, but at the close prices are somewhat firmer. The prices paid were from 79½ to 80f.

### SHIPPING INTELLIGENCE.

ARRIVALS.—May 3, at Texel, from Batavia, India; 7, at Brouwershaven, from Batavia, H.M. st. Watergeus; Henriette Gerardina Suzanna; at Texel, from Batavia, 's Gravenhage; from Passaroeang, Golden City; from Sourabaya, Java; 8, at Brouwershaven, from Samarang, Susanne; from Banjoewangie, Hebe; Graafstroom; from Indramayoe, Ludwig; 9, at Brouwershaven, from Batavia, Albrecht Beyling; at Texel, from Banjoewangie, India Packet; from Padang, Zaanstroom; 10, at Batavia, from Texel, Peter Adolf; from Banjoewangie, Frank Marion.

DEPARTURES.—May 2, from Brouwershaven, for Singapore, Tollens; 5, from Texel, for Batavia, Mr. I. van Lennep; 10, from Texel, for Singapore, Bethena.

PASSENGERS INWARD.—From Java, per 's Gravenhage: Mrs. S. J. Loudon and family, Messrs. W. D. J. Schiff and family, F. Weber and family, S. Meyer and family, Hoogeveen and family, Gerards and family, van Laren and family; Mrs. Kock and family, Messrs. Bogaerdt and family, de Ruiter and family, Ketjen, Mrs. van Panhuis and family. Per India Packet: Messrs. D. Smits and family, van den Kervel and family. Per Zaanstroom: Mr. v. d. Steen and family.

THE BRINDISI ROUTE.—The representatives of Governments and railway companies interested in the overland route to India by Brindisi have held conferences for some time past at Munich and Stuttgard. As the result of the deliberations, it is now proposed to run a train daily to and from Ostend and Brindisi. The train will be in communication with the 7.25 A.M. train from London, and the 2.45 P.M. train from Ostend. The whole distance from London to Verona by this train will be run in fifty-four hours. A special weekly train to meet the Indian mail at Alexandria will leave Verona every Saturday. Alexandria will be reached at the same time as by the steamer from Marseilles on Friday. The sea voyage will thus be lessened by seventy hours, and the net gain will be twelve hours.

THE Queen has approved of Mr. Leon Hernandez as Consul at Rangoon for the Belgian Government.

Digitized by Google

# Monetary and Commercial.

We understand that the second of the two companies recently formed for supplying direct telegraphic communication with India and the Far East, namely, "The Direct English, Indian, and Australian Submarine Telegraph Company," is for the present in abeyance. This company, it will be remembered, is the one which proposed to lay a light and cheaply-made cable, on Mr. Varley's plan, from Falmouth to Alexandria, *via* Gibraltar and Malta, without touching the Continent of Europe. It is stated that operations may yet be resumed, and we shall be glad to find this verified, for the new system is surely worthy of a trial. In the meanwhile, however, the British Indian Company remains master of the field.

In consequence of the entire absence of demand for India, and the decided advance in the Continental exchanges, bar silver is very flat, and sales have been effected at 60½d., showing a decline of ¼d. Mexican dollars are scarce, and remain at the last quotation, 59¾d., with no large amount of business doing.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton on the 15th inst., was, in gold, to Galle, £10,000; to Bombay, £10,000; to Madras, £1,785; in silver to Hong Kong, £24,862; total in gold, £21,785; in silver £24,862.

The *Yorkshire Post* states that a meeting of the creditors of Mr. M'Mahony, woolstapler, whose suspension, with liabilities of £20,000, occurred recently, has been held at Bradford. A composition of 7s. 6d. in the pound was offered. The meeting came to the resolution to require the insolvent to make an assignment of his estate for the benefit of his creditors, for whom assignees were appointed.

At an adjourned meeting of the creditors of Messrs. W. Dickinson and Sons, of Blackburn, who recently failed, it was resolved to accept a composition of 12s. 6d. in the pound, payable by half-yearly instalments of 2s. 6d. each.

Mr. Charles Bennington, manufacturer, of Blackburn, has been obliged to suspend payment; his total liabilities are estimated at £9,300.

The Bank of Holland has raised its rate of discount from 3 to 3½ per cent.

*Morris's Directory for China Japan and the Philippines* (1869,) is by far the most complete and accurate work of its kind ever published in China. It includes a full and carefully compiled directory for Hong Kong and all the ports in China, Japan, and the Philippines, even to the newly opened ones of Osaka and Hiogo, to which are added Saigon and Bangkok. An Appendix supplies much useful customs, postal, and stamp information.

## ABUSES IN THE TEA TRADE.

The following circular letter, dated 12th inst., has been issued by Messrs. J. C. Sillar and Co.:—

Gentlemen,—As the Mail for China departs to-morrow, and the routine of business will be interfered with next week, owing to the intervention of the Whitsuntide holidays, we publish our usual Bi-Monthly Circular to-day, and take the opportunity to make some remarks upon the exciting occurrences which have taken pace in this market during the past few days. We allude to the determination of a few of the large dealers to resist the payment of the usual half per cent. Buying Brokerage—a movement which we regard as most impolitic and short-sighted, as far as the dealers themselves are concerned, but which we believe and hope will end in great good, and further the interests of the trade generally. Attention has recently been called to the abuses in the Tea trade, and its unprosperous condition, which has now become notorious, has been in a great measure accounted for.

Who are the parties principally to blame in the matter? We unhesitatingly answer, the brokers themselves. As guardians of the trade, with them alone rests the responsibility of all the abuses complained of. We write in no unfriendly spirit, but in the sincere hope that at the meeting of the Tea Brokers' Association, to be held on the 20th instant, the matters complained of may be brought forward and fairly discussed. "A false balance is abomination to the Lord, but a just weight is His delight." As an example of the manner in which this has been set aside by "Trade Custom," we give an actual transaction—190 half-chests of Tea are sold weighing nett by the Queen's Scales 10,226 lbs., but the account sales are rendered to the importers of the Tea as 190 half-chests weighing nett only 9,846 lbs. Again, the Teas are sold at three months—that is to say, the Tea to be delivered and the money paid at the expiration of three months from the date of purchase. If the Teas are required, however, before that time, as is generally the case, according to another "trade custom" the buyer is again allowed to deduct a certain amount from the purchase-money; the full weight of the tea being required, however, although it, as well as the money, is handed over before the appointed time. The word which has been substituted for a very disagreeable and unblessed word representing this bite from the purchase money is "interest" or "discount," under which false name the abominable transaction has been allowed to pass hitherto almost unchallenged, few suspecting the true nature and meaning of it. It rests with the Tea Brokers' Association, as we have before said, to remedy these evils, to enact that the Queen's weights shall be taken by both parties, and that the purchase-money be handed over full weight and without deduction when the teas are delivered. These two abuses alone amount to upwards of ten times the amount of the buying brokerage. For their own interests, we should advise the trade to employ a broker, except at public auction, which, we feel satisfied, ought to be perfectly free and open, the present system being generally admitted to be far from creditable, the teas in few instances getting fair play. The demoralising system of buying over should be put a stop to. In consequence of a letter which we had the honour of addressing to the Court of Aldermen on the subject, some years ago, the clause forbidding brokers to buy and sell on their own account, was struck out of the rules, and many have thus been saved from the crime of perjury. Past experience, however, has proved the system to be unsound, and it would be well if those who still buy on their own account should style themselves "jobbers," and charge a small profit to the trade, but in nowise sign contracts as brokers, or receive a brokerage upon the sale of their own goods. Should our fellow brokers give the above subjects the attention they deserve, and act impartially and in accordance with strict justice between buyer and seller, and for their own sakes not combining the discreditable traffic of money lending, as at present practised, with their own honourable profession, we feel satisfied the trade generally would assume a very different aspect and the brokers would have no reason to fear either disestablishment or disendowment.—We are, Gentlemen, yours faithfully, J. C. SILLAR and Co.

## ARTICLES OF IMPORT.

### TEA.

The following is from Messrs. W. J. and H. Thompson's Circular dated 12th inst.

The greatest dulness has prevailed since our last. The Public Auctions were brought to a close on the 10th instant, without any rally whatever in prices, and subsequently some sales have been made at a further reduction. Foochow Congous. Dust and Siftings, of good quality, remain at 7½d. to 8½d. per lb. Common, all leaf, at 1s. per lb. Good common is but little enquired for at 1s. 0½d.; fair 1s. 0½d. to 1s. 1d. per lb.; and medium kinds have sold as low as 1s. 2d. to 1s. 3d. per lb. In fine there has not been anything done. Black Leaf Congous. Dust, "with all faults," sold at 5¾d. to 6½d. per lb., and clean at 6¾d., which is again lower. Common remains at 1s. 0½d.; and fair is offering at 1s. 0¾d. to 1s. 0½d. without finding buyers. In medium and fine little has been done, but prices are much as last quoted. Tayshan Congous. Ordinary sold at the last auctions in half-chests at 9½d. to 10d. per lb.; common to fair, in boxes at 1s. 0½d. to 1s. 1d. per lb. Souchongs: Fair sold at the auctions at 1s. 1¾d. to 1s. 1¾d., and a break of fine at 1s. 9¾d. per lb. Oolong: Fair at 1s. 0½d. to 1s. 1d. Scented Orange Pekoes: Foochow grades continue much depressed, and sales have been made of fair quality, with good scent, at 1s. 1d. to 1s. 1½d. per lb. Scented Capers: These descriptions sold at the auctions at 11d. for common, 1s. for fair, and 1s. 1½d. to 1s. 2d. for good, the better grades being again lower. Green Teas: Several parcels sold at the last auctions at rather easier rates, and the demand for Hysons has slackened.

The China auctions ended on the 8th inst., and proceeded flatly throughout. A large Indian sale commenced to-day, consisting of 9,578 packages; so far about 4,000 packages have passed. The Assam Company's sold well, but those of private growth, which were weak and thin, sold lower.

Digitized by Google

SILK.—The market since the 7th instant has remained quiet; the few transactions reported have been at unchanged rates.

COTTON.—Since our last report the Liverpool market has been extremely dull, and the anxiety to sell has been much greater than to buy, so that prices have shown a further downward movement, and have been very irregular. The following are the current quotations:—Surat, 6¾d. to 11d.; Madras, 8¾d. to 10⅛d.; Bengal, Scinde, &c., 7¾d. to 7⅞d.; fair Dhollerah, 9⅞d.; fair Oomrawuttee, 10d.; fair Broach, 9⅜d.; fair Bengal, 8⅛d.; fair Egyptian, 12⅛d.; fair Pernam., 11⅛d.; middling Boweds, 11⅛d.; middling Orleans, 11⅞d. The latest sales "to arrive" have been—Dhollerah, fair new merchants, ship named, 9¼d.; Oomrawuttee, fair new merchants, February-March shipment, 9⅜d.; Bengal, fair new merchants, ship named, 7¾d. The London market is very dull and depressed at the quotations given elsewhere.

COFFEE.—There was not much change to note in the market. Plantation Ceylon has been more steady, and here and there a trifling advance has been paid; Native is still much neglected, and lower prices would have to be taken to effect sales. Small quantities of Plantation East India have been brought forward, and only partly realised at moderate rates.

COIR GOODS.—Yarn continued steady until lately, when heavy arrivals occurring prices have given way about 20s. per ton upon all qualities except fine, which has declined rather more than this. Fibre, in consequence of rather heavy supplies, is dull, and somewhat lower. Rope very quiet; small lots only sold, 1½ to 3¼ inch at £30 10s. to £30 15s. per ton. China Grass: Low prices have attracted speculators' attention, and being assisted by a slightly improved demand prices are advanced to £70 per ton, but this is hardly safe to lay down on this market at.

COCOA NUT OIL.—There has been no change in the general condition of the market, prices being fairly maintained, but with a limited business.

JAPAN WAX.—The only sale since our last has been 171 boxes low mixed saucers from Hamburg at 55s. to 60s. per cwt.

MANILA HEMP.—The market continues steady, with limited business; one parcel good roping has realised £48 per ton.

PEPPER.—A small business has been done in Penang black at 3¾d.

RICE.—The tone of the market is unchanged. At the recent public sales 250 tons Siam on the spot realised 7s. to 7s. 6d., and 1,400 bags low middling white Bengal 8s. 6d. to 8s. 9d., while 16,000 bags Rangoon were bought in at 7s. to 9s. By private contract 800 tons Siam have been sold at 7s. 3d. ex ship. A cargo of 960 tons Siam in gunny bags, arrived off the coast, has been sold for delivery ex ship in London at 7s. 3d. for the field and 7s. 7½d. for garden.

SUGAR.—The demand is still almost exclusively for West India descriptions, but the demand generally has slightly improved, especially for superior qualities, and prices are 6d. to 1s. higher than at the date of our last. At the auction 7,000 bags Manila were all bought in. The business reported on the spot by private contract comprises:—11,200 bags clayed, duty 8s., at 31s., a few 30s. 6d.; 5,000 bags taal, at 28s.; and 1,500 Iloilo, at 29s. 6d. In Penang no business is reported.

SHELLS.—Mother-o'-pearl: At auction 80 cases good bold Manila sold steadily at £7. Tortoise: At public sale a total of 5,705 lbs. has been brought forward, which met a good demand, and the greater part sold at firm prices to some advance; of 4 boxes 2 cases (674 lbs.) Singapore, one-half-sold at 11s. 6d. to 13s. 6d. Turtle: 2 cases (249 lbs.) Manila sold at 6s., 3 cases (324 lbs.) Japan chiefly sold at 6s.

TERRA JAPONICA.—Cutch: At auction 280 boxes fine Pegu were bought in, Elephant mark at 32s. 6d., Fish mark at 30s. 6d. Gambier: The tone of the market is unaltered; there have been no transactions since our last report.

TIN.—The demand for Straits is slightly less active than at the date of our last, and prices are a shade lower, the current quotations being £133 cash on the spot and £128 for arrival.

## ARTICLES OF EXPORT.

—o—

### MANCHESTER MARKETS.

The demand since our last report has shown little animation; prices have become weaker, but not sufficiently so to induce much activity. At the lowest point touched there is rather more disposition shown today to place orders on a slightly increased scale; yet there are no signs of activity or desire to operate freely, and the market at the close is not more than steady at the current quotations.

| QUOTATIONS. | s. d. | s. d. |
|---|---|---|
| Grey Shirtings, 7 lbs. ... ... ... ... | 8 10½ to | 9 4½ |
| ,, ,, 8¼ lbs.... ... ... ... | 10 9 to | 11 0 |

| Cotton Yarn, Nos. 16-24 ... ... ... | 1 2½ to | 1 4 |
| Nos. 28-32 ... ... ... ... | 1 3½ | 1 5½ |

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.

## FREIGHTS AND CHARTERS.

We have no change to note in berth freights to the Eastern ports; coal freights from the Northern outports are also without material alteration.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 40s. weight, 50s. meast. To Hiogo: 50s. weight or meast. To Tientsin: 60s. weight or meast. To Chefoo: 60s. weight or meast. To Shanghai: 35s. weight, 30s. meast. To Foochow: 50s. weight, 45s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Amoy: 50s. weight, 45s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £43. For Shanghai: £44. For Hong Kong: £33. For Singapore: £24. For Galle: £24. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. For Shanghai: £2 4s. For Hong Kong: £1 14s. For Manila: £1 2s. 6d. For Singapore: £1 5s. For Galle: £1 5s.

The Admiralty have invited tenders for the conveyance of about 20 tons stores to Hong Kong.

## CASUALTIES.

The Burnside, Pendergrace, from Shanghai, arrived at New York, April 22, with loss of lower foretopsail and other damage, sustained during a cyclone, April 14.

## MISCELLANEOUS.

At ASCENSION.—March 19, Geologist, from Bangkok, and sailed for Falmouth.

Off ST. HELENA.—March 29, Patriot, from Sourabaya, for Falmouth.

At MAURITIUS.—March 25, Westward Ho, Kirk, from Singapore; 9, Nell Gwynne, Smith, sailed for Batavia; 23, Alexandra, Edwards, from Newcastle, sailed for Galle.

Vivat Veritas, from Colombo, for London; 25, Kate Kellock, from Colombo, for London; Weidenhjelm, from Java; 29, Talca, from Bangkok, both for Falmouth; Naworth, from Singapore, for Liverpool; 30, Henriette Maria, from Java, for Amsterdam; 31, Cleughs, from Colombo, for London; April 1, Johannes Antonius, from Sourabaya; 2, Maria Diederika, from Bali Straits, both for Rotterdam.

At ST. HELENA.—March 29, Philips v. Marnix, Moller, from Banjoewangie, and sailed 30 for Amsterdam; 30, Gebroeders v. d. Beek, Gobel, from Batavia, and sailed April 1 for Amsterdam; April 2, Sebastopol, Collins, from Probolingo, and sailed 3 for Falmouth; 5, Nadesda, Meyer, from Macao, and sailed 8 for Havana; 9, Australie, Zeylstra, from Batavia, and sailed 10 for Amsterdam; 11, Frances, Higgs, from Colombo; 12, Lichstraal, Jansen, from Banjoewangie; Sumatra, Montechiaro, from Sumatra; Liverpool, from Passaroeang; 6, Caroline, Bourhis, from Saigon, sailed for Bordeaux, after reshipping her cargo.

## LAUNCH.

On the 10th inst. Messrs A. and J. Inglis launched from their yard at Point House, on the Clyde, a screw-steamer named the Mallet, built to the order of Messrs. Baring Brothers and Co., and intended for the China coasting and river traffic. Immediately after being launched she was towed to a crane berth to receive her machinery, which is supplied by the same firm.

HOLLOWAY'S OINTMENT and PILLS.—SCROFULA, SKIN DISEASES.—In no disease is more early or constant vigilance required than in the treatment of scrofula. Early curative measures save great risks, and much unnecessary suffering. The nurse or parent must meet the first approach of the foe, or his defeat will be difficult. Enlarged glands about the neck, flying pains through the limbs, and irritable skin warns us of the presence of this hereditary malady, and not a moment should be lost in the employment of Holloway's anti-scorbutic remedies, to throw out from the blood at once the morbid cause of all future disfigurements. These wonderful remedies leave the system pure and vigorous, so thoroughly do they banish the poison.

Digitized by Google

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200.000.

Marine Risks are accepted by the above Society on goods by first class vessels from the United Kingdom to India, China, Japan, Melbourne, and Sydney, at the current rates of premium.

Claims for Losses and Averages are payable in London, or at the Port of destination, as may be desired.

OFFICES:—

Nos. 9 AND 11, KING'S ARMS YARD, MOORGATE STREET, E.C.

## NEW MUSIC.

BRAG. Serio-comic Song. Written and Composed by ALFRED SCOTT GATTY.

PUT IT DOWN TO ME. Comic Song. Written and composed by ALFRED SCOTT GATTY.

WHEN THE ROSES BLOW. Song. Written by R. REECE. Composed by G. B. ALLEN.

THE DAYS WERE SWEET IN SUMMER TIME. Song. Written by R. REECE. Composed by G. B. ALLEN. Post free for 19 stamps each.

Messrs. R. Cocks and Co., New Burlington-street.

We have had occasion to favourably notice Mr. Gatty's comic songs, and the two under notice do not alter our opinion of their character. "Brag" is a comic song of a mild order, but hardly to be ranked as serio-comic. It is all fun. "Put it Down to Me" is more pungent, and broader in tone, but without approaching coarseness. It is sung nightly by the St. George's Hall Christy's, and hardly ever fails to be warmly encored. Both songs are in marked contrast with the music-hall type, and deserve a wide circulation. "When the Roses Blow" is a ballad which has also obtained much favour with the Christy's, and it well merits it. The melody is very taking, and quite equal to any of Mr. Allen's uniformly excellent settings. "The Days were Sweet in Summer Time" is another excellent song, and if it reaches a front place in the thousand and one new compositions before the public it will fully deserve it.

HAMILTON'S MODERN INSTRUCTIONS for the PIANO. 673rd Edition. 70 large folio pages. 4s.—Order of all Musicsellers and Booksellers; and of the Publishers.

CLARKE'S CATECHISM of the RUDIMENTS of MUSIC.—121st Edition. Free by post 13 stamps. "Every child learning music should have this book."—Morning Chronicle.

London: ROBERT COCKS and Co., New Burlington-street, and of all Musicsellers.

Per P. and O. steamer *Ripon*, from Southampton, June 26.—To Singapore: Mr J. D. Vaughan. To Penang: Mr. and Mrs. Thompson and child.

## Summary of News from the Far East.

—o—

### JAPAN.

### YOKOHAMA.

The present mail brings advices from this port to the 7th April. The outward mail of Feb. 12 was received in Yokohama on the 5th April, with London telegrams to March 4. The *Japan Times* gives the following summary of the fortnight's news:—

We have to confirm with full particulars the strange rumour of important political change which we mentioned in our last. Authentic documents have come into our hands which place beyond a doubt the fact that several of the principal Daimios have resigned their rank, independent power, rights as sovereign princes, lands and men, into the hands of the Mikado, with a view to centralise and strengthen the Government of Japan, and to enable their country, as they say themselves, "to take its place side by side with the other countries of the world." This unexpected and extraordinary move has naturally excited great attention here, and will probably do so abroad. It appears almost incredible, but is none the less true, and there is no doubt that the result of the change will be of great benefit to the country, to the people, and to the Daimios themselves. The Mikado will be in Yedo in about a month from this date, and the nobles have been summoned to meet him there. At this Council, this and other changes in the constitution will be brought forward by the Imperial Ministers and fully discussed. We are able to give translations of the documents in which the Daimios make to the Emperor the offer we have mentioned, and in other columns have commented more fully upon it.

Meantime, while Japanese politicians are busy improving the constitution of the country and discussing domestic policy, they are leaving us Foreigners "out in the cold," still suffering from their neglect of, to us, the more important question of the currency. Nothing has been done to improve our position in this respect since we last wrote, and trade remains, consequently, in the same state of languor and suspense. All speculative business is necessarily stopped, the native merchant being unwilling to part with coin which may be replaced in his next month's returns by others of less purchasing power; and little is done, therefore, except to meet actual, immediate wants. The Foreign Ministers are hard at work endeavouring to instil into the minds of their native colleagues sound principles of finance, and to induce them either to give some guarantee that they will not further debase the coinage, or to call in the issue now circulating. But the accumulated debt incurred last year in putting down the northern rebellion and the present demand for money to extirpate the ex-Tokugawa pirates, press most heavily on the Mikado's Government, and the need of funds is immediate and irresistible. The readiest way of paying their debts being the issue of a spurious coin, they have adopted it, and it is matter of grave doubt whether any remonstrance setting forth the damage they are doing to Foreign trade will have any effect upon them. Only, if they can be convinced that by raising the cost of living, by thus diminishing the purchasing power of the currency, they will raise also discontent among the people and imperil the existence of the Government itself, can we gain our objects, reform in the Mint and a revival of trade. But we have no warrant for believing that they fear any such results; the Government is far stronger than most people imagine, and a counter-revolution is nearly impossible. Certainly, no popular rising can ever be looked for in Japan.

The sanitary condition of the settlement remains much the same as at the date of our last advices, typhoid fever being still prevalent, but perhaps a little less violent. A scheme for the effectual drainage of the place has been proposed by Mr. R. H. Brunton, a civil engineer sent out by the British Government to erect lighthouses for the Japanese upon the dangerous points of their coast. He estimates the cost of his drainage at the moderate sum of 50,000 dols., and to-morrow the residents are going to meet,

Digitized by Google

to determine whether they will bear any share of this cost, instead of leaving the Japanese Government to pay the whole. The latter are bound to do it by their engagement as our landlords; but what is right is not always expedient, and as the Foreign Ministers do not seem inclined to try to get us any share in the administration of the heavy ground-rent we pay, unless we tax ourselves heavily over again for such a privilege, we may have to yield.

These three subjects—the Daimios' offer to the Mikado, the Currency Question, and the Drainage Scheme—have pretty wel occupied our attention and thoughts during the fortnight. The weather has been variable, but the spring crops are looking very well.

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, April 13, 1869.

The English mail of the 12th February entered the harbour just as the outward steamer was leaving on the morning of the 31st ult. The telegrams brought extended to the 3rd March. On the following day we received telegrams *via* Kiachta and Tientsin to the 9th March. The French mail of the 19th February, with telegrams to the 16th March, arrived on the 7th inst., followed on the 10th by the American mail, with telegraphic news from Washington up to the 8th ult. All its European news had of course been anticipated. Yesterday a telegram to the 23rd March was received *via* Kiachta. This was merely commercial. This afternoon, however, we received the London mail of the 26th February, with telegrams to the 19th March. On the 1st inst. the *Everest* left this port, tea laden, for London.

Rumour is busy about the newspapers in Shanghai. It was said that the *Recorder* would be shut up at an early date, the *Supreme Court and Consular Gazette* be annexed to the *North China Daily News*, and the latter change hands either by sale or lease. Two offers for a lease of the latter have already been rejected, but I understand that a satisfactory offer has at length been made, and that the paper will for the future be conducted under the same management as heretofore. Meanwhile, the *Recorder* has shown signs of greatly increased vitality. Mr. Tarrant, the well-known ex-editor and proprietor of the *Friend of China*, who has now for some months lived in retirement, has published an advertisement stating that, in consequence of Mr. C. T. Jones's inability to fulfil the covenants of his lease of the *Friend of China*, he (Mr. Tarrant) is "constrained to enter on possession of the same." Accordingly, on the 10th the first number of the new series of the *Friend* appeared, not, however, conducted in its old vigorous style. Mr. Jones has taken umbrage at Mr. Tarrant's action, and turning on the only person who assisted him during his difficulty with the British Government, he has published a very offensive article reflecting on Mr. Tarrant's personal appearance, journalistic ability, honesty, and so forth. From all this you will see that, to say the least of it, newspaper property in Shanghai is in a transition state. Meanwhile, the *Evening Express*, hitherto conducted by Mr. Jones in the rowdiest possible style, has been brought to a stand. I send you an *Express* bearing on the matter.

All the money necessary for the purchase of Mr. Wylie's library has been subscribed, and in aid of the "public library" which I mentioned two mails ago the English and German Dramatic Corps have volunteered to give performances.

The great staple English beverage is now brewed here, of excellent quality, and at very reasonable prices, by Messrs. Evans and Co., who during the season have sold between Shanghai and the outports over 50,000 gallons of beer.

As an interesting item of local news I may tell you that garrotting, which a couple of years ago was quite a fashionable amusement among the native rowdies, has recently been revived, a gentleman having been attacked by some natives on the evening of the 4th inst., nearly choked, and completely stripped. The ill-feeling towards Foreigners on the part of the native residents at Pootung, which exhibited itself in the assault mentioned in my last letter, has again been proved within the last few days by opposition offered to police arrests. The *Recorder* reports that on two separate occasions a policeman and a collector of sampan tax were obliged to beat a hasty retreat, as the appearance of the congregated villagers became threatening in the extreme. The Hongque side is also reviving its old evil renown, a sailor belonging to H.M.S. *Zebra* being now missing for some days, after having last been seen in company with some Manilamen and Chinese females resident in the American settlement.

Yesterday a gunboat for the Chinese Government was launched from Kiang-nan arsenal dockyard. Not a single hitch occurred. The model was made by Mr. T. Falls, the superintendent, and drafted off by Mr. Lambert, and the vessel built under the superintendence of Mr. H. Mainland. She will be propelled by a screw, and her measurement is 175 ft. over all, 166 ft. on the keel, 27 ft. 3 inches beam, 12 ft. depth of hold, and of 560 tons measurement. Her engines, which have been made at the arsenal, are of 110-horse power, the cylinders of 36 inches in diameter and 26 inch stoke, condensing, and the boiler pressure 40 lbs. to the square inch. She is to be armed with one 68-pounder, smooth bore, to be placed midships, four 24-pounders abaft, two 12-pounders forward and one 32-pounder, Whitworth, rifled, to be placed in the bow.

An important case has been decided by the arbitration of the American Consul General. A British barque, the *Anita*, had been registered at Hong Kong in the name of a British subject, but was mortgaged to an American. On the death of the latter the former sold his interest in her to the widow of the mortgagee, who, in turn, transferred the vessel to Messrs. A. Heard and Co. for sale. On the 5th February last the barque was sold to Mr. Fobes, an American, on the condition of half purchase-money down, and the remainder on transfer, which the auctioneer promised should be on the day of sale or the day after. Meanwhile, an informality was discovered in Heard and Co.'s power to sell, and the transfer was not made until the 13th of March, although the purchaser made a formal offer of the remaining half of the purchase-money. The claim, then, was for damages for the loss of use of the ship during the interval, at the rate of 1,400 dols. per month—the rate at which a charter could have been effected immediately after the sale, and for the difference between that rate and the rate for which a charter could have been effected for four months at the time when possession of the vessel was received. Mr. Seward disallowed the first claim, but allowed interest at the rate of 12 per cent. on the purchase-money for the interval, and 300 dols. per month for three months and a-half, that being the estimated difference in the rates of charter obtainable.

An expedition has gone to the islands at the mouth of the Yangtsze, with the view of selecting a place suitable for a sanitarium, or summer settlement. The great objection to any place in that neighbourhood is the prevalence of piracy. Only the other day a pilot named Hoar was wounded while gallantly rescuing a Cheefoo junk from six piratical vessels off the South Saddle. For this reason, as well as on account of the great difficulty of obtaining supplies, and the impossibility of landing at certain states of the wind and tide, the exploring party has reported unfavourably.

On the 31st ult. the following shares were put up to auction, but were bought in at the prices named:—

| | | |
|---|---|---|
| 6 Shanghai Gas Company ... ... | Tls. 94 | per share. |
| 6 Shanghai Dock Company ... ... | Tls. 85 | " |
| 10 Steamship Navigation Company ... | Tls. 94 | " |
| 3 Hong Kong Fire Insurance Company | Dols. 165 | " |

At a meeting of the North China Insurance Company, held on the 9th inst., the auditors were re-elected, and a further dividend of Tls. 1,000 on the shares in the old company was declared. The only Consular news consists in a rumour that Mr. Cooper is under orders to replace Mr. Gibson at Takow, and that Mr. Frazer, of Shanghai, has been ordered to Chinkiang.

It has been announced that the Governments of Great Britain, France, and Russia have signified their approbation of the code of revised land regulations for the Anglo-American Settlement, subject, however, to the condition that the other treaty Powers give a like assent. Mr. Seward, the United States Consul-General, is believed to have supported the new regulations, and the approbation of the American Government may therefore almost be taken for granted. But Herr Tettenborn, the Prussian Consul, takes a different view, and hence there is little expectation of a favourable answer from the Court of Berlin. Thus, regulations now antiquated and obviously unsuited to the requirements of the place are kept in existence because of the opinion of one gentleman as opposed to that of all reasonable Foreigners in Shanghai. The worst part of it is that Herr Tettenborn will neither support the new regulations nor acknowledge the old, and hence his nationals (or some of them) evade the payment of municipal taxes, and derive all the benefits of police supervision, lighting, &c., without being at the pains to pay for any of them.

An interesting report on the Formosan coal mines, written by a Mr. Knight, who has been for a considerable period a resident in Formosa, and published in the *Shanghai Evening Courier*, has attracted some attention.

The *North China Daily News* has been made the victim of a practical joke, not worth mentioning but for the effect it is likely to have upon the home readers of that journal. Some facetious person at Tientsin sent it a copy of a Chinese paper, purporting to be a memorandum of the concession which the native authorities were prepared and anxious to make at the approaching revision of the treaty. This was duly translated, and published with a flourish of trumpets. On examination, however, it turns out that this valuable document is merely a free translation of the demands made by the Foreign framers of the Tientsin memorial to Sir Rutherford Alcock.

Sir Rutherford Alcock's reply to the private memorials on Treaty revision has just been published. In it he promises careful consideration of the views advanced, but he considers free inland residence incompatible with exterritorial privileges. Some hope of securing the concession of subsidiary ports is held out, but the spirit of the whole document obviously is that no refusal on the part of Chinese to extend Foreign privileges will be made the ground of quarrel.

The squeezes levied by the mandarins appear to be resented quite as bitterly by their own retainers as by Foreigners. A few days ago three or four hundred gunboat braves were paid off at

Digitized by Google

Minhong, a village about twenty miles up the river from Shanghai; but so large a squeeze was levied that the braves took the gunboats and salt depot in pawn for the balance of their claim. This step had the desired effect, and a steamer was immediately sent up from Shanghai with the necessary funds.

The Dunlop memorial window, subscribed for by the Freemasons of Shanghai as a monument to the late L. G. Dunlop, Esq., has been placed in the new church.

From Ningpo we have received no news of importance, except an account of the death by drowning of Mr. F. K. Porter, who sank while bathing, late in the evening of the 3rd inst., at a place about five miles up the river from Ningpo. Mr. Porter was assistant and acting interpreter at H.B.M.'s Consulate, and was very popular among the community. His death cast a general gloom over the entire Settlement.

From Hankow we have learned that H.M. gunboat *Opossum* left on the 26th March on its exploring trip up the Poyang Lake. On the 25th the *Salamis*, with Sir Harry Keppel on board, started for the Upper Yangtsze, having the *Faust* in tow. The *Salamis* arrived on Good Friday, the 26th March, at Yohchow, that is to say, at the entrance to the Tungting Lake in Hunan, 130 miles from Hankow, and left on the following day for Ichang, 230 miles further up the river. This is the last place accessible to the present style of Foreign steamers, and even to such native boats as are employed in the lower waters. On her way up, however, the *Salamis* went on shore at Shasi, a distance of seventy miles from Yochow. We have received no particulars, further than that her rudder was broken by the shock. The *Zebra* has gone to her assistance. The Hankow Spring Race meeting was held on the 5th and 6th inst.

At Kiukiang Mr. Edward Cunningham's memorial on the revision of the treaty, published in the *Supreme Court and Consular Gazette* of the 26th ult., has created little short of dismay. In the memorial Mr. Cunningham recommended the abandonment of Kiukiang, and the opening, in place of it, of Hukow, at the mouth of the Poyang lake. Several Kiukiang merchants have energetically protested against this, on the grounds of the inaccessibility of the town of Hukow, built, as it is, on a steep hill, the absence of native trade, and the loss on real property at Kiukiang.

From Chinkiang private letters have been received, stating that the people, both there and at Yangchow, have cooled down again, and exhibit no symptoms of antagonism to the missionaries.

Foochow advices announce that after an expenditure of half-a-million sterling, the one gunboat long promised to be launched from M. Giquel's Imperial dockyard will *probably* be completed by the middle of May. No wonder the Chinese should be disgusted when this is the result of three years' nominal work.

The following has been communicated to the *Evening Courier*:—

"By last advices from Mr. Markham, H.B.M. Consul at Chefoo, dated from Tsin-hsien (about 380 miles from Chefoo), the 24th March, 1869, we learn that he had visited Keo-fio, in Shantung, the burial place of Confucius, and had had an interview with that sage's representative, who is the duke, and ranks with Princes of the blood. Mr. Markham is the first Foreigner who has ever had audience with him. The place from which Mr. Markham writes is the birth-place of Mencius."

## AMOY.

### (FROM A CORRESPONDENT.)

AMOY, April 16, 1869.

The grand topic of conversation here at this moment is the failure of a Mr. Pielago, a Spanish Coolie emigration agent, to ship off the coolies he has obtained for the plantations in Cuba. The sins of the Macao coolie traffic are being visited upon him. All Treaty powers by the Convention agreed upon by the high Chinese authorities and the Foreign Ministers in 1866 are allowed to take coolies from China under certain rules then drawn up. Mr. Pielago, I believe, has conformed to these rules, but, unfortunately, the ship he has chartered to take these coolies away is a Peruvian ship. Rumour, of course, said that these coolies would be sent to the guano islands of Peru, and that their chances of reaching Cuba are few. The Chinese authorities have declined to let the coolies go in a ship belonging to a non-Treaty Power, and Mr. Pielago stands to lose some 20,000 dols.

The coolies there will be shipped off in a day or two in a vessel formerly under the Dutch flay, called the *Padang Panjang*.

The coolie trade carried on by any nation is looked upon with suspicion, but that suspicion is increased ten-fold when a Spaniard engages in it, and purposes to ship the men off in a hated Peruvian ship. I believe that the Commissioner of Customs and the Consuls of other Powers have had a great deal to do in putting the Chinese authorities on their guard, and it is to be hoped that they will appreciate this act of kindness. I know, however, for certain that the small mandarins do not, as palm oil has been freely used to get them to ship off the coolies in the Peruvian ship *Macao*, and it would have been done had not the Commissioner of Customs interefered.

Two more houses have been begun on Koolangsoo, one for the firm of Jones, Scott and Muller, physicians and surgeons, and the other for the Rev. John Stronach, of the London Mission.

The American clipper ship *Surprise* left this on the 29th March for New York, with a cargo of tea. The *Benefactor* is loading for the same port.

The Amoy tea market closed a fortnight ago.

The merchants of Amoy, wiser in their generation than their brother merchants at Foochow, Hankow, and other places, have held out for four months in spite of the immense quantities of tea that has been in the market, and which the dealers were most anxious to sell. The teamen here have been taught a lesson, that all Foreigners are not foolish enough to give them what they ask.

A combination of the merchants at other places would prevent those serious failures that have of late years taken place among merchants connected with China.

News from the Island of Formosa is most encouraging, the authorities and people are most respectful in their bearing and demeanour towards Foreigners.

I fear that the saying of "sparing the rod you spoil the child" is only too true with regard to China.

We are all anxious to see what is to become of the Burlinghame mission; if all matters have to be referred home and to be allowed to drag their weary length along, three years will land us in a glorious war.

Let China be treated courteously and with consideration, let there be no bullying, but let every iniquity she commits be punished promptly and on the spot. Centralisation has proved a failure.

Trade at this place is still very dull, owing to the mandarins continuing to impose a war tax upon all Foreign trade. The high authorities at Peking are powerless to remove it, so they confess.

April 17.

The coolie emigration matter is at a stand still. It is difficult to get at the truth among so many rumours.

The real history of the delay appears to be that the contracts of the coolies were made out in Chinese, according to the convention; but the Spanish translation of the same did not convey the same meaning. Fraud was suspected, and the case has been referred to the Viceroy at Foochow. The affair is looking like an attempt to revive the Macao coolie traffic at this port.

A few days ago the Emigration Agency House, where the coolies are assembled, ready to be shipped off, was carefully closed and padlocked, and the coolies kept in strict confinement, and they told certain parties, who were passing by, and saw them through iron bars, that they were detained there against their will. I will write further particulars next mail.

## HONG KONG.

From Hong Kong we have advices to the 20th April. The outward mail of Feb. 26 was delivered on the 8th of April, with London telegrams to March 19, but later news had been since received *via* Calcutta, viz., to March 21. There is not much local news of importance; the following items are from the *China Mail* and the *Overland Trade Report*:—

An armed band of thieves, variously stated at from twenty to fifty men, descended upon Sowkewan about one A.M. on the 18th instant, with the apparent intention of looting the village. Two Indian police constables, a Sikh and a Hindu, who were about a quarter of a mile this side of the village, saw the gang advancing, and at first thought they were lokongs; but, on learning their character, one of them fired his musket, and an immediate attack was made by the thieves. Sergeant Mahony, hearing the shot, bravely rushed out to the support of the constables, but was cut down and killed before he could use his pistol, his body being fearfully hacked, and one thrust having cut through his heart. The Indians were meantime overcome by numbers, and at length left for dead. A large force of police was stationed in the village, under Inspector Anningson, and why he did not go to the support of his three men is a mystery yet to be explained. It is said that a police constable even landed from his boat in the harbour to discover the cause of the disturbance, but ran away on hearing the groans of poor Mahony, though he had five or six armed lokongs in his boat. The bravery of Sergeant Mahony and the bold front showed by the Indians undoubtedly saved the village from an organised scheme of plunder. Two men have been arrested by the police officials, who are most active in taking the necessary measures; but the fact that so large a body of thieves could plan and nearly carry out such a scheme in concert does not say much for the police as a preventive force.

The Colonial Surgeon's report for 1868 shows Hong Kong to have been unusually healthy for that year, even when compared with that of London.

The supposed murderers of the late Mr. Holworthy are committed for trial at the next Sessions.

Admiral Keppel has notified that the national distinguishing flag of Chinese war vessels, as recognised by H.M. naval authorities, will, pending a final arrangement, be a square, and not a three-cornered flag as previously described.

We are pleased to notice that Mr. Jonathan Parsons, an old resident of Hong Kong, who leaves for home by the Pacific mail, has been presented with a silver tea service as a token of esteem by his many friends here. Mr. Parsons is one of the few men in the East who has *ever* been ready to help those in need.

The case of "Regina v. Saint" is not to be carried before the Privy Council formally; but it has gone to Earl Granville, the Secretary for the Colonies, we presume for advice as to what shall be done with it. The nature of the answer may be very confi-

Digitized by Google

dently anticipated. It is not given to every Governor to meet with such an unhappy conjunction of circumstances as those which afflict Sir Richard MacDonnell. Just while he is in the thick of the unpleasant controversy about the gambling revenue there will be presented the other astonishing blunder to which he committed his Government. How gratifying these things must be to the unofficial members! There was one of their number who raised his voice against the first blunder, but all of them seemed to have sympathised with the last, in their "representative" capacities—that is, whatever may be their private opinions.

The Hong Kong Association, so long hidden from the public gaze, has during the last fortnight emerged from its obscurity, and appears to be taking active measures in connection with a revisal of the draft of the Building Ordinance of 1868, which has been referred to a committee who consulted the Association. The chief points in which it appears to require amendment are that it should be made more simple in its application; that the clause providing that the Governor's leave should be obtained before erecting buildings should be expunged; and that the rules as to buildings should not be made retrogressive, but that if there is good reason to believe a building is defective, provision should be made for its being reported upon.

The decision of the Judicial Committee of the Privy Council in the *Min* case seemed to take the public somewhat by surprise, and the matter has been the subject of some talk, which has been increased by the fact that, almost at the very time the news arrived, a sale took place of the furniture of Mr. Maclean, of Lyall, Still and Co., who figured so prominently, but unenviably, in connection with the proceedings.

Two gentlemen, residents at Hong Kong, have started on a journey overland from Canton to Hankow. They expect to be absent about six weeks, returning by steamer from Shanghai.

The question of reviving the Asiatic Society here has been further discussed. It appears that there are some books belonging to the old Society that would form a neucleus for a Library, and it is expected some steps will shortly be taken in the matter.

Colonel Norman, C.B., of the 10th Regiment, now in Japan, who is the senior of Col. Gore by a few months, will, in consequence of the death of Major-General Brunker, take command of H.M.'s Forces in China and Japan, until a new general is sent out. All despatches and documents will meantime have to be sent to Japan.

Mr. James Russell, interpreter in the Colonial Service, and for some time Private Secretary to H.E. the Governor, has been appointed acting Police Magistrate in place of Mr. Goodlake. It is understood that this selection has been made chiefly on account of Mr. Russell's aquaintance with Chinese. He passed his examination in that language out here in 1867.

## STRAITS SETTLEMENTS.

### SINGAPORE.

Dates from this port are to the 27th of April. The outward (French) mail of March 18 arrived out on the 19th April. The latest London telegrams received were to the 14th April, *via* Calcutta. We take the following summary of the fortnight's news from the *Straits Times*:—

There has been one meeting of the Legislative Council since despatch of our last, held on the 21st inst., at which several papers of interest, alluded to in the body of our journal, were laid on the table. One was a return of the number of opium and chandoo cases entered at the magistrate's court during the past fifteen months; another showing the terms on which the sea beaches have been leased. But the paper likely to attract most attention is a "return showing every sum paid out of the Treasury of the Settlements for travelling allowance, mileage, table money and other similar expenses during the year 1868 of the Government officers detailed in the estimates for 1869 under the head of Transport." We are unable to give more than the title of the paper, as recorded in the official minutes of the proceedings of Council, as the paper itself has not been forwarded to us with the others; why, we have not been informed, though it cannot, we are sure, be the intention of the Executive to discourage a free examination by the public of a paper which has been laid on the Council table, and on the subject of which so much curiosity has been expressed. His Excellency formally announced to the Council the resignation by the Hon. Dr. Little of his seat in the Council; nothing was said as to whether the resignation was accepted or not, or, if so, what steps had been taken to appoint a successor.

The Council now consists of only two un-official members from Singapore, in place of four as formerly, or of five as was contemplated by Her Majesty's proclamation. The honour is not apparently coveted by the responsible men of the place, and several have declined the offer of it. In addition to the papers already enumerated, a return was submitted by command of his Excellency, showing the rents of the various revenue farms for the last ten years.

Outside of the Council a good deal of political discussion has been awakened by the very able letter the Chairman of the Straits Association in London has addressed to the Secretary of State for the Colonies, under date the 12th March, on the subject of Straits grievances. While agreeing with the spirit of retrenchment which breathes through this letter, exception is taken to the rather radical measures by which it is suggested to inaugurate that retrenchment, viz., the arrest of further expenditure upon the new Government-house, and the sale at home of the steamer and steam launch ordered eighteen months ago. The former would clearly be an intemperate measure, and the reverse of an economy. The building has progressed too far to be curtailed in plan without marring it, and to come to a sudden halt and leave it unfinished would be to sacrifice all the money that has already been expended—by far the greater part of the cost. Regarding the new steamer, too, unless it be plain that its maintenance will involve upon the colony a seriously greater annual outlay than the *Peiho*, it would seem desirable—if we are to have a steamer at all—to have one specially adapted to our purpose rather than continue a makeshift.

# Commercial Report.

## STRAITS, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—There was still an almost entire absence of business in either cotton or woollen goods, prices being nominal and holders firm. This state of affairs had prevailed throughout the fortnight, the only exception to the general depression having been Cotton Yarn, of which about 1,000 piculs, chiefly 16-24, had changed hands at $45 to $46 per picul.

TIENTSIN.—The market for all classes of imported goods was reported to be very inactive.

SHANGHAI.—Cottons: The advance in Grey Shirtings noted in our last report had been lost, the market having declined about 3 candareens. There was little demand, and the business had been chiefly in resales. White Shirtings: The demand was less active, but prices were maintained. The supply was moderate, and importers were not anxious to sell. T-Cloths: To effect sales a slight concession on the quoted rates must be made. There had been a large speculative business in both English and American Drills. Dyed and Printed Cottons were in fair demand. Woollens: Camlets were in better inquiry. Figured Orleans still found buyers. Metals—Lead: Prices had again given way a little; notwithstanding favourable advices from Hankow and Kiukiang, arrivals had been small, only 1,554 piculs added to stocks, whereas 5,556 piculs had been exported. Nail Rod Iron: Demand for good assortments during the fortnight had been good, and sales on the spot had been effected at Tls. 2.45 to 2.50, whilst a few invoices "to arrive" had been disposed of at Tls. 2 40 per picul. Stocks were much reduced. Bar Iron was much inquired after at Tls. 2.70 for best assortments. Coals: The market was still dull; sales of small lots of Cardiffs had taken place at Tls. 10.5, and a cargo of Australian had realised Tls. 7.8. There was some inquiry for Japans. The arrivals had been 368 tons from Great Britain, 306 tons from America, 2,062 tons from Australia, and 300 tons from Japan; in all, 3,036 tons, of which 467 tons were to order. The following were the current quotations at departure of the mail:—Grey Shirtings, 7 lbs., per piece, Tls. 1.9.6 to 2.0.2; 8.4 to 8.6 lbs., Tls. 2.1.9 to 2.2.5.; 9 to 9.12 lbs., Tls. 2.8.0 to 3.2.5. White Shirtings, Tls. 2.3 0 to 3.5.0. T-Cloths, Tls. 1.5.5 to 2.6.0. American Drills, 40 yards, Tls. 4.2.5 to 4.4.0. American Jeans, 30 yards, Tls. 3.6.5 to 3.7. English Drills, 40 yards, Tls. 3.9.5 to 4.1.5. Camlets, English, S.S., Tls. 12 to 12.6. Spanish Stripes, per yard, Tls. 0.5.5. to 0.8. Medium Broad and Habit Cloths, Tls. 0.9.0 to 1.6.0. Iron, nail rod, small size, per picul, Tls. 2.3.0 to 2.4.0; fair to good assorted, Tls. 2.4.5 to 2.5.5; Hoop, Tls. 1.9.0 to 2; Flat and Round, Tls. 2.6.0 to 2.7.0; Lead, Tls. 5.9.0 to 6.2.5; Tin Plates, per box, Tls. 4.3. to 4.8; Steel, per tub, Tls. 3.5.0 to 3. 6.0.

HANKOW.—Throughout the whole of the interval the import market had been dull and inactive. Arrivals of cotton goods had been on a large scale, and heavy stocks were on hand. In woollens a moderate business had been done at about previous rates. Cotton Goods:—Grey Shirtings—During the early part of the fortnight sales to some extent were effected at Tls. 2.25 to 2.32 per piece for 8¼ lbs. goods. Subsequent heavy arrivals had caused prices to decline 5 candareens per piece, and the dealers seemed fully occupied in clearing their former purchases. Few sales had been made, and the market closed quiet at Tls. 2.02 to 2.05 for 7 lbs., Tls. 2.21 to 2.26 for 8¼ lbs., and Tls. 3 to 3.20 per piece for 9¾ lbs. goods. White Shirtings had continued in good demand, and a further advance of 5 candareens per piece was established. T-Cloths had been dull of sale, and stocks had greatly increased. Quotations were slightly lower. Drills: A few sales of English and Dutch makes are reported at previous rates. Fancy Cottons had been in fair inquiry at somewhat higher prices for most descriptions. Woollens and Worsteds:—Camlets—A good business had been done at about previous prices for assorted colours, with the exception of Scarlet, which had been sold at a decline of 1 to 2 mace per piece. Lastings had found buyers to a considerable extent, but prices were 1 mace per piece lower. Long Ells had been in little enquiry; quotations unchanged. Spanish Stripes continued dull; Medium and Broad Cloths had been saleable to some extent. Figured Orleans firmer, with few sellers at quotations. Metals:—Lead had given way in price, best brands being quoted up to Tls. 6.70 per picul, and the demand was very trifling. Quicksilver was in some request at Tls. 49.30 to 49.50 per picul. Tin—Small sales had been made at Tls. 25 to 25.50 per picul. Quotations:—Grey Shirtings—7 to 7½ lbs. per piece, Tls. 2.0.2 to 2.0.5; 8¼ lbs., Tls. 2.2.1 to 2.2.6; 9 to 9¾ lbs., Tls. 2.8 to 3.2. White Shirtings, Tls. 2.1.5 to 2.7.5. T-Cloths, Tls. 1.4.5 to 2.2.8. Drills—American, 40 yds., Tls. 4.1 to 4.2; English, 40 yds., Tls. 3.9 to 4.0.5. Spotted Shirtings—White, Tls. 2.2.5 to 2.3; Dyed, assorted, Tls. 2.5 to 2.6.5. Brocades—White, Tls. 2.2 to 2.3.5; Dyed, assorted, Tls. 2.9 to 3.1. Damasks—White, Tls. 3.5 nominal; Dyed, assorted, Tls. 4.3 to 4.6. Chintz, Assorted, Tls. 1.4.5 to 1.8. Velvets—18 in. Black, per yard, Tls. 0.1.6½ to 0.1.7; 22 in. Black, Tls. 0.2.0 to 2.1.5. Orleans Cloth, Figured, per piece, Tls. 3.8 to 4.1. Spanish Stripes, per yard, Tls. 0.5.8 to 0.6.1; Cloth, Tls. 1.2.5 to 1.7.

FOOCHOW.—No sales of Manufacured Goods are reported. The undermentioned sales of Lead were made in the early part of the interval, since when there had been some large arrivals, and prices were tending down-

Digitized by Google

wards. The following transactions are reported:—430 piculs Lead at $9.50 to $9.80 per picul, against tea; 250 piculs Lead at $9 cash.

CANTON.—A small sale of Grey Shirtings, 8.4 lb., say 500 pieces, had been made at $2.75. Prices for Metals and Quicksilver were rather lower. Nothing had been done in Ginseng. Both holders and native dealers were firm. Stocks small. Sales of Imports had been:—Lead, 400 piculs, at $8.10 to 8.20; Quicksilver, 50 flasks, at $67 to 67.50.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated 19th ultimo:—Cotton yarn: Business has been much upon a par with that of the preceding fortnight, though prices from the commencement have been very firm; a further advance of $2.50 upon last figures was soon established, and in some instances increased rates have been demanded. Nos. 16-24 have again been easiest of sale, while the higher numbers have been taken but sparingly; foreigners have been holding above the ideas of the Chinese, whilst the views of the latter have been more for price than quality. Piece Goods: Prices are much firmer, though operations have been smaller, and buying has been more confined to regular dealers. Grey Shirtings during the first of the interval were neglected; but as stocks of 7 lb., 9.8 lb., and 10lb. had run very low, they soon recovered their favour, and these weights are now quoted 5 cents dearer, with a strong demand for 7 lb. T-Cloths show a greater enhancement of values, and quantities offering are very limited; 6 to 7 lb., and 8 to 10 lb. meet with very quick sale, the former at an advance of 5 cents, and the latter of 10 cents per piece upon previous quotations. The small stock of common kinds is held at very high figures. White Shirtings are also in very decreased supply, particularly 54 to 60 reed, which are much wanted; 64 to 66 reed are in fair demand, and are 5 cents dearer; the finer kinds have been much sought after, and such makes as E.F. mark could be placed at $6.70 to 6.90 per piece. There are no Drills or Jeans on offer, but both have been inquired for at an advance; the only transaction has been a sale of 1,000 pieces Dutch "to arrive." The shipments per Netty Merryman, from New York, were not intended for disposition at this, and will be sent on to Shanghai for sale. Woollens: The market is even duller than before. Scarlet and Assorted Long Ells have declined 10 cents, and the only kinds that at all maintain their values are the colours last advised, and the demand is very slack. Spanish Stripes are weaker, and not wanted. Lastings and Crape Lastings are without change. The inquiry for B.B.B. Camlets has sensibly decreased, and prices are weaker. Metals: Nail rod iron has been fairly taken, but shows no alteration in price: Hoop has been neglected, while Soft Bar has gone rather lower; Steel is still in good inquiry, and sales are readily made at an advance of 20 cents. Lead has ruled very quiet, and a reduction upon last quotations of 20 cents is noted. Such small lots of Tin as have come upon the market have been quickly taken at rates $2.50 to 2.75 higher; at present no parcels are offering. Quicksilver is rather firmer. Coal: Stocks have been fairly augmented, and prices have gone somewhat lower. Arrivals have been:—250 tons English, 1,193 tons Sydney, and 950 tons Cardiff. The only sale has been the cargo from Cardiff of 950 tons, at $10.75 per ton. Ginseng: Transactions have been on a very limited scale, and holders still continue very firm; the only noteworthy sale has been one of 14 casks of Crude, at $130 per picul. Some small odd parcels have been disposed of at irregular rates, not justifying other mention. The current quotations were as follows:—Cotton Yarn, Nos. 16 to 24, per bale, $125 to 132.50; 28 to 32, $135 to 140; 38 to 42, $135 to 140; Grey Shirtings, 7 lbs., per piece, $2.55 to 2.60; 8.4 lbs., $2.77½ to 2.85; 9.12 to 10 lbs., $3.90 to 4.10; White Shirtings, $2.45 to 5.10; T-Cloths, $1.95 to 3.30; Spotted Shirtings, $2.75 to 3.70; Turkey Red Shirtings, 8 lbs., $2.85; American Drills, 40 yards, 14 lbs., per piece, $5.25 to 5.30; Spanish Stripes, per yard, $0.78 to 0.93; Medium, Ladies', and Habit Cloths, $1.15 to 2; Long Ells, Scarlet, per piece, $8 to 8.50; Assorted, $8 to 8.50; Camlets, SS Scarlet, $17.50 to 18; SS Assorted, $16.25 to 16.50; Blankets, per lb., $0.45 to 0.63; Iron Nail Rod, per picul, $2.80 to 2.85; Round, Square, and Flat Bar, $2.85 to 2.95; Hoop, $2.90 to 3. Wire, $7.25 to 7.50; Lead, $7.30 to 7.45; Tin plates, per box, $6.50 to 6.75; Steel, per tub, $4.25 to 4.50; Quicksilver, per picul, $63.50 to 63.75; Window Glass, per box, $3.50 to 3.75; Coals, English, per ton, $10 to 10.25; Welsh, $11.

SINGAPORE.—The market had been quiet and business limited; rates for Manchester staples were generally firmer. Grey Shirtings had advanced in value, 39 inch 8¼ lbs. having been placed to a moderate extent at $2.87½ to 2.90, and small sales at $2.92½ per piece; 7 lbs. were in demand, and the stock light, 6 lbs. wanted, and market nearly bare; 45 inch shirtings inquired for; none in first hands. Long cloths dull of sale. Maddapollams inquired for, stock nearly cleared, prices firm. T-Cloths continued in brisk inquiry, good business, stocks much reduced, the lower weights nearly cleared; large sales of superior qualities, quotations firmer. Dutch drills unchanged, stock light, and moderate inquiry. Grey Yarn of low numbers quiet, quotations unchanged. No. 40s moving off slowly, inquiry slack. White shirtings of low and medium qualities in good demand, stocks much reduced, moderate business at an advance on last quotations, fine qualities in fair request. Imitation Irish linens in demand, stocks light. Maddapollams in moderate request. Cambrics No. 24s in moderate demand and several sales had transpired; Nos. 15 and 16 selling slowly, and previous rates barely maintained. Figured shirtings dull. Metals: Bar Iron difficult to place, without enquiry; Nail rod neglected, and no business had transpired; small sales of Hoop Iron and Swedish Iron. Lead in less active demand; prices declined, owing to lower rates current in China. Yellow Metal firm and stock in first hands light. Brass wire of the coarser qualities wanted. Supplies of Tin Plates had come forward, but no sales were reported. Gunpowder unchanged; a few trifling sales had been made. Coals had declined in value; the market was very dull, and there was a heavy stock with both importers and consumers; several cargoes on the market.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—During the early part of the fortnight more activity was experienced in the market, and settlements, principally for California, were 800 to 900 piculs, all of medium to good medium grades; since the departure of the P.M.S.S. Co.'s steamer on the 31st March, with 190,954 lbs., the market had again been quiet. Dealers continued firm, and prices may said to be a little higher; no change, however, is made in quotations, as the settlements had been effected as quoted. Arrivals were small, and stocks remained unchanged. The J. Godfrey had sailed with 339,287 lbs.; there was no vessel on the berth. Quotations:—Common, $19 to 23 per picul; good common, $24 to 25; medium, $26 to 28; good medium, $29 to 32; fine, $34 to 37; finest $38 to 39; choice, $40 to 42.

SHANGHAI.—Black: Since the departure of the previous mail the greater part of the stock left has been cleared from the market at former rates, and only 4 chops remained. Settlements for the fortnight, 2,063 chests; stock, 4 chops, or 1,313 chests. Green: A fair business had been transacted, but prices showed no alteration. Settlements were: 9,398 half-chests Moyune, at Tls. 24 to 41; 1,074 half-chests Fychow, at Tls. 21.7.5 to 23.5.0; 688 half-chests Pingsuey, at Tls. 28 to 38; and 2,968 half-chests Shanghai-packed, at Tls. 22 to 23. Settlements for the fortnight, 12,922 half-chests; re-shipments on owners' account, 1,206 half-chests; stock, 14 chops, or 6,501 half-chests.

FOOCHOW.—No change had taken place in the figures of stock, and no intelligence of moment had been received from the producing districts, whither most of the teamen had taken their departure, other than that the weather was still very favourable for the growth of the leaf.

CANTON.—About 1,000 boxes Gunpowder had been settled for the Continent, but no offers were reported for the remaining stock on offer. The weather continued very unfavourable for the crop, and natives asserted that a considerable portion of the leaf had been seriously injured. Musters were not expected to be placed on the market for several weeks.

### SILK.

YOKOHAMA.—There had been a small business of about 800 bales done, the high Boo-value of the dollar having induced some silkmen to accept concessions varying from $30 to $50 on last nominal quotations, but it cannot be said that there was any general pressure to sell. The settlements had been replaced by the same amount of arrivals, leaving stocks unchanged in quantity, and as before chiefly of mixed and common quality. Settlements, Hank sorts, 150 bales; Oshu, 130 bales; other sorts, bales; total, 300 bales. Quotations (all charges paid to London at exchange 4s. 7d.) were as follows:—Hanks, Mybash, Sinchu, &c., extra, 34s. 1d. to 36s. 1d.; ditto, best, 31s. to 33s. 8d.; ditto, medium, 27s. 1d. to 29s. 10d.; ditto, inferior, 26s. 1d. to 27s. 7d.; Oshu, extra, 32s. 11d. to 34s. 11d.; best, 29s. 1d. to 31s.; medium, 23s. 3d. to 27s. 1d.; Coshu, best, 29s. 1d. to 31s. 4d.; medium, 25s. 2d. to 28s. 3d.; Sodai, best, 27s. 1d. to 29s. 1d.

SHANGHAI.—The following is from Messrs. Skeggs and Co.'s report, dated 13th April:—The total business for the fortnight is estimated at about 600 bales, including 100 bales re-reeled descriptions; prices at the beginning were fully Tls. 10 higher, but any further upward movement has been checked by the advanced rate of exchange, and closing quotations may be considered on a par with those of last mail, thus leaving the cost in London 6d. per lb. more against buyers. There are no settlements of well-known chops to remark. Nearly one-half of the shipments go forward on native and joint account with Foreigners, one large holder having reduced his stock by 250 bales in this manner, and a considerable proportion of the remainder has been in barter for woollen goods.

### STRAITS PRODUCE.

SINGAPORE.—Business during the fortnight had been on a moderate scale; there was not much alteration in prices, and there was a good demand for most articles of export. Transactions had been limited by the shortness of supplies. Gambier easier, contracts for about 500 tons reported at $3.07½ to $3.05 per picul, and dealers were offering to sell at the lower quotation. Tin in active demand, supplies had been readily taken up at an advance on last rates, chiefly for the American market. Black Pepper firmer, crop nearly exhausted and supplies very small. White Pepper scarce, supplies had fallen off, and the price had advanced. Sago Flour in fair demand; price rather easier, supplies small. Pearl Sago difficult to procure, and price advanced. Tapioca lower in value; inquiry dull. Coffee in demand; no supplies of Bontyne had come forward; Bally had been taken up at about previous rates. Hides in good demand, and rates firmer. Horns inquired for. Cubebs had been bought at an advance. Gutta Percha eagerly taken up at higher rates. India Rubber in fair inquiry. Nutmegs and Mace in good demand; supplies small. Rattans of best qualities scarce and in request.

The following is from Mr. E. Mellish's report:—Shortly after the departure of last mail sales of private paper were made at 4s. 6½d., 6 months' sight. The P.M.S.S. *China* arrived on the 9th April, with treasure to the value of about $700,000, but this amount did not have the effect of depressing exchange. Rates remained unaltered until the 15th, when credit bills were sold at 4s. 6¾d., and the rate subsequently advanced to 4s. 7d. A large portion of the paper placed on this market has been forwarded for sale from Manila, where rates continue in advance of those ruling in Hong Kong. A large business has been done in rupee paper, at rates which have continued to advance throughout the fortnight. Consequent, however, upon advices from Shanghai, the market both for sterling and rupees closes with a downward tendency. Estimated amount of business:—Bank bills £70,000; private paper £190,000 to £200,000; rupees thirty-three lakhs.

# Shipping Intelligence.

## ARRIVALS.

At YOKOHAMA.—From London, March 31, Eliza Shaw; from Glasgow, 24, Clydesvale; from New York, April 1, George Peabody.

At OSAKA.—From Cardiff, March 21, Crown.

At SHANGHAI.—From London, April 4, Charmian; May 6, Argonaut, Whitecadder (reported by telegram); from New York, 10, Tavistock.

At HONG KONG and CANTON.—From London, April 10, Drydens (reported by telegram); 18, Nile (s.); from Cardiff, 4, Queen of the Ocean; from Portsmouth, &c., 8, Clara; from Ramsgate, 13, Else; from Liverpool, &c., 15, Agamemnon (s.); from Havana, 8, Cataluna; from Callao, 12, Feiga; from New York, 6, Netie Merryman.

At MANILA.—None.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, £4; to New York, per steamer, $45; per sailing vessel, £2 15s. to £3.

At NAGASAKI.—To London, £3 15s.; to New York, £3 10s. nominal.

At SHANGHAI.—The Chillingham and Grasmere, the only vessels on the berth, are loading for London at £3 and £4 respectively. To New York the rate is £3 5s. to £3 10s.

At HONG KONG and CANTON.—For home direct and the rice ports no charters have been made, and there is but little inquiry for tonnage, but a better demand exists from the rice ports to China and Japan. To New York the A. W. Stevens has taken the berth at £3 5s. per ton of 40 feet.

At MANILA.—The following transactions have taken place during the fortnight:—Her Majesty, 1,112 tons, takes sugar and hemp to New York at £2 10s. per ton, but she will not be ready to receive cargo for about six weeks; Rattler, 909 tons, has engaged sugar for New York at $13 per ton; China, 268 tons, takes tobacco to Falmouth for orders at £4 10s. per ton.

At SINGAPORE.—There is not much change to report in the freight market. There has been an inquiry for vessels of suitable size for the coasting trade, and there is still a demand for tonnage to load home from Bangkok. Rates for the United Kingdom have been lower, and there is not much cargo offering.

At PENANG.—The Salado has been laid on the berth for London at £3 for tin, pepper, and tapioca, £3 5s. for hides, and £3 10s. for sugar in baskets. She has engaged a full cargo.

# SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—May 15, at New York, from Yokohama, Caractacus; 29, at Deal, from Bangkok, Geologist; 6, at San Francisco, from Yokohama, Evangeline; 31, off Falmouth, from Singapore, Loudoun Castle.

DEPARTURES.—May 29, from London, for Hong Kong, River Eden; for Singapore, Pactolus; from Rotterdam, for Java, Johanna, Helvoetsluis; 28, from Liverpool, for Shanghai, Mikado.

LAID ON.—At London, for Bangkok, Hampton Court; at Liverpool, for Shanghai, Banian.

# REUTER'S TELEGRAMS.

(RECEIVED VIA GALLE, MAY 19.)

## CHINA.

HONG KONG, April 28.—A placard has been circulated in China denouncing Foreign missionaries, and styling them barbarian wolves. It is rumoured that a high Chinese official at Peking has slapped the French Ambassador on the face, and that his Excellency has in consequence hauled down his flag. It is believed that the Peking Government is in great fear of further encroachments by Russia.

### COMMERCIAL.

SHANGHAI, April 23.—Grey shirtings, 6½ catties, 8¼lb., 2.25 tls. Cotton, Shanghai 15½ tls. Tea, nothing doing. Silk quiet and unchanged. Settlements since departure of last mail, 300 bales. Export to date (China and Japan), from commencement of season, 64,000 bales. Exchange on London, Bank bills, six months, 6s. 1¼d. Freights, tea, £4.

HONG KONG, April 28.—Grey shirtings, 6½ catties, 8¼lb., $2 85c. Water twist, $1 35c. Cotton, Bengal, fair medium, $17. Tea, nothing doing; total export, China and Japan, 139,500,000lb. Exchange on London, Bank bills, six months, 4s. 6¼d.

# BIRTHS, MARRIAGES, AND DEATHS.

## BIRTHS.

ANDREWS—On the 22nd May, at Brooklands, Redhill, the wife of Arthur Andrews, Esq., of a daughter.

ANNESLEY—On the 12th May, at 5, Leinster-terrace, Hyde-park, the wife of the Hon. Sydney Annesley, of a daughter.

BARROS—On the 8th April, at Hong Kong, the wife of F. J. Barros, Esq., of a son.

BECKER—On the 18th April, at the Hotel de l'Europe, Singapore, Mrs. A. Becker, of a son.

BOWRA—On the 14th May, at 15, Longton-grove, Sydenham, the wife of F. W. Bowra, prematurely, of a daughter, who survived a few hours.

DAVIES—On the 18th April, at Hong Kong, the wife of C. Langdon Davies, Esq., of a son.

EITEL—On the 8th April, at the London Mission House, Canton, the wife of the Rev. E. J. Eitel, of a daughter.

HASCHE—On the 24th April, at Penang, Mrs. Alfred Hasche, of a son.

HENNESSY—On the 7th March, at Government House, Labuan, the wife of Governor J. Pope Hennessy, of a son.

KERSHAW—On the 16th May, at No. 1, Lincoln-villas, Willesden-lane, N.W., Mrs. John Kershaw, of a daughter.

LAURIE—On the 17th April, at 2, Castle-road, Hong Kong, the wife of Peter G. Laurie, Esq., of a son.

MOURILYAN—On the 6th May, at Lewisham, the wife of T. B. Mourilyan, Esq., prematurely, of a daughter, stillborn.

SASSOON—On the 18th May, at Beacon Lodge, Twickenham, the wife of R. D. Sassoon, Esq., of a daughter.

STEARNS—On the 24th May, at Radnor House, Twickenham, the wife of Alfred C. Stearns, Esq., of a son.

WADE—On the 22nd May, at 6, Seymour-street, Portman-square, the wife of Thomas Wade, Esq., Secretary to H.M.'s Legation, Peking, of a son.

## MARRIAGES.

HUNT—CLARKE.—On the 8th April, at St. George's Church, Penang, by the Rev. Julian Moreton, S. B. Hunt, Esq., Asst.-Surgeon H.M.'s Indian Army, to Emma Matilda, third daughter of F. C. Clarke, Esq., Beau-Coin, Jersey.

LITTLE—MARCHANT.—On the 29th April, at the Church of the Holy Trinity, Brooklyn, New York, by the Right Rev. A. N. Littlejohn, Bishop of Long Island, assisted by the Rev. A. Jones, D.D., uncle of the bride, and the Rev. N. H. Schenck, D.D., Robert William Little, of Shanghai, China, son of W. J. Little, M.D., of London, to Mary, daughter of the late Henry Marchant, of New York. No cards.

SMITH—JEFFERY.—On the 15th May, at St. Paul's Church, Covent-garden, by the Rev. B. Compton, William Sumner, only son of the late Capt. William Richard Smith, R.N., to Elizabeth Anne, younger daughter of the late Robert Jeffery, Esq., of Ceylon.

TROLL—ZECHARIAH.—On the 20th April, at St. Andrew's Church, Singapore, by the Rev. J. A. Beckles, Jacques Troll, son of J. Troll, of Winterthur, to Annie, youngest daughter of the late Isaiah Zechariah, of Singapore.

WINBOLDT—STEVENS.—On the 10th April, at St. Andrew's Church, Singapore, John S. Winboldt, Assistant Surveyor Straits Settlements, to Christiana Isabella, only daughter of the late Robert Stevens, Esq., M.R.C.S.

## DEATHS.

BRODERSEN—On the 19th May, at Altona, Charles Brodersen, Esq., late of China.

FARQUHARSON—On the 17th May, at Southampton (ten days after his return from China, invalided), Charles H. Farquharson, Lieut. R.N., aged 30.

FYERS—On the 20th April, at Slave Island, Colombo, Ceylon, Ann Eliza, the beloved wife of Capt. A. B. Fyers, R.E., Surveyor-General.

KRAAL—On the 18th April, at Singapore, Mr. Edwin A. Kraal, aged 22 years.

PATERSON—On the 7th April, at Hong Kong, of consumption, John Paterson, of Glasgow, Scotland.

WOODS—On the 7th April, at Singapore, the wife of R. C. Woods, Esq., barrister-at-law, aged 52.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.

## STRAITS GRIEVANCES.

(To the Editor of the *London and China Telegraph.*)

SIR,—Your support of the deputation from the Straits Settlements to Earl Granville induces me to pen you a few lines on the subject of one of the three evils which the deputation brought to the notice of the Colonial-office. I refer to what you have so appropriately termed "the burlesque of a free Legislature;" and without asking that a change should at once be made in the constitution of the Legislative Council of the colony in the choice and election of its members, let the Colonial-office equalise the number of the official and non-official members, and let the Council, *as at present legally established,* have fair play, *without illegally, by secret orders,* turning that Council to its own purposes, or, which is much worse, to those of the local Governor, in framing laws which on their face purport to have been done freely and fairly *by the advice and consent* of the Legislative Council!! and the Straits people may in the meanwhile mature their plans as to the non-official members being an elective body.

The 2nd Clause of the 29 and 30 Vic., cap. 115 (which formed the Straits Settlements into an independent colony) empowered Her Majesty, by Orders in Council, to establish laws and ordinances for the colony, and the 3rd Clause enabled Her Majesty, by Letters Patent under the Great Seal, or by instructions under her Signet and Sign Manual, *accompanying and referred to in such Letters Patent,* to delegate to other persons within the said Settlements the powers and authorities of making laws and ordinances, either in whole or in part, and *subject to all such conditions as by such Letters Patent of Instruction* Her Majesty should see fit to prescribe—with a proviso that, notwithstanding any such delegation of authority, it should still be competent to Her Majesty in Council to exercise all the powers and authorities aforesaid.

By Letters Patent, issued on the 4th February, 1867, Her Majesty delegated her powers and authorities to the Legislative Council, to consist of official and non-official members; by the 9th clause of which all questions brought before it are to be decided *by the majority of votes,* the Governor having an *original* vote, and also a *casting* one if the votes are equally divided. The 13th Clause declared all laws and ordinances of the Legislative Council to be null and void if disallowed by Her Majesty in Council or through one of her principal Secretaries of State.

Now, in no part of the Letters Patent (instructions accompanying and referred to in such Letters Patent there were none) is there *any condition* laid down that the official members are to vote as bid by the Governor or Colonial-office; in no part was there any power given to the Duke of Buckingham to write a despatch, that "a member of the Government will, *under all circumstances, support the Governor with his vote,* and I trust in case he finds it impossible to reconcile such a line of conduct with his wishes or honour, he will not hesitate in resigning his situation, *and in the event of his acting contrary to these instructions* I shall not be displeased to hear that the Governor had suspended him forthwith from the exercise of his official functions;"—in no part was there the shadow of any right given to Earl Granville to say that "the official members, upon *any important question* or *orders from the Home Government,* would be bound to vote with the Governor]; but there are many questions not of such importance, where, as occurs in frequent cases in the House of Commons, the members of Government are free to pursue their own policy."

If the Act of Parliament and Letters Patent are to have efficacy they should be as binding, if not more so, on the Colonial-office and local Governor, as on others; and when the Letters Patent directed that all questions should be decided by the majority of votes, with a casting vote to the Governor, who would dream that the votes of official members *(always a majority in the Council)* were to be given compulsorily on the side of Government? Who would dream that after an official member had taken his oath to act to the best of his skill and judgment, he could be compelled to forswear himself by any local Governor upon pain of being suspended forthwith to the high pleasure of a British Minister at home? Earl Granville, indeed, wished to soften down the meaning of the despatch of the Duke of Buckingham. But is the colony to be grateful and satisfied that when the Governor is indifferent to a particular measure he may graciously permit the officials "to pursue their own line of conduct," but that in a case where a vital question to the colony is raised, they are to be gagged and forsworn, on pain of the high displeasure of himself and the Secretary of State, and suspension from office and salary? How refreshingly Earl Granville cites as authority for such a practice the English precedent, "where, as occurs in frequent cases in the House of Commons, the members of the Government are free to pursue their own line of conduct," wholly wishing us, like babes, to overlook the great distinguishing feature between such a Legislative Council and the House of Commons, where the Ministry exists only by the confidence of the other members of the House of Commons, and where each Ministry is formed of members whose political views are the same, and who are banded together only so long as they agree to vote with and for each other when required!! Men also of independent means. But in our Legislative Council the official members are men drawn from the highest *permanent paid* offices, salaried out of the Colonial Exchequer, and ought to give their counsel in the Legislative Chamber pure and undefiled for the benefit of the colony. How are the true merits of any particular measure, which the Governor or Colonial-office may desire to force through, to be thoroughly discussed, as being beneficial or iniquitous to the colony, if the majority of the members are to vote with their minds Chubb-locked under the present system? How exasperating must be the feelings of the unofficial members when they address themselves to the conscientious opinions and judgments of the officials, endeavouring to convince them, and inviting a real interchange of ideas, to find, sitting after sitting, that they had better have spoken to the walls of the Chamber as to men whose minds were forcibly made up by the secret and underhand orders issued under the present system!

Now, in lieu of the Colonial-office sending secret orders to the Governor for the official members to vote in one way, or of allowing the Governor himself, in an underhand way to force their votes to suit his views, why does not the Colonial-office act legitimately and boldly, in exercising the powers vested in Her Majesty in Council, whenever any particular measure is required to be passed? and do not allow the local governor the power to interfere with the officials in the Legislature. On the contrary, knowing well the temptations besetting an official appointed to the governorship of a distant colony (even supposing him not to be a Sir Harry Ord), in whom much confidence is necessarily placed by the Colonial-office, from whom secret reports on his subordinates are received, and who is vested with the power of marring their promotion, and tyrannising over them in their paid offices in petty ways, which only the mind of a Colonial Governor can fully enumerate, let the clause in question of the Duke of Buckingham's despatch be cancelled, and write a clear order enforcing on the officials the exercise of free opinions, speech, and vote on all questions, and forbidding them to secret interviews with the Governor on any measure to be legislated upon. Then all measures will be fully and freely discussed; a cordial feeling will spring up between the officials and unofficials, though they may differ in opinion; and the Governor will study to bring forward such measures as the Colony really require; the public will appreciate the Legislature, and, need it be added, the Colonial-office will be gainers by having the advantage of reading the free speeches of both officials and non-officials on every subject without losing the present power of vetoing any ordinance from the Colony, or of passing any other law by Her Majesty's Order in Council. But the Governor's power of interfering with the well-being of the Colony will at least be swept away; and, with all due submission to the Colonial-office, it will be found that it is really the Governor, and not the Secretary of State, in ninety-nine cases out of a hundred, who is the party blameable for the evils complained of.

With a Government of such liberal and pure tendencies as the present one at home, surely the Straits Settlements may expect that their grievances will be examined and remedied in a proper spirit and by independent judgment, free from all Colonial-office traditions and humbug.—I am, Sir, yours faithfully,

A STRAITSONIAN.

### COURT OF QUEEN'S BENCH.—MAY 26.

TAYLOR V. THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

This was the action by Colonel Taylor for injuries sustained by reason of his falling down the bullion hole of one of the company's steamers, in which he was a passenger. The case was tried at the last sittings before the Lord Chief Justice, when it appeared that Colonel Taylor came on board, while the vessel was loading, to look at his cabin, and going along the saloon he fell down a hole in the floor, called the bullion-hatch, into the hold below. There was nothing to denote the danger, and no one said anything to warn him of it, nor to awaken his particular attention, and as it was dusk he did not see the hole. He was seriously injured and permanently disabled, so that he had to retire on half-pay, and, of course, sustained considerable and permanent pecuniary damage, and the loss of all his future prospects in life. The jury gave a verdict for £3,750.

Sir J. Karslake (with him Mr. Watkin Williams and Mr. M'Leod), on the part of the company, moved for a new trial, on the ground that the verdict was against the evidence. He relied chiefly on the general state of the vessel while it was loading as enough to put the plaintiff on his guard, and that the accident arose partly from negligence. Moreover, he had no right to be there at all while the vessel was loading.

The Lord Chief Justice, however, intimated that he saw no reason to be dissatisfied with the verdict. The hole was in the floor of the saloon, the last place where anyone could expect it. The saloon was like a drawing-room, and who would expect a hole in the floor? As to the point that he had no right to be there, the steward told him to go, and that his cabin was a certain number.

Mr. Justice Mellor observed that the degree of care a man was bound to exercise must in some degree depend upon the place in which he was.

Mr. Justice Lush likewise remarked that there was nothing to warn the plaintiff or call his attention to the hole.

Mr. Justice Hayes observed that the plaintiff's mind was naturally preoccupied with the position of his cabin, for the door of which he was looking, and a man whose mind was thus occupied might naturally be less observant of other objects, and thus it had happened to himself in going along to knock his head against a post. (Laughter.)

After a long discussion,

The Lord Chief Justice said he saw no reason to disturb the verdict. It was not hastily given, but after great consideration.

Mr. Justice Mellor concurred. It was a question for the jury, and there was no sufficient reason for disturbing their decision.

Mr. Justice Lush likewise agreed. The degree of care to be exercised in any particular place must depend upon the circumstances, and therefore must be a question for the jury.

Mr. Justice Hayes also agreed. It was, he said, eminently a question for the jury, as such questions must necessarily be.—Rule refused.

## CORRESPONDENCE ON THE RECENT OPERATIONS IN CHINA.

THE papers relating to the various outrages on British subjects in China, which were asked for some time ago by Colonel SYKES, have been published, and in another column we reprint four letters, two from Lord CLARENDON to Sir RUTHERFORD ALCOCK, one from the Foreign-office to the SECRETARY to the ADMIRALTY, and one from the last-named official to Admiral KEPPEL. The bulk of the papers consists of the despatches received from China by the Foreign-office and the Admiralty, detailing the operations and the circumstances that gave rise to them; but these are already so well known to our readers in China that it is needless to reproduce the letters describing them. It will be seen that with a single exception, namely, the action of Mr. HOLT in reference to the outrage on British merchants at Banca, in Formosa, all the steps taken by both Consular and naval authorities in defence of their countrymen have met with the unqualified disapproval of the Home Government.

In Lord CLARENDON'S despatch regarding the proceedings in connection with the missionary difficulty at Foochow his lordship takes it for granted that, had time been given them, the local authorities would have procured ample redress for the aggrieved missionary, and condemns Consul SINCLAIR for "inexcusable precipitancy" in not waiting the result of the course "which, on his representation, they *might* take." So Mr. SINCLAIR is to be "strongly censured" for what he did, and cautioned to be "more circumspect for the future." Nothing could be better. Encouraged by the warm appreciation of a grateful country, Mr. SINCLAIR will doubtless be found one of the most efficient officers in the Consular service at whatever port he may be placed; besides it is expedient to inculcate in the Mandarins a proper degree of respect for British representatives, and what is more calculated to produce this effect than a perusal of the despatch above quoted, which is sure to find its way into Chinese hands with very little delay? Mr. HOLT, who by good fortune, coupled with undeniable good management, managed to adjust the Banca "difficulty" without an actual resort to force, receives the commendation he so well deserves. Sir RUTHERFORD ALCOCK speaks in high terms of the judgment and firmness displayed by him, and, in reply, Lord CLARENDON fully endorses this praise, but specially grounds it on the fact that no force was employed, the *Janus*, which had been sent for, arriving after a settlement had been made. So we may infer that had the Chinese been just a little more obstinate, so as to prolong the dispute until the arrival of the gunboat, Mr. HOLT and the commander of the *Janus* would have shared in the sweeping censures with which the present Government is so exceedingly "Liberal." The tenour of the despatches sent to Sir R. ALCOCK regarding Mr. GIBSON'S case is already known, but the letter from Mr. HAMMOND to the SECRETARY to the ADMIRALTY exhibits the FOREIGN SECRETARY'S opinions in a very clear light. The Chinese Government is to be informed that Mr. GIBSON'S acts are "regretted and disavowed." A more distinct invitation to the Mandarins to insult and outrage British subjects could hardly be conveyed, and they will not be slow to avail themselves of it.

The last of the series of letters we publish refers to the operations by the *Algerine* at Namoa. That portion of it which points out that every vessel stigmatised as a pirate by a Chinese informer may not prove to be one, is by no means without reason. But here again we have a most absurd opinion expressed, that "when a number of armed vessels fire on one of Her MAJESTY'S ships," rather than show their papers, that is *not* to be considered evidence of piracy; and this is followed by instructions that "their fire is not to be provoked." That is to say, no junk is to be called upon by our cruisers to show her papers, as, if "provoked" by being so called on, she is justified in firing into the gunboat, and even then (so we infer from the despatch) her fire is not to be returned! If this system is to be carried out there is an end to all hopes of keeping piracy in subjection.

Sir HENRY KEPPEL is far too energetic an officer to suit the GLADSTONE-CLARENDON-BRIGHT combination that now rules the destinies of England at home and abroad. As they could hardly, in common decency, recall him, they have hit upon an admirable expedient to get rid of him—namely, to disgust him with his position and then tell him he need not stay if he doesn't like it. We read in the *Army and Navy Gazette* that Sir HENRY is expected to return to this country, "as the Admiralty have given him the option of doing so, if agreeable to himself." We should think the delightful series of despatches he has lately received will have made his present command anything but "agreeable," and we shall not be surprised to hear that he has availed himself of the "option" so gracefully accorded him; in which case it seems likely that the China station will be given to Vice-Admiral HENRY KELLETT, C.B., lately Admiral Superintendent of the dockyard at Malta.

By the way, one of the letters from Admiral KEPPEL, published in the Parliamentary paper now before us, contains a distinct corroboration of the views we recently expressed as to the true origin of Chinese hostility to foreigners. Sir HENRY asserts the necessity of activity on the part of the naval force in China, which he considers is the only means of preserving our Treaty rights, "as the constant outrages "are clearly to be traced to the instigation of Government "officials." If there is any truth in a report that lately reached us by telegraph that "a high Chinese official at Peking has slapped the face of the French Ambassador," our own views and those of Admiral KEPPEL as to the real feelings of the official class will have received an unexpected confirmation. But the French official journals repudiate the telegram as altogether "sensational" and unfounded.

---

THE telegram above alluded to, dated Hong Kong, April 28, conveys a belief that "the Peking Government is in great fear of further encroachments by Russia." If this be true, the most sensible policy on the part of the Peking Government would be to cultivate friendly relations with England and France.

---

SOMEWHAT late in the day, *The Times* notices Mr. ANDREW WILSON'S work on the Taiping campaign, entitled "The Ever-Victorious Army." A generally favourable review of the volume concludes as follows:—"The Chinese Govern-"ment bestowed all kinds of honours on GORDON for these "achievements, and he received several flattering addresses "from the British residents at Shanghai and elsewhere. *Eng-"land might do well to follow this example.* Such officers are "not always to be found, and GORDON'S services were of real "importance. . . Our object has been to direct atten-"tion to the gallant deeds of a most promising officer, *which, "though not sufficiently appreciated, were most valuable to "English interests* in the Far East at a critical juncture; "and it is for this reason we notice a book which, if imper-"fect in some respects, does justice to GORDON and his ex-"ploits." The words italicised exactly confirm the opinions we expressed when reviewing the book on its first appearance.

---

AT last the English Government has formally made reparation for the almost insulting neglect with which it has hitherto treated the restored dynasty of Japan. We have frequently pointed out the absurdity of the system whereby our Home Government still affected to treat the SHIOGOON as the *de facto* Sovereign of Japan, long after the supremacy of the MIKADO had been clearly manifested. We now read in the *Gazette* that an Order in Council has been issued revising the order of March 9, 1865, which made provision for the exercise of jurisdiction in Japan. For the future, wherever in that order reference is made to the "Tycoon" of Japan, such reference is to be held to apply to the MIKADO. It is so long since the Shiogoonate was suppressed that the order reads like an anachronism. But "better late than never."

## FRENCH REPORTS ON SILK.

THE repeated failures in the silk producing districts of France, and, indeed, of all Europe, render the present season a very anxious one for the silk interests. The Lyons and other markets continue to be very flat, and the little business done has been principally in Asiatic silk. At Lyons, during the third week in April, the *conditioners* passed in round numbers 50,000 kilogrammes of silk, of which 19,500 organzines, 14,000 trames, and 16,500 raw silk. At Marseilles prices suffered a slight reduction; the *conditioners* of that port examined only 28 bales, 1 from Italy, 8 from Brousse, 6 from the Levant, 1 from China, with 12 sample packages; 10 bales from China were also weighed, their total being 477 kilogrammes. At Valence good silk becomes more and more scarce, while lower qualities are not in demand. Like reports from the Ardéche and other districts. At the public sales of eggs which occurred at Lyons there were plenty of buyers, but holders were compelled to sell at low figures, the sheets fetching various prices, from 1 franc to 25 centimes.

This month the case is much the same, holders and buyers wait the result of the hatching to form an idea of the coming crop of silk. The quantity of silk conditioned at Lyons during the last week of April amounted to 54,780 kilos. At Marseilles only 1 bale from the Morea was announced as sold. Cocoons fetched low prices. Good silk wanting; waste silk refused. The silk examined by the *conditioners* consisted of 4 bales from Brousse, 3 from the Levant, 7 from China, with 27 sample parcels, making a total of less than a ton. Besides these, 13 bales of Chinese silk were weighed and reported at 606 kilos.

From the Var the reports were bad, the mulberry leaves being sadly bitten by the March frosts, and the new shoots promised little good; it is expected that the trees will have to be stripped twice, which of course weakens them excessively. The eggs, too, had turned out badly, many having been hatched during the warm days of February, when there were no leaves for them. There was a public sale of silk at Lyons in the first week of May, when the following goods were offered:—373 raw Japanese silk, 56 raw China, 62 trames of China, 13 organzines China, 24 raw tsatlee, respun, 35 Setchuen, 14 Taysaam Kahing, 282 Tsatlee, 277 Hamin, respun—in all 1,092 bales. There was little interest excited, and the prices attained were below the official minimum quotations. At Marseilles, between the 1st and 7th inst., there were entered only 4 bales of Levant silk, with 24 sample parcels, and 2 others, altogether 357 kilos. Cocoons sold, 1,500 kilos. Calamusa, f.28.25. 1,900 kilos. Syrian, 28 francs. 500 kilos. Panderma, f.32.50. 1,000 kilos. Japanese, 17f. The general accounts of the worms are, that the imported eggs have done well, but not those of the second generation, and that the mulberry leaves are in good condition. Accounts from Italy good, but those from Spain unsatisfactory.

---

THE inauguration of the Suez Canal stands for the 16th, 17th, and 18th October, and the departure of the boat from Marseilles on the 9th of that month, to arrive on the 13th or 14th. The French Government is said to have undertaken the task of inviting a certain number of representatives of the press to assist at the opening of the great water-way. Once in Egypt the visitors will be the guests of the VICEROY; a complete caravanseray will, it is said, be arranged for their accommodation, as well as asses and camels for such excursions as they may choose to make. In addition to this a very comfortable boat is now being completed to carry the visitors up the Nile and give them an opportunity of visiting Upper Egypt; the vessel is named the *Ark of the Alliance*. The VICEROY will, we are told, act the host right royally, and everything may be expected, say the journalists, of a prince who stored the lockers of the boat in which the Prince and Princess of WALES ascended the Nile with "20,000 bottles of Claret." The company of the railways of Upper Italy are organising a trip to Egypt on the occasion of the inauguration; it is to last twenty days, and everything required by the voyagers is to be supplied at fixed and very moderate rates. The passengers will embark at Brindisi on board the two best boats belonging to the company, which, it is added, will be the first vessels to enter the Suez Canal on the opening day.

## THE BRINDISI ROUTE.

A report recently made by Captain Tyler to the Board of Trade on the facilities afforded for communication with India and the East by the Brenner Pass and the Brindisi route, is published in a Parliamentary paper. Captain Tyler states that considerable progress has been made in the construction of the harbour at Brindisi, and a new hotel, which is being built by the railway company, will probably be completed in six months. The Italian Government are about to undertake the construction of docks, and all the works in progress would be expedited if there were any immediate prospect of the employment of the harbour for regular Indian mail steamers. The port of Monopoli, Captain Tyler considers, would be a superior point of departure for the mails as regards salubrity, but it cannot be considered as a rival port with Brindisi for the accommodation of steamers of a large class; and travellers need have no hesitation in resting *en route* at the new hotel at Brindisi, now in course of construction, provided it be managed as intended, with a view to their comfort in all respects, and at fixed and moderate charges. The Brenner Railway, which Captain Tyler has recently travelled over, has, he thinks, nothing exceptional about it to prevent it from being worked in much the same way as any other railway, and he believes that an express service may be performed, as far as this line is concerned, with a high degree of regularity. The total distance from London to Alexandria by the Brenner route (*via* Ostend, Cologne, Augsburg, Munich, Brenner, Verona, and Brindisi) Capt. Tyler calculates would be about 150 English miles longer than by the Paris and Mont Cenis route; but as regards time there would be very little difference. The time occupied by the Brenner route is estimated at 150 hours, by the Mont Cenis route, 150½ hours, or 147½ after the Mont Cenis tunnel is completed. Either service, if carried out, would effect a saving of 30 hours over the Marseilles route, but practically the time saved as regards letters from this country would not be more than 24 hours, because the Indian mail now leaves London on Friday evening, and as the General Post-office is closed on Sunday, the latest time for the postage of letters would be Saturday evening. As the arrangement for despatching the mails on Friday evenings was settled after much deliberation with reference to the convenience of those principally interested, the more immediate practical benefit to be anticipated by the adoption of either of the Alpine routes would, as far as letters are concerned, be the possibility of sending a supplementary mail 24 hours later than the mail *via* Marseilles. All these routes, Captain Tyler observes, may, however, be only provisional ones. The line by Constantinople and the Valley, and over the Greek frontier to Cape Shorium, so near to the Suez Canal, have yet in process of time to be constructed, and the hope of the Indian traveller of the next generation, chimerical as it may appear to many at present, must be nothing less than to pass dry-shod from London to Bombay, through a submarine tunnel from Dover to Calais, through Europe by railway, over the Bosphorus by a bridge, and forward by railway down the Euphrates Valley, and round the Persian Gulf to Bombay.

---

## OFFICIAL CORRESPONDENCE ON THE OUTRAGES IN CHINA.

1.

LORD CLARENDON TO SIR R. ALCOCK.

"Foreign-office, April 23.

"SIR,—Her Majesty's Government have received from Vice-Admiral Sir H. Keppel copies of a correspondence respecting certain proceedings of Her Majesty's consular and naval officers in support of the claim of the Rev. Mr. Wolfe, a missionary, to a piece of land purchased by him for the use of the mission at Sharp Peak Island, near Foochow-Foo. The papers forwarded by Sir H. Keppel supply the only information that has reached Her Majesty's Government on the subject; but they are sufficient to enable them to judge of the consul's proceedings, which I have to inform you are entirely disapproved, except in so far as relates to his application to the local authorities. Those authorities, it appears by Consul Sinclair's letter to Lieutenant Keppel, of January 19, were perfectly ready to obtain redress for the missionary, and it was inexcusable precipitancy on the part of Consul Sinclair not to await the result of the course which, on his representation, they might take; and even if that had been unsatisfactory, the case was not one calling for forcible interposition on the part of the Consul, or of the naval officer whom he instigated to apply it, without direct reference to Peking. The Consul's measures had a direct tendency to provoke, without sufficient cause, collision with the Chinese authorities and people; and I have to instruct you strongly to censure Mr. Sinclair for what he did, and to caution him to be more circumspect for the future.—I am, &c.,

"CLARENDON."

2.

LORD CLARENDON TO SIR R. ALCOCK.

"Foreign-office, Feb. 17.

"SIR,—I have received your despatch of the 30th November, en-

Digitized by Google

closing copies of correspondence with Mr. Holt, in regard to the outrage committed on Messrs. Kerr and Bird, British subjects at Banca, and reporting the steps he had taken with a view to obtain reparation from the Chinese authorities for that outrage. I have to instruct you to inform Mr. Holt that Her Majesty's Government approve his conduct in this matter; and it is a great satisfaction to Her Majesty's Government to think that by his judicious management he had succeeded in obtaining redress without employing force, which was not called for by the state of affairs when Her Majesty's gunboat *Janus* arrived, immediate danger being at an end, and the matter, therefore, being one for which redress was to be obtained at Peking.—I am, &c.,

"CLARENDON."

3.

MR. HAMMOND TO THE SECRETARY TO THE ADMIRALTY.

"Foreign-office, Feb. 23, 1869.

"SIR,—As among the papers enclosed in your letter is found Mr. Gibson's Report of the 18th of December, to Sir Rutherford Alcock on the subject, Lord Clarendon considers that he is sufficiently well-informed to admit of his at once making known to their lordships his opinion, and he is compelled with regret to say that it is wholly unfavourable, whether as regards the conduct of the acting Consul or that of the naval officer, save as regards the operations of the latter considered in a professional point of view, the appreciation of which he must leave to the Board of Admiralty. There was clearly no occasion for these two subordinate authorities to commit any acts of hostility whatever; any danger to life or property was, for the time at least, at an end, and had been so for many weeks; the question at issue was the amount of reparation which might be due, to be ascertained by local inquiry; and any remissness on the part of the authorities to afford adequate reparation was a matter for discussion between Her Majesty's Minister and the Chinese Government at Peking, and not one to be adjusted by a precipitate recourse to reprisals by a subordinate civil or naval officer. Lord Clarendon will convey this opinion to Sir Rutherford Alcock by the next mail. The Lords of the Admiralty will see that his lordship strongly disapproves of the proceedings on the part of the British officers concerned, and he sincerely trusts that the instructions recently sent to China by their lordships and by himself will prevent the recurrence of these unnecessary acts of violence. Equally reprehensible, in Lord Clarendon's view, are the many particulars stated in the correspondence, and to which his lordship's attention is pointedly called in your letter, whether as regards the guarantee of 40,000 dols. demanded by the Commander of the *Algerine* and afterwards returned by him, or to the two sums of 5,000 dols. each, one under the title of indemnity for expenditure of warlike stores in attacking the Chinese fort, the other under that of prize-money, which were exacted from the Chinese authorities. Lord Clarendon considers that these last sums should be immediately returned to the Chinese authorities; and Sir Rutherford Alcock will be instructed to apprise the Chinese Government that the conduct of the British officers in exacting them is regretted and disavowed, and that orders have been given for the restitution of the money."

4.

THE SECRETARY TO THE ADMIRALTY TO VICE-ADMIRAL SIR H. KEPPEL.

"Admiralty, March 18, 1869.

"SIR,—I have laid before my Lords Commissioners of the Admiralty your letter of the 24th January, relative to an action between the *Algerine* and thirteen armed junks off Namoa Harbour, in June last, and requesting instructions as to the course to be pursued in the event of any further instances of Chinese opium smugglers firing on Her Majesty's ships. It is well known to the officers employed in Her Majesty's ships on the coast of China for the suppression of piracy that there are large numbers of well-appointed armed ships engaged in smuggling opium, which will not allow the Chinese officials to board them. It may easily be understood that a Chinese mandarin on board one of Her Majesty's cruisers would be readily disposed to use the opportunity of boarding and seizing such ships. These considerations should render an officer doubly cautious before he begins an action with vessels which may be wholly innocent of piracy. Not to return the fire would no doubt have required the presence of an officer of great temper and sagacity. It appears from Lieut. Domvile's letter of 15th January, 1868, that he succeeded in cutting off one of the Chinese junks, and that he boarded her, and with the mandarin examined her papers, which were apparently correct. The captain also stated that his was a merchant junk, and it is not stated that his story was disbelieved. If his story was true, it is clear that the other junks in his company were not pirates; but after this incident Lieutenant Domvile commenced a sanguinary engagement, pouring in grape at close quarters as he passed three times down the line, which, he adds, 'told with fearful effect.' The junk captured was proved, on trial at Hong Kong, to have been a trader, and was consequently released. Looking to the foregoing considerations, my lords have no hesitation in expressing their inability to concur with that part of your despatch which lays it down that 'when a number of armed vessels fire on one of Her Majesty's ships on the high seas, rather than permit their papers to be examined, the act is *prima facie* evidence of piracy.' Chinese merchant vessels are by law entitled to navigate the high seas armed with heavy guns. You will, therefore, give orders that Chinese vessels are not to be attacked, or their fire provoked, unless from previous information, or other unmistakable grounds, there can be no reasonable doubt that the ship is engaged in piracy. Such an event as the one described in this correspondence must be a great discouragement to native trade on the coast, and must justly cause ill-will between the merchant junks and Her Majesty's ships engaged in suppressing piracy. You will take the earliest opportunity of making the officers under your command acquainted with the remarks and instructions of their lordships."

# Monetary and Commercial.

At the meeting on the 18th inst. of the proprietors of the Chartered Mercantile Bank of India, London, and China, the directors, report was adopted. The net profits for the year amounted to £123,376, out of which £45,000 has been paid in two half-yearly dividends, equal to 6 per cent. per annum. The surplus profits of the year, together with £9,355 brought from special reserve, have been appropriated to the extinction of the greater portion of the losses caused by the crisis of 1866. The board propose increasing the dividend of the current twelve months.

The biddings for £350,000 in bills on India were held on the 19th instant at the Bank of England, and the amounts allotted were to Calcutta £329,000, and Madras £21,000. The minimum price was fixed at 1s. 10⅞d. both on Calcutta and Madras, being a reduction of 1 per cent. No tenders on Bombay were invited. Tenders at 1s. 10⅞d. will receive about 89 per cent.; those above that price in full. These results show a considerable diminution in the demand for means of remittance to the East.

At an adjourned meeting of the creditors of Mr. Charles Bennington, manufacturer, of Blackburn, an offer to pay 10s. in the pound was accepted; the instalments to consist of 5s. in three months, 2s. 6d. in six months, and 2s. 6d. in nine months, the last two instalments to be guaranteed.

On the 4th inst. the steamer *Japan* sailed from San Francisco for Hong Kong, *via* Yokohama, with 1,334,000 dols. in treasure, of which 458,000 dols. are for Yokohama, 21,000 dols. for Hiogo, 263,000 dols. for Hong Kong, and 192,000 dols. for Shanghai.

The Council of India will receive tenders on the 2nd proximo for bills on Calcutta and Madras to the amount of £325,000.

The report of the British Indian Submarine Telegraph Campany (Limited) states that the whole of the capital required from the public—viz., £550,000—has been subscribed; that the order for the cable has been given to the Telegraph Construction and Maintenance Company, and the first payment of £50,000 made to them, as provided by the contract; that 250 miles of core have been completed, while about 500 miles are in the various stages of manufacture, and that there is every reason to believe it will be completed within the contract time. With regard to the prospectus issued in March last of a proposed "direct English, Indian, and Australian Submarine Telegraph Company," to lay light cables between England and the East, it is mentioned that "the scheme has been withdrawn and the deposits returned, so that the threatened opposition is at an end."

The suspension has been announced of Inglis and Morris, manufacturers at Glasgow, with liabilities for £40,821, and assets under £2,200.

The amount of bullion by the P. and O. Company's steamer *Nyanza*, from Southampton 29th inst., was, in gold, to Aden, £420; to Bombay, £10,000; to Madras, £941; in silver, to Singapore, £22,390; to Hong Kong, £24,896; to Foochow, £500; to Shanghai, £6,920; to Yokohama, £400; total in gold, £11,361; in silver, £55,106.

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the present month, which contain details of the quantities of cotton manufactures and yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th May, 1869, compared with the corresponding periods of the two preceding years:—

### HONG KONG AND WHAMPOA.

PLAIN COTTONS.—Export for the month ended 16th May, 1869, 2,688,435 yards; for the twelve months 1869, 45,426,867 yards; for the twelve months, 1868, 62,986,421 yards; for the twelve months 1867, 36,887,861 yards. Decrease for 1869 against 1868, 17,559,554 yards.

COLOURED COTTONS.—Export for the month ended 16th May, 1869, 139,845 yards; for the twelve months 1869, 1,420,949 yards; for the twelve months, 1868, 2,448,432 yards; for the twelve months, 1867, 2,383,563 yards. Decrease for 1869 against 1868, 1,027,483 yards.

PRINTED COTTONS.—Export for the month ended 16th May, 1869, 60,840 yards; for the twelve months 1869, 1,583,081 yards; for the twelve months 1868, 1,483,742 yards; for the twelve months, 1867, 855,956 yards. Increase for 1869 against 1868, 99,339 yards.

COTTON YARN.—Export for the month ended 16th May, 1869, 292,080 lbs.; for the twelve months 1869, 5,164,070 lbs.; for the twelve months 1868, 7,778,216 lbs.; for the twelve months 1867, 4,301,318 lbs. Decrease for 1869 against 1868, 2,614,146 lbs.

VALUE.—For the month ended 16th May, 1869, £69,040; for the twelve months 1869, £1,234,148; for the twelve months 1868, £1,806,349; for the twelve months 1867, £1,235,623. Decrease for 1869 against 1868, £572,201.

### SHANGHAI.

PLAIN COTTONS.—Export for the month ended 16th May, 1869, 21,580,239 yards; for the twelve months 1869, 245,822,017 yards; for the twelve months 1868, 193,239,109 yards; for the twelve months 1867, 111,398,402 yards. Increase for 1869 against 1868, 52,582,908 yards.

COLOURED COTTONS.—Export for the month ended 16th May, 1869, 932,176 yards; for the twelve months 1869, 7,728,939 yards; for the twelve months 1868, 9,003,570 yards; for the twelve months 1867, 11,786,648 yards. Decrease for 1869 against 1868, 1,275,531 yards.

PRINTED COTTONS.—Export for the month ended 16th May, 1869, 256,631 yards; for the twelve months 1869, 2,505,989 yards; for the twelve

Digitized by Google

months 1868, 5,682,169 yards; for the twelve months 1867, 6,410,743 yards. Decrease for 1869 against 1868, 3,176,180 yards.

COTTON YARN.—Export for the month ended 16th May, 1869, 50,000 lbs.; for the twelve months 1869, 354,573 lbs.; for the twelve months 1868, 404,300 lbs.; for the twelve months 1867, 165,932 lbs. Decrease for 1869 against 1868, 49,727 lbs.

VALUE.—For the month ended 16th May, 1869, £419,164; for the twelve months 1869, £4,341,996; for the twelve months 1868, £3,556,978; for the twelve months 1867, £2,793,355. Increase for 1869 against 1868, £785,018.

### JAPAN.

PLAIN COTTONS.—Export for the month ended 16th May, 1869, 1,381,535 yards; for the twelve months 1869, 20,387,104 yards; for the twelve months 1868, 24,801,109 yards; for the twelve months 1867, 17,790,607 yards. Decrease for 1869 against 1868, 4,414,005 yards.

COLOURED COTTONS.—Export for the month ended 16th May, 1869, 157,485 yards; for the twelve months 1869, 1,180,237 yards; for the twelve months 1868, 2,197,237 yards; for the twelve months 1867, 3,804,035 yards. Decrease for 1869 against 1868, 1,017,000 yards.

PRINTED COTTONS.—Export for the month ended 16th May, 1869, 35,155 yards; for the twelve months 1869, 827,289 yards; for the twelve months 1868, 571,304 yards; for the twelve months 1867, 1,503,515 yards. Increase for 1869 against 1868, 255,985 yards.

COTTON YARN.—Export for the month ended 16th May, 1869, 374,980 lbs.; for the twelve months 1869, 4,772,784 lbs.; for the twelve months 1868, 4,744,880 lbs.; for the twelve months 1867, 1,663,360 lbs Increase for 1869 against 1868, 27,904 lbs.

VALUE.—For the month ended 16th May, 1869, £50,916; for the twelve months 1869, £682,399; for the twelve months 1868, £803,415; for the twelve months 1867, £701,668. Decrease for 1869 against 1868, £121,016.

### SINGAPORE AND PENANG.

PLAIN COTTONS.—Export for the month ended 16th May, 1869, 5,168,241 yards; for the twelve months 1869, 45,020,039 yards; for the twelve months 1868, 63,414,124 yards; for the twelve months 1867, 49,154,209 yards. Decrease for 1869 against 1868, 18,394,085 yards.

COLOURED COTTONS.—Export for the month ended 16th May, 1869, 363,015 yards; for the twelve months 1869, 4,542,131 yards; for the twelve months 1868, 6,342,846 yards; for the twelve months 1867, 9,744,714 yards. Decrease for 1869 against 1868, 1,800,715 yards.

PRINTED COTTONS.—Export for the month ended 16th May, 1869, 314,996 yards; for the twelve months 1869, 2,267,916 yards; for the twelve months 1868, 3,744,408 yards; for the twelve months 1867, 4,216,279 yards. Decrease for 1869 against 1868, 1,476,492 yards.

COTTON YARN.—Export for the month ended 16th May, 1869, 80,064 lbs.; for the twelve months 1869, 1,395,244 lbs.; for the twelve months 1868, 2,780,614 lbs.; for the twelve months 1867, 2,125,638 lbs. Decrease for 1869 against 1868, 1,385,370 lbs.

VALUE—For the month ended 16th May, 1869, £90,449; for the twelve months 1869, £972,104; for the twelve months 1868, £1,466,214; for the twelve months 1867, £1,538,621. Decrease for 1869 against 1868, £494,110.

### BATAVIA.

PLAIN COTTONS.—Export for the month ended 16th May, 1869, 544,784 yards; for the twelve months 1869, 16,108,498 yards; for the twelve months 1868, 16,702,481 yards; for the twelve months 1867, 30,166,938 yards. Decrease for 1869 against 1868, 593,983 yards.

COLOURED COTTONS.—Export for the month ended 16th May, 1869, 437,065 yards; for the twelve months 1869, 6,100,264 yards; for the twelve months 1868, 9,542,466 yards; for the twelve months 1867, 15,382,036 yards. Decrease for 1869 against 1868, 3,442,202 yards.

PRINTED COTTONS.—Export for the month ended 16th May, 1869, 410,862 yards; for the twelve months 1869, 4,730,931 yards; for the twelve months 1868, 9,138,751 yards; for the twelve months 1867, 16,232,977 yards. Decrease for 1869 against 1868, 4,407,820 yards.

COTTON YARN.—Export for the month ended 16th May, 1869, 11,610 lbs.; for the twelve months 1869, 438,360 lbs.; for the twelve months 1868, 658,410 lbs.; for the twelve months 1867, 835,666 lbs. Decrease for 1869 against 1868, 220,050 lbs.

VALUE.—For the month ended 16th May, 1869, £29,283; for the twelve months 1869, £563,784; for the twelve months, 1868, £809,829; for the twelve months 1867, £1,453,019. Decrease for 1869 against 1868, £246,045.

### MANILA.

PLAIN COTTONS.—Export for the month ended 16th May, 1869, 500,269 yards; for the twelve months 1869, 16,432,774 yards; for the twelve months 1868, 15,411,276 yards; for the twelve months 1867, 16,759,915 yards. Increase for 1869 against 1868, 1,021,498 yards.

COLOURED COTTONS.—Export for the month ended 16th May, 1869, 1,116,749 yards; for the twelve months 1869, 15,649,537 yards; for the twelve months 1868, 12,157,974 yards; for the twelve months 1867, 18,912,573 yards. Increase for 1869 against 1868, 3,491,563 yards.

PRINTED COTTONS.—Export for the month ended 16th May, 1869, 44,347 yards; for the twelve months 1869, 1,361,066 yards; for the twelve months 1868, 757,960 yards; for the twelve months 1867, 1,151,732 yards. Increase for 1869 against 1868, 603,106 yards.

COTTON YARN.—Export for the month ended 16th May, 1869, 25,200 lbs.; for the twelve months 1869, 303,957 lbs.; for the twelve months 1868, 287,413 lbs.; for the twelve months 1867, 139,844 lbs. Increase for 1869 against 1868, 16,544 lbs.

VALUE.—For the month ended 16th May, 1869, £38,461; for the twelve months 1869, £684,903; for the twelve months 1868, £624,646; for the twelve months 1867, £943,225. Increase for 1869 against 1868, £59,257.

### CEYLON.

PLAIN COTTONS.—Export for the month ended 16th May, 1869. 1,567,612 yards; for the twelve months 1869, 21,481,087 yards; for the twelve months 1868, 18,301,683 yards; for the twelve months 1867, 22,911,508 yards. Increase for 1869 against 1868, 3,197,404 yards.

COLOURED COTTONS.—Export for the month ended 16th May, 1869, 68,570 yards; for the twelve months 1869, 857,507 yards; for the twelve months 1868, 777,061 yards; for the twelve months 1867, 1,532,686 yards. Increase for 1869 against 1868, 80,446 yards.

PRINTED COTTONS.—Export for the month ended 16th May, 1869, 132,250 yards; for the twelve months 1869, 2,432,747 yards; for the twelve months 1868, 1,426,054 yds.; for the twelve months 1867, 3,884,813 yards. Increase for 1869 against 1868, 1,006,693 yards.

COTTON YARN.—Export for the month ended 16th May, 1869, 16,800 lbs.; for the twelve months 1869, 373,247 lbs.; for the twelve months 1868, 448,585 lbs.; for the twelve months 1867, 696,419 lbs. Decrease for 1869 against 1868, 75,338 lbs.

VALUE.—For the month ended 16th May, 1869, £32,726; for the twelve months 1869, £448,948; for the twelve months 1868, £383,674; for the twelve months 1867, £730,082. Increase for 1869 against 1868, £65,274.

---

## THE CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The eleventh annual meeting of the shareholders of the Chartered Mercantile Bank of India, London, and China, was held at the banking-house, No. 65, Old Broad-street, on the 18th inst. Mr. G. G. NICOL, chairman of the company, presided.

The CHAIRMAN, in moving the adoption of the report, said that the accounts of the general balance-sheet did not show many changes for the past year. There was, however, the same evidence of progress, which would, he hoped, be considered satisfactory. He was happy to say that since the 1st of January that progress had continued, and there had been an increase of about £250,000 in their deposits since that date. They were always in a strong position, not only at their head office, but at their branches, in having a large available source of revenue to meet all demands upon them. The bills, deposits, and loans were all of the most satisfactory character. Their assets were now almost entirely bills of exchange, and there was not one of them of which they had the slightest reason to feel any doubt. With respect to the profit and loss account, it had during the last half-year fallen considerably short. The shareholders were aware how very unfavourable business had been during that half-year. He hoped that they had now turned the corner, and if there were a good harvest during the present year they would easily bring the bank up to the position which they desired to see it occupy. The produce markets of India and China had been very bad during the last year or two, and that had affected them of course unfavourably. Under the conditions of their deed of settlement they had set apart a sum for the special reserve fund, making that reserve fund £150,000. The point which would, perhaps, be most interesting to the shareholders would be the amount they had written off of bad debts during the previous year. They were disappointed that they had not been able to make larger provision than they had been enabled to do, but that arose from two reasons—the bad half-year which they had had, and the liquidation of estates not coming up to their consideration. Still, they had wiped out a large number of accounts, and the amount was now brought within such a moderate compass that they felt no hesitation at all in giving the shareholders an assurance that they need not be under the slightest apprehensions as to this point. As a proof of the confidence of the directors on that point, they did not hesitate to announce to them that it was their intention, on the 1st of July next, to make a moderate increase of the dividend. They had been pursuing a very cautious policy, and they regretted much that they had not been able to increase the dividend before; they had now, however, no hesitation in doing it, and they were the more induced to do so because of the patience and forbearance with which the shareholders had acted towards them in the past, and they therefore thought that they were entitled, now that matters were getting into smooth water, to participate in the legitimate profits of the bank. They would continue to follow that policy, and to keep gradually increasing their dividend. Until the reserve fund was raised to £250,000, however, they would not increase the dividend beyond a moderate amount. (Hear, hear.) It was necessary that in the first place their reserve fund should be increased, but at the same time consideration was due to the shareholders, and they must try to attend fairly and properly to their present as well as to their future interests. In conclusion, he had merely to observe that it had been brought to his notice that a report had been put in circulation to the effect that the bank had sustained a loss by the failure of Messrs. Morgan, Melbourne, and Co. He had to give the most unqualified contradiction to that report, the account of Messrs. Morgan, Melbourne, and Co. with the bank having been closed two years ago.

A SHAREHOLDER asked what was the amount of the bad and doubtful debts, and the question was reiterated by Mr. R. Roberts and one or two other shareholders, to which Mr. T. N. Garraway and several others said they hoped that the Chairman would not answer the question, and expressed the utmost confidence in the board.

The CHAIRMAN said the loss would certainly be under £100,000, but it would be over £50,000.

The motion was then put, and unanimously carried.

The CHAIRMAN moved that Mr. James Joseph Mackenzie be elected a director, in the room of Sir Frederick Halliday, resigned.

Dr. THOM said he had no objection to Mr. Mackenzie, but Mr. Mackenzie was one of the auditors last year, and in consequence of the death of Mr. John Smith became sole auditor, and he audited the accounts after he knew he was to be elected a director. He objected on principle to auditors being appointed directors.

The CHAIRMAN said Mr. Mackenzie was elected an auditor by the shareholders with a perfect knowledge that he was to be a director.

The motion was then agreed to.

Mr. Donald Larnach was re-elected a director. Mr. George Christian, merchant, of Ceylon, and Mr. C. H. Pickford, merchant, of Calcutta and London, were appointed auditors; and Messrs. Turquand and Young official auditors; and a vote of thanks having been given to the chairman and directors, and to the officers of the bank, the proceedings terminated.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports still continue very dull, and rates are without alteration; coal freights from the Northern outports are also without improvement.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 40s. weight, 50s. meast. To Hiogo: 50s. weight or meast. To Tientsin: 60s. weight or meast. To Chefoo: 60s. weight or meast. To Shanghai: 35s. weight, 30s. meast. To Foochow: 50s. weight, 45s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Amoy: 50s. weight, 45s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £14. For Shanghai: £44. For Hong Kong: £33. For Singapore: £24. For Galle: £24. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. For Shanghai: £2 4s. For Hong Kong: £1 15s. For Manila: £1 10s. For Singapore: £1 5s. For Galle: £1 5s.

The Admiralty have invited tenders for the conveyance of small stores to Hong Hong.

## CASUALTIES.

The Argo, Hammon, from Singapore, put into Simon's Bay, April 12, for repairs, having lost fore and main-topmast during heavy weather.

The Chusan, Roy, from London to Hong Kong, which was spoken March 17, in lat. 18 S., lon. 37 W., had shipped a very heavy sea, February 12, and damaged boat, bulwarks, &c.

Advices from Amsterdam, dated May 18, state that the Frank Marion, Lincoln, from Batavia to that port, which arrived at Texel May 10, had been in collision.

The Isabella, James, from Cardiff to the Philippines, which put into Lisbon May 11, leaky, had been ordered to lighten; her head knees were started, and the caulking of her top sides was shaken.

The Hollandia, Nieuwenhuy, from Nieuwe Diep to Macassar, put into Simon's Bay, April 9, leaky, and would discharge her cargo.

The Johanna Mathilde, Lohse, from Saigon to Falmouth, put into Simon's Bay, April 10, making about eighteen inches water per hour, and with some bulwarks gone, having encountered a severe N.W. gale on April 7.

The Westminster, which arrived at Liverpool, from Yloilo, May 10, was reported as being leaky.

The Isabella, James, which sailed from Cardiff, April 12, for the Philippine Islands, put into Lisbon, May 11, leaky.

The Inverary, Auld, from Colombo, arrived at Boston, April 29, with loss of bowsprit and foretopmast, having experienced heavy weather.

The Tartar, Bush, from Cardiff to China, which put into Falmouth, Feb. 13, parted from her moorings on the 14th inst., and drifted on to the bank, inside the breakwater, but subsequently got off, and would proceed.

The Hirondelle, Beel, from Glasgow to Hong Kong, grounded 23rd May in the Clyde, but got off at high water, and proceeded to Gareloch to have her compasses adjusted.

Advices from Amsterdam, dated May 24, state that the Mary and Hillegonda, Walters, from Rotterdam to Batavia, which put into Rio de Janeiro, April 19, had lost her rudder near Tristan d'Acunha.

## MISCELLANEOUS.

At SIMON'S BAY.—April 12, Argo, Hammon, from Singapore, for London.

At RIO DE JANEIRO.—April 19, Mary and Hillegonda, Walters, from Rotterdam to Batavia, in distress.

At CALLAO.—April 19, Henri IV., Monella, sailed for Amoy.

## NEW MUSIC.

BRAG. Serio-comic Song. Written and Composed by ALFRED SCOTT GATTY.

PUT IT DOWN TO ME. Comic Song. Written and composed by ALFRED SCOTT GATTY.

WHEN THE ROSES BLOW. Song. Written by R. REECE. Composed by G. B. ALLEN.

THE DAYS WERE SWEET IN SUMMER TIME. Song. Written by R. REECE. Composed by G. B. ALLEN. Post free for 19 stamps each.

Messrs. R. COCKS and Co., New Burlington-street.

We have had occasion to favourably notice Mr. Gatty's comic songs, and the two under notice do not alter our opinion of their character. "Brag" is a comic song of a mild order, but hardly to be ranked as serio-comic. It is all fun. "Put it Down to Me" is more pungent, and broader in tone, but without approaching coarseness. It is sung nightly by the St. George's Hall Christy's, and hardly ever fails to be warmly encored. Both songs are in marked contrast with the music-hall type, and deserve a wide circulation. "When the Roses Blow" is a ballad which has also obtained much favour with the Christy's, and it well merits it. The melody is very taking, and quite equal to any of Mr. Allen's uniformly excellent settings. "The Days were Swee in Summer Time" is another excellent song, and if treaches a front place in the thousand and one new compositions before the public it will fully deserve it.

HAMILTON'S MODERN INSTRUCTIONS for the PIANO. 673rd Edition. 70 large folio pages. 4s.—Order of all Musicsellers and Booksellers; and of the Publishers.

CLARKE'S CATECHISM of the RUDIMENTS of MUSIC.—121st Edition. Free by post 13 stamps. "Every child learning music should have this book."—Morning Chronicle.

London: ROBERT COCKS and Co., New Burlington-street, and of all Musicsellers.

HOLLOWAY'S OINTMENT and PILLS.—The scrofulous and consumptive will find in these noble remedies the means of casting out the bad humours which originate and prolong their sufferings. The Ointment should be well rubbed twice a day over the skin as near as possible to the part affected. It will penetrate and act most wholesomely and energetically on the diseased structure. It manifests a wonderful power in removing all taints from the blood, and consequently in curing a multitude of chronic ailments which seemed to be almost irremediable. No invalid who carefully studies the plain instructions folded round every packet of Holloway's medicines will be at a loss how his preparations can be used to the greatest advantage.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## ORIENTAL BANK CORPORATION

Incorporated by Royal Charter, 30th August, 1851.

PAID-UP CAPITAL, £1,500,000.

RESERVED FUND, £444,000.

The Corporation grant Drafts and negotiate or collect Bills payable at Bombay, Calcutta, Colombo, Foochow, Hong Kong, Kandy, Kurrachee, Madras, Mauritius, Melbourne, Point de Galle, Shanghai, Singapore, Sydney, and Yokohama, on terms which may be ascertained at their office. ### THE MAILS, &c

—o—

The French mail, with Hong Kong advices to April 22nd, which was not due at Marseilles (according to the Company's time table) until Friday last, June 4, reached London on that day. As it brought only two days' later news, and that of no importance, we deemed it advisable to reserve the present issue until to-day, and are now enabled to print some very interesting matter which would not have been ready for publication on Friday.

The next homeward mail is that with Hong Kong dates to April 29, due here this day week. Telegrams have been received, *via* Galle, in advance of the mail leaving Hong Kong May 12; and *via* Kiachta telegrams from Shanghai to May 19 came in yesterday.

## List of Passengers.

—o—

### PASSENGERS INWARD.

Per Messageries Imperiales steamer *Moeris*, arrived at Marseilles June 2.—From Yokohama: M. de la Pagerie and servant. From Shanghai: Messrs. De Queredo, Détape, Agostina, Casse, Lanfranchi. Per P. and O. steamer *Ripon*, from Southampton, June 26.—To Singapore: Mr. J. D. Vaughan. To Penang: Mr. and Mrs. Thompson and child.

## Summary of News from the Far East.

—o—

### CHINA.

—o—

### TIENTSIN.

(FROM A CORRESPONDENT.)

TIENTSIN, March 15, 1869.

We were much surprised to read in the *L. and C. Express* of the 15th January that Lord Clarendon had agreed with Mr. Burlingame that when any differences arise, before war shall ensue, they shall be referred to the Home Government for consideration. Surely this must be a hoax. No Minister with the slightest knowledge of Chinese character, as at present constituted, would ever agree to such a thing. The *Standard* and Mr. H. N. Lay show plainly and truly what would be the effect of so acting. If Lord Clarendon has so far forgotten himself, would it not be advisable to carry the Civil Service examinations a little further, and make it imperative on all Secretaries, whether Indian, Colonial, or Foreign, to have a full knowledge of the people and countries they are called on to have dealings with?

No one here that I have met with has the slightest belief that the Burlingame mission will do anything towards the opening up of China; the belief is entirely the other way, that the mission will do all they can—being well paid for it—to prevent the opening up of the country. The Chinese, if left to themselves, never will do anything, and this, to any resident in China, is so plain that he who runs may read. If the Chinese wish to be placed on the footing of European nations, and have reference made home in any case of dispute, let them act like European nations, and allow telegraphs and railroads to be spread all over the Empire, and from that to Foreign countries, so that the Consuls can communicate with the Ministers, and the Ministers with the Home Government; then it is possible that at times small wars might be avoided; but their reason for asking this reference to Europe or America is from a mere desire to put things off, and, if necessary, to make preparations for eventualities. And so will it ever be with them if they are granted this concession of delay; and not compelled to make progress in return for it. No Foreign nation has the real good of the Chinese at heart, unless that nation insists on the Chinese advancing in the paths of scientific progress. That they have no such intention themselves is shown daily. Witness the answers given by the Tsong-li Yamun to the British Minister, when he asked them to make a road to the coal mines. The reply was that the construction of the road would injure the Feng-shui. Could any answer be more childish or unlike a nation anxious to go forward in the paths of progress? In favour of the Chinese, it is said they have had translated Wheaton's "International Law;" but what use do they make of it? They use it when they can find anything in it which favours their cause, but they totally ignore it when it goes against them. The college at Peking shows also in their favour; but some folks there say the college is already on its last legs—and no wonder, if the following case is correctly reported. Some Chinese in authority over the college sent for the scholars of the French class to examine them, and knowing nothing of French themselves, dismissed from the class about one-half the scholars—the scholars who had really the best knowledge of the French language.

The Chinese Government are really at work, however, and it is well to look at the nature of their work. Is their progress in work in the paths of peace? is it in the furtherance of commerce? No! Is it in the protection afforded to missionaries? No! Is it in making roads or canals, or anything to ameliorate the condition of their own subjects? No! What is it, then? It is in the erection of arsenals, the making of cannon, muskets, the manufacturing of gunpowder, and warlike stores and implements; in fact, in carrying out Tseng-kwo-fan's programme, as given in his private letter of advice, namely, to make these things

Digitized by Google

themselves, and be independent of Foreigners, and in time to be in a position to drive them out of China, or at least confine them to the seaboard! Such is the progress the Chinese are making, and that alone—unless when compelled to do otherwise; all else is decay. If this can be called a progress, then they are fast progressing. Can any true friend of China say it is the progress he would like to see made here!

The insults and worse than insults in some places offered to our missionaries at Yangchow, Tungchow, Chefoo, Formosa, Foochow, and Swatow, you are already aware of, but may not yet have heard of the last and worst case, an account of which has only just reached Peking. The account, as I got it from good authority, is that a French priest in Szechuen had been brutally murdered and cut in pieces; another French priest was wounded, but escaped; about two hundred native converts killed. One of the converts who escaped, and afterwards joined the French priest who was wounded and escaped, told the latter that after he (the French priest) left about three hundred more native converts were killed. A mandarin, who was hostile to the priests and converts, in conjunction with the literati, is believed to have been at the bottom of this affair, and is said to have spent a large sum of money to get it accomplished. Another—and what—a commentary on Mr. Burlinghame's account of the Chinese welcoming the missionaries to plant the shining cross on every hill! Tseng-kwo-fan showed plainly at Nanking that he would grant no compensation for the Yangchow affair until compelled to do so. When the *Rinaldo* was there he promised everything; when she left nothing was done until the affair was placed in the Admiral's hands—and only then compensation was made. So will it ever be with the Chinese until their characters are changed for the better; but with them whose chief glory it is to try and throw dust in our eyes, by any or every means, however low or mean those means may be, what can you expect?

Our missionaries are trying their best to enlighten the Chinese; but with what success you see from the above cases. They may not in all cases be the most suitable for such works; they are like their neighbours, of different minds and temperaments. The societies at home at all times do not appear to have much choice in whom they will send; but the best missionaries will do little good in the interior of the country, I fear, until we get railways; the people require to see more of Foreigners and of each other—they know little or nothing about us; and the mandarins, possibly knowing as little, seem, while having a dread of us, to have a hatred of us also. Why is this? Wherever we travel in the country we are most kindly received and treated by the country people. Such has always been the case with myself, and other travellers say the same; it is only when we come in contact with the mandarins or those about them that travellers experience any molestation or trouble. The mandarins know nothing of us personally; do they take the cue from the Imperial Government, or have they an innate feeling that we are likely to supplant them, or at least to expose their illegal exactions?

Some foreigners in Chinese Government employ, who have access to the mandarins, and are often brought in contact with them, tell me it is very evident to them that the mandarins as a class would gladly see us all out of the country; and that we are only tolerated here. And this is no doubt the feeling of the Imperial Government towards us; they cannot now well drive us out, but they are trying their best, by every means in their power, to keep us back; the Imperial Government, being Manchus, are, so to say, strangers in the land, like ourselves, and what they did in conquering the country, they possibly think some other foreign nation may do also; the great bocy of the people have little nationality, and care little who rules s· long as they have peace and plenty, and no doubt the Government are well aware of this. Had England and France not interfered with the Taipings, they would have been masters here now. And were a good man to arise now, anxious to benefit his countrymen and possessed of the knowledge how to do it, there would be little doubt of his succeeding; and were the people well treated, no country could be so easily governed as China. I cannot think that this dynasty will last long; it is rotten to the core. Burlingame's plans, if carried out as he would have them, would hasten this catastrophe; he may do the country good in this way, but certainly he will do China no good otherwise, in the way he proposes. China, in my opinion, is not to be opened gradually; China will be opened at a bound, at once, like the emancipation of the slaves in America and West Indies. Like the revolution in Spain, or something of a like nature, but whether caused by war with foreigners, or by war amongst themselves is difficult to foresee.

Mr. Charles Wentworth Dilke may be right in saying that the words of the Chinese translation in his letter which you print in italics are a forgery. Nevertheless they are now looked on and acted on by the Tsong-li-yamun as part and parcel of the treaty. The high provincial authority here, H.E. Chung How, superintendent of the three Northern ports, looks on the words and acts on them in the same light. The following case will show this. Some eighteen months ago native Christians in Shantung, connected with a mission having their head-quarters at Tientsin, were molested by some of their neighbours on account of their Christianity, and were by the local mandarin refused protection, on the plea that they were Christians and not under his jurisdiction. The missionaries brought the case before the Consul here, Mr. James Mongan, and he laid it before H.E. Chung How; the latter took it up, and sent Mr. Mongan a draft proclamation quoting the Roman Catholic or French article in the treaty as being the strongest worded, but the Consul preferred the English treaty, Article 8, as being quite strong enough, and also because he did not wish the missionaries to be thought Roman Catholic. The proclamation was sent to the district, and there has been no more trouble or molestation to the native Christians since then. His Excellency Sir R. Alcock was informed of the affair after it was all settled, but only then, I believe.

This case, I think, proves plainly that the Chinese look upon the article, however obtained, as part of the treaty, and binding upon them; therefore the missionaries have a perfect right to be in all these places, so long as they behave themselves. Mr. Dilke would have been a much better authority on Chinese matters had he come and seen the country and people for himself. He may have then seen things in another light, like some of Mr. Burlinghame's friends who had heard him at San Francisco, and have since visited China, and found the Chinese of real life very different indeed from the Chinese portrayed with such glowing language by Mr. Burlinghame. I hope Mr. Dilke is wrong in saying that Sir R. Alcock has withdrawn the claim of right of residence, if so, we may suppose he has also withdrawn the claim, if ever made, to have the mines opened, and railways made, or anything else which would necessitate a residence in the interior.

I was somewhat surprised to read in the *L. & C. Express* that Mr. J. McL. Brown, Secretary to the Chinese Mission, stated at a meeting of one of your societies that he did not think that we should get railways about Peking or China for years to come (I have not the paper by me containing his words), on account of there being cemeteries all round Peking, and the opposition on that account of the mandarins; he might have said with equal truth that if the mandarins have their way we shall never get railways. From what I have seen of these cemeteries all round Peking I have no doubt but an engineer could lay a line of rail down in the thickest part of them, and go no nearer any of them than the existing roads do to some of them. And as for the Feng-shui it may be met and laid as easily there as elsewhere when it suits the Chinese Government to do so; the lower classes of Chinese readily sell their ground about Tientsin, although covered with graves; they try generally to get a higher price for it on that account, saying that if the ground is built on at any time they would previously have to remove the coffins; but they always abate their demand, and accept the usual price of land. On one occasion a house was to be built on some land having graves on it; the late owner was asked to come and remove the coffins as he agreed on; but although he was sent for several times he never came. Where was the Feng-shui here?

On my telling two missionaries here lately that this Government would not allow a road to be made to their coal mines because it would obstruct the Feng-shui, they only laughed at it. On my asking one of them what Feng-shui was, he said it was something he had heard of but knew nothing about. On my asking the second one the same question, he replied, "Feng-shui is something said to exist in rich men's villages. Now, our village (Chaiting) is a poor one—a very poor one—and therefore there can be no Feng Shui there." The upper classes may have Feng-shui, and use it when it suits them, as the Government do; but they also, when it suits their purpose, have no difficulty in overcoming the Feng Shui. Witness an arsenal, built within the walls of the Treaty Temple of Tientsin for the manufacture of cannon, gun carriages, &c., with steam engine, and a lofty chimney, showing by the smoke issuing from it that the work is being carried on, and by the sound of a steam whistle, instead of a bell, the men are called to labour and to leave it. Witness also the new powder manufactory at Tientsin, which is to be called the "Imperial Arsenal." When the ground for it was laid out, the priests or parties who pretended to a knowledge of Feng-shui were present, but the English gentleman who is in charge of the works, by giving a foot or two here was able to gain a foot or two there, and so was able to get what he wanted without much difficulty. So would it be in every case when it suits the Government to overcome Feng-shui, which is but a myth, so far certainly as any Foreigner knows anything about it. If there is really anything in it, let it be stated distinctly what it is, and how it acts, then one may be able to argue with them about it, but one cannot argue with or expect to command another, neither knowing anything about it.

The Chinese Government, I firmly believe, do not like us, not that we are doing or have done anything that they should dislike us for, but because they cannot understand our energy and restlessness, and constant moving to and fro. Leave us alone would be their policy, and to all our demands, reply, like the poor Pope, "Non possumus." As it has been and will yet be with the Pope, so will it also be with the present dynasty of China, unless they move forward with the age in which they live.

The Chinese Government, even if they grant the concession of roads and railways, will no doubt be anxious that they be made only in some of the Southern provinces in the first place, although there is no place so well adapted for them as the plain of Pechile, and no place where they would pay better than a line from the coal mines forty miles west of Peking to Peking, Foochow, Tientsin, and Taku, between which places the traffic is immense. Here also the Imperial authorities could judge of their working for themselves, instead of leaving it to some Governor of a province to report upon it—having had previous instructions to

Digitized by Google

report against it, and to put what obstacles in the way of it that he can; but I fear the Imperial authorities do not wish to hear the sound of the railway whistle in Peking yet. The Chinese Government well know that if liberty to work the mines is granted, railways must follow; the first is of little use without the second; they must go hand in hand. They also know, as we are beginning to know, that the whole of the southern range of mountains—and possibly others also—through Manchuria, Mongolia, Chihli, and Shansi, contain vast mineral resources of many kinds—gold, silver, iron, copper, lead, and no doubt many others. While coal is found in the greatest abundance all over the north of China, and in some places, like Chaiting and neighbourhood, steam coal, both bituminous and anthracite, of the very best quality, besides the common anthracite used for house purposes by the Chinese, a few miles of rail could connect the main rail about Peking and give the Pekingese their coals at one-third or one-fourth the price they now pay for them. Coals costing at the mines, forty miles in a straight line from Peking, 1 dol., or 4s. per ton, were selling at Peking during a part of last winter at 7 mace, or 1 dollar per picul, there being 16 piculs and 80-109 catties to the ton. A ton cost in Peking no less than £3 11s. 4d. Could a greater case be needed to show the want of a railroad from the mines to Peking? The working of these mines and transport by railroad would prove an inestimable benefit to the country. Foreigners at first would reap a share of these benefits, but in no long time the natives might have it all in their own hands. Our friends in England and China who have such a stake in the China trade seem very apathetic in some things nearly concerning their interests. For instance, they nave done nothing, so far as I know, in endeavouring to find out the mineral resources of China. The P. and O. Company might surely of themselves have taken this trouble, but it seems to have been left to a gentleman sent here by the merchants and others in San Francisco, who, at their expense and under the instructions of the U. S. Minister at Peking, to report on the coalfields in the North of China; he is now at work, has been up the Yangtsze, and is now, I believe, at Formosa, and will, no doubt, in time pay us a visit here.

On the Yangtze, I believe, he reports there are no available fields of good coal close to the river, so far as he had travelled. Shantung may produce good steam coal. The Chaiting mines, forty miles west of Peking, are producing the best steam coal; the want of a road, and want of water in the river, alone prevents them being got down in large quantities. With a railroad from the mines to Tungchow, and river dredged from that to Tientsin, or railroad to Tientsin or Taku, and mines worked by machinery, 100,000 or 120,000 tons a-year might be exported and laid down at most ports in China, at prices which neither the English nor Australian coal could compete with; while as to quality, some of the engineers who have tried it give it the preference over both. If our friends in England are afraid of their coalfields being exhausted, had they not better assist us in getting our mines into working order, so that we may help to save their coals? The great coalfields here may still be said to be untouched, as the Chinese have no machinery, and the mines are, consequently, of little depth, the miners being always obliged to stop when the water becomes too great for their buckets, or the expense is greater than the cost of the coals. If our Transatlantic cousins on the Pacific side have taken the initiative in exploring the coalfields here, would it not be well that our English friends connected with China or some of the learned societies should follow suit, and send some learned geologist and mineralogist to survey the northern part of China? I feel sure, from what I have seen of the country, that they would be amply repaid for their trouble and expense in the knowledge they would gain of this very interesting part of China, which may be said to be, especially in minerals, the richest part of it.

March 24.—Rumour a few days since had it that Tseng-kwo-fan was coming here from Powting-foo to drive all the Foreigners out of Tientsin—that at his late interview with the Emperor he had asked and obtained permission to do so. To-day several of his people are reported to have been seen in the city, and the report now is that he is coming to drive the French Consul and priests out of their present residence, which is said to be Imperial property, and that the French acting Consul refuses to quit it. There has been some communication passing about this residence, but I imagine his visit—if he makes one—is one of inspection, Tientsin being the most important place in his province.

Our winter, just past, has been a very mild one, except the first few days, which were cold and stormy. The river was navigable from Tientsin to the sea on the 11th February. Chinese New Year's Day much earlier than usual. While at Newchwang, which generally opens about a fortnight after Tientsin, the first steamer could not enter until the 15th March, the ice about the settlement at Newchwang breaking up on the 18th, laden carts crossing over it the day previous. At Tientsin our first steamer of the season arrived on the 25th February. Our postal arrangements were very defective during the winter, hardly a newspaper being received all winter, and in the spring we have all the winter's supply, and are unable to read them all.

Preparations are reported to be making in Peking for the reception of H.R.H. the Duke of Edinburgh.

This day, March 24, is the first rainy day of the season; it has been raining all day. We had a slight shower on the night of the 16-17th. The steamer now here may not save the mail, on account of the rain. She has also been in collision with a North German vessel, and the latter will have to be surveyed. We had lately here some six steam and twelve sailing vessels; ten sailing vessels were North German, one Swede, one English.

I enclose you herewith a comparative table, showing the principal articles of the import trade at Tientsin in 1867-68, with memorandum of direct imports from Great Britain, 1868, from Customs returns. You will see our imports of grey cotton goods last year amounted to no less than 2,045,876 pieces, while of grey cotton goods direct we had 185,100 pieces. The five or six vessels now on their way here direct, to be followed, it is hoped, by others during the season, will bring us a much larger quantity than we received in this way last year.

Tientsin being the largest consuming port in China for cotton goods, it follows that if goods pay here sent *via* Shanghai by sailing vessel, and thence to Tientsin by steamer at the rate of Tls. 8 to Tls. 12, or 50s. to 75s. per ton of forty feet, as is often the case, they must pay, if sent direct by sailing vessel to Tientsin or Taku, at an extra freight of 5s. per ton over Shanghai rates, as is at present the case.

Much has been written in our Consular and Customs reports during the last two or three years about the obstacles to Foreign trade here, such as the bar outside Taku and want of lighthouse on Shallentun Island, that I need not do more here than mention them, except to say, that although we have been promised that we shall have our bar dredged and lighthouse erected, we have not yet got either the one or the other done. It is to be hoped that in the revision of the Treaty, Article 32, relating to these affairs, may be altered from *consulting* together to acting together, and that with a right good will, when harbour improvements are requisite. No one here has much faith in seeing these things done in a hurry. They are going on slowly with improvements about Shanghai, and possibly our turn will come in time.

### COMPARATIVE TABLE SHOWING THE PRINCIPAL ARTICLES OF THE IMPORT TRADE AT TIENTSIN, 1867-68.

(*From Customs Returns*, 1868.)

| Description of Goods. | Pieces. 1867. | Pieces. 1868. |
|---|---|---|
| COTTON PIECE GOODS:— | | |
| Shirtings, gray | 656,349 | 1,398,377 |
| ,, white | 164,558 | 248,574 |
| Dyed and brocade | 46,631 | 54,635 |

## SHANGHAI.

From this port we have but two days' later advices, namely to April 16th, with no news whatever of any importance. Mr. Burlingame's doings in Europe, and the action of the Home Govern-

Digitized by Google

ment regarding the Yangchow affair, are the only topics discussed in the local papers. No later outward mails had been received since the date of our last despatches, and there seems to be no news from the River or Northern Ports.

A correspondent writes:—"Admiral Keppel got pelted by a Chinese mob at Lochow, near the entrance to the Poyang Lake. He and his officers and boat's-crew had to cut and run; of course, according to Lord Clarendon, he is to do nothing—but we shall see. He sent to the authorities at Hankow for assistance when the *Salamis* got ashore; but they refused, though they had two steamers there at the time! The clipper *Thermopylæ* is loading 400 tons tea here for Foochow, where she is to fill up with new crop.

"Some excitement in Shirtings, consequent on telegrams reporting a strike in Manchester, and 'short time.' Several firms are buying largely, the idea being that in August we shall have high prices ruling. Exchange is weak since P. and O. mail, and closed at 6s. 1¼d. to 6s. 1½d. for Bank Bills."

## HONG KONG.

Our advices from Hong Kong also extend to two days later only, the 22nd April being the latest date. No outward mail had arrived in the interval. The only item of news worth reproducing is the following, from the *China Mail* of April 21st:—

The following paragraph appeared in our contemporary's issue of Monday, but it then escaped our notice:—

"It is stated that a despatch has been forwarded from the Colonial-office on the position of the ex-officio members of the Legislative Council, the purport of which is that, with regard to all measures emanating from the Colonial-office, Her Majesty's Government will expect the support of the ex-officio members, but with regard to such measures as originate in the Colony, either from the Governor or from any other member of Council, H.E. the Secretary for the Colonies will be only too glad to get the benefit of their opinion. It is to be hoped that this desirable line of conduct will be acted upon."

What amiable condescension! The despatch, if its effect is correctly stated, only confirms what is already known as to the conditions under which the *ex officio* members hold their position; they must accept the rule of Downing-street. As for the unofficial members, they are simply complimentary make-believes, to relieve the colony from the appearance of a pure despotism, and whose "representative" functions are *nil*. Whether such a position confers any real honour is a question hardly worth inquiring into, but we cannot help thinking that, under the circumstances of the case, the official Government might well be left to monopolise the honours of administration. The Governor, for instance, is wholly credited for the suppression of piracy, but the whole Government (including the unofficial members) will have to share in the odium of the gambling revenue.

# STRAITS SETTLEMENTS.

## SINGAPORE.

The last mail brought advices from Singapore to the 1st May. The outward mail of March 26 was received on the 29th April, the latest telegrams from London being to the 17th April.

The races were going on, and formed the only topic of interest. In the first day's racing (April 28) the first race was won by Fisch-Ton-Khan; the Roadsters' Cup by Pills; and the Confucius Cup by Bismark. On the 30th (second day) the Club Cup was won easily by Colonial, the Galloway Stakes by Pills; the Johore Plate was not run for, on account of a sufficient number of horses not coming to the starting-post; the Winners' Handicap by Colonial. The *London and China Express* Cup (presented by the proprietors of that journal) was to have been run for, but it was dark when the above events had come off, and this race was consequently postponed until the following afternoon; Sir Harry was the favourite, but we are ignorant of the result, as the mail left at noon.

## SINGAPORE IN 1869.

(FROM OUR SPECIAL CORRESPONDENT.)

That a feud exists between the Governor and the governed in Singapore is soon apparent to a passing visitor. How this most unsatisfactory state of things was brought about is not so easily described. The community complain of the Governor as overbearing and intolerant, trusting to no one in the discharge of the duties of the various departments. It is alleged on the other side that the community have thought proper to range themselves in opposition to the Governor, and, in fact, to raise a wall between them which renders it impracticable to act with anything like co-operation. The consequence of this is that neither the Municipal Council nor any other representative body can make common cause for the benefit of the public generally. The Municipal Council, who collect the 10 per cent. on rentals levied for town purposes, *i.e.*, a radius of three miles, are constantly at loggerheads with Government officers; and the town is still without a system of water supply in consequence. The risk of fire is therefore much increased, as the hose may have to be laid on at a distance of a quarter of a mile. There are steam fire engines and hand engines, but the chief element is wanting.

The feud between the Governor and the community is much increased by the hearty sympathies of the latter with the position of the Chief Justice, Sir Benson Maxwell, who considers it a great blow to his dignity, and an injustice to the public, that the judges in the Straits should have been deprived of their former independence of the local executive, although the change only places them under the same regulations as the other Crown colonies. It is at the same time known that the Chief Justice is often arrayed against the Government in the measures which come before the Legislative Council; and his opposition generally carries with it the sympathies of the inhabitants.

The post vacated by Dr. Little in the Legislative Council has not yet been filled, and it is currently stated that it has been offered to and rejected by several merchants. The Governor should not incur this undignified position, and the best manner to avoid this would be, not to ask, but leave it to the community to send up the names of, say three or four gentlemen whom they consider eligible. This could be arrived at through the Chamber of Commerce, Municipal Council, or similar representatives of the community. The Government could then select one. It is stated that in offering the post it was accompanied with the suggestion that they would make themselves pleasant, *i.e.*, not oppose Government measures! !

The new Government House, about which there has been so much said, is getting on very fast, and there is but little doubt of its completion by October, the time of the arrival of the Duke of Edinburgh in the *Galatea*. As far as the building and its appointments are concerned, there is nothing that can be termed extravagant. The ball room, drawing and dining rooms, and bed rooms are certainly not in excess; indeed the visitors' bed rooms are decidedly not up to the mark for a Government house. The site is certainly a charming one, and commands fine views; indeed, for the distance from town, is the finest. There is a great deal of spare ground, which can be realised. The cost of the land was 46,000 dols., and in speaking of the 200,000 dols. which the whole thing is estimated at, including furniture, this should be remembered.

The steamer building by White, of Cowes, which is to cost £23,000, and perhaps £25,000, still continues to be a mark for attacks by the writers in the *Straits Observer*. In a recent article they even go to the length of saying that it will be better that she "sinks in the Bay of Biscay." The *Observer* of the 23rd had a very bitter personal attack on Mr. Cameron, who has lately taken editorial charge of the *Straits Times*, for an article which turns to the Governor's side. These personalities are inseparable from colonial controversies, and generally afford amusement to the community, but do not effect any real good. The *Observer* in many things is much too personal.

The Cavanagh Suspension Bridge, which is to connect the business part of the town with the Esplanade, the Court-house, the Government offices, Post-office, &c., and which will supersede the present wooden structure, is progressing very slowly, and will take six months to complete. The bridge is too heavy and too costly by far; a very suitable one might have been erected for 50,000 dols., instead of 150,000 dols., and would have been completed by this time. This is an undertaking of the municipal authorities.

The scheme for connecting the town with the docks, wharves, &c., at New Harbour, a distance of some six miles by rail, is still agitated, but the owners of the nearest wharves are opposed, as it deprives them of the advantage over their far-off competitors. This isolated interest, however, cannot overcome the greater portion of the mercantile people, backed by the Government and the public generally, to whom it would be an immense boon. Passengers and their friends passing to and fro find the journey by gharry a very fatiguing, dusty, and expensive ride. The great utility of the rail will be in the transport of goods to and from ships, a process that at present often occupies three days. It will not be very long, however, before we have the iron horse snorting, not only from this to New Harbour, but to the extremity of the island, and on to Johore, Malacca, &c. The Maharajah of Johore is quite sanguine on the subject. The telegraph wires erected by Mr. Fisher from the square to three stations in New Harbour continue in good working order.

There is a neglected "tagrag-and-bobtail" sort of appearance in all parts of the town, which sadly requires, as the Americans say, "straightening out." The surroundings of the Town Hall, Court House, and Government offices (a batch of public buildings lying close together) are in a most miserable condition. The Esplanade along the beach is in a wretched condition, and a few seats should be placed about it. The canal is in a most offensive condition, the effluvia at low water being horrible; the work of cleaning and laying a granite bottom to this foul ditch is a work which Governor Ord should have undertaken long ago. The open drains which run along the native dwellings are also a disgrace to any English settlement. The police offices, gaols, hospitals, &c., are, however, in excellent order. The Convict Jail, accommodating 2,000 inmates, is a credit to those in charge. The Chinese Hospital, called the Tak Seng Hospital, requires a different organisation; those in attendance have not a fair chance of keeping the establishment it decent order. Its present mode of working is not suitable; Chinese should be employed as dressers and attendants, and in all posts but those of the superior medical officers.

Digitized by Google

Hotels in Singapore do not shine; there are some half dozen, but, with the exception of the Clarendon, kept by Mr. Emerson, which is very clean and well managed, there is hardly a comfortable hotel in the place.

The Sailors' Home, under the superintendence of Mr. Moyle and a committee of Government officers and merchants, is a very well managed institution; a good building, accommodating thirty officers and 170 men, at 1 dol. 50c. each per diem. The Raffles Institute, under the management of Mr. Bayley and Mrs. Boyd, maintains its utility for educating children of any age and any parentage. The number of boys at present under Mr. Bayley is thirty-three boarders and 350 day scholars, most of whom pay 6 dols. as boarders, and half to one dollar for day, the number entirely supported by the Institute numbering from fifteen to twenty. In the girls' school there are sixty-nine boarders and day scholars, about twelve at the expense of the institution. Both schools are conducted under one fine building on the Beach-road, fronting the sea. The effect of this English education on the natives ought to be a powerful element for good over all the Eastern seas, and the same thing is going on in China and Japan. What will it produce a century hence? Any one who has £100 to spare could not do better than bestow it here.

The storekeepers in Singapore have largely increased in number during the past few years, and now include several German and Chinese firms. The old established store of John Little and Co. has kept pace with the times in the extension of the premises and the reduction of prices, and it is no longer necessary for travellers to burden themselves with large stocks of clothing, &c., for everything can be bought at Little's as good, and in many cases as cheap, as at home. The truth is that the 30 to 50 per cent. which the shopkeepers at home put on their wholesale prices more than covers cost of transit here, and a stranger who is not on the "inside track" is truly astonished at the nearness of prices to the English shopkeepers. At Little's the *London and China Express* and other home papers can be obtained.

The accommodation for docking and discharging ships in the new harbour is somewhat too extensive for the pockets of the various shareholders. The competition is very keen, and large vessels have been docked (towed in and out) for 50 to 75 dols., and, according to appearances, the dock managers will shortly have to throw in a champagne lunch to the captains to secure them. This is very disastrous in a climate like this, where people as a rule come to make dollars. The chief competitors are Mr. Smith, the manager of the Tanjong Pagar Dock, and Mr. Cloughton, of the Patent Slip and Dock Company. The other dock of Messrs. Buyers and Robb looks out for paying work. The docks and works are of the first class, capable of taking in any vessel and performing any repairs to either the hull or machinery.

In 1870 the Straits Settlements will be shorn of its convict labour, unless the Home Government make a move in the matter, and induce the Indian Government to resume their system of transportation. The number is now about 3,000, and the time of nine-tenths of them expires next year. Their labour is very useful, and having the necessary accommodation in working order, the loss to the Straits for Government works, &c., will be very much felt, as the Klings will not work so well as Malays voluntarily, and Chinese can find better and more lucrative employment than Government work on roads, &c. Earl Granville should see to this before it is too late.

The Governor has returned from Penang, after completing the preliminary arrangements for adding some islands called the Dindings to the Straits Settlements, under the British flag. It is believed they will prove a source of revenue, and increase the production of sugar. It is the intention of Sir Harry Ord to visit Java as soon as possible, and amongst other matters it is to be hoped that he will endeavour to settle the old standing grievance of the Penang people anent the interference of the Dutch with the native growers in Sumatra.

The Austrian expedition, consisting of the frigates *Donau* and *Friedrich*, sailed on the 22nd for Bangkok, under the command of Admiral and Plenipotentiary Petz (the hero of Lissa). Dr. von Scherzer, the chief director (of *Novara* fame), and Baron Herbert, who have been in Singapore some six weeks, proceeded in the *Donau*. It is expected that the treaty negotiations at Bangkok will occupy several weeks; from thence Saigon will be visited *en route* to China and Japan. There has been much comment on the reception of the Austrian Admiral by Governor Ord. On his arrival the Admiral, with his A.D.C., called on the Governor; the call was returned by the Governor's A.D.C., and an invitation sent to dine at Government House. The gallant Admiral feeling much hurt at this treatment, excused himself, and sent only his A.D.C., which may be looked on rather in the light of "diamond cut diamond." Why the Governor should adopt such a course towards a Plenipotentiary who had been specially recommended to the good offices of all our officials in the Far East by the Foreign-office is a mystery which, perhaps, the Government at home will think proper to ask an explanation of.

The admiral and officers of both ships, and the captain and officers of the North German frigate *Medusa*, were entertained at a ball given by the German community at their club, the Teutonia. In consequence of the national character which it was desired to give to the affair, the invitations could not be extended to the whole of the community usually invited on such occasions, which gave cause for considerable growling on the part of the British bachelors, who declare they will be revenged by leaving the German bachelors out in the cold at the next ball. There is always some dissatisfaction at these affairs, and the managers never can please every one. However, the affair was a thorough success. The ladies numbered forty-four, including Lady Maxwell and daughters (the Governor and Lady Ord of course were not invited after the slight to the Admiral), and the gentlemen about a hundred and fifty. The band of the Austrians was an immense acquisition, as Singapore balls generally suffer for the want of good music. A supper was served at twelve, and dancing did not cease until three, everything passing off most satisfactorily and highly creditably to the German Club.

The races commence to-morrow with the Governor's Cup, value 25 guineas; the Roadster's Cup, value 100 dols.; the Hack Pony Race; the Confucius Cup, value 250 dols., presented by the Chinese merchants.

The second day, 30th, Club Cup, 200 dols.; The Cup, 100 dols.; the Johore Plate, 150 dols., by the Maharajah; the Winner's Handicap; the *London and China Express* Cup, 100 dols., by the proprietors. On this last cup the *Straits Times* has the following:—"Our readers will doubtless have noticed a handsome addition to "the programme of the coming races in the shape of a *London and* "*China Express* Cup, value 100 dols., presented by the spirited pro- "prietors of that well-known and favourite journal. This courteous "act, unprecedented as it is, will not decrease the popularity of *The* "*London and China Express* in the Straits, and we feel sure that "our sporting friends will fully appreciate the kindly spirit which "has actuated Mr. Angier in contributing his mite, as a passing "visitor in name of his paper, towards the amusement of the resi- "dents in this benighted colony, and towards the support of "genuine sport, harmless in itself as conducted here, and deserv- "ing of the approval of the whole community."

The gas works continue to be worked in the most satisfactory manner, under the management of Mr. Wells, who has now been seven years in charge. The consumption is now up to close on the producing power with one gas-holder, and sometimes overruns, but there is not sufficient demand for two. The total number of lights is now about 7,000, including public lights. The charge for private lights is 3 dols. per 1,000 feet, while at Hong Kong it is 4.50 dols., labour and general expenses being cheaper here. The Australian coal is chiefly used, and answers better than any other (cost compared); a cargo from England now landing being miserably small stuff. The whole of the works are in excellent order, the premises, &c., clean, and general discipline. The company have been fortunate in securing such a manager.

The ice-making machine, originally imported by Dr. Scott (now in San Francisco), is at present in the hands of Messrs. Riley, Hargreaves and Co., engineers, &c., on a monthly rental of 180 dols., which yields the shareholders who subscribed to Dr. Scott's company a very small per centage. The machine is constantly out of order, not really being constructed for an ice-making machine. When in good order it can produce about 22 cwt. per diem. The daily average demand is about 8 cwt. When the present contract is out the company must either remodel or sell out, in order to place the undertaking on a satisfactory footing.

The Horticultural Gardens and the Leveson Lake continue to be a great source of enjoyment, and the promoters will ever command the thanks of successive residents. The boat propelled by a small engine worked by hand, presented by Mr. Stuart, the overseer of the convict jail, has been shorn of her engine and oars substituted, to the annoyance of many persons. It is to be hoped that the committee will as soon as possible place some seats in different spots, and when some liberal and wealthy visitor to Singapore wishes to leave a mark of his appreciation of Singapore, a pair of gates would be a great acquisition to the gardens.

A curious case, arising out of the late fire which consumed the Oriental Bank premises, the office of the *Straits Times*, and some Chinese property, is likely to come before the Court. Mr. Dunlop, the managing partner of Madame Fraser and Co., representing several fire companies, had information which induced him to lay a charge of arson against the Chinese, and he offered a reward for information establishing the same. A Chinese came forward, who swore that he had seen the implements of destruction arranged, and the match applied. The evidence seemed so conclusive that he was promised the reward of 100 dols. The Chinese in this extremity set their wits to work, and actually induced this same man to swear that all he had said before was manufactured, and he had been paid for it. On this a criminal information was filed against Mr. Dunlop for a conspiracy, and he is bound over to appear for trial. Mr. Dunlop represents the Phœnix and Home and Colonial offices of London, and some Foreign ones.

The screw steamer *Flying Scud*, 105 tons, consigned to Hamilton, Gray, and Co., has arrived from Australia for sale, but is not likely to find a purchaser, and will go on to China. The Dutch steamer *De Hoop*, of about 200 tons and 30-horse power, is also in the market, and reported sold to Messrs. Wilton and Co.

The last French mail arrived on the 19th, the due date, with advices from London to the 18th March. There is every prospect of this line now working with regularity, the captains having strict orders to adhere to the schedule time.

The eight English miners sent out for the Labuan coal mines, per *Agamemnon*, have been sent forward by the company's steamer *Vine*.

Mr. C. Sturzenegger, of the firm of Messrs. Rautenberg,

Digitized by Google

Schmidt and Co., has been appointed Acting Consul for Austria, in the place of Mr. Conighi, who goes to Europe by the present mail.

The last mail steamer took away the remaining portion of the 8th M.N.I. (about 250), leaving only the wing of the 75th Regiment (about 450 strong) and the Artillery, who cannot perform the guard duties performed by the native troops, and indeed are a mere show for the £59,000 per annum paid by the colony. This military question is in a very unsatisfactory state, but arrangements are in progress more suitable to the requirements of the Straits Settlements. Certainly for £59,000 there should be a force fully equal to all guard duties usually performed by the military.

News has been received by telegram of the abandonment of the "Direct English, Indian, and Australian Telegraph," on the ground that "Varley's" cable would not answer. The scheme was looked on with much favour here, as likely to outstrip all other more cumbrous and expensive plans.

Yesterday afternoon the occupants of the Square were astonished at an encounter between Mr. Atchison (a barrister, and a writer on the *Straits Observer*) and Mr. Cameron, the editor of the *Straits Times*. As already noticed above, the *Observer* had a slashing and personal article on Mr. Cameron, at which he took great offence. At the corner of the building occupied by the Chartered Bank, it appears, Mr. Cameron met Mr. Atchison, and demanded if he wrote the article in question, to which Mr. Atchison replied that he should not answer; whereupon Mr. Cameron struck him across the neck with a whip, which inflicted a wound drawing blood. A scuffle ensued, in which blows were exchanged, watches smashed, and coats torn. The combatants were separated by Mr. Buyers, who was passing. The *Observer* article was extremely strong, but not of a nature to justify Mr. Cameron in resenting it in that manner. His proper weapon was the *pen*, not the whip, and his conduct is generally condemned. It is not the business of editors to chastise each other.

Mr. Fisher, who has for some time been distilling by machinery the various grasses grown here, including lemon grass, citronella, patchouli, sandalwood, nutmeg, and ourum, is now trying the growth of tobacco and indigo. He has lately added the packing of pine apples in tin cases for export to London, &c., both with and without sugar. By this process a pine can be laid down at about 4d. The distilling works are not at present in full working, as prices for all these oils are very low at home; they are capable of producing 1,764 oz. per diem. They have already obtained prizes at the Paris Exhibition of 1867, and the Nagpore and Agra Exhibition.

In addition to the Dock enterprise, Singapore boasts of a Coir Rope Company, under the auspices of Dr. Little. The refuse of the cocoa-nut is worked up by machinery specially imported for the purpose. This rope is laid up in first-rate style, and only requires to be more generally known amongst shipowners and captains. The cost of this rope is about 6 dols. to 7 dols. per picul, and the agent in London is Mr. John Little, Cannon-street.

## JOHORE.

(FROM OUR SPECIAL CORRESPONDENT.)

On the 22nd I went over to Johore at the invite of the Maharajah. It is fourteen miles from Singapore, and the crossing by water about two miles. He provided carriage and boat, gave a tiffin, &c. The Rajah's dominion is about 200 by 100 miles, and the river intersections consist of the Johore river, a fine stream, navigable for large vessels some fifty miles up, and numerous smaller ones, perhaps over fifty in all. The population is largely increasing, and is now computed at 50,000 Chinese, 30,000 Malays, &c. The cultivation of gambier, pepper, &c., is yearly increasing, and a coffeee state has lately been added to the other productions, the plants looking very promising; if it succeeds it will be a very valuable addition to the revenue of the Maharajah. The estates are mostly let out at an annual ground rent to Chinese, who work it on their account. The great desideratum in the development of the country is roads; this seems to be appreciated by the Maharajah, who is cutting them as fast as possible. The house at present occupied by him is rather small, but a new one is in progress on a good commanding site. The Maharajah has several brothers, who take part in the administration of Government, which is administered more on the European model than on the Oriental; for there is a Court-house and a Council, to deliberate on general matters, in addition to a police-court, and a school for English learning. The Maharajah has an establishment in Singapore, on which side he usually resided; but he now sees the necessity of residing at Johore, to be more amongst his people, like other Eastern potentates. The Maharajah's late visit to Europe has evidently given him a more intelligent view of his duties as a ruler, and already he talks of railways, connecting his territory with that of the British authorities. His net revenue is now about £10,000 per annum; but in a few years there is every prospect of its being doubled or trebled.

One of the mountains in Johore is about 2,100 feet elevation, and the distance from Singapore is about thirty miles. There is some talk of forming a sanitarium on it for the residents of Singapore; roads are now being pushed forward to the base, and the scheme is very likely to be carried out in time.

On the water side (with a depth of some twenty-five feet, and wharves for loading vessels) stand the Johore Steam Saw Mills, erected by Messrs. Paterson, Simons, and Co., in conjunction with the Maharajah and Mr. Meldrum, the manager. There are two mills, with engines of considerable power, and when fully running about 400 labourers are employed, the Europeans comprising four or five. The whole of the works are in a very creditable state. The principal employment is cutting railway sleepers for the supply of the Indian railways; any description of cutting, however, for house building is done. About twelve ship loads were sold last year. At the present the demand is slack, and only one mill is working. The works also include a small foundry, and many additions have been made to the working appliances. It is a satisfactory thing to note that the proprietors have not left the *employés* without the means of Sunday improvement, for a neat little chapel stands on the hill. In the event of railways being introduced into the Straits, the Johore saw mills would be largely benefited. The wood is pronounced of the best sort for railway purposes.

## JAVA.

—o—

### BATAVIA.

The cause of the recent disturbances in the vicinity of Batavia is still involved in some degree of mystery. We hope however to have some reliable information shortly from our special correspondent, who is visiting Java.

The *Batavia Handelsblad* of the 20th April observes:—"We think ourselves fortunate in being able to state that the movement in Bekassie, and Depok has been wholly suppressed, and it now sufficiently appears that it was nothing else than a tumult of evil disposed persons. Probably a personal exercise of vengeance on a certain Baba Beiran, a Chinese landowner converted to Islamism; so far about 200 persons have been arrested.

The result of the examinations into this partially dark affair is waited with interest. Rumours which were current of an extensive conspiracy, and which seem to have had their chief ground in the circumstance that one of the ringleaders had given himself out to the credulous natives as being Raden Paleh, the Javanese artist, so well known in Europe, have proved to be quite unfounded. The losses of the Chinaman, Baba Beiran, from the firing of his premises by the rioters, amount to upwards of 300,000f. Besides his buildings and paddy stores, a number of valuables in gold and precious stones, and a sum of 50,000f. in cash, became a prey to the flames. He saved his life by a timely retreat and concealment. The attack on Depok, which it appears had been fully planned and determined upon by the rioters, was prevented by the prompt action of the Resident of Batavia, who arrived just in the nick of time, with a body of military. All the able-bodied depokers had assembled, well armed, and had passed the night in the church and school, fully determined to fight to the last in *pro aris et focis* repelling the rioters.

"A very interesting letter from J. Beukhof, the teacher at Depok, appears in the *N. B. Handelsblad*, from which it appears that the danger was imminent and the rebels close to the place. Amongst the other prisoners is the native who gave the fatal thrust to Mr. de Kuypers—a very ill-favoured fellow, fifty-five years of age, who by his own confession had no grievance whatever against Mr. de Kuypers. A native is also among them named Bapa Joenda, who was the acknowledged head and leader of the rebels, who directed their movements, and whose commands were obeyed by them and other natives implicitly. He wanted to deny that he was the man, but as the prisoners were being conveyed along the roads, a passenger in a cart hailed him as Bapa Joenda, to whom he replied, and thus betrayed himself. The well-disposed natives in the Campongs appear to be communicative on the subject; and no doubt the really guilty will be brought to light, and their punishment act as a warning to other would-be banditti and plunderers who only want a chance."

The Batavia papers strongly recommend horse, or cavalry police as being more effective and prompt in operation than mere foot police prove to be on an emergency. The cavalry, it appears, did excellent service as patrols or rangers, through the disturbed districts, and prevented some intended burnings and plunderings from taking place.

## REUTER'S TELEGRAMS.

—o—

### (RECEIVED VIA GALLE, JUNE 3.)

### CHINA.

HONG KONG, May 11.—Accounts received here of the fracas at Peking, state that it originated in the French Chargé d'Affaires, Count de Rochechouart, having jostled against a chair containing a brother of Prince Kung. The Prince struck the Chargé d'Affaires across the face, and, an apology having been demanded and refused, the French tricolour was hauled down. The other Foreign Ministers had taken up the matter, and had given the Chinese Government three days to apologise. Another account says that the Chargé d'Affaires' pony ran into a chair containing the brother of Prince Kung, and that the Prince's outrider struck the blow, but whether he aimed at Count de Rochechouart, or at a member of his suite, is said to be uncertain.

### JAPAN.

HONG KONG, May 11.—Intelligence received here from Japan states that a powerful naval force is being moved by the Mikado's Government against the rebels, who occupy Hakodadi. It is asserted that the latter are supported by French officers. The Mikado is expected to reside at Yedo.

## SHIPPING POSTSCRIPT.

—o—

ARRIVALS NOT IN THE TABLES.—June 2, at Liverpool, from Rangoon, Cora Linn; May 27, at Gibraltar, from Sumatra, for Marseilles, Sumatra; —at Queenstown, from Hong Kong, Sarah Nicholson; June 3, at London, from Colombo, Frances, Ocean Beauty; in the Downs, from China, Lauderdale; 4, at Deal, from Singapore, Zodiac; —, off the Start, from China and New York, Sir Wm. Wallace; 3, at Glasgow, from Maulmain, Bruce, Queen of Scots; off Queenstown, from Rangoon, for Liverpool, Inkerman; 4, in the Downs, from China and New York, Glenaros.

DEPARTURES.—June 2, from Liverpool, for Manila, Victoria; May 25, from Cardiff, for Manila, Cosmopolitan; 31, from Glasgow, for Singapore, Roslin Castle; for Yokohama, Diana; June 4, from London, for Cardiff and Galle, Lloyds; 3, from Liverpool, for Manila, Doriga.

LAID ON.—At London, for Shanghai, Lammermuir; for Colombo, Fort Regent; at Liverpool, for Buenos Ayres and China, Surprise; at Glasgow, for Penang, James Paton; at London, for Shanghai, Omba.

SPOKEN.—Australia (Dutch barq.), Batavia to Amsterdam, May 10, 25 N., 40 W.; Frederick, Saigon to Falmouth, March 28, 30 S., 43 E.; Tropic, Singapore to London, April 2, 32 S., 31 E.; Fair Leader, Canton to London, April 20, 18 S., 3 E.; Kate Carnie, Singapore to Lynn (?), March 4, off Java Head; Sevilla (Germ. barq.), Batavia to Rotterdam, March 6, 10 S., 101 E.; Lord Riverdale (Amer. barq.) Shanghai to New York, March 17, 22 S., 67 E.; Magnet, Hong Kong to New York, March 30, 31 S., 37 E.; Khimjee Oodowjee (barq.), Liverpool to Singapore, May 24, 23 N., 44 W.; Anna (Dut. ship), Rotterdam to Batavia, May 1, 3 N., 22 W.; Kortenaar (Dut. ship), Rotterdam to Batavia, April 21, 12 S., 29 W.; Peter (Dut. barq.), Cardiff to Hong Kong, April 21, 12 S., 29 W.; Mary Scott (barq.), Liverpool (?) to Sumatra, Jan. 18, 40 N., 20 W.; Torro, Liverpool (?) to Singapore, Jan. 31, 24 N., 24 W.; Southern Belle, Liverpool to Yokohama, April 22, 7 S., 29 W.; Wigerdina (?) (N. Ger. ship), Java to Falmouth, March 27, 29 S., 45 E.; Star of India, Cardiff to Japan, April 13, 39 S., 46 W.; Peterborough, China to London, May 19, 39 N., 38 W.; Flora, London (?) to Singapore, April 25, 1 N., 32 W.

CASUALTIES.—The Mutlah, Ballard, from Manila, for Boston, which arrived at Mauritius, May 3, had experienced bad weather in the Straits of Sunda, from 1 to 8 April, during which she sprung foremast and topsail yards.

MISCELLANEOUS.—May 3, Mutlah, Ballard, from Manila, for Boston; April 18, Westward Ho, Kirk, sailed for Singapore.

## BIRTHS, MARRIAGES, AND DEATHS.

—o—

### BIRTHS.

CAMPBELL—At 93, Cornwall road, Westbourne-park, the wife of George W. R. Campbell, Inspector-General of Police, Ceylon, of a daughter.

CHALDECOTT—On the 26th May, at Beomond, Chertsey, the wife of T. A. Chaldecott, M.D., late of Hong Kong, of a son.

EHLERS—On the 31st May, at Arundel Cottage, Tulse Hill, S.W., Mrs. Paul Ehlers, of a son.

GALTON—On the 26th May, at Brockwell, Dulwich, the wife of W. P. Galton, Esq., of Foo-chow-foo, China, of a daughter.

LAY—On the 25th May, at 89, Gloucester-terrace, Hyde Park, the wife of H. N. Lay, Esq., C.B., of a son.

MEDHURST—On the 7th April, at Shanghai, the wife of Walter Henry Medhurst, Esq., H.B.M.'s Consul, of a son.

WEST—On the 6th June, at West Grove, Woodford, the wife of Mr. James West, late of China, of a daughter.

### MARRIAGES.

SCOTT—HARDY.—On the 21st April, at the Wesleyan Chapel, Point de Galle, by the Rev. G. Baugh, the Rev. John Scott, Chairman of the Wesleyan Mission, South Ceylon, to Emily Ann, eldest daughter of the late Rev. Robert Spence Hardy.

### DEATHS.

BEDWELL—On the 18th May, at East Moulsey, Maria Jeannette, widow of the late Frederick Bedwell, Esq., of the Record and Will Clerk's Office, aged 56.

BRODERSEN—On the 19th May, at Altona, Charles Brodersen, Esq., late of China.

## THE WILL OF DOUGLAS LAPRAIK, ESQ.

The will of the late Mr. D. Lapraik has been proved, and the following outline of its provisions will probably possess some interest for readers connected with Hong Kong. The personalty was sworn under £20,000; but as much of the property is in land and buildings, this conveys no adequate idea of its total value. The executors, who are also appointed trustees, are—Mr. William Lane, of Highbury; Mr. W. Mauger, of Piccadilly; Mr. Robert E. Baker, of Hong Kong; and Mr. John S. Lapraik, of Hong Kong. The testator leaves his house at Acton ("The Oaks"), with its furniture, plate, carriages, horses, and all its contents and appurtenances, with the freehold property attached to it, to his wife absolutely; and a sum of £2,000 in addition. There are fifteen or twenty other legacies, chiefly of small sums, the principal ones being—to Mrs. Mauger, £500; her eldest daughter, £500; her three younger daughters, £100 each; her son, Douglas Mauger, £200; Mr. Thomas Lane, £100. After these bequests, all the rest of the estate is vested in the trustees, who are to pay out of it an annuity of £800 per annum to Mrs. Lapraik, and one of £500 per annum to Mrs. Baker, the niece of the testator, the residue being left to his nephew, Mr. John S. Lapraik. One clause provides that, in the event of Mr. John Lapraik not surviving the testator, the residue of his estate, after satisfying the specia bequests above enumerated, should be distributed in the same manner as if no will had existed. Mr. John Lapraik having survived his uncle, this clause is of course inoperative.

## THE PACIFIC RAILWAYS.

The following comments on the practical utility of the railways across America are from the *New York Times*:—

The enthusiasm in respect to the Pacific Railroad has undoubtedly entered into the excitement in real estate on this island. Many expect lines of marble palaces in our streets, built up by the profits of new trade with the Orient, and that New York is to become a kind of Venice in connecting the products of the Indies with Europe. Chicago has caught the enthusiasm, and is awaiting a new prosperity, as the centre of the carrying trade in teas, silks, rice, and all the most profitable products of China and Japan, on their way to New York and London. "The way to the Indies" is said to be already posted up as an inscription somewhere on the Pacific road. We regret to say that cool reason characterises these expectations as mere dreams of hope. The cool and shrewd business men engaged in Oriental trade doubt if it will ever pay to forward teas from San Francisco overland to New York, except, possibly, a single first cargo of some exceptional article. The freights will be too high. Already it costs as much to send teas by rail from New York to Chicago as by water from Hong Kong to New York. Moreover, the time now from China to England by canal and steamer, on the old route, is somewhat less than by rail and steamer on the new American one. Japan alone is brought nearer to Europe. The Pacific roads, with 3,600 miles of travel, can never deliver with profit any California or Oriental freights on this coast, except such as are very light and costly, such as silks or light manufactures. And even with these they must compete with the water freights of the Pacific Mail, which will only be a fortnight longer in time. Land transportation can seldom compete successfully with water. Undoubtedly, Oriental travel will take this route, at least for half its journey; but Oriental trade with this coast and Europe will be more likely to take the Isthmus or the old routes. The Pacific Road will feed and clothe the interior of the Continent; it will pour an increasing stream of pleasure seekers, business travellers, and emigrants from one coast to the other; it will build up Colorado, Montana, and Nevada, and supply California with cheap labour; but as a link between the far Orient and the Atlantic Coast or Europe, we are persuaded its importance has been much exaggerated.

THE ORDER OF THE BATH.—A supplement to the *London Gazette* states that the Queen has been graciously pleased, on the occasion of the celebration of her Majesty's fiftieth birthday, to give orders for a number of promotions in and appointments to the most Honourable Order of the Bath. Among those we notice that Vice-Admiral Kuper, K.C.B., who recently commanded the China fleet, is promoted to be a G.C.B.; and Vice-Admiral Henry Kellett, C.B., who is spoken of as the probable successor of Sir Henry Keppell, becomes a K.C.B. The *Gazette* also notifies the appointment of Henry Turner Irving, Esq., to be Colonial Secretary for Ceylon.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

*LONDON, MONDAY, JUNE 7.*

## THE STRAITS SETTLEMENTS.

WHEN any particular cause is to be advocated before the Minister responsible for one of the chief departments of the State, a deputation, consisting of a select number of influential persons who are well informed on the question at issue, is probably the best method that can be chosen. But a Minister who receives such a deputation, and listens to several addresses from gentlemen who each handle the subject perhaps in a different way, cannot be blamed if his impressions regarding some of the facts sought to be impressed on him are rather confused, although of course he retains a fair general idea of the whole. The Straits Settlements Association, remembering this, and being anxious that no single feature of their case should be overlooked or misunderstood, have forwarded to Earl GRANVILLE a "memorandum," in which the arguments already presented verbally for his lordship's consideration are recapitulated with admirable conciseness and lucidness. To this document, which we reproduce in another column, no official reply has been received, and perhaps none is needed; but the members of the Association have the satisfaction of knowing that no effort has been wanting on their part to secure a favourable result. It is a great pity that we cannot say the same of a kindred institution—the Hong Kong Association of London, which has of late exhibited no signs of vitality. Mr. P. F. TIDMAN has been appointed honorary secretary to the Straits Association in London, and we understand intends to endeavour, by maintaining a regular correspondence with the local association at Singapore, to establish a complete accord between the two communities. The merchants and others resident in the colony are apparently those most immediately interested in its prosperity and well-being, but those who form and support the London association are in no degree less so—indeed, the latter consist mostly of heads of firms who represent the capital by which the Straits trade is sustained, and from this fact, and their long experience of Straits affairs under the old *régime* as well as the new, are the most natural and fitting exponents on this side of public opinion in the Straits. The necessity of perfect accord between the two bodies is therefore clear. At the last meeting, whereat Mr. TIDMAN accepted the post of secretary, a letter was read from the Right Hon. E. HORSMAN, M.P., announcing his acceptance of the Presidentship of the Association, *vice* the late J. CRAWFORD, Esq. Mr. HORSMAN'S energetic disposition and great mental activity, together with his position as an independent member of the House of Commons, will render him a most valuable ally.

Some remarks that recently appeared in the *Straits Times*, a portion of which were quoted in our last issue, would seem to indicate that public opinion, hitherto so strong in its opposition to Governor ORD'S administration, was in some degree wavering. The tenour of our own information, however, is directly in opposition to this idea. Mr. NAPIER'S letter to the COLONIAL SECRETARY, of the 12th March, seems to have been misunderstood in some quarters, more especially that part of it relating to the expenditure on the new Government-house. Although the memorial in question prayed for some check on the excessive expenditure that was draining the resources of the colony, and adduced the outlay on this building as an instance of prodigality, it was never contemplated to ask for a suspension of the work; indeed, nothing could be more distasteful to the Association than to see it left unfinished, to be pointed at by future generations of colonists as a memorial of the folly of the present one. All will agree that the house should be finished, and finished handsomely; but although a mansion is needed, a palace is not, and the association would not willingly sanction a large outlay on profuse internal decoration, only justified on the pretext of the Duke of EDINBURGH'S flying visit. We regret to see that the *Straits Times* speaks somewhat slightingly of the chief opponents of the present system of Government, as "agitators," whose occupation would be gone if that system were abolished. This is hardly fair to a body of gentlemen who are actuated in their arduous task not only by a proper regard for their own interests, but by a sincere desire to promote the welfare of the colonists at large. We deeply regret also the intemperate writing with which the *Straits Observer* seeks to advocate the cause of the reformers. The arguments in favour of reform are so clear, and the facts on which they are based so patent, that anything like vehement writing is altogether unnecessary. Angry words are generally characteristic of a losing cause, and therefore are quite out of place here; besides, even a winning cause is endangered when its advocates descend to bitter personalities. So we recommend our friends in the Straits to be content with ventilating, in that temperate language that always carries the greatest weight, the wrongs for which they seek redress; fearlessly entrusting to the Association in London the task its members are so well qualified to perform, of representing their desires in the proper quarter at home.

The position of the Chief Justice with reference to the Governor seems likely to be the most difficult point to deal with, although it presents such a glaring injustice. Compare it, for instance, with the case of the Mayor of CORK. Here is a tradesman who, by reason of his wealth—no matter how accumulated, or his influence, no matter how obtained—gets himself made an alderman, and in due course is elected Mayor, in virtue of which office he becomes chief magistrate of the city. He may abuse and disgrace that office in every possible way, yet neither the LORD LIEUTENANT nor the Supreme Government has power to dismiss him until an Act of Parliament is passed specially to disqualify him! A colonial judge, on the other hand—necessarily a man of high standing in an honourable profession, nominated by the Government on account of his especial fitness for the post—may be removed or suspended at the caprice of the local Governor! being thus placed in a worse position than the man who becomes temporarily, and almost accidentally, a magistrate by the votes of a few dozen tradesmen. The position is as humiliating as it is anomalous.

Let us conclude these remarks with a suggestion. Why should there not be an Association permanently established in London to advocate the interests of all our Eastern colonies and Settlements? We have a Ceylon League, a Straits Settlements Association, and a Hong Kong Association, all working for the good of the various colonies they represent, and in many cases with objects in common. There was some talk of affiliating one or more of these to the newly-founded "Colonial Society," but that institution is more likely to be occupied with questions of emigration, culture, &c., connected with our larger possessions in Canada and Australia, and among these the affairs of small Eastern settlements would be lost sight of altogether. But a combination, including all the latter, under some such title as the "Oriental Colonial Society," with a standing committee to deal with each separate colony and correspond with local associations, would, we think, be better calculated to attain stability and permanent influence than a number of minor societies possessing no bond of union.

---

THE subject of "Our Relations with China" is not to be entirely neglected by the House of Commons, after all. Colonel SYKES has given notice that on Tuesday, the 29th June, he will call the attention of the House to circumstances connected with the revision of the Treaty of Tientsin, and move for correspondence relating thereto. We earnestly trust that those gentlemen interested in the prosperity of the China trade, who have seats in the House, will not fail to take advantage of this opportunity to obtain a thorough discussion of the policy of the present Cabinet towards China, and its inevitable results—if persevered in.

## THE VICEROY OF EGYPT AND THE SUEZ CANAL.

BEFORE the Viceroy of EGYPT quitted home on his European trip certain new arrangements were entered into between his Highness and M. DE LESSEPS. What these were exactly has not been officially announced, but the following statement comes from a highly respectable source. The company, in the first place, receives an indemnity of thirty millions of francs, and is authorised to sell certain lands which it still holds in participation with the VICEROY. The company gives up its privilege of free importation from the date of the 1st of October, and the Customs service by the canal will be carried on elsewhere in Egypt and under Governmental superintendence. It also renounces the right which it held under the original concession of using the fresh-water canal, and will confine itself exclusively in future to the working of the maritime canal. In return for the abandonment of the above privileges the company is to receive a further indemnity of twenty millions of francs. The company cedes to the VICEROY its warehouses and other constructions at Boulak and Damietta, the hospitals which it has erected and organised, as well as its establishments at the quarries and the port of Mex; the indemnity for these concessions is fixed at ten millions more. Lastly, it is stipulated that the 25,000 acres of land which the company possesses on the banks of the great canal, as well as the 1,250 acres intended for the enlargement of Port Said and Ismalia, shall form the subject of an ulterior arrangement; the whole that can be spared to be sold, and the proceeds divided between the VICEROY and the company.

The total of the indemnities in money mentioned above is sixty millions of francs, or £2,400,000; and in order to facilitate the arrangement it is stipulated that the company shall detach from the shares in possession of the VICEROY as many coupons as shall make up the sum of thirty millions of francs, or half the total indemnity, with interest at the rate of ten per cent. The company is to be congratulated on these arrangements, which have already had the effect of raising the value of its shares, which now stand at 580, and will, it is supposed, enable it to make an issue of debentures, and they moreover do away with some of the objections which rendered the original concession unpalatable abroad. A meeting of the company, ordinary and extraordinary, is announced to be held in Paris on the 2nd of August.

Great preparations are being made, it is said, in Egypt for the reception of the Empress and other Imperial and Royal personages in October next; and amongst other schemes is mentioned the formation of a boulevard to give free access to the Roman Catholic Church of Cairo, which is closely shut in and only approachable by narrow streets, or rather lanes. The Opera-house, which is to open its doors at the same time as the canal, is progressing rapidly, and numbers of artistes are engaged; amongst others, the tenor Naudin, who has already secured apartments at the French Club, on the Esbékieh. Apropos to the subject of the canal and the overland route, it may be mentioned that a respectable Paris journal, in quoting the report from the *Economist*, of a convention entered into for the conveyance of the Indian and China mails by Ostend and Brindisi, says that the arrangement in question is the result of the refusal of the French railway companies to run special trains on the arrival of the steamers from Alexandria at Marseilles. Should nothing intervene to prevent the presence of the Empress EUGENIE, the Emperor of AUSTRIA is confidently expected to attend also. The heir presumptive of the Italian Crown will represent King VICTOR EMMANUEL; the King of PRUSSIA intends to send a member of the Royal family; and it is believed that the Prince of WALES, possibly accompanied by Prince ARTHUR, will represent Queen VICTORIA.

---

WE invite special attention to a letter from our correspondent at Tientsin, which contains an able exposition of the real feelings entertained towards Foreigners by the ruling powers both at Peking and in the provinces. The statements contained in it corroborate much that we have lately written on the same subject.

---

WE hear from St. Petersburg that the Russian Government intends to transport a large number of criminals detained in Siberia to the semi-Japanese isle of Saghalin. It is said that an expedition has already been sent out to make arrangements for their reception.

---

THE *Morning Star*, in a frothy article on the completion of the Pacific Railways, says that "Hong Kong is nearer to England by 5,000 miles than it was before the 10th of May," and that "before long it will be possible for a Londoner to "reach Yokohama, in Japan, within three weeks from his "mounting the deck of a Southampton or Liverpool steam-"ship." Such misstatements as these are ridiculous, and only tend to injure the cause they are designed to serve. The fine powerful vessels built especially for the long passage between San Francisco and Yokohama have not yet succeeded in performing that section of the voyage in three weeks, and under the most favourable circumstances they cannot be expected to do it in less, so that this section of the journey alone swallows up all the time allowed by the writer in the *Star*, without any allowance for the time consumed in travelling from Liverpool to San Francisco, which will practically be as much more. The completion of this direct route is a great fact, and needs no sensational writing to magnify its importance.

---

THE telegram from China given in another column brings corroboration of that previously received, announcing an assault on the person of the French Minister by a high official at Peking. There can no longer be any doubt that at least some indignity has been offered to his Excellency, and that there has been also the usual passive resistance to his just demand for an apology. We offer Mr. BURLINGAME our respectful congratulations on this unlooked-for confirmation of his assertion that "China is extending her arms towards us." Mr. BURLINGAME did not exactly mean, perhaps, that it was for the purpose of slapping our Ministers on the face, but such a trifling discrepancy is of no importance. A Taoutai is allowed with impunity to assault an English Consul in Formosa—why should his superiors not do the same to a Minister at Peking? Perhaps Sir R. ALCOCK'S turn to be beaten will come next, in which case we suppose he will refer the matter to the Home Government, and receive instructions to make an abject apology.

---

A CORRESPONDENT of the *Levant Times*, writing from Alexandria, says:—"One of the most important events I have to report to you is the definitive signature of the contract between the Government of Egypt and a party of English capitalists for the construction of a breakwater at Alexandria. When this work is completed Alexandria will be one of the finest and safest harbours in the world, and the great facilities which will then exist for loading and discharging vessels will probably keep a great portion of the through traffic to India from being diverted to the Suez Canal."

---

IT is a noteworthy fact that Hong Kong Cathedral will be the first religious edifice either in India or any part of the Far East to possess a peal of bells. Many of our readers are doubtless aware that an ex-trustee of the Cathedral, now in this country, is sending out a peal of four bells as a parting gift; the building, being a small one, can swing no more. They are being cast by Messrs. STAINBANK, of Whitechapel, and are nearly ready for shipment.

---

IT seems there is to be no BURLINGAME treaty made here. The concessions made by Lord CLARENDON are (naturally enough) looked upon as sufficient, and in accordance with the spirit of these the Treaty of Tientsin will be revised. We understand that Mr. BURLINGAME expresses himself quite satisfied with the result of his mission as far as this country is concerned, and speaks of his return to London as a matter of choice rather than necessity.

---

## MEMORANDUM NO. 2.

ISSUED BY THE STRAITS SETTLEMENTS ASSOCIATION.

Notwithstanding the representations made to the Right Hon. the Earl Granville by the recent deputation, and the courteous attention with which they were received, it is thought desirable to set forth briefly in this form the grievances complained of, and the suggestions offered for their remedy. These comprise:—

1st. The rapid and alarming growth of expenditure under the administration of the present Governor, Sir H. Ord.

2nd. The subjection of the judicial bench to the local executive.

3rd. The constitution of the Legislative Council, and the restrictions on its official members.

Digitized by Google

4th. The state of extreme dissatisfaction and discontent which has grown up under the present Governor.

1st. It is with the greatest satisfaction that the Association receive his lordship's assurance that this matter is already having his attention, and they will rejoice if their statement of the financial position of the colony should be so far modified by his lordship's prohibition of the useless expenditure on steamers, and a determination to restrict that threatened on Government-house; but the Association would impress upon his lordship's attention the fact that during the past year an amount of £50,000, as shown in the report of the committee, has been spent in excess of the current expenditure under the former Government, and, further, that this sum has been appropriated, not to public works, which were urgently called for, and which the increased revenue would have amply met, but largely upon objects personal to Sir H. Ord and the different members of his Government.

The Association are not unmindful that the unofficial members are to some extent responsible for a portion of the extraordinary expenditure, but would remark on this point that it was the desire of all classes in the colony to meet the new Governor in a spirit of liberality and good will, and they believe that the original vote of 100,000 dols. for Government-house, though large, met general approval, but it was most certainly regarded as a maximum, and no thought was entertained that supplemental votes would be required. It is now felt that the style of residence adopted may entail upon the successors of the present Governor a heavy current expenditure, hitherto unnecessary and unknown.

2nd. The Association disclaim the idea of seeking absolute independence for the Judges of the Supreme Court, but they deem it of the very highest importance that they should be held responsible, not to the local Governor, but to the Colonial-office. It cannot be urged against Colonial Judges that they are, as a class, inferior to Colonial Governors, and from an intimate acquaintance with Asiatic habits and modes of thought the Association are of opinion that natives will never regard with anything but distrust the decisions of judges subject to the control of the local Executive, and who have been deprived of the independence hitherto enjoyed by the Bench in these settlements. As regards the supposed absence of checks on the judicial action, it is submitted that these exist in the colony in daily and weekly newspapers, several members of the English bar practising in the Courts, and a strong and readily expressed public opinion.

3rd. There would appear to have been in his lordship's mind some misapprehension as to the views of the deputation on this point. It is by no means sought to give to the unofficial members a preponderating influence in the Council, although such a state of things exists in both Mauritius and Trinidad. The desire is *to equalise the numbers*, giving the Governor a casting vote, and it is submitted since it is within the power of the Government to ensure a fuller attendance of its members than can be done by a non-official party, the result of such an arrangement as is proposed would be simply to create a strong and healthy opposition in the Council, ensuring a full and open discussion of all questions affecting the colony, and tending to a rigid and economical supervision of the public expenditure.

Regarding the mode to be adopted for equalising the numbers in the Council, it is thought desirable to reduce that of the official rather than to materially increase that of the unofficial members.

The method of appointment to the Council is left with confidence to his lordship. The present plan—*i.e.*, nomination by the Governor—has worked satisfactorily, and the Association see no reason at present to depart from it. The existing system of representation, which, if properly carried out, would insure the presence in Council of the leading professional men, merchants, and planters of the colony, is, in the opinion of the Association, the most just and satisfactory to all classes that can at present be adopted; for the Asiatics, being primarily an industrial population, regard the European residents, whose interests they see to be identical with their own, as their truest friends and most fitting representatives; and though the Association admit that a system theoretically perfect might require the attendance of natives in the Council, they find practical difficulties in the way of this, there being but few who are naturalised British subjects, and eligible from their social position, and of these but one or two are sufficiently conversant with the English language to make their services anything but formal. The Association must gravely demur to his lordship's view that the Asiatic portion of the community are fairly represented by Government officials, and believe that fuller inquiries will alter his opinion on this point.

It is satisfactory to the Association to learn that only on important Government measures, or under instructions from home, are the official members of the Legislature bound to vote under the direction of the Governor, and it is very respectfully submitted that his lordship's view of their duty should be publicly made known, looking to the stringent and authoritative language of his Grace the Duke of Buckingham in his despatch on this subject to the Governor of Hong Kong in 1868, and to the not less pointed language of his Grace in his despatch of 17th August, 1868, to the officer administrating the general government of the Windward and Leeward Islands.

4th. It can hardly be matter of surprise if the existing state of affairs in the colony has evoked a spirit of grave dissatisfaction, and a feeling that the present Governor has failed in any degree to identify himself with the real interests of the Settlement. An arrogant bearing, and studied disregard of the public convenience and wishes are charged against him and the Lieutenant-Governor of Penang (Colonel Anson), and appear to have lent force to the grievances in the system of government already complained of, and changed a community hitherto remarkable in the East for its unity and good feeling, into one seriously discontented and alarmed. The existence of this state of feeling will perhaps be best exemplified by the extracts which are appended from the local press, confirmed, as the Association regret to find it is, by the general tone of the private communications from the colony.

## THE P. AND O. STEAM NAVIGATION COMPANY.

The fifty seventh half-yearly report of the directors of the P. and O. Company has been issued, in anticipation of the meeting to be held on the 11th instant. We extract the most important passages:—

### THE COMPANY'S FLEET.

The *Ellora*, *Baroda*, and *Behar* have received their new boilers, and are performing satisfactorily on their regular lines. The fitting of new boilers to the *Madras* and *Delhi* was not found to be immediately necessary after a survey of the former vessel at Bombay, and the latter at Southampton. The *Bombay* has been withdrawn from the Australian service for the purpose of receiving new boilers, which are now being supplied to her. The *Travancore* made an excellent voyage of fifty-seven days, from Southampton to Bombay, and is now running on the China station. The *Deccan* was despatched to Calcutta, *via* the Cape, in January, and made the run out in sixty-two days. She has already taken up her work on the Suez line, and delivered the mail which reached that place on the 21st ultimo within the contract time. The new ship *Hindostan*, the contract for which was announced in the half-yearly report of June last, is to be launched by Messrs. Day and Co., at Southampton, on the 12th instant.

In the early part of April the directors invited tenders for the construction of a new steam ship of about 3,000 tons, and 600-horse power. A spirited competition between the leading builders of the North and South was the result, and the lowest offer, that of Messrs. Caird and Co., of Greenock, was accepted. It affords the directors much satisfaction to add to this part of their report that the very extensive operations of the company, which now include the performance of nearly 1,400,000 miles annually, have not been attended by any casualty during the last twelve months.

### THE POSTAL SERVICE.

The requirements of the mail contracts have been fulfilled with almost perfect precision since the date of the last report, and the public have experienced the advantage of as much regularity in the delivery of the mails to and from India, China, Japan and Australia, as is attained on the shortest postal routes, no instance of the arrival of the mails in London later than the Monday of each week having occurred. A modification of the mail service with Japan has recently been introduced by the establishment of a direct line between Hong Kong and Yokohama, instead of the line hitherto maintained between Shanghai and Yokohama. This modification reduces the outward voyage to Japan by two days, and the homeward voyage by five days. The service between Hong Kong and Shanghai is kept up as a separate line.

### ELECTION OF AN AUDITOR.

The resignation by the Earl of Leven and Melville of the office of an auditor of the company has left that post vacant, and it is proposed to hold a special meeting at the close of the ordinary business of the day, for the purpose of appointing a qualified proprietor in his place. A list of candidates for the vacant appointment has been exhibited in the board-room since the 5th inst., and the directors have no doubt the proprietors will think it expedient to make a selection on the opportunity to be presently afforded them.

### OPERATIONS OF THE HALF-YEAR—DIVIDEND.

The result of the operations of the six months is fairly encouraging, as compared with the corresponding period of the previous year. The shipments of silk from China, although compressed within a shorter period than usual, consisted of a somewhat larger number of bales than last year. The export of cotton from Bombay by the company's steamers during the season now about to close also exhibits an increase, while there has been some revival of the remittances of specie to the

Digitized by Google

East. The company's business in these branches, and in its intermediate carrying trade, is now, however, most materially affected by the competition which prevails in almost every quarter, and the directors have been compelled to make concessions in their rates of freight, which tell very sensibly on their total earnings as compared with the extent of operations. On the other hand, there has been a diminution in the cost of coals at some important stations, and the directors trust, by the observance of a rigid economy in all departments, to preserve a reasonable margin between receipt and expenditure.

As regards the first six months of the financial year, they are enabled to recommend the declaration of a dividend of 3 per cent., free of income-tax, for the half-year ending the 31st of March last, and the warrants for this dividend will be payable on and after the 25th inst.

## ORIENTAL LITERATURE IN FRANCE.

The efforts of the Imperial Government to create an interest in matters relating to China, Japan, and Cochin China, are manifested by the constant appearance of publications on the languages, literature, or industries of those countries. M. Charles Lemire has just published a volume on Cochin China*, and the result of seven years' residence in those countries, with hints for those who are about to undertake the journey. It contains good information on the agriculture, industries, commerce, and capabilities of the French colony, with tables of weights and measures; as well as on the habits, manners, and institutions of the natives. M. Léon de Rosny, professor of Japanese, has translated, by order of the Minister of Commerce, the often mentioned Japanese treatise on the management of silkworms.† The failure of the silk crops in France and other companies, will draw the attention of practical men to this work, while the literary and artistic world will be attracted by the beauty of the book; it is printed at the Imperial office, and the chromolithographs are admirable. It contains also a number of *fac similes* of trade and commercial marks, seals, and cursive writing, which may prove of commercial importance. The treatise is not confined to the common silkworm, but contains information respecting all the silk producing worms bred in Southern Asia. M. de Rosny was commissioned by the Government about two years since to study the marks on the silkworm cards arriving from Japan, and the results are given in this work, which is furnished with useful indexes or glossary. The same gentleman is now publishing in the *Revue Orientale* a translation of a Chinese tale, called "A Husband under a Bell."

M. D'Hervey Saint Denys has been appointed joint professor of the modern Chinese language, with the eminent scholar M. Stanislaus Julien, and native assistant professors or teachers are now also attached to the Chinese, Japanese, and Tamoul chairs in the special school of Oriental language.

SILK SUPPLY ASSOCIATION.—On Thursday the second meeting of this association was held, under the chairmanship of Mr. T. Dickens, president of the society. Mr. Maxwell Anketell, of the Industrial Silk Establishment in Alexandria, attended to report the progress recently made under his observation in Egypt. He exhibited cocoons and samples of Japanese silk, the material being valued by Mr. Browett at 35s. per lb. Mr. Cobb, of Natal, also submitted specimens of Japanese cocoons grown in the south of Africa. He stated that, judging from his own experience, great success would follow the cultivation of silk in the colony to which we have referred. It was decided that a deputation should wait on the Viceroy of Egypt on his arrival in England, to thank his Highness for the exertions he was making for the advancement of silk culture in the country over which he exercises rule. It was also resolved that a deputation should wait on the Secretaries of State for India and the Colonies to solicit their assistance for the promotion of silk cultivation.

NEW STEAMERS.—Messrs. Denny Brothers, of Dumbarton, have contracted to build for the Austrian Lloyd's Steam Navigation Company two steamers, to be named the *Apis* and the *Sphinx*. These vessels are to ply between Trieste and India via the Suez Canal. The burden of each will be 1,400 tons. Messrs. A. and J. Inglis, of Pointhouse, have launched an auxiliary screw clipper, named the *Oberon*. This vessel has been built to the order of Messrs. Shaw, Maxton, and Co., of London, and will form one of their China fleet. With the view of avoiding the detention occasioned by calms in the equator to sailing vessels, she has been fitted with machinery by which she will be enabled to keep up a uniform speed throughout her voyages. Messrs. Napier have launched from their yard at Govan the *Invincible*, a twin screw, armour-clad frigate, built for the British Government. She is a twin vessel to the *Audacious*, launched by Messrs. Napier in February.

## GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, June 1.

The storm of opposition to the proposed new Federal taxes has been still further increased by the inconsiderate project of another new tax of no less than ten per cent. on railway tickets; but this was the additional straw that broke the camel's back, and the whole affair is so unpopular, and has called forth such a number of angry speeches both in the German Parliament and out of doors, that the Bundesrath does not dare to bring it to a decisive conclusion by a division, from the certainty of a most signal defeat. It had all along been an inexplicable mystery what was the real object to be obtained by the imposition of Federal taxes, for there is a simple means provided by a special article of the Constitution for raising the money required for Federal purposes, which is—as I explained in a former letter—by a repartition or division of the sum wanted among the separate States in proportion to their population, leaving it to the respective Governments to raise their quotas in their own way. But now the secret has been divulged by no less an authority than Baron von der Heydt, the Prussian Minister of Finance, who has published a statement from which it appears that the Prussian finances are in a very feeble condition, showing a deficit of about eleven millions of dollars. It is, therefore, apparent that, in order to cover this Prussian deficiency, it is proposed to raise direct Federal taxes, the alternative being that if those now proposed are refused, the Bundesrath will, in the next session, bring in a Bill for a Federal income-tax. In the meantime, it is decided to convene immediately the Zollverein Parliament, and see what they say to an increase of the import duties; and then there is still a chance left by an appeal to the special Prussian Parliament—for, by the complicated machinery at present in operation, there are no less than three different Parliaments, to say nothing of the legislative bodies in all the separate States of the Confederation.

The King of Prussia's visit to his new provinces of Hanover and Hesse-Cassel has been postponed by a slight indisposition, and now again put off till after the visit to Berlin of the Viceroy of Egypt next week, who is making a tour to invite personally the Sovereigns of Europe to "assist" at the opening of the Suez Canal in the autumn, and endeavour to obtain a general guarantee for the neutrality of the canal in time of war. But according to the latest arrangements the Royal progress will be confined to visits to Hanover, Bremen, Oldenburg, and Heppens, to inaugurate at the latter place the new dockyards and naval arsenal in the Bay of Yadhe, on the North Sea.

The result of the general elections in Bavaria is not of a character to facilitate a *rapprochement* between the north and south of Germany. The majority of the members returned belong to the Ultramontane or Clerical party, who are very decidedly opposed to a junction with the North German Confederation, whilst the minority is far from being a compact body, being split up into several political factions. Under these circumstances it is highly probable that Prince Hohenlohe, the present Liberal Premier, will find his position no longer tenable, and be eventually compelled to resign.

### COMMERCIAL.

Some considerable arrivals of rough rice have come to hand, and have been warehoused, as the importers could not make up their minds to accept the low bids made. A fair amount of business was done in cleaned grain at previous rates. Tea calm, but prices rule firm. Cassia lignea is again in favour, and 8,000 chests of the late arrivals have been taken at 12¾ sch. bco. Flores commands a more easy sale at full prices, 19 and 19½ sch. bco. having been paid. No alteration in Pepper, which is but little inquired for at this time of the year; Singapore offered at 4 7-16 to 4½ sch. bco., and Penang at 4¼ to 4 5-16 sch. bco. Banca Tin is higher; none can be had now under 16½ to 16¾ sch. bco. There is still no improvement to report in Spelter, which continues in its torpid state. Hitherto the holders have made such exaggerated demands that they have frightened away purchasers; but they are now more inclined to do business, and would not refuse lower offers. Nominal quotations—13 mks. 10 sch. bco. ex warehouse, and 13 mks. 12 sch. bco. to 13 mks. 14 sch. bco. for delivery. Money is more plentiful in the banks, and Discount has receded to 4 per cent. for good bills.

### SHIPPING.

ARRIVED.—Alardus, from Bangkok; Trinculo, from Singapore.

SAILED.—Gustav, to Shanghai; Hong Kong, to Hong Kong; Lorenzen, to Singapore.

LOADING.—Lola, for Manila; Alma and Elizabeth, for Singapore; Randers and Herzog Ernst, for Hong Kong; Figaro and Excelsior, for Shanghai.

### SHIPPING AT BREMERHAVEN.

ARRIVED.—Borealis, from Bangkok (42,290 bags rice, 2,000 pieces sapanwood).

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, June 2.

The elections, which take place on the 10th inst., become every day more exciting. The papers are filled with articles on the various candidates, and with reports of meetings of electors. Of course it is impossible to foretell the result of these elections, but, as great dissension prevails between the factions—Roman Catholics, anti-Revolutionists, Liberal Conservatives, and Tories, who together form the Opposition—it is most probable that they will turn in favour of the Liberal party. However hot the paper-war may now be, it would be still hotter but for the fact that the editor of the *Dagblad* is very ill, and cannot take

Digitized by Google

part in it. Some weeks ago he started for the South of France to recover his health. A widely-spread rumour, however, says that he is lost to his party; and, if so, the Tories have cause to weep, as they never will find so able a pen ready to defend their retrograde principles. Another loss they sustain in Parliament, Mr. J. J. Rochussen having declined to offer himself again as a candidate for the Second Chamber.

A curious story is told by the *Dagblad* about a scene which it alleges to have taken place in the Café Mille Colonnes, at Brussels, between Messrs. Otto van Rees and Roorda van Eysinga, both well known in India as ultra-political antagonists. The last-named gentleman, it is asserted, insulted Mr. van Rees publicly, whereupon Mr. v. Rees made a complaint to our ambassador requesting that Mr. Eysinga should be ordered by the Belgian Government to leave Belgian territory. This *on dit*, however nonsensical, will, of course, become current in the Far East, and thus it will be of some interest to your readers to know that the whole story is a fabrication. The *Vaderland* ascertains on "authority" that the gentlemen named did not even meet each other in Brussels.

General Kroesen, the newly-appointed Commander of the East India Army, left by the last mail. The papers in general are of opinion that he is "the right man in the right place," and that he will succeed in suppressing the discontent which now prevails among the officers of the East India Army. He is, the *Vaderland* states, convinced that there are some real causes for complaint, viz., that the position of the officers is not nearly so lucrative as that of the civil functionaries, and that their interests were always neglected. The above-named paper, however, condemns the manner in which the officers showed their opposition to their grievances. Knowing that our Parliament is often too economical, they ought to have addressed themselves to the King, their natural protector.

The First Chamber met on the 20th of May for the despatch of business. I regret that I have to record the death of Mr. P. van Swieten, ex-Colonel of the staff of the East India Army and ex-Secretary-General of the Colonial Department.

For the past year or two the Indian novels and sketches of Messrs. van Hoevell ten Brink, van Rees, and others have been translated into German, and published under the title of "Indische Bibliothek." As these volumes have contributed greatly to throw light upon the condition of our East Indian society, it will be of some interest to know that the translator—who writes under the *nom de plume* of "Wilhelm Berg"—is no other than Mrs. Lina Schneider, the wife of one of our most eminent opera-singers.

### COMMERCIAL.

The Stock Markets have been generally good, with some exceptions. Foreign Government securities have been firm, and nearly all the changes are for the better. There has been a very quiet demand for money in the discount market, and the rate of discount remains unaltered. Dutch Two-and-a-Half Per Cents., 54¾; Three Per Cents., 64; Four Per Cents., 87. Trading Company, 122¼. India Railway Company, 92½.

### PRODUCE MARKETS.

COFFEE.—The last Trading Company's auction, held on the 20th ult., at which 64,770 b. Java were offered, went off very well. Except some damaged parcels, the whole quantity sold at ½c. to 1c. above the brokers' valuation. Good ordinary Java realised 38½c. This result made a favourable impression abroad, but nevertheless the market remains very quiet. In second hands nothing is offered. The private transactions include —1,145 b. Java, ex Doesborgh, and Jennie Eastman at 37½c. to 40c.; 2,400 b. do., ex Zeenymph, at 35½c.; 719 b. do., ex Twee Gezusters, at 38c. to 39c.; 1,160 b. Java, ex Jennie Eastman, at 36c. to 37c.; 1,036 b., ex Garibaldi, at 38c.; 830 b. do., ex Susanne, at 38½c.; 516 b. do., ex Twee Gezusters; 1,400 b. do., Padang, ex Zaanstroom, at 39½c.; 459 b. Java, ex Ludwig. at 39½c., 1,000 b. Java, ex Yedo; 600 b. do., ex Isaac Da Costa. The unsold stock of the Trading Company amounts to 393,600 b., whilst the total stock is 719,600 b., against 648,800 b. on June 1, 1868.

RAW SUGAR.—On the 25th ult. the Trading Company held an auction, at which 70,324 mats were offered. The brown and yellow qualities sold at 0½f. above March value, and other descriptions on a par with the March prices. No. 16 is now quoted 36¾f.; No. 14, 36¾f. The private transactions include 287 mats, Passaroeang, and 40 yards Sourabaya, ex Laurens Koster. The last parcel was No. 19, and sold at 36¼f.; 1,032 mats Samarang, ex Atlantic King, No. 18¼, at 36½f.; 402 mats Sourabaya, ex Laurens Koster, No. 18, at 36¾f.; 202 mats Batavia, ex Maria Adriana; 123 mats Passaroeang, ex Maria Diederika, No. 12¼. Stock of raw sugar on the 15th May, in bond, 44,779,882 kilo.

RICE.—There is good and regular demand. The following parcels have changed hands:—925 b. Java, ex Hebe; 7,750 b. Sourabaya, ex Johannes Lodewyk, at 4⅞f.; 1,115 b. Java, ex Albrecht Beyling, at 8¼f.; 1,166 b. Sourabaya, at 5⅛f.; 1,020 b. Java, ex Maria Adriana, at 7⅛f.; 5,200 b. Java, ex Maria Adriana, at 7f. to 8f.

SPICES.—The market is firm, but inactive. There is some demand for Nutmegs No. 3 and 4. A small parcel Cloves sold at 29c. Pepper —1,143 b. ex Luctor and Emergo, sold at 21¾c. to 22¼c. in bond.

TOBACCO.—The market is dull and inactive. Stock in Amsterdam, 7,587 b. Java. There are no transactions to report.

INDIGO.—There has been a good demand, and about 150 chests have changed hands. Prices for inferior qualities are somewhat lower.

BANCA TIN.—The market closes somewhat firmer. Banca is quoted at 84f., and for delivery out of the forthcoming auction 82½f. Billiton is quoted at 81½f. for floating parcels, on spot 82f.

HIDES.—The market is firm, but rather more inactive. 1,753 p. Samarang Rinder, ex Garibaldi, and 232 p. Bat. Buffalo, ex Noach II., have been sold.

### PASSENGERS.

PASSENGERS INWARD.—From Java, per Maria Adriana: Mr. C. H. C. Flugi van Aspremont. Per Maria Diederika: Mr. J. F. Krul and family. Per Java Packet: Mr. Van den Burg and family, Mr. Doyer, Mr. Siedenburg, Mrs. Fokker, Mrs. Ryk de Groot, Miss Schol. Per Laurens Koster: Mr. J. van Boxel. Per Philip van Marnix: Mr. E. van Hengel and family, Messrs. B. Alberts, J. Segaar, H. Gerrebrand, W. Smidt, H. Tendeloo, O. Wikens, C. Schmidt, G. Rooker, Mrs. H. J. Hoffmann and family, Mrs. S. W. Martens. Per Geobreders van der Beek: Mr. F. J. Voogt and family, Mr. R. J. Oosterhoff and family, Miss J. B. Dibbetz.

PASSENGERS OUTWARD.—For Java, per Insulinde: Mr. Berenstein, Mr. Benjamins and family, Mr. Rochemont and family, Mr. Dieu Sterling, Mr. Van der Weide. Per Hellevoetsluis: Mr. Linard, Mr. Arnolds and family, Miss Linard. Per Catharina Maria: Mr. J. Kroesen and family. Per Sourabaya Packet: Mr. van Wessem and family, Mr. Steup, Mr. Strumer.

## Monetary and Commercial.

The fifty-seventh half-yearly report of the P. and O. Company has been issued. It recommends a dividend for the six months at the rate of 6 per cent. per annum, payable after the 25th inst.

We are glad to note that the scheme of arrangement between the shareholders and the creditors of the Commercial Bank Corporation of India and the East, under which all litigation is to be stayed, and the creditors are to accept 17s. in the pound in discharge of their claims, has at last received the sanction of the Master of the Rolls.

The report of the Anglo-Mediterranean Telegraph Company announces a dividend of 4s. 6d. per share, making with previous dividends a distribution at the rate of ten per cent. per annum, leaving nearly £3,000 to be carried forward.

The biddings for £325,000 in bills on India were received on Wednesday at the Bank of England. The amounts allotted were —to Calcutta £288,400, and to Madras £36,600. The *minimum* price was fixed, as before, at 1s. 10¾d. on Calcutta and Madras; and tenders on those Presidencies at 1s. 10¾d. will receive about 59 per cent., and all above that price in full. These results show a further diminution in the demand for means of remittance to the East.

The Mexican dollars by the last West India packet were sold at 4s. 11½d. per ounce, showing no change. Bar silver is quoted 5s. to 5s. 0⅛d.

The amount of bullion by the P. and O. Company's steamer *Nyanza*, from Southampton 29th inst., was, in gold, to Aden, £420; to Bombay, £10,000; to Madras, £941; in silver, to Singapore, £22,390; to Hong Kong, £24,896; to Foochow, £500; to Shanghai, £6,920; to Yokohama, £400; total in gold, £11,361; in silver, £55,106.

The Board of Trade Returns for April show that the exports in that month amounted to £15,624,475, an increase of about eight per cent. over the the corresponding month of last year, and a still larger increase upon the figures of April, 1867. The imports are made up to the end of March. In that month their total value was £19,448,415, or less by rather over £2,000,000 than the amount of the imports in March last year. Our usual *resumé* of the figures relating to China, Japan, &c., will appear in our next issue.

### ARTICLES OF IMPORT.

#### TEA.

We have at length a slight improvement to notice in the tone of the market. There has been less anxiety during the interval to press sales on the part of importers, both privately and at public sale, whilst the very low prices at which first crop Kaisows had been sold led to some inquiry for them on speculative account, and there has been a recovery of nearly 1d. per lb. from the lowest point of the market, whilst common Teas have also further improved to the extent of about ½d. per lb., there being now but little to be bought under 1s. 1d. for fair to good common. There has also been rather more demand for good medium black-leaf, and these also show some recovery from the recent extreme depression. The public sales of the 1st instant comprised 11,806 packages, of which 11,033 were offered without reserve. The stock in the United Kingdom on the 31st ultimo was estimated at 92,000,000 lbs., against 85,820,291 lbs. last year, and the quantity afloat at 6,590,960 lbs., against 6,286,420 lbs.

CONGOUS.—Siftings have sold ½d. per lb. higher; broken-leaf have fully maintained former value. Fair to good common have sold ½d. per lb. dearer, the quotation now being 1s. 0¾d. to 1s. 1d. per lb. Fair to good flavoury kinds and good Kaisows have sold ½d. to 1d. per lb. higher, such qualities as about a month ago were selling at 1s. 1d. per lb. now fetching 1s. 1½d. to 1s. 2d. per lb. Fine Kaisows have met with more inquiry, and when quality has pleased the buyers a rise has been obtained of about 2d. per lb. Finest show no alteration. Pak Lins have been in rather better request, and prices show a slight improvement. Amoy kinds have recovered ½d. to ¼d. per lb. Common to fair black-leaf have been more saleable at from 1s. 0½d. to 1s. 1½d., being rather higher prices. Fair to good medium have been more inquired for, and prices have ruled ½d. to 1d. per lb. higher. Good to fine Monings have also met with rather more demand, but only in excep-

Digitized by Google

tional cases have prices improved. The teas, per overland route, new make Congou, were sold in public sale from 1s. 4d. per lb. upwards. In old importations there has been some rally from the very low prices lately current. Oolongs: There is no new feature to notice, the demand being chiefly for teas for price. Souchongs and Flowery Pekoes show no material alteration, the demand for the former being limited. Scented Teas: Canton Capers show but little alteration, either in demand or prices. Foochow kinds are without change. Canton Orange Pekoes continue dull of sale at about former prices. Foochow kinds are still selling at the low rates last quoted. Uncoloured Japans show no material alteration. Green Teas: The supplies offering have exceeded the wants of the trade, whilst the export demand has been very limited, and the sales made have been at rather lower prices both for Moyune and Ping Suey kinds, the common sorts being best supported. In Canton make there is no alteration to notice.

The following is from Messrs. Shepard, Harrison, and Rehden's Circular:—There has been a better tone in the market the past fortnight, much less tea being pressed for sale; a few thousand chests of good common Congou have been taken on speculation; this, combined with a good trade demand, has caused an advance of ½d. per lb., 1s. 1d. being to-day's quotation; preferable and medium show a like improvement, and prices for these grades have been so beaten down the last two months, there is good reason, now a favourable turn has taken place, to look for still further rise, more especially should coming advices from China, on the opening of season 1869-70, lead us to expect moderate shipments. A small public sale of 11,800 packages of China growth commenced yesterday, at which a portion of the late arrivals, per Overland, of new season's new-make Congou were offered without reserve, medium selling at 1s. 4d. per lb.; fine has not yet passed. There is no new feature to note relative to the export trade, which continues limited. Deliveries show great increase, no doubt helped by the low range lately current, and stand as follows:—

| | 1869. | 1868. |
|---|---|---|
| Home consumption for London from 1st Jan. to 31st May ... | 31,678,000 | 34,130,000 |
| Export do. do. ... ... | 17,243,000 | 10,510,000 |
| Sent coastwise do. ... ... | 14,900,000 | 14,301,000 |
| | 63,821,000 | 58,941,000 |

BLACK.—There has been a recovery of fully ½d. per lb. for Dust and Siftings, in sympathy with a similar move in inferior flavory and Kaisow kinds; medium to fine Kaisow has been in better demand, and the few sales have been at improved rates. Imitation Kaisow, made from Tayshan leaf: For old leaf prices rule at a low standard; the new season's have been offered mostly at public sale. Black-leaf: Ordinary common to good common has been in small supply, ruling firm at 1s. 0¾d. to 1s. 1d. per lb.; preferable to medium have been in more demand than for some time past, and improved prices have been paid, as also for medium to fine quality, though transactions have been of a limited nature. In Souchong and Oolong we hear of no sales. Scented Teas: Canton Orange Pekoe is the turn better. Caper: No change in price and sales few. Foochow Orange Pekoe has met with attention when offered at market rates.

GREEN.—Of the Dundonald's cargo, containing 7,000 packages, only a portion have been offered. Pingsuey kinds have been heavy of sale; but Moyune, considering the crop is not up to an average, sell at full prices, though barely covering import cost. In Japan leaf there is nothing to report.

## SILK.

There has been very little, if any, change in the market during the past fortnight, and the slight improvement in demand which we then advised as having taken place still exists, there being a small daily business for immediate wants, chiefly in Tsatlees and Japans, but an absence of general business until definite news of the result of the European crops arrive; up to the present time the advices from the South of Europe are, perhaps, a little more favourable than last season at this period, but there is, until the very latest stage of the worm's progress has been reached, so much uncertainty, that reports are of very little real value, and are liable to contradiction at any moment; there appears to be a general impression, however, that the total result will be a little better than last season. There is no change in quotations, which are mostly nominal as regards Maibash Japans, and re-Reels and Chinese Throwns. The deliveries, although small last month, are nevertheless fair, considering the quiet market which has existed; they were 4,062 bales in all.

Nothing new during the past fortnight in East India and China silk piece goods; the markets generally are very quiet; the deliveries of Bengal goods last month were fair, being 5,910 Corahs, 1,224 Choppahs, and 651 Tussores. The stock of Corahs is still large—41,257 pieces. The next public sales will be held on 7th July.

| Hatchoji ... ... | 20s. 0d. to 22s. 0d. | None. |

COTTON.—The Liverpool market continued to exhibit a dull tone until the 1st inst., when there was a material change. A considerable improvement in the demand from the trade stimulated speculators to action, and a material increase in the amount of business done was the result. Holders were much less anxious to force sales, and prices were therefore not only steadier, but quotations were advanced ⅛d. per lb. both on the spot and for arrival. The improvement has since made further progress, and, with a steady demand from the trade and some activity among exporters and speculators, prices have been further strengthened, and quotations further advanced ⅛d. per lb., the current rates on the spot being as follows:—Surat, 6¾d. to 11d.; Madras, 9¼d. to 9¾d.; Bengal, Scinde, &c., 7¼d. to 8⅜d. Fair Dhollerah, 9¼d.; fair Oomrawuttee, 10d.; fair Broach, 9⅞d.; fair Bengal, 8⅛d.; fair Egyptian, 12½d.; fair Pernam., 12d.; middling Boweds, 11¼d.; middling Orleans, 11¼d. The latest sales for arrival have been:—Broach, good fair, March sailing, 9¾d.; Dhollera, fair new merchants, ship named and June sailing, 9⅛d.; Oomrawuttee, fair merchants, ship named, 9¼d.; ditto, March sailing, 9¼d.; Scinde, fair new, February sailing, 8¼d.; and Bengal, fair new merchants, shipment previous to 15th June, 7¾d. The London market has also improved, there being a fair inquiry at higher prices.

COFFEE.—The depressed condition of the market for Ceylon Coffee noticed in our report of the 21st ult. became more marked after the departure of the mail, and prices continued to recede until a reduction of 1s. 6d. to 2s. 6d. per cwt. was effected. On the 2nd instant, however, increased supplies of colonial sorts were brought to auction, of which the Plantation kind met a better competition, and prices in some instances were rather higher; Native and other pale sorts sold on lower terms. Plantation Ceylon realised, for triage and ordinary, 40s. to 57s.; fine ordinary small, 63s. 6d. to 67s. 6d.; low middling, grey to coloury, 68s. to 70s. 6d.; middling coloury, 71s. to 76s.; good middling, 76s. 6d. to 80s.; good bold, 84s.; peaberry, 74s. 6d. to 85s. Native Ceylon sold, small at 50s.; good ordinary rather small at 55s. to 55s. 6d.

CINNAMON.—At the quarterly public sales, held on the 31st ult., 2,900 bales were offered, and nearly all sold; medium at 1d. to 3d. per lb. above last sales' rates, but fine and common sorts went at easier prices—low to superior, first sort, 1s. 9d. to 3s. 6d.; second, 1s. 7d. to 3s. 5d.; third, 1s. 4d. to 3s. 2d.; fourth, 10d. to 2s. 5d. Of 2,500 bags of chips offered about 1,000 bags sold at 2½d. for low course to 1s. 0½d. for fine.

CAMPHOR.—There have been no transactions of any importance since our last report.

JAPAN WAX.—The demand is very inactive.

MANILA HEMP.—The market exhibits a firm tone, with business to fair extent by private contract at £44 to £48 5s. per ton for common to good qualities. The sales at auction have been limited, at £47 10s. to £50 for fair and superior sorts.

PEPPER.—Black: Firm; of 3,000 bags Singapore at auction two-thirds sold at 3¾d. to 4d. per lb., and of 997 bags Penang a large proportion sold at 3¾d. White: Prices have suffered a further fall of 1d. per lb.; of 325 bags Singapore at auction half sold at 5¾d., and of 369 bags Penang a few only sold at 5¼d.

RHUBARB.—The better qualities of China are scarce and firm; middling, 3d. to 4d. per lb. lower; ordinary, without material change. 78 chests sold at auction at 2s. to 3s. 7d. for good ordinary to middling, and 1s. 4d. to 1s. 6d. ordinary.

SPICES.—Cassia Lignea: Cheaper; 289 boxes sold at auction at 127s. to 131s. per cwt. for middling second and first quality. Budds: Nothing doing. Cloves: Transactions have been of some importance; of 82 cases Penang at auction about one-third sold at 10¼d. to 10¾d. per lb. for good, with a single lot of fine at 1s. 1d. 1,543 bags Zanzibar sold at 3¼d. to 3½d. fair to good. Mace: Steady; of 16 cases Penang and 7 cases Batavia at auction, two-thirds sold at 1s. 11d. to 2s. 10d. per lb. for ordinary red to good reddish. Nutmegs: Steady; 21 cases Penang sold at auction at 3s. 2d. to 3s. 7d. per lb. for fair to good bold, and 1s. 1d. to 2s. 3d. low small to very good medium.

TERRA JAPONICA.—Cutch: Flat and cheaper: of 1,052 packages at auction a small portion only placed at 27s. per cwt. for good, at which price sales have been effected for arrival. Gambier: Fair enquiry for block at 17s. to 17s. 3d. per cwt.; limited business in Cubes at 22s. 6d. for very good pale; 4,572 packages at auction all retired.

TIN.—We have to report an improvement in the market for Straits, the demand being moderately active at an advance of £2 to £3 per ton on the rates current at the date of our last. The current quotations are:—Banca, £137; fine Straits, on the spot, £135 to £136; afloat, £130 to £132 per ton.

The Admiralty have invited tenders for the conveyance of small stores to Hong Hong.

## MISCELLANEOUS.

At ST. HELENA.—April 12, Prinses Amalia, Driest, from Banjoeangie, and sailed 15 for Falmouth; 18, Omba, Thomson, from Macao, and sailed 19 for London; 22, Tek Li, Kier, from Penang, and sailed 23 for London; 23, Anne, Morrison, from Shanghai, and sailed for New York; Mexicana, Jeffries, from Saigon, and sailed 24 for Queenstown; 24, American Lloyds, Park, from Shanghai, and sailed for New York; Finzel, Hicks, from Bangkok, and sailed for Falmouth; Ymuiden, de Jong, from Banjoewangie, and sailed for Amsterdam; 25, Corypheus, Ross, from Singapore; 26, Xulla, Ward, from Padang, and sailed for New York; Petronella, Leicher, from Batavia; Doelwyk, Leverstein, from Batavia, and both sailed for Rotterdam; Hendrik Ido Ambacht, Byl, from Batavia, and sailed for Amsterdam; Modesty, Kerr, from Samarang, and sailed 27 for the Clyde; Palmerston, Seagrove, from Ceylon, and sailed for London; Loyola, Echevarria, from Manila, and sailed for Liverpool; 27, Jeanne and Joseph, Castro, from Hong Kong; Heimdal; Berg, from Probolingo; 13, Sumatra, Montechiaro, from Sumatra, sailed for Gibraltar. Off St. Helena, April 14, Glendoveer, from Hong Kong, for New York; 23, Evangeline, from Saigon, for Falmouth; 24, Carnarvonshire, from Shanghai; 26, Star of Jamaica (barq.), from Singapore, and sailed for London.

A new feathering screw has been introduced by Messrs. Laird Brothers, of Birkenhead. They have patented an arrangement which has been put to a practical test in the Kathleen, a yacht constructed for the Marquis of Downshire, and the results obtained on trial are so far very satisfactory. It was found that with the screw feathered the yacht not only had a speed of 1½ to 2 knots more than with the screw fixed, but that she was more lively in coming round. It was thus clearly shown that the drag of the screw not only affected the speed through the water, but prevented the ship working so satisfactorily as she did when the blades of the screw were feathered fore and aft, and we look with interest for reports of further trials.

NEW MUSIC.

BRAG. Serio-comic Song. Written and Composed by ALFRED SCOTT GATTY.

PUT IT DOWN TO ME. Comic Song. Written and composed by ALFRED SCOTT GATTY.

WHEN THE ROSES BLOW. Song. Written by R. REECE. Composed by G. B. ALLEN.

THE DAYS WERE SWEET IN SUMMER TIME Song. Written by R. REECE. Composed by G. B. ALLEN. Post free for 19 stamps each.

Messrs. R. COCKS and Co., New Burlington-street.

We have had occasion to favourably notice Mr. Gatty's comic songs, and the two under notice do not alter our opinion of their character. "Brag" is a comic song of a mild order, but hardly to be ranked as serio-comic. It is all fun. "Put it Down to Me" is more pungent, and broader in tone, but without approaching coarseness. It is sung nightly by the St. George's Hall Christy's, and hardly ever fails to be warmly encored. Both songs are in marked contrast with the music-hall type, and deserve a wide circulation. "When the Roses Blow" is a ballad which has also obtained much favour with the Christy's, and it well merits it. The melody is very taking, and quite equal to any of Mr. Allen's uniformly excellent settings. "The Days were Swee in Summer Time" is another excellent song, and if treaches a front place in the thousand and one new compositions before the public it will fully deserve it.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

HOLLOWAY'S PILLS.—ENJOYMENT OF LIFE.—When the blood is pure, its circulation perfect, and the nerves in good order, we are well. These Pills possess a marvellous power in securing these great secrets of health by purifying, regulating, and strengthening fluids and solids. Holloway's Pills can be confidently recommended to all persons suffering from disordered digestion, or worried by nervous fancies or neuralgic pains. They correct acidity and heartburn, dispel sick headache, quicken the action of the liver, and act as alteratives and gentle aperients. The weak and delicate may take them without fear. Holloway's Pills are eminently serviceable to invalids of irritable constitution.

| Malaba Coast ... | Robt. Jones | A1 12 yr. | 287 | L.D.K. | June 20 |
| Do. ..... | Star of Jamaica ... | A1 9 yr. | 306 | L.D.K. | June 30 |

No. 22, Great St. Helen's, E.C.

## BOMBAY DIRECT, first ship,

the well-known clipper ship BURLINGTON, A1 13 years, 652 tons register, A. C. FORBS, Commander; loading in the East India Docks. This fine vessel presents a most desirable opportunity to shippers.

For Freight or Passage apply to GELLATLY, HANKEY SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

Malabar Coast. To follow the Antipodes. Will meet with the usual quick despatch.

## DIRECT for COCHIN, CALICUT, MANGALORE, and CARWAR, the beautiful clipper ship, ROBERT JONES, A1 12 years, 287 tons register; E. ELLIS, Commander; London Docks.

This splendid vessel offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Mates' Receipts must be left before bills of lading can be signed.

L. H. and B. will not be responsible for demurrage on craft sent alongside without their instructions.

N.B. Shippers are particularly requested to have the Port for which the Goods are intended distinctly marked on the packages, to prevent delay and confusion on delivery.

To follow the "Ocean Rover." Will meet with the usual quick despatch.

## DIRECT for COLOMBO, the splendid clipper ship FORT REGENT, A1 10 years, 655 tons register; LEWIS OLSEN, Commander; West India Docks. This favourite vessel is well known in the Colombo trade for her rapid passages, and the good order in which she invariably delivers her cargo.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Steam from London to Shanghai direct. To sail punctually on the 28th of July.

## FOR SHANGHAI, the splendid new composite full rigged steam clipper ship OBERON A 1 16 years at Lloyd's, 1,200 tons register, 300-horse power; JOHN KEAY (late of the ARIEL), Commander; East India Docks. This fine ship, built expressly for the China trade, combining all the latest improvements of the fastest clippers, with the addition of the best description of marine engines, offers a most favourable opportunity to shippers of fine goods. The passage to Shanghai is expected not to exceed 75 days.

For Freight only, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

To sail on the 15th June.

## FOR SHANGHAI, the Splendid Clipper Ship, DEVONPORT, A 1 13 years, 1,188 tons register; THOMAS S. KENNEDY, Commander; East India Docks. This beautiful ship presents a favourable opportunity to shippers of fine goods, and has superior accommodation for Passengers.

For Freight or Passage, apply to SHAW, MAXTON and Co., 2, Royal Exchange-buildings, London, E.C.

To sail punctually on the 1st July. Last shipping day 29th June.

## FOR SHANGHAI, the celebrated Clipper Ship, LAUDERDALE, A1 15 years; 851 tons register; G. MOODIE, Commander, East India Docks.

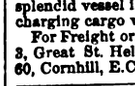
For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

Regular line of Packet Ship. With quick despatch.

## FOR HONG KONG, the splendid Liverpool-built Clipper GEOLOGIST, A1 13 years, 854 tons register; M. CLARKE, Commander; East India Docks.

For Freight apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

With immediate despatch.



## FOR YOKOHAMA (KANAGAWA) Direct, the well-known Clipper Ship CREST OF THE WAVE, A 1 13 years, 776 tons register; ALEX. CROMBIE, Commander; loading in the East India Docks. This splendid vessel is noted for her rapid passages, and discharging cargo without damage.

For Freight or Passage, apply to A. Wright and Co., 3, Great St. Helen's, E.C.; or to NORRIS and JOYNER, 60, Cornhill, E.C.

## THE CHINA & JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China, Japan, the Straits Settlements, &c. Orders for Furniture, Stores, Books, and Personal Requirements of every description promptly executed, either by Overland Route or Clipper Sailing Vessels. The articles in all cases are carefully selected by persons who have had personal experience of the wants of residents in China and Japan. ### THE MAILS, &c

We have again but very few days' later news, the present mail having left only nine instead of fourteen days after the previous P. and O. mail, owing to the setting in of the S.W. monsoon. On Thursday last (the 10th) despatches by the Pacific route were received, bringing advices from Yokohama to April 30, or a fortnight later than those by to-day's mail; a summary of the news will be found in its proper place.

The next inward mail will be that leaving Hong Kong May 13, due here on the 28th inst. Telegrams have been received in advance of the French mail of Hong Kong, May 20. *Via* Kiachta Shanghai telegrams to the 26th May came in this morning.

## List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Pera*, arrived June 11.—From Shanghai: Mr. Stevenson, Mr. J. Burns. From Hong Kong: Mr. Patora, Mr. Rira. From Singapore: Mr. R. Baker. From Batavia: Mr. C. Doornick. From Ceylon: Mr. George Pyatt.

To Southampton, per P. and O. steamer *Massilia*, expected to arrive June 18—From Yokohama: Mr. Tripp. From Shanghai: Mr. and Mrs. Stewart and three children, Mr. Jackson. From Hong Kong: Lieut. and Mrs. Harvey, Mr. Manser, Captain Thompson, two Misses Brunker, Mr. Dobbs and child. From Singapore: Mr. P. Hayes. From Galle: Assist.-Surg. Hinds, Mr. Collins, Captain Perrins, Mr. Eastwood.

To Gibraltar.—From Hong Kong: Dr. de Mesquita.

By last Bombay mail to Marseilles, per P. and O. steamer *Bangalore*, arrived June 3.—From Hong Kong: Mr. Young.

PASSENGERS OUTWARD.

Per P. and O. steamer *Tanjore*, from Southampton, June 12—To Hong Kong: Mr. W. S. MacLeod. To Batavia: Mr. R. R. Purvis. To Ceylon: Mr. Ralph Tatham, Mr. W. G. Kortwright, Lieut. Baldwin, Mr. Ferguson.

Per P. and O. steamer *Pera*, from Marseilles, June 20.—To Yokohama: Mr. T. Langaard. To Hong Kong: Mr. and Mrs. P. Karberg, Mr. C. S. Craig. To Singapore: Baron de Thuyll. To Batavia: Mr. Otto Sielcken.

Per P. and O. steamer from Suez, June 27.—To Hong Kong: Mr. A. F. Walcott, Mr. S. P. Walcott.

Per P. and O. steamer *Ripon*, from Southampton, June 26.—To Hong Kong: Mr. E. Monger. To Singapore: Mr. J. D. Vaughan. To Penang: Mr. and Mrs. Thompson and child.

Per P. and O. steamer from Suez, July 11.—To Penang: Mr. Victor Kruger.

Per P. and O. steamer from Southampton, July 10.—To Hong Kong: Mr. F. Cumberland. To Ceylon: Mrs. Halliley, child, and two sons; Mr. H. Skrine.

Per P. and O. steamer from Marseilles, August 1.—To Batavia: Mr. and Mrs. Pietermaat.

Per P. and O. steamer from Suez, August 8.—To Hong Kong: Mr. and Mrs. Bade.

## Summary of News from the Far East.

### YOKOHAMA.

From Yokohama the advices by the present mail extend to the 16th April. The outward French mail of Feb. 18 arrived on April 11, with London telegrams to March 10. We extract the following summary of news from the *Japan Times*:—

Our statements last mail respecting the daimios' cession of their independent rights to the central government we can now confirm in every particular. Many other daimios have joined the movement and there is no doubt that by the approaching council at Yedo it will be ratified and extended to the whole of Japan. Satsuma has been already invested at Kagosima with the rank from the Mikado of Governor of his province, yielding that of daimio with all its sovereign and separate rights. The *Thales* was chartered at Kobe to take down the Mikado's envoy, who was received in Satsuma's capital with imperial honours, the ceremonial observed being the same as if his Majesty himself had been presented. The investiture took place on the 26th ult.

The Mikado will be in Yedo about the 3rd of May, and, as we have before mentioned, his stay will be a very lengthened one, if not altogether permanent. Great preparations are being made for his reception and for that of the Princes and Nobles of Japan summoned to the Council. The city will resume much of its ancient splendour, and the people are proportionately delighted. The pleasure grounds within the inner moat, immediately around the Imperial palace, were thrown open to the people for three days last week, and between 70,000 and 80,000 are said to have visited them. The crush was so great that some women and children were killed.

A terrible accident has happened in Yedo harbour. The steamer *Kewanee*, one of the recent Government purchases, was taking in some powder, when, no precautions being taken on board native craft, a spark from the pipe of one of the workmen fell on a damaged keg and the whole exploded. The vessel sank immediately, her bottom being blown out, and her crew, about 130 in number, were in the air or water. Twelve men were never seen again, and eleven were picked up so frightfully mangled that little, if any, hopes were entertained of their recovery. Dr. Willis, whose absence on leave from H.M. Consular Service while establishing a Government hospital in Yedo we lately recorded, has them in charge. Others of the crew are more or less injured. This is a frightful example of the effect of carelessness, and when we know, too, that in our own harbour, not two miles from the shore, lies a hulk, the *Nassau*, full of Foreign-owned powder, storage of which, in such a dangerous position, no complaints can induce the authorities to prevent, we naturally feel rather uncomfortable on our own account. We badly want a harbourmaster, a good, honest, experienced, Foreign shipmaster, with full powers from the Japanese Government, and independent of Foreign Consular control. Until we get such an officer improvement is impossible, or safety either; the harbour will deteriorate as it is doing daily, ships will be moored, as now, so as to take the best chance of accident in case of a typhoon, and we may all be blown out of our houses some day by the *Nassau's* cargo. Of course, if the Japanese Government were to ask the Dutch representative to have the *Nassau* moved the request would be complied with at once; but what can we hope from a Government which allows its own powder to be moved about on board its own ships by workmen who smoke pipes meanwhile?

Only of less, if indeed of less, importance than the Currency question is that of Municipal Reform, which has engaged our attention also for a long afternoon's debate since we wrote last. The largest public meeting ever yet assembled at Yokohama met on the 8th inst., to receive and discuss the report of a committee of Land Renters, appointed some time back to suggest ways and

Digitized by Google

means for carrying out a scheme of Mr. Brunton, Civil Engineer to the Japanese Government, for the effectual drainage of the place. We need not trouble readers abroad, who are but little interested in the question except as affecting their own health when they happen to visit Japan for change of air, with a full report of this debate. It will suffice to say that three propositions were brought forward; the first on behalf of the native Government, by Mr. Benson, the present Municipal Director, proposing to support the whole prime cost of the drainage and road making provided certain Consuls would pay up ground rents held back by them as material guarantees for the satisfaction of certain outside claims by some of their co-nationals, but without any provision for keeping the said drains and roads in order when made, or for police, or lighting, or scavenging. The second, proposed by Mr. Wilkin, one of the committee, that their scheme of dividing the cost with the natives should be adopted, and the necessary funds for the community's share provided by a wharfage due. The third, proposed by Mr. Rickerby, expressed in the following resolution:—

"That, in the opinion of this meeting, the Japanese Government is fully bound to all expenses in respect to the drainage, roads, &c., &c. Yet, without in any way virtually lessening their liability, it would seem desirable, as a matter of expediency, to endeavour to meet them; and that a deputation should be appointed by this meeting to wait upon the representatives of Treaty Powers, offering, on the part of the community, to take upon themselves the management of municipal affairs in their entirety, inclusive of Mr. Brunton's, or some equally effective scheme of drainage, on consideration of the Japanese Government guaranteeing that 80 per cent. of the ground rents, commencing with the present year, shall annually be paid over to a properly constituted municipality of Foreign residents, as may hereafter be agreed upon."

This last was carried by an overwhelming majority of forty-six to fourteen, and a strong effort will be made to procure its sanction by the Japanese Government and the Foreign Ministers. When it is considered that the ground-rent, of which we ask 80 per cent. for municipal purposes, reaches the enormous figure of £76 per acre, the ground-rent in Shanghai being only £2. 0s. 6d., and that a promise by the native Government to give us all we might then and thereafter require in the way of municipal and sanitary provision was read out as a condition of sale when the first lots were bought at auction in 1858, and that the Government has enjoyed a great revenue for ten years with very small expenditure—when, we say, all these things are considered, our demand appears only just, and we may therefore hope for its favourable reception.

From the North we have nothing yet to report. Affairs are in *statu quo*, Enomoto being strongly posted, but short of rice, and the imperial forces not yet strong enough to attack him with an absolute certainty of success. They are quite right to risk no failure. The weather is much milder, and spring is fast approaching us.

## LATER ADVICES *VIA* THE PACIFIC ROUTE.

By way of San Francisco we have advices from Yokohama to April 30 (a fortnight later). The following summary of news is given by the *Japan Gazette* of that date:—

We may expect to hear of the arrival of the Mikado in Yedo within a week or thereabouts, as he has already been ten days on the road. Apprehensions are felt by the Japanese lest the great assemblage of the daimios in Yedo may lead to trouble; but in the uncertainty it is useless anticipating trouble.

The Imperial fleet has left for Hakodadi, Island of Yesso, to attack and oust the Tokugawa kerai, who took and held it. Exciting news may be looked for ere long. It would not be altogether wondered at, if, after all, the place were given up without fighting. But looking at the great preparations that have been made, and the fact that French officers are the principal directors of those preparations, it is not likely. Altogether, there can be but small hope of the permanent retention of the place; but if a brave and vigorous resistance be made, it may force the Government to agree to good terms.

We hear of no particular movement in the South.

Some little difficulty occurred lately at Nee-e-gata. We have no full particulars, but it appears that a great number of coolies were employed by some who were hostile to the admission of Foreigners to trade at the port, and an endeavour was made to turn the course of a river that debouches into the sea at the city into an entirely different channel, so that all the internal water traffic would be diverted, and Nee-e-gata be rendered useless. It was discovered, however, and the ringleaders will be punished.

We are credibly informed that owing to an accident to the engines of the *Stonewall*, the Mikado's fleet put back, and anchored in Uraga Bay. They had got as far as Cape King, when owing to the south-east gale which was blowing at the time, the ram lost her jib; in addition to this misfortune we hear she was short of coals, and was supplied from the *Bushimaru*, which vessel has passed up to Yedo for a further supply.

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, April 22, 1869.

The M. I. steamer *Phase*, which left this port on the 15th inst. with the French Mail, took 250 bales of silk.

On the 18th the Chamber of Commerce received a London telegram *via* Kiachta, dated 30th March. London telegrams to the 20th March, amplifying those received by last mail, were received on the 19th inst. *via* Calcutta.

H. E. Ross Brown, United States Minister, is at present on a tour through the Coast ports, but will return almost immediately to Peking, whither he will be accompanied by the Consul General.

Mr. Hart, who was expected to make a tour of the ports during this spring, has announced his inability to leave Peking until September. The Customs' officials, or at least the higher grades, have recently been distinguished by Chinese rank, ranging from the third to the fifth button. Mr. Dick, commissioner at this port, has received the grade of Taoutai.

A new Fives Club has been organised here, a code of rules drawn up, and a lease of premises effected. The capital is Tls. 1,000, in twenty shares of fifty taels each; subscription, fifteen taels per annum.

On the evening of the 14th instant the Philharmonic Society gave a very successful concert.

On the evening of the 16th inst. the third of the "Temperance Series" of lectures was delivered at the United States Consulate General by Dr. MacGowan. These lectures have proved exceedingly popular, and it is hoped that during the next cold season a series will be inaugurated upon a more extensive plan, for the benefit of the general Foreign community. At present, as the lectures are delivered in Hongque, comparatively few residents in the English town take advantage of them.

On the 17th a meeting of the now defunct Debating Society was called, to consider the question of appropriating the surplus funds—Tls. 280. As usual with Shanghai public meetings, nothing was done.

The weather here has been continuously wet for several days, and in consequence the annual athletic sports, announced for the 16th and 17th inst., have been postponed indefinitely.

A despatch dated the 1st April, addressed by Sir Rutherford Alcock to Mr. Medhurst, has been published. His Excellency discusses very fully the questions of foreign trade with the interior, transit dues, inland residence, and steam navigation. The two latter are dismissed as obviously outside the present provisions of the treaty. But the imposition of transit dues in the manner now adopted "constitutes a legitimate subject of complaint." At the same time it is asserted that all the plans hitherto proposed as remedies are subject to many objections, and fall short of the object to be attained.

From Ningpo we have received a report of a lecture delivered on the evening of the 14th inst., to the "Book Club," by the Rev. Mr. Green. The subject was Hangchow, and much interesting information was given about this once-important city—"the terrestrial paradise." The present walls date from A.D. 600, and, measuring just 100 li in circumference, answer to Marco Polo's description of the walls of Kin-t'ai.

On the 17th inst. news was received from Hankow reporting that the *Salamis* has been got off successfully after a stay of two days on the bank. Where she went ashore the river is charged to such an extent with sand that in twenty-four hours after she struck it was almost possible to walk ashore from her dryshod. The intention was to send the expedition overland to Chungking if the river passage should be found troublesome. It is believed that the navigation of the upper river will prove quite easy all the year round for steamers of not more than ten feet draught. At Yochow the surveying officers were pelted with stones by the populace, but the magistrates expressed great concern—whatever they felt. The *Opossum* is reported to have reached a point ten miles above I-chang. Sir Henry and Lady Keppel reached Hankow on the 17th inst.

At Kiukiang the Commissioner of Customs, Mr. Drew, and a friend, have been pelted with stones by the populace, and would, no doubt, have sustained serious injury, but that they captured a burly native and made him walk with them. It is said that the Chinese are about to enlarge the mouth of the Lung-kei Creek to a width of 500 feet, so as to form a sheltered anchorage for native craft.

Further particulars regarding Mr. Markham's trip to the birthplace of Confucius have been received. It appears that he was treated with much civility by the people on the way, and by the Duke, who is the head of the Kung family. The petty officials were, however, discourteous and obstructive. Mr. Markham reports that the mineral wealth of the Shantung province has been under-estimated, rather than over-rated. The cultivation of silk is prosecuted with much success, and it is said that a peculiar species of worm, which there lives on the paper tree, produces a silk which when manufactured defies moths.

A correspondent at Keelung of the *Evening Courier* states that negotiations are being made for the purchase, by a Foreigner, of a coal mine there. As yet the price asked is much too high. The people are described as being very like the New Zealanders, they

Digitized by Google

fight furiously and tattoo the body. The writer found great difficulty in travelling through the country, being able only to penetrate fifteen miles in one direction, owing to the savage nature of the people and their enmity to white men. Several buildings are in course of erection for the Customs' Service. Other buildings are in abeyance pending instructions from Peking.

The *North China Herald* remarks:—"It is satisfactory, amid the fuss which the Yangchow affair has raised at home, to learn that it has fully attained its object, and taught the officials and people to behave to Foreigners with civility. Some gentlemen, who visited the city a week or two ago, met with no annoyance, nor did they hear a single 'Yan-kwei-tze' or other objectionable epithet."

The following remarks upon the Hankow import market are from Messrs. Townend and Co.'s Circular:—The fallacy of supposing that prices of Manchester fabrics here are governed by the cost at home has been fully shown during the past three weeks, for the market has steadily declined notwithstanding favourable telegrams from London. Too little regard is placed upon the enormous quantity of cotton cloth manufactured in these provinces, and it is the comparative dearness or cheapness of such that regulates the demand for Foreign cloth. Until within the past three years an average crop of cotton in Oopack and Oonam was estimated at about 800,000 piculs; since then the yield has been more or less a failure; and last year, with a larger area than usual under cultivation, not more than 500,000 piculs were gathered in, supplemented by imports of 170,000 piculs, which has so far proved sufficient for all requirements. As regards the future the consumption of Grey Goods is likely to increase if prices are moderate; and the demand for the current year of Shirtings, T-Cloths and Drills is estimated at between 1,800,000 to 1,900,000 pieces, against about 1,500,000 pieces last year.

### RUSSIA'S ENCROACHMENTS TOWARDS CHINA.

The *Shanghai Recorder*, in commenting upon a singularly able letter by Mr. E. Cunningham, of Messrs. Russell and Co.'s, upon affairs in China, after noticing the temptation for conquest which the country presents, observes that Russia has accumulated conquest after conquest on the Jaxartes. She had annexed Bokhara, and has thus joined frontiers at that point with Great Britain. What is there more likely than that by threatening British India she may keep England employed while she swoops from her commanding position in the Amoor territory, and makes herself mistress of the whole or of a part of China? Her influence is even now paramount in Eastern Turkistan, and the ruler of Yarkand is represented as seeking the joint guarantee of England and Russia against Russian advance. Already the Khan of Khokand and the Prince of Yarkand are at loggerheads, and the former has invoked Russian aid. Here, then, there are at once an opening into China from the east, and an opportunity of menacing Cashmere from the north. Considering these temptations and opportunities; bearing in mind the fact that the conquest of China demands not men, but money; and recalling the practice of Russia hitherto and her political principles, it cannot but be believed that in process of time China itself will be threatened by her powerful neighbour. People do not sufficiently realise the fact that no enormous army is required for the annexation of China.

## HONG KONG.

The latest advices from Hong Kong are those of April 29. The outward French mail of March 25 was delivered on the previous day. The *China Mail* gives the following items of news:—

The three hundred emigrant coolies of the French vessel *Tamaris*, from Macao to Havana, mutinied off the Straits of Sunda; some of the coolies were killed, but eventually the officers and crew took to the boats, leaving the captain and interpreter on board, but first disabling the rudder. Steamers have been despatched from Batavia in search of her.

A memorial Church to St. Francis Xavier has been consecrated on the island of San Juan, some sixty miles from Hong Kong, the scene of his death in 1552. A large party of residents went over to the ceremony, which was very impressive.

An interesting evidence of the estimation in which Foreigners are held in this immediate neighbourhood is furnished by a placard which has been forwarded to us, and which is said to be in circulation in the neighbourhood of Hu-men (Bocca Tigris), where Mr. Nacken and one other gentleman of the Rhenish Mission are stationed. This interesting document sets forth that "Barbarian wolves," under the cloak of endeavouring to spread their religion, have established depots at Macao, Canton, Fatchan, Hunling, and Hong Kong, where they are in the habit of administering pills of an aphrodisaic nature to the females whom they can bring under their influence for the purpose of producing certain results, and the writer, who describes himself as a Sing-shi-tao-jan, somewhat as we should say "one who is wide-awake," implores the natives not to let women who have taken such drugs intermarry with their families, and to do all in their power to put a stop to the proceedings of the "barbarians" in question. Is this another development of the "shining cross" business, or a merely local matter? Does it represent a wide-spread dislike to our medical and other missionaries, or is it the individual effusion of a crackbrained Chinese who owes some Foreigner a grudge? The matter may not amount to much, but a little inquiry as to its source may be worth while.

A report has reached us that the emigrants on board the *F. A. Palmer*, which left on the 14th inst. for San Francisco, rose *en masse* when near Amoy and murdered the entire crew. We have made inquiries, but can obtain neither confirmation nor denial of the report. The only thing we have been able to ascertain is that it has been circulated during the day about the colony.

Intelligence has been received that the portion of the telegraphic line mentioned as being under contemplation for connecting Hong Kong, by way of Saigon and Bangkok, with the British Indian system, which is to connect Saigon with Brumhpenh, a few miles from the capital of Cambodia, has been actually commenced. Orders go forward this mail for the shipment of wires, &c., to complete the line from thence through Cambodia and Siam to Bangkok. It is understood that the Concessionaires have adopted for their enterprise the name of the "International Indo-Chinese Telegraph Company." It will be thus seen that active steps have been taken to make the concessions that have been obtained of immediate use.

We regret to learn the loss, on the Pratas Shoal, of the American barque *Arthur*, Captain Crosbie, which left here for Tientsin on the 19th. The second mate, with part of the crew, came in here to-day, in the ship's gig, and it is from his report that we learn the fact of the wreck. The captain, his wife, and nine of the crew took to the lifeboat from the wreck, and towed the gig for about half a mile, when the rope broke, and the two parted company, the captain setting sail and the second mate plying oars, both intending to make for Hong Kong. The second mate, however, is the first to arrive. Immediately on receipt of his disastrous news two gunboats, one American and one English, left the harbour in search of the missing boat, which it is supposed, or hoped, has found a refuge in Amoy. We are informed that the gig's crew, together with the crew of a pilot-boat who went to their assistance, were robbed by pirates outside the harbour. If so, we trust the gunboats will meet with the rascals.

The existence has been discovered of a native hospital in Hong Kong to which sick Chinese emigrants were sent when their lives were despaired of. The revelations are as sensational as disgusting, and immediate steps have been taken for its suppression. The *Daily Press* gives the following particulars:—"It is now some years since an application was made to the Government to grant a site for the erection of a Chinese hospital, to be looked after by native medical practitioners. A site was granted, and a building soon appeared; but, beyond the granting of the land, the Chinese seem to have been left pretty much to themselves, as far as the management is concerned. When it is stated by a public officer that the place when seen by him was a living grave, and that he had seen many strange sights during his residence in China, but never saw such a dreadful scene before, it is difficult, in fact almost impossible, to give in detail the sight seen by both Mr. Lister (Acting Registrar-General) and the coroner who visited the so-called hospital together. It is described as filthy in the extreme, and yet having keepers. The patients were huddled together on the floor without any distinction as to the nature of their diseases, so that a man going into the den with a complaint of really no great moment might be laid alongside a man raging with typhus or some other contagious disease, and, of course, take it from him. Can it be expected for one moment that anybody once entering such a place could ever leave it alive? Mr. D. R. Caldwell, in reply to the coroner, said "he had known patients to leave the hospital alive, but not within the last two years or so." The class of people who go to this awful place are members of families, coolies who are turned out of lodging-houses; for when a man gets sick in a coolie lodging-house the other residents object to his remaining in the house, and accordingly the master of the house gets a couple of coolies, hurries the sick man to the "Yee-tsze," and leaves him there to die a lingering and miserable death. It would perhaps be hard to say so, but there are very good grounds for believing that many of the poor wretches who were discovered in the place never received any food. Inspector Grey found out that the native doctor had not been near the sick for two days, and he also discovered that the dead were allowed to remain in the place some indefinite time. After they had breathed their last, living and dead were mixed together; and furthermore, Mr. Stewart has said that one keeper to whom he spoke could not tell if one of the patients were alive or not. The dreadful revelations which have come to light have induced Mr. Stewart and Mr. Lister to draw up a joint report, which has been submitted to the Governor, who it is to be hoped will order such steps to be taken as will prevent any such abuses existing in the colony. Mr. D. R. Caldwell has said he will, at his own expense, have matters mended at the Yee-tsze, but it is hardly a private matter. It seems more a subject to be dealt with by the Government, who granted the land on which the hospital is built, and ought naturally to be supposed to have exercised a proper supervision over the place by the appointment of an officer who should have regularly inspected the place."

The news of Mr. Douglas Lapraik's death was received with great regret in Hong Kong. The *China Mail* of April 20 says:—

"We are sorry to learn that a telegram has been received by this morning's mail announcing the death of Mr. Douglas Lapraik, a well-known and respected resident. Many to whom he has lent a helping hand in bygone times will regret his loss. He was believed at the time of his death to be the oldest British inhabitant of this colony, and his death has thus severed a link between the present and the past.

Digitized by Google

"Apropos of the above, we may note that the second 'oldest inhabitant,' Mr. G. A. F. Norris, took his departure by this morning's steamer, having during his long business career earned the respect and esteem of the community by his uprightness and courtesy. Who succeeds to the vacant title of 'the oldest foreign-born inhabitant?'"

THE RESULTS OF THE BURLINGAME MISSION.

Commenting upon the results of the Burlingame Mission, as shown in the despatches which have passed between Lord Clarendon and the Chinese Ambassador, the *Daily Press* observes that if the Chinese have proved themselves good diplomatists, they have at the same time shown themselves to be bad statesmen. They have attained their object, but the object itself is not the one which is required to serve their best interests. They have pledged themselves to exercise a central power, and by means of this pledge have obtained an amount of consideration which would not otherwise have been extended to them. While they have contrived to scrape out of their immediate engagements, they have incurred an additional amount of responsibility for future days.

The policy for China to pursue was to make as little noise and as much progress as she could. She has adopted precisely the opposite course. Great bluster, gigantic promises, insolent and retrogressive action form the *role* which she has enacted since the Burlingame Mission was despatched, and if she has succeeded in obtaining an additional respite, she has done so only upon terms that are far more difficult for her to carry out than those which existed before. She has renewed her bill, but at heavy interest, and has done nothing towards providing for her future liabilities.

Unless really and honestly prepared to make some advance, it was very unwise for her to call the prominent attention of the Home Governments to the state of affairs existing in the country, and to subject all her shortcomings to the sifting of public discussion at home, which is bound ultimately to discover their true nature.

TEA-BUYING IN CHINA.

The *Overland Trade Report* has the following, based on an article in the *Shanghai Evening Courier*:—

The *Shanghai Evening Courier* has some pertinent remarks concerning the difference in the valuation of teas in China and at home. It states that it is impossible at the beginning of a season to say what a tea is worth, and that this is one of the principal causes of the constant heavy losses. Teas are bought for what they may be worth, not for what they are worth. Several chops of equal quality may be bought at the beginning of the season at the same price, and yet be sold on the London market within a fortnight of each other, at prices varying 6d. to 1s. per pound. Such cases occur every season; but notwithstanding this, tea tasters are in the habit of valuing tea to ½d. per pound, and usually paying for it the extreme price it might fetch under a combination of favourable circumstances, utterly ignoring the risk they run, should there be instead (as there usually is) a combination of unfavourable circumstances. This, the above paper adds, was disastrously exemplified last season at Foochow. The condition of the teas when put on the market was such as to admit of their purchase as fine; but when they arrived, three months later, in England, the longest stretch of imagination could not elevate them into anything but teas of the poorest description. They were, as was frequently remarked, little better than "common Congou." And this change in the character of tea on its voyage home occurs every year; sometimes, but rarely, as in the early part of the season of 1865, the change is in favour of the tea; more often, as in Hankow in 1864 and 1866, and in Foochow the last three seasons, it is the reverse. In 1866, those buyers who had the opportunity of seeing samples of their teas when they were being offered for sale on the London market failed to recognise them, and some that they remembered to have possessed, when in China, both strength and flavour, turned out thin and tasteless, with no more flavour than chopped straw. This, combined with severe competition at the opening of the season, is noticed as being the constant cause of disappointment. The remedy, however, is simple, but few people apply it. If teas were bought at prices at which it would be difficult to lose, instead of at prices at which it is almost impossible to gain — if they were bought, not for the quality they possess now, but for the quality they will be likely to possess six months later; if tea tasters, instead of trying to overreach their neighbours, would wait their chance, and take it when it came; and if, instead of putting a problematical value on a tea, they would acknowledge their inability to value it within so many pence per pound, complaints about the disastrous nature of the trade would be at an end, and a safe and profitable business would be done. Till then, let the motto of the tea trade be—*caveat emptor*.

## BORNEO.

—o—

SARAWAK.

The Sarawak steamer *Royalist* has brought intelligence of the destruction of a Lanun pirate prahu by the assistant resident of Bintulu. It appears that the pirate crew, before they were destroyed, had captured ten prahus, killed eight men, besides wounding and making prisoners of many others. The intelligence of the pirate making havoc among the trading boats along the coast was received in Sarawak before the news of her destruction, and the two Government steamers, *Heartsease* and *Royalist*, went to sea at once in search of the pirates. Shortly after leaving Sarawak they spoke H.B.M.'s gunboat *Starling*, Lieut. Commander Crowdy, who had come down from Labuan on the same errand as themselves. We shall shortly publish full particulars of the whole matter, and in the meantime are glad to be able to congratulate the Sarawak Government on the speedy satisfaction taken by their officers on the murderous villains who have begun again to disturb the peaceful trade of the coast, which, since the *Rainbow's* well-known action in 1862, has continued hitherto unmolested.

## STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Dates from this port are to the 6th May. No later advices had been received from home than those mentioned by last mail. The *Straits Times Overland Journal* gives the following summary of news:

There has been no political movement of any consequence since our last, only one emergent meeting of the Legislative Council having been held to rectify some clerical error discovered in one of the Ordinances passed at the previous sitting. Colonel Woolley, who has succeeded Colonel Cooke in command of the troops, took his seat as member of the council at the meeting. The work set down for the next ordinary meeting is the Pilots Bill, Pensions Bill, Fire Bill, and reservation of Peace Bill. The Pilot Bill has now been put in the form recommended by those chiefly interested in shipping at the port here, and will be a very proper addition to our law. The Pensions Bill and Fire Bill are not in final form yet. The Preservation of Peace Bill has passed the first and second reading, and should in the customary routine pass the third as a matter of form; but, as the object of the Bill is to continue unconstitutional power in the Governor's hands for another twelve months, enabling him at any moment to suspend the Habeas Corpus Act, and as there is no ground whatever to apprehend a disturbance of the happy quiet that prevails over the Settlements, we would be glad to see it withdrawn or thrown out. The powers contained in the Bill were delegated to the Governor at the time of the Chinese Riots at Penang, but there can be no excuse for continuing them now. The Council have consented unanimously to the introduction of a new code of criminal law, based upon the Indian Penal Code, and the preparation of this will probably form one of the chief labours of the Council during the Session.

The chief local interest of the last nine days has been centered in the races, which came off with very fair success on the 28th-30th of April and 1st of May. Only two days had been appointed, and it was dark on the 30th before the programme was completed,* and the race for the *China Express* Cup (liberally presented by the proprietors of that well-known paper) had to be postponed to the following day. Three horses entered for this race, viz., Zuleika, Sir Harry, and Tom Sayers, handicapped, 10st. 4lbs. for the first two, and 9st. 7lbs. for the latter. Tom Sayers was entered merely to give more interest to the race, for, barring accidents, he had not a ghost of a chance. The time appointed for the race was a quarter past five o'clock, and a little before that hour a sudden heavy shower of rain came on, and the rain continued drizzling more or less during the rest of the afternoon, rendering the course somewhat slippery and heavy, and causing some discomfort to the few spectators who attended to witness the race. The jockey of Sir Harry, owing to some unaccountable misunderstanding, did not make his appearance at the appointed hour, and a race between hack ponies was improvised, and proved of an amusing character. At a quarter to six the three horses appeared at the post and a beautiful start was effected, Zuleika inside with a slight lead, and Sir Harry close on her flank, with Tom Sayers pegging stoutly behind on the outside. Rounding the corner past the Hospital, Zuleika and Sir Harry were neck and neck, and they raced excitingly along the straight run on the opposite side, round the head of the course, and into the straight run in, exactly in the same position, neither appearing to gain an inch on the other. A dead heat or very close finish was anticipated by the spectators, but, unfortunately, about half-way to the winning-post, Zuleika appeared to slip in the same place where she fell the previous day, and Sir Harry at once took the lead, and steadily increased it, winning by about a couple of lengths. Time 2 m. 8 sec. The mare, according to her old fashion, would answer to neither whip nor spur after she had been fairly headed. We think this race was the prettiest and best contested of the whole meeting. In all the other races, except the Roadsters', either of two horses had certainties, one only having been lost to them, we may safely say, by a mere accident. In this race both horses were pretty equally matched; both appeared in good condition, Sir Harry especially in far better form than on the previous days, and the result was as good and fair a race as could be desired.

In concluding our notice of this meeting we may be permitted to add that, while the sport afforded this spring has not been up to the average, it has been quite as good as could have been ex-

* A brief outline of the first two days' racing was given in our last.

Digitized by Google

pected from the little interest now taken in races by the majority of residents, and our best thanks are due to those spirited owners who entered horses simply to make a meeting and for sports' sake, but who have not been successful. We trust the owners of Zuleika and Spero, especially of the latter horse, whose breakdown must have been very disappointing, will have the luck they deserve at our next meeting.

From Java we learn that all is quiet, and that no attempt has been made to follow up the recent disturbances.

# Commercial Report.

## STRAITS, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—Although the native coin had advanced in value, imports generally continued dull, the native dealers being disinclined to enter into operations of any moment. There had been sales of Cotton Yarn, 7 lbs. Shirtings and Velvets, but the majority of importers held for higher rates. Grey Shirtings: A few sales of 7 lbs. at quotations; heavier goods held for higher rates. White Shirtings: Small demand at quotations. Other Cotton Goods in slight demand. Cotton Yarn: Nos. 16 to 24 in fair demand, Nos. 28 to 32 and 38 to 42 occasionally inquired for. Woollen Goods: A few sales of Camlets, Lastings, and Alpacas at low prices. Metals: With the exception of a small demand for Nail Rod Iron at easier rates, there was nothing doing. The current quotations were as follow:—G.E. Grey Shirtings, 7 lbs., per piece, $2.40 to 2.45; 8-4 to 8-6 lbs., $2.65 to 2.70; G.E. White Shirtings, $2.70 to 3.20. T-Cloths, 6 to 7 lbs., $1.75 to 2.15; Velvets, Black, 35 yds. 22 in., $8.25 to 9.75. Cotton Yarn: Nos. 16-24, per picul, $45.50 to 46.25; 28-32, $47.0 to 47.50; 38-42, $49.0 to 49.50. Camlets, BBB and S, per piece, $18 50 to 14.50; SS, $12.0 to 13.0; Cloth, Medium and Broad, 54 in. to 64 in., per yard, $0.80 to 2.0; Long Ells, Assorted, per piece, $8.0 to 8.75; Blankets, per lb., $0.45 to 0.50. Metals and Sundries: Iron, flat and round, per picul, $3.30 to 3.60; nail rod, $3.30 to 3.60; hoop, $3 to 3.40; pig, $1.15 to 1.20; wire, $6.50 to 7.0; Steel, $6.50 to 7.0; Lead, $7 to 7.50.

HIOGO AND OSAKA.—The unsatisfactory position of the metallic currency, coupled with the extraordinary fluctuations in the value of Kinsatz, had continued to exercise a most depressing effect on the market, and the business transacted had been of the most meagre description. Cotton Goods: Limited inquiry for 7lbs. and 9lbs.; Grey Shirtings 8.4 to 8.8 almost neglected—good demand for Victoria Lawns, fair inquiry for Chintzes and Turkey Red Cloth. Woollens: Plain and Figured Orleans and Lustres in rather more favour, Mouseline de Laines fairly saleable, Blankets dull. Metals: Some demand for Lead and Tin Plates.

SHANGHAI.—Cottons: The business in Plain Cottons during the time since the departure of the last mail had been almost entirely confined to speculation, and this chiefly in Grey Shirtings of standard quality. No material alteration in prices of any description of goods had taken place, but importers were not anxious to realise, in view of telegraph advices, reporting firmer prices in Manchester. Grey Shirtings, of Eagle Chop, had been bought at Tls. 2.2.3 to 2.2.5. White Shirtings and T-Cloths were weak. Prices of English Drills were maintained. Sales of American Drills and Jeans had been made at the quotations given. There had been a small business in Fancy Goods at previous prices. Woollens: Prices of Camlets remained low. Scarlet Long Ells were unchanged, but Assorted colours were quoted lower. Metals—Lead: Firm at quotations, but sales of small lots only. Nail Rod and Bar Iron had shared in the general depression of trade. Holders were firm, and as stocks were reducing, dealers, most probably, would soon re-enter the market at former quotations. Coal: Three cargoes from Sydney had added further to the depression. Rates were much against shipments from England and Australia, and prices were nominally lower, with no transactions to report. The current quotations were as follows:—Grey Shirtings, 7 lbs., per piece, Tls. 1.9.6 to 2.0.0; 8.4 to 8.6 lbs., Tls. 2.1.9 to 2.2.4. White Shirtings, Tls. 2.3.0 to 3.5.0. T-Cloths, 6 lbs., Tls. 1.5.5 to 1.7.7; 7 lbs., Tls. 1.6.5 to 2.0.5; 8 to 8.4 lbs., Tls. 2.0.5 to 2.6.0. American Drills, 40 yards, Tls. 4.2.0 to 4.3.5. American Jeans, 30 yards, Tls. 3.6.5 to 3.7.0. American Sheetings, 40 yards, Tls. 3.8.0 to 3.9.5. English Drills, 40 yards, Tls. 3.9.5 to 4.1.5. Dutch Drills, 40 yards, Tls. 3.8.0 to 3.9.5. Velvets, per yard, Tls. 0.1.9 to 0.2.1. Camlets, English, Tls. 12 to 12.6. Spanish Stripes, per yard, Tls. 0.5.5. to 0.80. Medium Broad and Habit Cloths, Tls. 0.9.0 to 1.6.0. Long Ells, Scarlet, 24 yards, H.H., per piece, Tls. 6.5.0 to 6.5.5. Iron, nail rod, small size, per picul, Tls. 2.3.0 to 2.4.0; fair to good assorted, Tls. 2.4.5 to 2.5.5; Hoop, Tls. 1.9.0 to 2; Flat and Round, Tls. 2.6.0 to 2.7.0; Lead, Tls. 5.9.0 to 6.2.5; Tin Plates, per box, Tls. 4.8. to 4.8; Steel, per tub, Tls. 3.5.0 to 3.6.0. Coals, Cargo quotations afloat, Cardiff, per ton, Tls. 10 to 10.2.5; North Wales, Tls. 9 to 9.2.5; English, Tls. 9 to 9.2.5; Anthracite, Tls. 11.

HANKOW.—The present mail's advices report a limited business in Manufactured Goods. The demand for Grey Shirtings had been very trifling, the latest quotations being Tls. 2.0.2 to 2.0.5 for 7 lbs., Tls. 2.1.9 to 2.2.3 for 8¼ lbs., and Tls. 2.8.0 to 3.2.0 for 9 to 9¾ lbs. White Shirtings were rather firmer, owing to small supplies. T-Cloths were plentiful, and these goods had not improved. Drills also remained neglected. With the exception of Black Velvets, which were somewhat lower, being in large supply, Fancy Goods remain in moderate request, at previous prices. Woollens and Worsteds.—Camlets had been sold at some extent, prices remaining without alteration; S S Tls. 12.0.0 to 12.7.0 per piece. Long Ells were quoted Tls. 6.6.0 to 6.7.0 for assorted, and Tls. 6.6.0 for Scarlet, with few transactions. Spanish Stripes were neglected. Medium Cloth had been in slight inquiry at m. 1.0 to 1.1.5 per yard, closing weak. Best assortments of figured Orleans had found purchasers at Tls. 4.0.0 to 4.1.0.

FOOCHOW.—The transactions during the interval had comprised 900 pieces 8¼ lbs. Grey Shirtings, at $3.10 per piece. 1,000 pieces 7 lbs. T-Cloths, at $2.55 per piece; and 40 boxes Tin Plates, at $7.70 to $7.80 per box.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated 28th April:—Cotton Yarn: Present stocks are in the hands of a few large holders, who have persistently continued to ask rates much above dealers' offers, and who are fully aware that buyers must accede to their terms as the quantities at Canton are very small, and a certain native demand must be supplied. Sales have not been large, but prices may be quoted easily $2.50 per bale dearer for Nos. 16 to 24 and 28 to 32 of ordinary make, while the finer grades of these numbers are fully $5 per bale higher. Nos. 38 to 42 are not in so much request, but holders are equally firm in their ideas respecting them. Piece Goods: The sales reported have been almost entirely "to arrive," and transactions on the spot have been very trifling. Intelligence from the northern markets has not been so favourable; and though foreigners strongly endeavour to uphold prices, Chinese purchasers show evidently their intention of holding off for further developments or lower figures. The quantities offering of 7 lb. Grey Shirtings are very small and with a fair demand rates are rather higher, other weights are weaker and a slight decline in values has taken place. T-Cloths have undergone no noticeable change, though very few sales are reported and quotations are as previously given. Prices of White Shirtings are without alteration, the demand of the moment is entirely for very fine or very common qualities. American and English Drills have both been enquired for at a further advance, but there are none on offer and no sales have been made "to arrive." Offers were made for the Drills by the Nettie Merryman, but were refused; they will go on to Shanghai for sale. Demand continues for Turkey Red Shirtings, which are again dearer. Sheetings are not wanted, a small lot is now held upon the market, but no offer can be obtained for it. Woollens: Nothing has been done and very little change can be noted in the market. Long Ells are very dull of sale, and there are no buyers of Scarlet at greatly reduced figures. Spanish Stripes are lower and no demand exists. Lastings are down ten cents. A slight demand has arisen for Blankets, and prices have taken a turn upward. Metals: A most trifling business has been done. Nail Rod Iron and Bar Iron have receded in values and are sensibly lower. Hoop Iron and Steel maintain their former figures. Lead is extremely dull of sale, and is quoted 20 cents lower, while there are willing sellers to arrive at a further marked reduction. The inquiry for Tin still continues, and Malacca is quoted at a further advance, but there is none in stock. Quicksilver is dearer. Coal: A still lower range of price is noticeable. Arrivals have been two small cargoes of Sydney, 689 tons. Sales, 733 tons Sydney at $6.80 per ton. Ginseng: Holders, both native and foreign, are still very firm; the demand is exceedingly slight, and such offers as are made are generally below the market. The only sales have been 6 casks good crude at $145 to 146 per picul. Current quotations:—Cotton Yarn, Nos. 16 to 24, per bale, $125 to 135; 28 to 32, $135 to 145; 38 to 42, $140 to 145; Grey Shirtings, 7 lbs., per piece, $2.55 to 2.65; 8.4 lbs., $2.80 to 2.87½; White Shirtings, $2.45 to 5.10; T-Cloths, 6 lbs., $1.98 to 2.25; 7 lbs., $2.20 to 2.60; 8 to 8.4 lbs., $2.70 to 3.30; Velvets, 22 in., per yard, $0.25 to 0.27; American Drills, 40 yards, 15 lbs., per piece, $5.25 to 5.50; Spanish Stripes, scarlet, per yard, $0.78 to 0.94; assorted, $0.74 to 0.93; Medium, Ladies', and Habit Cloths, $1.15 to 2; Long Ells, Scarlet, per piece, $8 to 8.50; Assorted, $8 to 8.50; Camlets, SS Scarlet, $17.50 to 18; SS Assorted, $16.25 to 16.50; Blankets, per lb., $0.45 to 0.63; Iron Nail Rod, per picul, $2.80 to 2.85; Round, Square, and Flat Bar, $2.70 to 2.80; Hoop, $2.90 to 3.; Wire, $7.25 to 7.50; Lead, $7.10 to 7.30; Steel, per tub, $4.25 to 4.50; Quicksilver, per picul, $63.50 to 63.75; Coals, English, per ton, $10; Welsh, $10.75 to 11.

SINGAPORE.—Since the last mail a moderate amount of business had transpired in the principal Manchester staples; prices of Shirtings had been easier and the demand quiet; T-Cloths continued in good request; White Shirtings had been in active inquiry, at an advance on previous rates. Grey Shirtings, 39 inch, 8¼ lbs., had been moving off at a reduction on last quotations, and business had been limited at $2.87½ per piece; 7 lbs. also lower, but in more inquiry at the close of the market, stocks much reduced; stock of 6 lbs. in first hands very light. 45-inch Shirtings had met with little inquiry, sales reported under last quotations. Maddapollams inquired for, but rates lower. T-Cloths of all descriptions in good request, prices firm, and stocks much reduced; market nearly cleared of the lighter qualities; finer makes had continued in fair inquiry. Dutch Drills unchanged, stock light, and sales trifling. Grey Yarn of low numbers dull and no sales reported; stock light. White Shirtings of fine qualities in active demand at an advance of 10 to 15 cents per piece; a considerable business had transpired; medium and low makes in small stock and good inquiry, last rates well maintained. Imitation Irish Linens in demand at previous rates; stock light. Maddapollams inquired for; prices firm. Cambrics Nos. 15's and 16's had sold to some extent at about last rates; No. 24's. had not received much attention. Figured Shirtings in more inquiry, and quotations firmer. Dyed Goods had been without animation. Plain and Figured Shirtings remained as last quoted. In Metals a sale of assorted Glasgow Iron was reported at rather better rates; there was little inquiry for Bar Iron; Nail Rod difficult to place; a small sale reported at $2.62½ per picul. Swedish Steel in moderate request. Lead in less demand, owing to the lower prices ruling in China; there were no stocks; importers had sold for arrival at a considerable reduction in price. Stocks of Copper Sheathing light. Yellow Metal firmer; stock light; Brass Wire of the lower numbers inquired for. Gunpowder unchanged. The stock of Coals was very heavy, both with importers and consumers; there was no inquiry, and quotations were nominal.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—During the short period that had elapsed since the despatch of the last report there had been very little business done in the Tea market. Settlements had been confined principally to common grades for the London market, and were estimated at about 500 piculs. The chief inquiry had been for good medium and fine leaf, of which there were very few parcels on the market. Stocks of all descriptions, except very common, were almost exhausted; prices were without change. Quotations:—Common, $19 to 23 per picul; good common, $24 to 25; medium,

Digitized by Google

$26 to 28; good medium, $29 to 32; fine, $34 to 37; finest $38 to 39; choice, $40 to 42.

SHANGHAI.—Black: The business since the departure of the last mail had been restricted to the settlement of one chop (466 chests), at Tls. 19½. Settlements for the fortnight, 466 chests; re-shipments on owner's account, nil; stock, 3 chops, or 847 chests. Green: In Green Teas we have to report a marked falling off in the settlements, though prices generally were without change. The remaining stock of 5,224 half-chests consisted chiefly of common and undesirable chops of Fychow and Shanghai-packed teas. The settlements comprised 1,692 half-chests Moyune, &c., at Tls. 23.5 to 36; and 831 half-chests Shanghai-packed, at Tls. 22 to 28. Settlements for the fortnight, 2,523 half-chests; re-shipments on owners' account, nil; stock, 5,224 half-chests. Quotations (duty paid, exchange for credits, six months' sight, at 6s. 2d. per tael, and freights at £4 per ton) were as follow:—Fychow and Moyune Gunpowder 1s. 6½d. to 3s. 9d., Imperial 1s. 2½d. to 2s. 11d., Young Hyson 1s. 2d. to 3s. 4d., Hyson 1s. 2d. to 3s. 5d., Twankay 9½d. to 1s. 2½d.

FOOCHOW.—Messrs Odell and Co. report as follows:—Since the date of our last about 420 chests common Congou have found a buyer at previous quotations. We are as yet without any information from the country regarding the new crop Teas, but it is said that the Season will be somewhat later than usual, owing to continued cold and wet weather. Settlements for the fortnight have been:—Congou, 420 chests at Tls. 16.8 per picul ship off.

CANTON.—There had been no settlements, and no musters of new leaf had been shown, but samples were expected.

## SILK.

YOKOHAMA.—The appearance of a few buyers in the market, coupled with a rise in Boos, had been sufficient to make silkmen raise their pretensions, and the partial weakness in prices advised in our last had entirely disappeared. Settlements had been restricted to 150 bales, and quotations must be considerably raised again. Arrivals had been about to the same extent as sales, leaving stock as before. It was composed chiefly of Oshus, among which were a few nice parcels. The current quotations (laid down in London at exchange 4s. 7¾d.) ruled as follows:—Hanks, Mybash, Sinchu, &c., best, 36s. 2d. to 38s. 1d.; ditto, medium, 32s. 7d. to 35s. 4d.; ditto, inferior, 27s. 6d. to 31s. 5d. Oshu, extra, 36s. 6d. to 31s. 8d.; best, 34s. 2d. to 36s. 2d.; mediam, 29s. 5d. to 31s. 5d.; inferior, 25s. 6d. to 27s. 6d. Coshu, medium, 29s. 5d. to 31s. 10d.; inferior, 25s. 6d. to 28s. 8d. Sodai, medium, 27s. 6d. to 29s. 5d.

SHANGHAI.—The following is from Messrs. C. J. Skeggs and Co.'s Circular, dated 22nd April:—The business during the interval amounts to about 500 bales, 371 of which have already gone forward by the Messageries Impériales and the American mail. Prices for the most part have been unchanged, the greater portion of the late shipments being on native account; but as the inclination of foreigners is now decidedly against buying at such high rates at this late period of the season, the market closes weak for medium and common silks, and a decline of 10 to 15 taels might be obtained on chops, none of which however have been taken. The stock is reduced to about 600 bales. Hitherto the weather has been unseasonably wet and cold, so that hatching will not commence o anothe week yet, or fully ten days later than last year. Reports rom the country are unfavourable regarding the mulberry, but it is still oo early to obtain any reliable information.

## STRAITS PRODUCE.

SINGAPORE.—Transactions had continued on a limited scale; there is not much alteration to report in quotations, but the decline in freights may probably cause more firmness in rates; supplies of most of the principal staples had been coming in slowly. Gambier had been taken up to the extent of about 750 tons, chiefly at $3.02½ per picul, and the market closed firm at that rate. Black Pepper scarce, and supplies of inferior quality; the price was firmer, and the demand mostly for Calcutta and China. White Pepper also advanced in value; supplies very small. Pearl Sago had been taken up to a moderate extent at lower rates. Sago Flour declined in value. Tapioca rather firmer. Gum Damar much wanted, and there was active competition for the small supplies. Gunnies lower in value; stock heavy. Gutta Percha in active demand at high rates. Bontyne Coffee nominally the same as last quoted; no supplies had arrived; no transactions in Bally Coffee reported. Rattans of the best quality scarce, and in good demand. Tin in active demand, and the rate touched $32½ per picul; but on receipt of telegrams of the lower quotations on the home market prices gave way, and last sales had been at lower rates; there was still a good inquiry, chiefly for America.

# Shipping Intelligence.

## ARRIVALS.

At YOKOHAMA.—From London, April 8, Eastern Queen.

At SHANGHAI.—From London (reported by telegram), previous to May 21, Wild Deer, Min, Lennox Castle.

At HONG KONG and CANTON.—From Hamburg, April 25, Maria Miles, from London (reported by telegram), Windhover.

At MANILA.—None.

At SINGAPORE.—From Liverpool, May 2, Nestor (steamer); from Sunderland, April 27, Crofton; from Cardiff, 28, Mathilda, Bertha; from Glasgow, 29, Edinburgh Castle; from London, Eleanor; from Liverpool, Dewa Gungadhur; from Clyde, Lochleven Castle.

## DEPARTURES.

From SHANGHAI.—For New York, April 16, Anglo Saxon.
From AMOY.—For New York, April 20, Benefactor.
From HONG KONG and CANTON.—For London, April 20, Ameer.
From MANILA.—For England, April 14, H.B.M.S. Perseus; for New York, 11, Agnes; for Boston, 15, Mindoro.
From SINGAPORE.—For Liverpool, April 29, Foxglove; for Boston, May 5, Lord Raglan; for New York, 1, Joseph Holms.
From PENANG.—None.

## VESSELS LOADING.

At SHANGHAI.—For London, Forward Ho; for New York, Tycoon (full).

At FOOCHOW.—For London, Achilles (st).

At HONG KONG and CANTON.—For London, A. W. Stevens.

At MANILA.—For London, Rosa del Turio, Southern Cross; for England, Cavalier, China; for Hamburg, Valadora; for New York, Hazard, Rattler, W. G. Russell; for Boston, Sooloo.

At SINGAPORE.—For London, Queen of Devon, Siberia; for Liverpool, Wemyss Castle; for Havre, Amaranth; for New York, Selim; for Boston, Aurelia, Humbolt.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—There is no vessel on the berth either for London or New York. The rate to the latter port per P.M. steamer is $45 per ton of 40 feet.

At SHANGHAI.—For London the Forward Ho has taken the berth at £4 per ton. A slight improvement has taken place in coasting business. For New York there is no inquiry for tonnage.

At HONG KONG and CANTON.—For home no fresh charters have been

Digitized by Google

effected, and rates remain unaltered. There are nine disengaged vessels in port, representing 3,026 tons.

At MANILA.—The Rosa del Turia gets £3 10s. dry Sugar; £3 15s. wet, £4 Coffee, and £4 10s. Hemp. Cavalisa goes to Iloilo to load for the English Channel at £4.

At SINGAPORE.—To London and Liverpool the rate is £2 5s. to £2 10s. per ton.

## REPORTS AND CASUALTIES.

The various vessels trading on the coast of China, have not brought anything regarding the weather worthy of note during the past fortnight, and, consequently, the winds and currents in the China Sea may be summarised in a few words. Between Hong Kong and the Straits the weather has been fine, calms and light airs prevailing, and the neighbourhood of this island the weather has been much the same, excepting occasional breezes from the land. In the North of China the weather had been very variable, light winds and calms being succeeded by strong winds from the N.E. the last efforts of the departing monsoon. The Northernmost port being open, steamers and sailing craft are busy reopening the trade which has been closed for so long. The temperature for the time of year may be said to be low, and the usual warm weather has only just appeared, and is considered late. In addition to the loss of the Der West, the N.G. barque Ingeburg has been lost off Amoy, and the American barque Arthur has been wrecked on the Pratas, the third wreck there this year, and another instance showing the necessity for the immediate erection of the so much talked about lighthouse.

At TABLE BAY.—April 28, Chine and Havane, Robart, from Macao, and sailed 29 for Havana; 23, Guttenburg, Schlossbauer, from Shields, and sailed 26 for Anjer.

## BIRTHS, MARRIAGES, AND DEATHS.

—o—

### BIRTHS.

CAIRNS—On the 23rd April, at Mosque-terrace, Hong Kong, the wife of R. H. Cairns, of a son.

DAVIES—On the 18th April, the wife of C. Langdon Davies, Esq., of a son.

RITCHIE—On the 14th April, at Hong-que, Mrs. J. Ritchie, of a son.

WALTER—On the 1st April, at Shanghai, China, the widow of Theodore Walter Esq., of a daughter.

### MARRIAGES.

MACLEAN—MACPHERSON.—On the 8th June, at St. Mary, North End, Fulham, by the Rev. Beaumont Byres. John Alexander, only son of Hugh Maclean, Esq., Hythe Hill, Elgin, to Isabella Martha Harriet, only daughter of the late Lieut.-colonel Gileas Macpherson.

### DEATHS.

CLARKE—On the 26th April, at his residence, 31, Wyndham-street, Hong Kong, Capt. John W. Clarke, aged 52 years, a native of Auburn, New York, U.S.A., and lately of Tahiti.

HILL—On the 21st March, at Newchwang, William Harry, twin son of Charles E and Elizabeth A. Hill, aged three years and eight months.

## MISCELLANEOUS.

—o—

JONAS DANIEL VAUGHAN, Esq., F.R.G.S., late of Singapore, has been called to the Bar by the Honourable Society of the Middle Temple.

CAPTAIN CHAPMAN, 2nd battalion 5th Fusiliers, has been appointed aide-de-camp to Sir Hercules Robinson, Governor of Ceylon.

NEW COLONIAL BISHOP.—We understand that Her Majesty has been pleased to approve the nomination of the Venerable Walter Chambers, Archdeacon of Sarawak, as successor to the Right Rev. Francis M'Dougall, D.D., Lord Bishop of Labuan and Sarawak, who, in consequence of impaired health after many years' arduous service, has been compelled to resign his See. Archdeacon Chambers has filled the post of missionary in the diocese for many years. He thoroughly understands the native habits and language, and as the bishopric is of a purely missionary character it seems impossible that a better selection could be made. The bishop's income consists only of £360 per annum from the Colonial Bishoprics' Fund, and £300 from the Society for the Propagation of the Gospel.

AN experiment made in the neighbourhood of Frankfort to introduce the culture of the Japanese silkworm has failed, as they eat only the leaf of a certain species of oak, and breed only in dark rooms. In accordance with the arrangements lately made between England and Germany, patterns and samples of English goods are allowed to enter the Zollverein duty free, the same advantage having been granted to German manufacturers by the British Government.

EIGHT 64-pounder steel muzzle-loading rifle guns, manufactured by Messrs. J. Vavasour and Co., London Ordnance Works, Southwark, have been proved at the Royal Arsenal, Woolwich, with 10 lb. charges, and answered most satisfactorily. The weight of the guns is 55 cwt. each, and they are intended to form part of the armament of the Japanese corvette Iho-Sho-Maru, now building at Aberdeen for the Prince of Higo. Mr. Edward Harrison, through whom the order was given for the guns, and Captain Hamilton were present at the proof, with Major-General Charles Burnaby, R.A., superintending their manufacture.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

*LONDON, MONDAY, JUNE* 14.

## THE COLONIAL PRESS.

NEWSPAPERS in small colonies or distant English settlements, are not as home newspapers. The points of difference are numerous and unavoidable, and most of them arise from the narrow limits of the circle of readers to which a paper of the former class appeals for support. The identification of the Editor (who, of course, is personally known to nearly every member of such a community) with his journal; the division of such communities into cliques, between which there is often bitter jealousy and rivalry; the tendency of popular opinion to run to extremes, thus encouraging strong passions that seek an outlet in angry, vehement language; the existence, in many cases, of a standing feud between the government and the governed—these, and many similar causes, conspire to render the editing of a Colonial paper a task of no little difficulty, even to a *litterateur* possessing calm judgment and an equable temperament. To exclude all elements of strife—controversy is far too mild a term—would be to render the paper colourless and insipid; while, by admitting them, no little danger is incurred of a breach of the peace. It is not very long since we heard of a horse-whipping case in Yokohama, arising out of a newspaper quarrel, and now we have to deplore a discreditable *fracas* of a somewhat similar nature in Singapore. A personal encounter arising from such a cause is seldom honourable to either side. The press has its privileges as well as its duties, and unless the privileges be respected, the duties cannot be efficiently discharged; at the same time, editors of local papers, knowing what dangerous ground they stand on, should ever be cautious in the exercise of their prerogative. Anonymous journalism, though theoretically the rule among English communities abroad, as it is at home, is practically impossible in small Settlements. Here, any person who considers himself aggrieved by a newspaper article never dreams of attempting to trace the writer of it and administer corporal punishment; he has his legal remedy against the publisher of the journal, if he can show the article to be libellous or injurious, and has to be content with that. In the East, it is otherwise; the writer of such an article is generally known, or may be traced, and is, moreover, easily accessible for purposes of assault. Editors are frequently led, willingly or unwillingly, into the admission of personalities into their columns, and from the causes just enumerated, the victims of such attacks are as easily betrayed into forgetting their dignity, and seeking redress in the *argumentum baculinum*. A "row" of this sort, after being a nine days' wonder, is generally soon forgotten, but its injurious effect on the dignity of journalism, and on the beneficial influence that should everywhere be exercised by the press, is of longer duration. We sincerely trust that for the future the discussion of local politics in Singapore will be carried on without any such unseemly collisions as that we have alluded to.

Anything like official interference or "gagging the press," as practised in France under the Napoleonic *régime*, is as entirely foreign to English ideas in a distant colony as it is at home; yet this seems to be a danger from which journalism in Hong Kong is by no means exempt. Many of our readers have heard of the case of *Regina* v. *Saint*, which was decided by Chief Justice SMALE, in the Supreme Court of Hong Kong, on the 12th of March last. The history of this case will of course be stale to those who have read the Hong Kong journals for 1868 and 1869, but we will recapitulate the leading facts for the benefit of readers in other Settlements, and at home; merely premising that a more deliberate and unjustifiable attempt on the part of the law officers of the Crown to crush a newspaper could hardly be conceived.

The Portuguese settlement of Macao had long been notorious for the unscrupulous manner in which a vile traffic in human life had gradually grown up there under the convenient disguise of "coolie emigration." Chinese labour being greatly in demand for the West Indies, the Chincha Islands and other places, the hiring of coolies, and transporting them in ship-loads from various ports in China to these places, soon developed into a large trade, giving employment to numbers of vessels, and handsome profits to the speculators, who hired the coolies under agreements for a term of years, and sold those agreements to great advantage to the employers of labour in Cuba and elsewhere. Abuses soon crept into the system. Unsuspicious Chinese were deluded by false representations into signing agreements they could not understand; they were even kidnapped by hundreds; shut up in "barracoons" until a vessel was ready to convey them, when they were crowded on board like cattle; and finally cruelly ill-treated and overworked when they reached their destination. In Hong Kong a stringently-framed Passenger Act was put in force, with other ordinances that rendered any such mal-practices impossible there; and not only the English Government, but, with a single exception, all the Governments of civilised nations exerted themselves to prevent their subjects engaging in so nefarious a trade. The exception was Portugal. In Macao, therefore, the coolie trade took firm root; there it was fostered, and there it flourished, until its horrors equalled those of the African slave trade in its worst days. From 1862 to 1866 one Senhor AMARAL was Governor of Macao; he was succeeded by Senhor HORTA, who in his turn gave place, in 1868, to Admiral de SOUZA, the present Governor. Under Senhor AMARAL'S administration it was more than suspected that the local Government not only connived at the slave trade carried on under the cloak of emigration, but even profited by it; and under Senhor HORTA'S sway matters got even worse, until an act of absolute piracy was committed on certain junks, their crews being forcibly kidnapped, cruelly tortured and ill-treated, and subsequently shipped off as slaves. This was too much even for the Portuguese Government; and on receipt of the news at Lisbon orders were despatched to Macao to institute criminal proceedings against the offenders. It was soon found that the evidence taken in the course of these proceedings implicated several Government officials, and the form of the investigation was changed, a commission of inquiry being appointed to report on the whole affair. Before long, however, there was a change in the Portuguese Ministry; and soon after that the Commission was quietly smothered, and all proceedings abandoned. The Portuguese Parliament admits representatives from the Colonies; and shortly after his return to Europe, Governor AMARAL was elected by the constituency of Macao to represent that colony in the Legislative body. When the above-mentioned change in the Ministry took place, Senhor AMARAL took office, and in the new Cabinet held the post of Minister for the Colonies; and it is a significant fact that the suppression of the Macao inquiry took place almost immediately after his accession to power.

This brings us to the origin of the trial, *Regina* v. *Saint*. In May, 1868, the *China Mail*, an old established and ably conducted Hong Kong paper, published two short paragraphs referring to the facts above recapitulated. The first contained an allusion to so some rumours then current, to the effect that the charges arising out of the coolie traffic had been hushed up at the instance of Senhor AMARAL, and that a certain sum of money known to have been collected in Macao and remitted to Lisbon was appropriated as hush money. The paragraph concluded by expressing a doubt that the influence of Senhor AMARAL, even aided by this corrupt expenditure, would be successful in preventing an ultimate exposure. The second paragraph was contained in a letter from a correspondent at Macao, addressed to the editor. The writer confirmed the truth of the rumours alluded to in the previous paragraph, and added, from his own knowledge, that Senhor HORTA (the then Governor) had received positive instructions from the previous COLONIAL MINISTER to punish the offenders; that it was doubtful whether he would have carried out his instructions willingly,

Digitized by Google

but that he had been spared the necessity of executing them at all by the receipt of counter orders from Senhor AMARAL after the change in the Ministry.

Within a fortnight after the appearance of these paragraphs, the Acting Attorney-General of Hong Kong, at the instance of Senhor HORTA, filed three separate criminal informations against Mr. SAINT, the proprietor of the *China Mail*, for libel (1) upon the King of PORTUGAL, (2) upon Senhor AMARAL, and (3) upon Senhor HORTA. These informations complained of the paragraphs in question as "false, scandalous, and malicious libels," which were fraught with "great damage, scandal, infamy, and disgrace" to Senhors AMARAL and HORTA and their Sovereign. In all of them the Acting Attorney-General evidently relied on the PELTIER case, in which a British subject was convicted of a libel on Consul BUONAPARTE, and he left the argument for the Crown in the hands of Mr. POLLARD, Q.C., who contended that the plaintiff was not entitled to be allowed any plea of justification. Mr. HALLYAR, the defendants' counsel, ably and earnestly argued against a recurrence to a "barbaric" form of procedure for the punishment of a British subject at the instance of a Foreign Power on such absurdly inadequate grounds. The Chief Justice (SMALE) declined giving judgment until he had heard the Acting ATTORNEY-GENERAL on the matter. Thenceforward occurred postponements and delays innumerable on the part of the Crown; but at last, after repeated efforts, defendant got the case set down for judgment on March 12. Of course it was given against the Crown. His Lordship held that the due and temperate discussion of the notorious abuses connected with the coolie traffic, as carried on under the wing of the Macao Government, was for the public benefit. Although the articles complained of gave offence to that Government, no communication was held with the Governor of Hong Kong, but the Portuguese Consul at Hong Kong (a mere commercial agent) consulted Mr. POLLARD, and the result was that three *ex officio* informations were filed against the defendant, without even affording him a chance of apology or explanation. These informations were founded on the old case of JEAN PELTIER, tried in 1803—and it was strange if that case was law at the present time. Commenting on the oppressive nature of the proceedings, his Lordship observed that "the tendency of filing "three informations in one day against one man, for "two articles to the same purport, was to unduly de-"press the defendant, and by a sort of mental torture "induce him to make the most abject apology, whether he "could prove what he had said to be true or not; and that "such proceedings were especially oppressive in a colony "where the costs of litigation exceeded the like costs else-"where in the British dominions or in the world. Even "success in three such suits might be ruin to a man if he were "not rich." Judgment was recorded for the defendant, with all costs. If Mr. SAINT'S persecutors choose to exhaust every means in their power of harassing their victim, they may even now appeal to the Judicial Committee of the Privy Council; but it would be with but very small chance of success, we should imagine. The case has however been sent home, we believe, to Lord GRANVILLE, for his advice as to what is to be done with it.

By avoiding repetitions and legal technicalities we have endeavoured to make our outline of the proceedings as intelligible as possible; but it conveys a poor idea of the harsh, oppressive spirit in which they have been conducted. The extraordinary manner in which the Hong Kong Government allowed itself to be used as a tool, to do the dirty work of the corrupt Government of Macao, and the apparent hostility exhibited by an English legal functionary towards an English journal, which sought, from the purest motives, to expose the horrors of the vilest of all vile traffics, are difficult to understand, and still more difficult to dwell on with equanimity. "Scandal, infamy, and disgrace" indeed! Why, the whole system of government at Macao was a "scandal" and its officials were steeped in "infamy and disgrace" by their own action in giving encouragement to the horrible traffic. If an intense loathing for man-stealing, torture, slavery, and murder, expressed on many occasions in no measured terms, be libellous, the *London and China Express* has certainly earned that title. We earnestly hope that the English press will be induced to take this matter up, and let it be known far and wide that public opinion in this country cordially endorses the wise and enlightened decision of Judge SMALE.

It is with great satisfaction that we are able to add that the Governor of Hong Kong, Sir RICHARD MACDONNELL, never approved of the Acting Attorney-General's proceedings, the prosecution having been undertaken without his official sanction. And it is still more satisfactory to know that the day of the man-stealers in Macao is over, the present Governor, Admiral DE SOUZA, having sternly discountenanced their iniquitous trade since his arrival. Macao is no longer the "Coolie colony;" but so long as its former evil notoriety is remembered, the case of *Regina versus Saint* will be remembered too; and we hope the lesson it conveys will not be lost on future generations of colonial officials who may be tempted to try the experiment of "gagging the press."

---

HENRY TURNER IRVING, Esq., has been appointed Colonial Secretary for the Island of Ceylon. Mr. IRVING entered the Colonial-office in 1854, became private secretary to Sir F. ROGERS, then Under Secretary of State, in 1862, and was appointed Colonial Secretary of Jamaica in 1866.

---

MR. BURLINGAME has arrived in London from Paris, and is staying at the Grosvenor Hotel; we understand that he will remain here for a short time only.

---

## PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

The half-yearly general meeting of this company was held on Friday, the 11th inst., at the offices, Leadenhall-street; Mr. P. D. HADOW, the chairman, presided.

The CHAIRMAN, in moving the adoption of the report (the principal part of which we gave in our last issue), said that it was fourteen months up to the 30th of April last since the extended contract for postal service came into operation, but nothing had occurred during the past six months to alter the views he had expressed at the last meeting. The result of their operations had been satisfactory and encouraging, although not to any great extent, except that they had had an entire immunity from casualties. The mails were delivered every Monday morning in London with the greatest regularity. It occupied a good deal of time and attention to work their complicated service with advantage, and great credit was due to their commanders, officers, and agents for doing their work so successfully for the company. With regard to their commercial relations trade had been unusually depressed, but they were in hopes that an improvement would occur before long. He was glad to say that they had earned their present dividend without any such assistance as they had had in the corresponding period of the preceding year, from the supply of ships for the Abyssinian expedition. He hoped things would improve, so that the company's receipts might be equally good at the end of the year. The directors would try to do their best to secure as much net revenue as possible. It was with sincere regret the directors had to report the decease of their much-esteemed colleague, Mr. J. C. Ewart, who was the oldest member of the board, and, although he resided chiefly in Liverpool, he was ever ready to attend the board, and give them the best assistance in his power.

Mr. GIBBONS seconded the motion for the adoption of the report.

A long discussion ensued, in which Mr. GLIDDON, Mr. BADDELEY, Mr. J. JONES, Mr. GRANT, and other shareholders took part, as to the exercise of more economy, and respecting the competition of various steam companies extending along nearly the whole route of the company's steamers.

The CHAIRMAN, in reply to questions, stated that a reduction had been effected in the expenditure at Malta, and that wherever it was possible further reductions would be made. It was true they had more ships than were actually in use, but it was necessary that they should have vessels with which to replace others in cases of accident. It had been the constant practice of the board to build the ships by tender, but they had found it expedient in some cases to depart from that course. None of the employés of the company were engaged in any commercial pursuit apart from the company's business. With respect to the accounts, he said a regular weekly audit was kept up, and, in addition to that, the Post-office authorities had a right to inspect any papers which they might deem necessary; so that, in effect, the system of audit was more complete than that employed by any other company in the City.

The report was unanimously adopted; a dividend of 3 per cent., free of income-tax, was declared for the half-year ending the 31st of March last, payable on the 25th inst.

The meeting was then made special, to elect an auditor in the room of the Earl of Leven and Melville, who had resigned. There were two candidates, Mr. Rait and Mr. Godfrey, but the latter gentleman was elected, and the proceedings concluded with a vote of thanks to the chairman and directors.

# Monetary and Commercial.

The scheme for constructing a line of telegraph connecting the Indian system with Hong Kong, *via* Bangkok and Saigon, has been announced in London through the medium of *The Times*. The details are identical with those given in our issue of the 17th ultimo, and it is added that the line is expected to be in operation by the summer of 1871.

It is stated, we believe somewhat prematurely, that the Russian Government has granted to certain parties in London the concession of the right of laying a submarine cable, with a monopoly for forty years, from the mouth of the River Amoor, in Eastern Siberia. The cable is to run to Japan, and thence to Shanghai, the Government undertaking to complete, as far as the mouth of the river, the land line of telegraph wire which already crosses the greater part of Siberia, up to a point within 600 miles from the coast. In connection with this affair it is said to be proposed to make arrangements for obtaining the co-operation of the Telegraph Construction and Maintenance Company.

A telegram states that the *Hull* steamer, with the Black Sea cable on board, arrived at Gibraltar on the 6th inst. This cable is 100 miles in length, and forms a portion of the new telegraphic route between England and India, *via* Prussia, Russia, and Persia, now in course of construction for the Indo-European Telegraph Company by Messrs. Siemens, a member of which firm, Mr. C. W. Siemens, has gone out to superintend personally the operation of submerging it. Two-thirds of the land lines through Persia have been completed, and the construction of the remainder of the line through Russia, to unite with the Prussian telegraphs, is making rapid progress.

The United Kingdom Electric Telegraph Company have announced the opening of the new direct submarine cable, *via* Denmark and the Baltic to Russia. This route is stated to be also available for messages to India, China, Australia, Persia, &c.

The market for bar silver is inactive, and the quotation shows no change, at 5s. 0½d. per ounce. Mexican dollars are rather firmer, at 4s. 11¾d., there being a slight demand for China, and very few here.

The suspension has been announced of Messrs. Livesey and Thorne, cotton brokers, at Liverpool, with an establishment also at Manchester. They occupied a high position, and their liabilities are probably large. The event, which is attributed to the recent numerous failures among cotton spinners, has created surprise and anxiety, but they state they will be able, with time, to pay everyone in full.

The failure has also been announced of Messrs. Felix, Leach, and Co., cotton spinners and manufacturers, Enfield Mills, near Accrington, and a meeting of their creditors will be held next week. They enjoyed fair credit and an average extent of trade.

The gross liabilities of Messrs. Shore, Kirk, and Hargreaves, who suspended on the Manchester Stock Exchange on the 3rd inst., are stated to amount to about £150,000, but of these £120,000 will be covered by securities. The circular issued attributes the stoppage to default on the part of certain of their principals.

At a meeting of the creditors of Mr. G. Mason, manufacturer, of Clayton, near Bradford, on the 5th inst., the liabilities were shown to be £60,000, and an agreement was adopted to accept a composition of 7s. 6d. in the pound, provided that sum can be guaranteed—a point which will be determined at a future meeting.

At an adjourned meeting of the creditors of Mr. Shackleton Smith, of Gomersal, worsted spinner, the liabilities were stated to be £16,500, and a composition of 7s. in the pound was ultimately accepted.

Messrs. John Clough and Co., machine woolcombers, of Bradford, are announced to have failed, with liabilities for £5,000.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton on the 12th inst., was, in gold, to Madras, £755; in silver, to Singapore, £10,480; to Hong Kong, £24,889; total, in gold, £755: in silver, £35,369.

## BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month and four months ended the 30th April show the total declared value of the exports of British and Irish produce and manufactures for the month of April in the last three years to have been as follows:—April, 1867, £13,804,908, April, 1868, £14,575,152, April, 1869, £15,624,475. This statement exhibits a satisfactory increase in the general volume of the export trade, the month's total being larger by £1,049,323 than in April last year, and larger by £1,819,567 than in April, 1867. The principal increase is in woollen manufactures, apparel, haberdashery, hardwares, and iron. The yarns of cotton, wool, and linen have each been exported to a less extent than in the corresponding month of last year. The month's shipments of cotton manufactures—£4,290,061—though less by £405,667 than in April, 1868, are slightly above those of April 1867. The exports for the first four months of the present year show likewise a steady recovery from the effects of the prostration of trade which was caused by the disastrous events of 1866. The figures are annexed:—Four months, 1867, £56,186,529; four months, 1868, £55,998,068; four months, 1869, £58,428,080.

As regards the imports of the principal articles, the total for the month of March (being the latest date to which values are given) indicates an expenditure upon a moderate scale, as will be seen by the following:—March, 1867, £18,405,599; March, 1868, £21,463,367; March, 1869, £19,448,415. For the first quarter of the present year, however, our imports have been at a much larger rate than in the corresponding periods of the two previous years; and this fact, combined with the imports of foreign securities, must be held to account for the recent rise in the value of money. The present figures are as follows:—Three months 1867, £44,346,529; three months 1868, £46,446,999; three months 1869, £49,090,619. The quantities of imports for April—being one month later—show a marked diminution as regards several of the principal articles, including cotton, corn, wine, and sugar; but there is an increase in wool and coffee.

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East:—

## ARTICLES OF IMPORT.

—o—

### TEA.

The following is from Messrs. W. J. and H. Thompson's Circular :—

The market has not shown much activity since the 3rd instant, but prices continue firm, especially for all the common grades of Congou. The better kinds have not been pressed, and occasionally improved rates are obtainable compared with those ruling a month ago. Foochow Congous. Good common commands 1s. 1d. per lb. Fair continues at 1s. 1½d. to 1s. 2d., without much enquiry. The few sales made of good and fine at 1s. 4d. to 1s. 10d. per lb. have occasionally been at better prices, but at the same time there is no general quot-

Digitized by Google

able advance. Black leaf congous. Good common stands at 1s. 1d. per lb., and little is to be had under this price; fair, as last quoted, at 1s. 1½d. to 1s. 2d., have been fairly dealt in. Good and fine are but little inquired for at the prices lately ruling. Tayshan Congous: Several parcels have been on offer, but the prices bid have been so low in most cases that sales have not resulted. Scented Capers: Fair Common has been sold at 11d. to 11½d. per lb., showing no improvement in price. Scented Orange Pekoes: Fair has been sold at 1s. 1½d.; good, at 1s. 3d. to 1s. 4d.; fine, at 1s. 7d. per lb. Green Teas: Finer grades in request, but the common descriptions are heavy of sale.

SILK.—No change has occurred in the market since we last reported.

COTTON.—The favourable tone of the Liverpool market noted in our last continued until the 8th inst., when there was a falling off in the demand from the trade, and the disposition of speculators to operate was clearly less strong, whilst holders were more willing sellers. Yesterday (9th instant), however, the market was steady, and prices remain unaltered, the current quotations on the spot being—Surat, 7¼d. to 11¼d.; Madras, 8¾d. to 9¾d.; Bengal, Scinde, &c., 8d. to 8¾d. Fair Dhollerah, 10⅛d.; fair Oomrawuttee, 10¼d.; fair Broach, 10d.; fair Bengal, 8⅜d.; fair Egyptian, 12¾d.; fair Pernam, 12¼d.; middling Boweds, 11¾d.; middling Orleans, 12⅛d. The London market has also become quieter in tone, but prices remain firm.

COFFEE.—The last auctions of Plantation Ceylon went off with improved spirit, full previous rates being obtained, and occasionally a slight advance, the prices realised being as follows:—Triage and ordinary, 45s. 6d. to 58s.; good and fine ordinary small gray, 61s. to 66s.; low middling to middling gray, 67s. to 70s.; bold gray, 71s. 6d. to 73s.; small colory, 65s. to 69s; low middling, 71s. to 72s; middling, 72s. 6d. to 78s.; good middling, 78s. 6d. to 81s. 6d.; pea-berry, 72s. to 85s. 6d. The demand for Native Ceylon continues inactive at former rates.

COIR GOODS.—Yarn: At the decline recently noted the market has been comparatively steady. Auctions have, however, been large, and some qualities have declined 10s. to 20s. per cwt.; fine realised extreme rates; superior is wanted. Ceylon, very good, £40 to £41; good to good middling, £33 10s. to £37; common, £27 15s. Fibre: Has been in rather improved demand, and fine to superior qualities may be quoted higher. Ceylon: Fine, £28 5s. to £28 10s.; middling, £22 to £22 5s. Rope: In fair demand; Cochin, 1 to 1½ in., £33; 2 to 2½ in., middling, £29 10s.; 4½ to 5 in., £31 15s.; 3½ to 4 in., £28 15s. China Grass: Without change; quotations are nominal.

COCOA-NUT OIL.—The demand is still inactive; a sale of 15 tons yellowish Ceylon at £41 is reported.

GUMS.—Benjamin: Siam cheaper; 11 cases sold at auction at £15 10s. to £15 15s. per cwt. for fair second quality; and £7 15s. to £8 ordinary. Sumatra steady; of 42 cases offered, a few only sold at £5 for middling third. Copal: Nothing of any interest doing. Damar: Firm; of 41 cases at auction, two-thirds sold at 87s. 6d. to 88s. per cwt. for fair quality, in sorts. Gamboge: Steady; 7 cases at auction sold at £16 to £16 5s. per cwt.

GALLS.—There is an almost entire absence of inquiry for both China and Japan.

ISINGLASS.—At public sale 49 cases Penang sold at firm prices, middling to fair tongue, 3s. 7d. to 3s. 9d.; small and dark, 3s. 5d. to 3s. 6d.; fine pale, 4s. 1d.; fine pale leaf, 4s. 2d. to 4s. 3d.; middling, 3s. 9d. to 3s. 10d.; ordinary and inferior, 3s. to 3s. 7d.; Manila sort, 2s. 8d. to 2s. 9d.

PLUMBAGO.—At the auctions 459 barrels Ceylon were all sold, lump at about two shillings decline; dust at steady prices, chiefly ordinary to middling small lump and dust at 11s. to 13s. 6d.; fair small lump, 16s. 6d.; two small lots good, 19s. 6d. to 23s.; good and fine dust, 10s. 3d. to 11s. 3d.

RATTANS.—A sale is reported of 5,110 bundles Penang at 3s. 2d. to 3s. 6d. per hundred.

RICE.—The market continues extremely dull. Of 1,714 bags very good white Bengal of the new crop, offered by auction 982 bags sold at 13s. to 13s. 6d., the remainder bought in at 14s. By private contract 100 tons Garden Siam landed have been sold at 8s. 1½d. cash; 300 tons Rangoon at 9s. 9d., ex ship, and 500 tons Rangoon afloat at 9s. 4½d. per cwt.

SUGAR.—There is a fair demand for good and fine qualities at full prices, while common sorts are dull at lower rates. There have been no sales of Penang or Manila.

SAPANWOOD.—At auctions ten tons Siam were bought in at £11, and 20 tons Cochin were sold at £8 7s. 6d. to £9 5s. per ton.

TIN.—We have to report a quieter market for Straits at lower prices the current quotations being £134 on the spot and £131 afloat.

## THE TEA-BROKERAGE QUESTION.

The following relates to a question now warmly under discussion in the tea trade:—

"The present dispute between import brokers and some of the largest tea houses has caused such an amount of irritation that neither party seems inclined to reason calmly upon the points of difference. As the interests of those who are not involved in the dispute are affectd by it, I propose examining the grounds upon which each party are taking action, with the desire of showing which is right.

"The brokers say that though they are paid by the importer for taking charge of and disposing of his tea at the highest price obtainable, yet they are entitled to another brokerage when they sell those teas to a dealer, because they send the samples to the dealers' sale rooms, and in some cases wait upon them to receive their bids. They also state that it has been the practice to make this charge ever since the abolition of the East India Company's monopoly. Previous to that time they were paid only for purchasing on behalf of clients who instructed them to do so. They further allege that a number of wholesale dealers are still willing to pay the charge.

"The dealers who object to pay the charge say that no agent or broker can faithfully serve the conflicting interests of buyer and seller in the same transaction.

"That those who buy on their own judgment, and employ their own capital, get no adequate service for the brokerage charged; and that as regards sending on samples, it is done in the merchants' interests. If the import broker limits the competition for his merchants' teas to those dealers who pay him a buying brokerage, it is obvious that the importers' interests are prejudiced. If the import broker treats dealers and brokers on precisely the same footing, why does he charge the dealer 10s. per cent. and the broker nothing? There is not a single condition imposed upon the one that the other does not fulfil.

"It is alleged by the brokers that this movement is undertaken for the purpose of destroying the competition of buying brokers. This the dealers deny, and say that importers are much too intelligent to be misled by such statements; the tea market is much too large to be controlled by any body of dealers, however powerful they may be; that buying brokers with judgment and capital will always be required by a large number of smaller dealers; and it must be obvious, when merchants' samples are always open to the free competition of every buyer, and not restricted in the first instance to a few favoured brokerage-paying dealers, that the change advocated cannot fail to benefit the merchant.

"All that is asked is that there shall be a clear stage and no favour. Let merchants' samples be shown to brokers and dealers alike, and at the same time; and let the highest bidder be the purchaser, whatever he calls himself.

"These are the views put forth by the disputants.

"The intense and increasing competition in all branches of business must lead to the abolition of all merely complimentary fees, for which no substantial service can be honestly rendered.

"To profess to serve two masters is alike opposed to sound policy and morality. If an example of this is needed, a recent scandal in this city supplies it, and furnishes both a precedent and a warning. An individual professed to serve the interests of Messrs. Overend, Gurney, and Co., and some of their clients; he received fees from both, and it ended in the ruin of both.—Yours obediently, "OBSERVER."

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports are without change, and tonnage is plentiful; in coal freights from the Northern outports there is but little doing, and rates are without material alteration.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 40s. weight, 50s. meast. To Hiogo: 50s. weight or meast. To Tientsin: 60s. weight or meast. To Chefoo: 60s. weight or meast. To Shanghai: 35s. weight, 30s. meast. To Foochow: 50s. weight, 45s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Amoy: 50s. weight, 45s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £44. For Hong Kong: £33. For Singapore: £24. For Galle: £24. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. For Shanghai: £2 2s. 6d. For Hong Kong: £1 15s. For Manila: £1 10s. For Singapore: £1 6s. For Galle: £1 5s.

The Admiralty have invited tenders for the conveyance of about 67 tons stores to Hong Hong and small stores to Colombo.

## CASUALTIES.

The Mutlah, Ballard, from Manila, for Boston, which arrived at Mauritius, May 3, had experienced bad weather in the Straits of Sunda, from 1st to 8th April, during which she sprung foremast and topsail yards.

The master, Berryman, of the Westminster, which arrived at Liverpool May 10, from Zebu, reported that his ship grounded in Balabec Straits, and that shortly afterwards several piratical looking boats were seen, but the vessel got off and stood to sea.

## MISCELLANEOUS.

At TABLE BAY.—May 1, United Service (s.s.), Gaine, from China, Singapore, &c., left for London.

At MAURITIUS.—May 3, Mutlah, Ballard, from Manila, for Boston; April 18, Westward Ho, Kirk, sailed for Singapore; 22, Reveil, Chauvelon, from Monte Video, for Saigon.

The Ambassador, a composite vessel of about 750 tons register, intended for the China trade, has been launched at the Lavender Dock, Rotherhithe, in the occupation of Mr. Waller. She is the fourth ship of similar construction built by the same enterprising builder within the last four years, and will be managed by Mr. W. Lund, one of the owners.

The Austrian Lloyd's Steam Navigation Company have contracted with W. Denny and Brothers, Dumbarton, to supply two iron screw steamers of 1,400 tons burthen, to be named the Apis and Sphynx. These are intended for the trade between Trieste and East India, *via* Suez Canal.

There was launched on the 7th from the building yard of Messrs. Wingate and Co., Whiteinch, Glasgow, a handsomely-modelled, well-finished screw steamer of 450 tons, and 80-horse power, intended for the Asia Minor Steamship Company's trade in the Levant. This vessel has the much approved combined high and low pressure engines, circular boilers, carrying 70 lbs. of steam on a square inch, steam winches to each hatch, steam windlass, and all the most recent improvements for economising fuel and labour, and is also furnished with Davidson's patent surface condensers. As the vessel left the ways she was named Attalo by Miss Fanny Bell, daughter of Captain Bell, Craighew, Ayrshire, the managing director of the company. This steamer in her style and finish reflects much credit on her builders.

THE BEST ROOFING MATERIAL.

BRABY & CO. ALSO MANUFACTURE SHEET AND PERFORATED ZINC, ROOFING FELT, GALVANIZED BUCKETS, AND ALL OTHER ZINC AND GALVANIZED IRON GOODS, ILLUSTRATED LISTS OF WHICH WILL BE SENT FREE ON APPLICATION.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

HOLLOWAY'S OINTMENT and PILLS.

BAD LEGS.—When from injury, feeble circulation, foul blood, or neglected chill, inflammation, succeeded by ulceration, has attacked the lower limbs, the sufferer may turn for a cure, without fear of disappointment, to Holloway's celebrated Ointment, whose fame for such disorders has resounded throughout the habitable globe, and testimonials in all languages have been received, universally praising this celebrated Ointment. In all old cases Holloway's Pills should be taken while his unguent is used; both together are most effective, and the cure is accomplished painlessly and readily. Under their joint curative influence the worst wounds or ulcers assume a more healthy character, and shortly begin to fill up or contract, and soundly heal.

| London Agency . . . | LONDON & CHINA TELEGRAPH OFFICE, 2, Cowper's-court, Cornhill. |
| Head Office . . . . | KIACHTA, ORIENTAL SIBERIA, |

C. MITCHELL GRANT, Proprietor.

I have the pleasure to report to those interested in GRANT'S TRANS-MONGOLIAN TELEGRAMS SERVICE that the Line has realised during the past year the anticipations which I formed on issuing my last circular. The couriers have run with great regularity during the whole of the season, the average time between Tientsin and Kiachta being under twelve days. In many instances Telegrams from Shanghai have been delivered in London in seventeen days.

New contracts have been concluded for the Season of 1869.

The contract time from Kiachta to Tientsin is ELEVEN DAYS! a speed never yet attained by either the Chinese or Russian Governments between these two towns.

The Director General of the Telegraph Department, St. Petersburg, has given stringent instructions regarding all Telegrams addressed to my care. In future they will always be REPEATED as in "recommended" Telegrams without extra charge.

The community of Hong Kong can now take advantage of this line to reply to Telegrams or Letters received by the P. and O. Mail Service from Europe. A Telegram bag will be made up at Shanghai on the arrival of each P. and O. Mail Steamer from Hong Kong, and Telegrams from Europe will be forwarded by first steamer from Shanghai.

I have to thank my constituents for the increased support they have given to my line, and in order that it may be still further used, it is my intention to reduce the charges so soon as the capital due to subscribers has been paid up.

KIACHTA, December 31st, 1868. **C. MITCHELL GRANT.**

| Ditto ..... | Loudoun Catl | A1 16 yr. | E.I.D. | To follow |
| Hong Kong | Jas. Shephrd | A1 13 yr. | W.I.D. | With des. |
| Ditto ... . ... | Borealis ..... | A1 | E.I.D. | To follow |
| Yokohama (Kanagawa) | Napier..... | AA1 | E.I.D. | With des. |
| Nagasaki & Hiogo..... | Chanticleer .. | A1 10 yr. | E.I.D. | With des. |

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

---

BOMBAY, CALCUTTA, MADRAS, SHANGHAI, and HONG KONG.

GELLATLY, HANKEY, SEWELL and CO. will despatch the following high-classed SHIPS from the East India Docks, as under:—

| Port. | Ship. | Class. | Tons. | To Sail. |
|---|---|---|---|---|
| Bombay..... | Sir J. Lwne | A1 13 yrs. | 1,090 | June 25 |
| Do. ..... | Salisbury .. | A1 13 yrs. | 1,113 | To follow |
| Calcutta..... | Kg. Arthur | AA1 | 1,221 | June 20 |
| Do. ..... | Clyde ..... | AA1 | 1,161 | July 5 |
| Do. ... .. | Roodee ..... | A1 12 yrs | 1,036 | July 20 |
| Madras ..... | Chalmers ... | A1 13 yrs. | 594 | June 20 |
| Shanghai ... | Lammrmur. | AA1 | 1,054 | June 25 |
| Do. ... | Dartmouth.. | A1 14 yrs. | 933 | To follow |
| Hong Kong | Merse..... | A1 13 yrs. | 628 | June 25 |

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., No. 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

---

JOHN C. CAMPBELL will despatch the following splendid first-class VESSELS:—

| Destinatn. | Ships. | Class. | Tns. | Dock. | Date of Sailing. |
|---|---|---|---|---|---|
| Colombo .. | Ocn.Bauty. | A1 16 yr. | 585 | W.I.D. | July 1 |
| Do. ..... | Palmerston | A1 15 yr. | 855 | W.I.D. | Aug. 1 |
| Malaba Coast ... | Robt. Jones | A1 12 yr. | 287 | L.D.K. | June 20 |
| Do. ..... | Star of Jamaica ... | A1 9 yr. | 306 | L.D.K. | To fol. |

No. 22, Great St. Helen's, E.C.

---

Malabar Coast. To follow the Antipodes. Will meet with the usual quick despatch.

DIRECT for COCHIN, CALICUT, MANGALORE, and CANNANORE, the beautiful clipper ship, ROBERT JONES, A1 12 years, 287 tons register; E. ELLIS, Commander; London Docks.

This splendid vessel offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Mates' Receipts must be left before bills of lading can be signed.

L. H. and B. will not be responsible for demurrage on craft sent alongside without their instructions.

N.B. Shippers are particularly requested to have the Port for which the Goods are intended distinctly marked on the packages, to prevent delay and confusion on delivery.

---

In lieu of the "Fort Regent." To follow the "Ocean Rover." Will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful clipper ship OCEAN BEAUTY, A1 16 years, 585 tons register; ROBERT WATSON, Commander; West India Docks. This magnificent high-classed Clipper, built last year, under special survey, offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Rates:—15s. per ton of 20 cwt., or 40 cubic feet. No Creosoted Timber, nor manure of any description, taken by this vessel.

---

Steam from London to Shanghai direct. To sail punctually on the 28th of July.

FOR SHANGHAI, the splendid new composite full-rigged steam clipper ship OBERON, A1 16 years at Lloyd's, 1,200 tons register, 300-horse power; JOHN KEAY (late of the ARIEL), Commander; East India Docks. This fine ship, built expressly for the China trade, combining all the latest improvements of the fastest clippers, with the addition of the best description of marine engines, offers a most favourable opportunity to shippers of fine goods. The passage to Shanghai is expected not to exceed 75 days.

For Freight only, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

To sail on the 15th June.

FOR SHANGHAI, the Splendid Clipper Ship, DEVONPORT, A1 13 years, 1,188 tons register; THOMAS S. KENNEDY, Commander; East India Docks. This beautiful ship presents a favourable opportunity to shippers of fine goods, and has superior accommodation for Passengers.

For Freight or Passage, apply to SHAW, MAXTON and Co., 2, Royal Exchange-buildings, London, E.C.

---

To sail punctually on the 1st July. Last shipping day 29th June.

FOR SHANGHAI, the celebrated Clipper Ship, LAUDERDALE, A1 15 years; 851 tons register; G. MOODIE, Commander, East India Docks.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

Regular line of Packet Ship. With quick despatch.

FOR HONG KONG, the splendid Liverpool-built Clipper GEOLOGIST, A1 13 years, 854 tons register; M. CLARKE, Commander; East India Docks.

For Freight apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

---

With immediate despatch.

FOR YOKOHAMA (KANAGAWA) Direct, the well-known Clipper Ship CREST OF THE WAVE, A1 13 years, 776 tons register; ALEX. CROMBIE Commander; loading in the East India Docks. This splendid vessel is noted for her rapid passages, and discharging cargo without damage.

For Freight or Passage, apply to A. Wright and Co, 3, Great St. Helen's, E.C.; or to NORRIS and JOYNER, 60, Cornhill, E.C.

### THE MAILS, &c

The present inward mail arrived in London two days in advance of the due date, and its delivery commenced on Saturday morning; the bulk of our despatches, however, did not come to hand until between one and two P.M., too late to allow of our publishing on that day. This is not the first occasion on which the early arrival of a mail has been in great measure counteracted by the dilatoriness of the Post-office.

The next inward mail will be the French one leaving, Hong Kong the 20th May, due here on the 4th July. Our latest telegraphic advices *via* Galle are in advance of the mail leaving Hong Kong May 27; those of the succeeding mail (June 10).

## List of Passengers.

### PASSENGERS INWARD.

By this mail, to Marseilles, per P. and O. steamer *Nyanza*, arrived June 24.—From Penang: Captain Lloyd, Mr. Scott. From Galle: Mr. Wormald, Mr. and Mrs. Carver, Mr. Wright, Mr. Young.

To Southampton, per P. and O. steamer *Bangalore*, expected to arrive July 1.—From Yokohama: Mr. White, Mr. Darling. From Shanghai: Mr. Wells, Mr. de la Cour, Mrs. Polkington and three children. From Hong Kong: Mr. and Mrs. Greig, Mr. Clark, Mrs. Roper and two children, Mr. Brady, Mr. Nantes, Mr. McDonald, Mr Preacher. From Singapore: Mrs. Geiger and two children, Mr. and Mrs. Boyd, Mr. Watson. From Galle: Mrs. Thompson, Mr. Heamby, Mrs. Grinlinton, Mrs. Tindal's two children, Mr. Staners, Mrs. Berwick and two children, Mr. Brooke, and one second-class passenger.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Ripon*, from Southampton, June 26.—To Hong Kong: Mr. E. Monger, Mr. J. Russell Skey. To Singapore: Mr. J. D. Vaughan. To Penang: Mr. and Mrs. Thompson and child.

Per P. and O. steamer *Nyanza*, from Marseilles, July 4.—To Ceylon: Mr. Wm. Somerille.

Per P. and O. steamer from Suez, July 11.—To Penang: Mr. Victor Kruger.

Per P. and O. steamer *Massilia*, from Southampton, July 10.—To Shanghai: Mr Broughall. To Hong Kong: Mr. F. Cumberland. To Ceylon: Mrs. Halliley, child, and two sons, Mr. H. Skrine.

From Gibraltar.—To Singapore: Mr. A. Mosley.

Per P. and O. steamer *Tanjore*, from Marseilles, July 18.—To Ceylon: Mr. F. R. Sabonadière.

Per P. and O. steamer *Ripon*, from Marseilles, August 1.—To Batavia: Mr. and Mrs. Pietermaat.

Per P. and O. steamer from Suez, August 8.—To Hong Kong: Mr. and Mrs. Bade

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Advices from this port extend to the 30th April. The outward P. and O. mail of February 26 was received on the 20th April, and conveyed also London telegrams to March 19; but *via* Kiachta telegrams to April 1 had been received. The *Great Republic*, from San Francisco, was overdue. The *Japan Times* gives the following summary of news:—

The new scheme of centralising the Government of the country in the hands of the Mikado has received the important accession of the Prince of Kishiu. This noble, under the Shiogoon's Government, was in the position of a prince of the blood, his clan being one of the three called Sanke or Go-sanke, from which alone the Shiogoons were chosen. His consent to the proposition, following that of Owari, another chief of a Sanke clan, is therefore highly significant, as indicating the submission of the Tokugawa family to the new order of things. The Mito clan has not yet signified its intentions officially, but there seems no reason to doubt that it will follow the example of the other two branches of the house. The late Shiogoon was a cadet of this family, and its present head, Mimbutayo, is firmly loyal to the new Government. The Mito clan, however, has for many years been agitated by internal dissension, so much so, as to prevent its taking a prominent part in general Japanese politics, and we are bound to say that it would be highly satisfactory to be able to note its official adherence to the new system.

While on this subject, we have to correct the statement made last mail that Satsuma had been already invested with the governorship of his province under the Mikado. The mission of the Imperial envoy to Kagoshima was to convey to the Prince the thanks of the Government for his distinguished service in assisting to repress the Northern rebellion. The new scheme of government is referred to the great Council of Daimios about to assemble in Yedo, and until ratified by their vote everything remains *in statu quo ante*. This is almost a formality after all, as most of the chief princes and a large number of nobles of less importance have already sent in their lists of estates and men. The Mikado is believed to have left Kioto on the 18th inst., and is expected in Yedo early in May.

The Imperial fleet has left for the North; it sailed on the 21st. The ram *Stonewall* had to stop and put back into Uraga Harbour, in consequence of an accident to her machinery, or from the inability of the Japanese to work it, but we hear that she left again on the 28th. She is on the twin screw principle, and the Government are exceedingly foolish to have trusted her to native engineers. A report was current for a couple of days that she had actually foundered, and no one would have been surprised had the rumour been true. This absurd confidence in themselves, as soon as they find they have acquired a smattering of any art, is a great fault in the Japanese character, and much in the way of their advancement; their clumsy handling of the *Stonewall* is a striking and what may be called a concrete example of it.

The question of Municipal Reform will, now that the currency dispute is shelved for a time, come up again for, we trust, final settlement. A committee is hard at work framing a memorial to the Ministers, and as the claims of the community are nothing more than what are just and reasonable, we fully expect that the application will be successful. The old Municipal Council did all that was possible for it to do with the limited funds allowed it; it only gave up office when its estimates for the coming year's expenses were found to be exceeding its anticipated income, and stated that as its chief reason for dissolving. The Japanese then took the settlement in hand, squandered ignorantly upon it, by their own account, three times what we had ever had to spend, and have reduced it to a worse state in every particular—roads, scavenging, police—than when we handed it over to them. After

Digitized by Google

eighteen months' experience of their incapacity, we now ask to have the municipal government again placed in our hands with increased funds; and there is no doubt that, if our request be complied with, we shall soon improve Yokohama into something like what it ought to be.

A very sad accident has happened on the Tokaido, two Japanese children having been killed and one badly hurt by the careless riding of some Foreigners as yet unknown. We earnestly hope by next mail to be able to announce the detection and punishment of the offenders. It is of the last importance that they should be constituted an example. Not only on the Tokaido and in Yedo, but also in the Foreign settlement and native town of Yokohama, furious riding is the rule with men who in their boyhood hardly knew a horse from a cow, and never rode outside of anything, except an omnibus or a diligence, and life and limb are endangered every day. The people are naturally infuriated about the occurrence, and the worst results may be anticipated if justice be not done and the Japanese public satisfied. A small party of Foreigners on their way down from Yedo passed the spot immediately after the accident, and, but for the fortunate presence of a vice-governor of Yedo, who appeased the crowd by promising on our behalf a full examination of the circumstances, it might have gone very hard with them.

Next week is our race week, and we have a very fair promise of sport. The committee have very properly devoted much of their funds to the encouragement of native pony buyers, the Griffin Stakes having been restored, and with marked success. *Apropos* of sport, a very useful and sensible proposal has just been made, *i.e.*, that the Japanese Government should be solicited, through the Foreign Ministers, to name a close season, during which the sale of game, particularly pheasants, should be prohibited in the markets. Even now, at the very end of April, pheasants are freely offered for sale, and the result upon our next year's shooting may be anticipated.

The Club Germania have opened their new club house. The silk and tea markets are still very depressed; there is a slight improvement in the demand for manufactured goods.

Advices from Kobé give but poor accounts of the state of trade at the Southern ports.

From Nagasaki we hear of the sale of the *Arqus* steamer to the Prince of Isahaya for 53,000 dols., and of the British barque *John Eyston* to the Prince Satzuma for 17,000 dols., by Messrs. Rainbow, Lewis and Co.

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, May 6, 1869.

The English mail of the 12th March, bringing telegrams to the 2nd April, arrived on the 26th ult. A Chamber of Commerce telegram to the 4th April had been received *via* Kiachta on the 23rd ult.; and on the 1st inst. a trans-Mongolian telegram to the 13th April was received. The French mail arrived on the 4th inst., bringing London telegrams to the 7th ult. The steamer *Nile*, from London, arrived on the 28th ult., bringing sixteen passengers. The U.S. flagship, *Piscataqua*, arrived in the river on the 29th ult., having Admiral Rowan on board.

An Italian frigate, the *Clotilde*, Captain Carlo Alberto Racchia, arrived here on the 21st April from Yokohama, and laid off the Custom House until the 29th, when she left port. The appearance of the Italian flag, either naval or mercantile, is so unusual in this harbour, that large numbers repaired to the bund in order to assure themselves that an Italian man-of-war was really in port.

Mr. Alfred Robinson, a solicitor practising in the Supreme Court, has opposed the levy of the registration squeeze in his own person, and when summoned before the police magistrate, pleaded his own cause, or rather that of all British subjects in China, with much ability. Of course the case was given against him, and he therefore appealed to the Chief Judge, who confirmed the magistrates' decision. Mr. Robinson has announced his intention of appealing to the Judicial Committee of the Privy Council. The official report of the trial will be found in the *Supreme Court and Consular Gazette* of the 1st inst.

An important police case has been tried here before the full Supreme Court. One Giovanni Cavagnoro, a native of Genoa, charged the captain and chief mate of the British ship *William Chandler* with carrying him off on board from Vancouver's Island, and with sundry acts of gross ill-treatment, such as beating him severely for inability to work as an ordinary seaman—he being in fact a baker—towing him overboard, and the like. The prisoners stated that the complainant was entered on the articles as "Thomas Connolly, aged 32, Dublin," and a general and special denial of the acts of cruelty charged was put in. It was held that the captain had taken complainant away without having signed articles in compliance with the Merchant Shipping Act, that this was done contrary to complainant's wish, and that therefore the captain was liable for his maintenance in Shanghai, his passage to Genoa, and for 50 dols. to be paid him on arrival at his native place. The mate was fined 20 dols. and costs.

The Spring Race Meeting was held on the 28th, 29th, and 30th ult. and the 1st inst. As you already know, racing enthusiasm has quite died out here, and the greater number of the residents seize the opportunity afforded by the race week to run up-country or visit the coast ports. The Race Club this year reduced the cost of admission to the stand from Tls. 10 to 6 dols., but even this had little effect on the attendance. The first day was very wet, but the riders and spectators were more fortunate on the succeeding days.

The athletic sports, which had been often postponed in consequence of continued wet weather, came off on the 23rd and 24th ult., before a crowd of Foreign spectators, which the papers unite in describing as larger than was ever previously seen in Shanghai. None of the events were worth special notice.

On the 26th ult. a meeting of the supporters of the Anglo-Chinese Hospital was held, under the presidency of Consul Medhurst. The business was of a purely routine character. The funds of this valuable institution are not in a very flourishing condition, yet its sphere of usefulness is daily extending.

Mr. Dick, Commissioner of Customs at this port, has addressed a letter to the Chamber of Commerce on the question of bonded warehouses, which stands for the Chamber's consideration at its meeting to-morrow. He states that he is not authorised to settle any terms concerning the bonding of imports, but, as a basis for discussion, he asks whether, in case of different fees being charged for the privilege according to the amount of business done at different godowns, those whose godowns would fall into the lowest class would pay Tls. 300 per annum.

The allotment of seats in the new church has created some interest among the English Episcopalians. Several plans have been proposed, but at a meeting of subscribers, held on the 3rd inst., it was resolved that the matter be left to a committee, and that the rental be uniform. The architect expects that the building will be open for worship on the first Sunday in June.

The annual meeting of Land Renters will be held on the 27th inst.

The 4th inst. being the Emperor's birthday, the 23rd day of the 3rd moon, was celebrated throughout the Empire in general, and at Shanghai in particular, by the closure of all the native public offices.

A notification has been issued by the provincial authorities stating that the *war tax* (N.B. peace is now supposed to reign throughout the Empire) of Tls. 100,000 per month levied in the Soochow and Shanghai district is no longer sufficient, and announcing an increased levy of Tls. 30,000 per month. It is well known that this squeeze is intended for the private purses of the collecting mandarins, but the people, with exemplary patience, are preparing to pay almost without grumbling.

The *North China Herald* mentions a vague report of a project to do away with Consular establishments at the ports of Newchwang, Chefoo, and Tamsuy,—British interests to be entrusted to mercantile consuls. We give this as it has reached us, as the purest rumour, and should be hardly inclined to mention it, but for the eccentric views on China which the new Government entertains. These, combined with its struggles after economy, may impel it to anything.

On the 24th ult. we received information from Hankow that the *Salamis* had arrived there on the 21st. The expedition was at Ichang on the 10th, but as Sir Rutherford Alcock's despatch had been received it was doubtful whether any attempt would be made to reach Chung King. A private letter describes Ichang as abounding in natural beauties, thus offering a strong contrast to Sha-si, which closely resembles Hankow. Sha-si is the great centre of trade for Szechuen, whence produce of all kinds is distributed to that province. It is very flat and low, one street built on an embankment which keeps the rising water from the rest of the city, which lies thirty feet below.

On the 26th ult. the *Salamis*, with Admiral Keppel on board, reached Shanghai, and on the 29th the steamer entered Muirhead's dock for repairs, her stern-post having been sprung by her bump.

H.E. Mr. Ross Browne, U.S. Minister to Peking, arrived here on the 27th ult. in the gunboat *Monacacy* from the Coast ports, where he has been on a tour of inspection. He is about to proceed immediately to Peking, in company with the U.S. Consul-General.

A rumour was current some days ago that serious political complications had occurred at Peking, the Ministers having united in a threat of hauling down their flags, in consequence of a personal assault made upon the French Secretary of Legation by the Prince of Kung's brother. Again, on the 1st inst., the *Friend of China* inserted the following sensational paragraphs:—

"Just as we go to press we receive, overland, information from Peking to the following effect.

"Prince Kung, *hors de combat*, has had to resign his position as Regent and head of the *Tseng li* Yamen.

"Tsen-kwo-fan has been called to Court, and made *Tso-tsiang*—*i.e.*, a member of the Cabinet.

"Le (our old friend *Le Footai*) has been commissioned to inquire into the conduct of Tso, Compo (umquhile Footai of Chekiang), who allowed himself to be defeated by the *Wei-fei* (as the new rebels are called).

"Our information is reliable."

Although several steamers have arrived since, no confirmation of these alarming statements have been received.

Digitized by Google

The following extract, from the log of the *Mary Miller*, just arrived from Sydney, will interest your maritime readers :—"At ten o'clock A.M., March 27, saw a reef on which the sea was breaking heavily, bearing S.W., distance three miles, which is not on the chart of date 1864. Went aloft to see the extent of it, and saw it running from S.E. to N.W., about three miles. At noon got good observations, which placed the centre in lat. 3 deg. 5 m., long. 160 deg. 37 m. E.

The following amended rules relating to the duty on tea dust have been published :—

RULE I.

*Transit Dues.*

Tea dust, like tea, pays transit dues at the rate of Tls. 1.2.5.0 per picul.

RULE II.

*Export Duty on Tea Dust declared for Foreign Market.*

Tea dust declared to be for a Foreign port, whether shipped at a Yangtsze port, or a seaport, pays export duty as tea, at the rate of Tls. 2.5 per picul. If thus shipped at a Yangtsze port, it deposits, as tea, a bond for coast trade duty.

RULE III.

*Export and Coast Trade Duties on Tea Dust declared for Native Market.*

Tea dust, no matter where shipped, if for a Chinese port, and of not more than ten taels in value per picul, pays export duty at the new rate of Tls. 1.2.5.0 per picul. If shipped at a Yangtsze port, it is there to deposit the coast trade duty of Tls. 0.6.2.5 per picul in cash, like any other commodity, not being tea.

RULE IV.

*Final Duty leviable on Tea Dust originally shipped for a Chinese Port, and after arrival there reshipped for a Foreign Port.*

Tea dust passed at the new rate will have paid a duty of Tls. 1.2.5.0 per picul, when shipped at a sea port, and, like other goods, will have afterwards paid its coast trade duty, Tls. 0.6.2.5 per picul, on arrival at the second port; shipped at the Yangtsze port, it will have acquitted itself of both export and coast trade duties at the same time, in the same way as other merchandise. In the event of the subsequent shipment of any such tea dust from the second port, it (having already paid duties amounting to Tls. 1.8.7.5 per picul) will be called on, at the time of shipment, to pay a further shipment of Tls. 0.6.2.5 per picul; in that way it will pay the duty, Tls. 2.5 per picul, leviable on it as tea for the Foreign market.

## AMOY.

### (FROM OUR OWN CORRESPONDENT.)

AMOY, May 10, 1869.

The *Macao*, Peruvian coolie ship, left this port about a week ago for Havannah, having conformed to all the necessary regulations. The Commissioner of Customs (a Foreigner) would not give up her papers on his own responsibility, but handed them over to the Superintendent of Customs (a Chinese), in order to avoid being involved in any trouble that might arise in allowing her to leave the port. The *Padang Panjang*, now the *Villa de Cammilla*, and under the Spanish flag, will leave this port with coolies for Havannah in a few days. She being a treaty power ship, will have no obstacles put in her way, which seems absurd, after dealing so harshly with the *Macao*. It is to be hoped that the coolies will not be illtreated and drafted off to other places than Havannah. It is to be regretted that the Chinese mandarins make such a large sum out of the coolies—they get 3 dollars a head as a fee for each man shipped. What villany is a small mandarin not capable of when he sees a large fee coming to him? What does it matter to him how the poor unfortunate labourer is treated? This coolie matter has created a little excitement here, and one was at a loss at times to know who was in the right, the coolie brokers or their opponents. Be it as it may, it will serve as a lesson to all future coolie brokers to be straightforward, and to employ careful translators in drawing up the agreements with the Chinese labourers. The opposition they have met with in procuring labourers at this port will show all future adventurers that they must confine themselves strictly to the letter of the law if they wish to get their business put through quickly. Everything is quiet at Taiwan. Mr. Gibson, our Consul there, is to be superseded; Mr. Cooper will relieve him shortly. Mr. Gibson goes as Interpreter to Canton for a time, Mr. Meyers going for a trip on sick leave.

## HONG KONG.

From this port our latest date is the 13th May. The P. and O. mail of March 26 arrived out on the 6th May, with London telegrams to April 17. From New York the latest advices were to March 18, *via* San Francisco.

The *China Mail* gives the following account of the fracas at Peking, which is almost identical with that received by telegraph :—"A fracas which may lead to serious complications has taken place at Peking. One account says that the French Chargé d'Affaires jostled against the cart containing Prince Kung's brother, as they were returning from the races. The Prince struck the Frenchman across the face. An apology was demanded and refused, so the tricolour was hauled down from the French Legation. The other Ministers have taken the matter up, and have given the Chinese Government three days to make an apology. Another account says that the French Chargé d'Affaires' pony slightly jostled a chair, in which was Prince Kung's brother. One of the latter's outrider's struck a blow, whether at Mr. Rochefort or one of his suite does not seem clear. A later paragraph says, that Prince Kung has had to resign his position as Regent and head of the Tsung-li-Yamen. Tsen-kwo-fan has been called to Court and made a member of the Cabinet."

The following items of news are from the same source :—

Le Footai has been commissioned to enquire into the conduct of Tso, formerly Footai of Chekiang, who allowed himself to be defeated by the Weifei (rebels.)

The Soochow authorities have been told to modify their rancour towards Christians. This appears from a proclamation recently put forth.

The Yangchow affair has fully attained its object, and taught the officials and people to behave to Foreigners with civility. Visitors to the city a week or two ago met with no annoyance.

The financial statement of this colony for the year 1868 deserves a little more minute consideration than it has received. The total receipts for the year were 1,134,186.19 dols., being an increase of 274,702.17 dols. on 1867. The expenditure increased at nearly the same rate, from 730,916.82 dols. in 1867 to 991,311.49 dols. in last year—a difference of 260,394.67 dols., and being only 13.307.50 dols. less than the total excess of receipts for 1868. This is an astounding jump from a condition of bankruptcy in 1866 to an absolute plethora of wealth (the balance on hand on December 31, 1868, being 142.794.70 dols.) in the short space of two years, especially when the fact is borne in mind that the cost of Government in the colony was increased during last year by the sum of 19,641.54 dols., and that there was a decrease of 66,825.12 in the land revenue for 1868 as compared with 1867.

Confining ourselves for the present to the question of revenue, we observe that the increase is mainly due to two items :—

| | |
|---|---|
| Gambling Fees ... ... ... | dols. 267,166.66 |
| Stamps ... ... ... ... | 101,766.20 |
| | dols. 368,932.86 |

The opium farm yielded an increase of 10,470 dols., and miscellaneous receipts dols. 11,583.30. From these four items more than one-third of the entire revenue is derived; but it is to the two above set out that the present flourishing condition of the colonial exchequer is attributable. There has been no orsginal legislation beyond them to which the increased revenue can be traced.

We now turn to the expenditure. The sum of dols. 208.144.80 clears off all arrears on account of the military contribution; on public works and buildings, roads, streets, and bridges, there were spent during 1868, dols. 164,444.03; making together, dols. 372,588.83. What has become of the remainder of the dols. 991,000? The Crown demands have been satisfied, local public works are supposed to have been sufficiently provided for; where are two-thirds of the revenue of 1868 gone? The answer is in payment of the labour which is employed in the government, of the colony, from his Excellency through all the departments of our petty state, down to the coolie who sweeps out a Government office. The item charged under the head of "Establishments" means the amount paid to persons employed in various offices,—the police, gaols, postmaster's office, registrar's office, &c., and it stands thus—

| | |
|---|---|
| Total Establishments ... ... | dols. 448,473.53 |

But to this are to be added certain items which, though for some occult reasons are charged "exclusive of establishments," in reality form part of the same account. They are these

| | |
|---|---|
| Revenue Services ... ... ... | dols. 1,695.55 |
| Administration of Justice ... ... | 924.26 |
| Hospitals ... ... ... ... | 11,613.51 |
| Police... ... ... ... ... | 56,022.38 |
| Gaols ... ... ... ... ... | 25,115.35 |
| | dols. 95,371.05 |
| Add (as above) ... ... ... | 448,473.53 |
| | dols. 543,844.58 |

But this is not all that we have to pay for the blessings we enjoy under the Government of Hong Kong. We have to add—

| | |
|---|---|
| Pensions ... ... ... ... | dols. 16,303.63 |
| Charitable Allowances ... ... | 350.68 |
| Miscellaneous Services (not specified) | 28,106 89 |
| Special Expenses (not specified) ... | 6,195.68 |
| | dols. 50,956.88 |
| Add (as above) ... ... ... | 543,844.58 |
| And you have ... ... ... | dols. 594,801.46 |

as the sum which has to be provided by the inhabitants for the payment of the expenses of our local Government, before a dollar can be spent on public works.

The verdict of the coroner's jury was strongly condemnatory of the Chinese Hospital case; and the place has been for the time abolished, pending more humane arrangements. A case of the death of a Chinese, a few minutes subsequent to exposure in the street, has also occurred, and an inquiry is going on.

Capt. Crosbie (late of the *Arthur*), who, with wife and crew, was picked up near Pedro Blanco, and brought into Hong Kong by a fishing junk, moved the criminal law in order to charge his prisoners with piracy and extortion. Case was dismissed by the magistrate.—Another suit (civil) for 500 dols. was proceeded

Digitized by Google

with, and gained by the junkmen; this was half the 1,000 dollars promised for the salvage service.

The *Friend of China* gives "reliable" information that Prince Kung has resigned his office as Regent of China, and implies that this arises from the recent quarrel with the French Charge d'Affaire's. If the news be correct we are rather inclined to find a very opposite reason for his conduct. Nothing would be more popular with the Chinese than resistance to the demands of a Foreigner, and had the Prince tried to bid for popularity he could scarcely do so more effectually than by opposing the French demands to the last gasp. We incline to believe that he has declared his inability or unwillingness to assume an offensive position which he is able enough to foresee must result in a new war. Such a declaration would very probably be met by taunts of cowardice, direct or implied, from Tseng-kwo-fan, now at the Capital, he having committed to writing his belief that but the will is wanting to expel the hated Foreigner from China. The prince would thereupon naturally suggest that the warlike Tseng should undertake the policy which he recommends; and as that official has long been ambitious of a seat in the Cabinet he would naturally accept the conditions attached to gain it.

This is, of course, mere supposition, but if the *Friend's* account be correct we can find no other solution. It is quite certain that Foreign pressure would not be exerted to unseat the Prince Regent (who is identified with the pro-Foreign party) in favour of Tseng-kwo-fan, who is equally identified with the "old war party." Another mail will, doubtless, bring more intelligence; but, meanwhile, here is another "nut" for the pro-China party at home to talk over. Reference to Peking with Tseng as Prime Minister will be, we doubt not, an eminently practical proceeding—to those who don't mind being kicked

## JAVA.

(FROM OUR SPECIAL CORRESPONDENT.)

BATAVIA, May 14, 1869.

The London mail of the 26th March arrived here on the 3rd inst. Our import market remains in a stagnant condition, and the godowns and bonded warehouses are choked with European manufactures, while at the same time several vessels are due. When will people at home ship out more in accordance with the demand? The bankers, as well as merchants, are now crying out at the utter stagnation in business, and discount is down to 5 per cent., and even 4½ on Government paper! What will old Java residents say to this? The Java Bank holds its meeting on the 24th inst., and gives only 9 per cent. dividend for the year, against 15 per cent. in former years. This is the only bank allowed by Government to issue notes. The capital is six million guilders (12 to the pound), and the current value of the shares is 50 per cent. premium. The other banks are the Netherlands India and the Rotterdam, which have their head-offices in Holland. The Chartered Bank of India, Australia, and China, which has also its head-offices in London, is the only English Bank, and has large transactions in Exchange, as well as a good share of the local business.

The chief topic of conversation here is the coming festival and masquerade ball, to commemorate the 250th anniversary of the settlement of the Dutch in Java. Three days are to be set apart for the festival, and it is predicted by many that the discontented natives will take the opportunity of raising a rebellion; but I have noticed nothing which can warrant this opinion. The riot which occurred last month was a spasmodic and abortive affair, and the murder of the Europeans arose entirely from their over confidence in not procuring sufficient aid from the military. The rioters, one hundred and sixty in number, are in prison awaiting their trial.

Rain has fallen heavily during the present week; being unusually late, it is feared that it will injure or at least retard the next crop of sugar. Contracts for delivery, however, have nevertheless been made for the end of June. The export in 1868 was of sugar, 2,500,000 piculs, and of coffee, 960,000 piculs; it is early yet to form an opinion, but it is believed that the crops of both sugar and coffee will be larger; but then, last year, and also in 1867, the coffee crop was considered a failure. The Government at the Hague have sent out orders that the native producers are to be made to suffer for the inferior quality of the coffee, and this will be put into practice when the new crop is brought by them to the Government depots next month. The price paid by Government to the natives for all coffee brought in has hitherto been 13 guilders per picul, irrespective of the quality, but now they are to be paid only *one half* that amount for inferior descriptions. On what legal or equitable grounds this can be done is not easily seen, and the course is universally condemned by all classes of the public here. The system which the Government pursue in the cultivation of coffee has left it far behind the produce of Ceylon, although the sale here is infinitely superior. The contract price for sugar this season is about £2 per ton higher, coffee contracts are also higher, owing to the insurrection in Cuba.

Until the policy of the Government is changed, and more liberal principles prevail, the commerce of the island cannot increase. Forced labour must be abolished and the soil let out to the enterprise of individuals. The institution of such a policy would be more calculated to develop the resources of the country, and would prove more lucrative to the Government than the present system of "squeezing," which is simply killing the goose which lays the golden eggs. Sooner or later a change must come, including, perhaps, a change of masters. The Dutch Government must be sadly blind and unpractised not to be able to read the signs of the times. Simply to go on squeezing out every drop of blood from the place without a care for its future is a policy which can have only one end.

Notwithstanding that the country possesses the finest facilities for railways, there is now only a small section, under fifty miles in length, in the vicinity of Samarang. The line from Batavia to Buitenzorg, the seat of the Governor-General, about forty miles in extent, is not yet commenced, although it would, by the sale of lands in the vicinity, be a source of considerable profit. It is stated that the necessary purchases of rail and rolling stock are now being effected in England, and that the line will be commenced in four months, and finished in about a year and a-half. The value of property in the locality is already rising in anticipation. Considering how few engineering difficulties there are in the way, and the comparative cheapness of labour in Java, railways should have been brought into use years ago, to give those facilities for the transport of goods which are the greatest stimulants to trade.

The fleet of the Netherlands India Steam Company continues to perform their various services in connecting Singapore and all the ports on the coast of Java, Sumatra, Macassar, Borneo, &c., with great regularity. The organisation of this line, which includes fifteen steamers, was one of the finest enterprises ever carried out for Java, more especially as it has been done at such a moderate cost to the Government. The postal subsidy is only 3s. per mile, but the receipts from freight and passengers by the company are large, and are increasing at a very satisfactory rate. The expenses of a line in these far-off seas are necessarily heavy, but the managers here adopt the best system for maintaining the efficiency of their vessels. All the contracts with Government are performed and the management here conducted by Messrs. Fraser and Hulstyn, who give universal satisfaction. The only dispute which has arisen with the Government is on the twelfth article of the contract, which states that the Company are to have the "exclusive" carriage of Government passengers, and this the Company holds to include soldiers sent on expeditions, &c. The case was tried here in Court, and decided in favour of the Company, but an appeal has been made to Holland, the result of which is looked for with much interest. The directors and shareholders in England (for it is a London company) will soon receive a handsome return for their capital, but in all these concerns the organisation is difficult and expensive. In adding to the fleet as required, the directors would do well to construct steamers on the American plan, having the first-class cabins forward, and the native aft, as in China; this climate requires it. The vessels of the fleet are now too much on the Atlantic model, but not so well suited for hot weather.

Telegraph wires are distributed all over Java and part of Sumatra, and messages can be forwarded for 70 cents, *i.e.*, about 1s. 2d. for distances about 100 miles, rising in proportion; but the system is not well conducted, the office closing in the business quarter at four, and at five at the head-office outside. The result is that an answer to a message on the same day it is forwarded is a rarity. The post-office is some two and a-half miles out, and the European mail has to be brought from thence, and is some six hours in delivery. There can be no reason why the mail should not be sorted on its way from Singapore by the mail agent on board, as in the English mail steamers from Singapore to Hong Kong. If it could not be all accomplished it could at least be done in part, and the time occupied in delivery would then be shortened probably by two hours.

Amongst the many complaints which the Foreigner has against the Dutch Government here is the unreasonable delay of their courts of law. There is now an Englishman incarcerated in the common gaol of Batavia (for an assault on a Dutchman), who has been there since February, and whose trial will not come off until next month. Bail has been offered to any amount, and refused. This for a police-court case, which should have been settled the next morning, is certainly a most barbarous state of things, especially when the heat of the climate is considered.

The Government here has refused to meet the demand made by our Government, through Mr. McLean, the Consul, for damages in the case of the ship *Maggie Leslie*, with a cargo of tea, which was towed in here last year by the *Fusiyama*. The claim is for damages and losses by the acts of the Government officer, here styled the "Receiver of Wrecks." This officer insisted by force on his right to take charge of the ship, against the protest of the British Consul. A quantity of tea was landed and sold quite unnecessarily, and heavy charges made, for which he reimbursed himself out of the proceeds of the tea. The whole transaction was little more than one of plunder. The underwriters in England represented the matter to our Foreign-office, and Lord Stanley decided that the acts of the Government in Batavia were illegal, and made a claim for restitution. As it has been refused, it now rests with Lord Clarendon to carry the case to the Supreme Government at the Hague.

There has been a hearing of witnesses before the Court in the case of the British ship *Cannata*, owned by Mr. John Hodgeton, of Edinburgh. This vessel was bound from China to Rangoon or

Digitized by Google

Bassein, and her freight was insured in a Java office, the Colonial, which disputes its liability, on the ground that it was possible to know of the damage to the vessel at the time the insurance was effected. The amount insured was 6,000 dols. The case has been going on since 1862, and public opinion is against the insurance office. The next hearing is fixed for the 26th inst.

There is a growl, loud and deep, against forced service in the army, or Schuttery, as that branch is termed. The Government will not even exempt ministers, our chaplain, the Rev. Dr. Arnold, being compelled to serve, or pay a fine of ten rupees; and the law even permits imprisonment for three days for non-attendance. Now, in a climate like this to pull every European merchant and his staff of clerks out on the parade at 4 P.M. once in every week is a most arbitrary measure, although it would be only reasonable that Foreigners as well as Dutch should be compelled to serve at a time of popular tumult for the support of law and order.

It is an anomaly that the Government with their arbitrary pressure on the natives should permit them to go about armed with the well-known Malay "kris." This is an element of barbarism, and not of civilisation, and should be swept away. Europeans do not go about armed, and it is not right that they should be exposed to the knives of these natives, which are frequently the occasion of bloodshed among themselves.

Batavia, like other places, is adopting the inventions of the West. The tramway which Messrs. Dummler and Co. introduced has, after many delays and difficulties, been opened for a distance of four miles. Certainly, no city in the Far East is so well suited for it in regard to long and straight roads. The tramway should have been in existence ten years ago. However, here it is, and one can ride to and from residences for 5d. first class and 2d. second. The traffic since the opening has rapidly increased, and the daily number is now over three thousand, yielding receipts of 350 guilders per day. The remaining portion of the line, about four miles further, will be ready for opening shortly, the rails, &c., having all arrived. The capital invested is 750,000 guilders, and the shares, of 1,000 each, have been sold at a premium of 60 per cent. This is no doubt a speculative rise, but there can be no question of the success of the tramway if it is not heavily weighted with capital and expenses. The directors are Mr. McLean, the British Consul, Mr. Pels, and Mr. von Hernert.

The failure of Messrs. Morgan, Melbourne, and Co. continues to be one of the topics of the day. It has inflicted a great blow on the name of English houses, although in truth the partner here, Mr. Lichtenberg, was a German. His escape from this clandestinely is, of course, a great scandal. The transactions of the firm show that they had been insolvent for some years, and Mr. Melbourne, in London, could hardly have been ignorant of the condition of affairs. It appears that credits have been so ingenuously worked as to be cashed three times over. The amount of liabilities is no less than four million guilders, or £350,000, and the assets are returned at about £70,000. In Europe and Australia the sum is considerable, but the chief creditors are here. As a proof that these cases do not pass without notice by the public I may mention the fact that a few evenings since the wife of an English merchant, while taking a drive, was hooted by a half-drunken soldier with some broken imprecations, with which were mixed up the names of "Morgan" and "Melbourne." The question is, Where has the money gone? The assets here are next to nothing. The Chartered Bank of India, who are creditors, will not be such heavy losers as at first reported. The Bank of Rotterdam is also nearly clear, but there is much talk of the manner in which the manager accomplished this, and it is openly stated that he aided and abetted the escape of Mr. Lichtenberg. The winding-up of the estate here under the Court will probably occupy years, as there will be many complications of the English and Dutch law; the latter, antiquated as it is, will certainly not be able to cope with the modern mercantile appliances of hypothecations, goods stopped *in transitu*, banks and financiers holding property of houses who have never received a farthing, whilst Morgan, Melbourne, and Co. have appropriated the value for their own benefit in more ways than one. The first hearing, for examining claims, &c., is fixed for October.

The small English church originally built by the Rev. Mr. Medhurst in 1830 is now under the charge of the Rev. Dr. Arnold, the chaplain, who, in addition to this charge, keeps up a service and a school for the Malays. The English community numbers only about eighty, and of these some attend a Scotch chapel, which is in charge of the Rev. Mr. King. Society has suffered lately by the loss of several English ladies, who are always great supporters of the church.

The lighthouse, with a revolving light, on the North Watcher (which is generally made on entering Batavia Roads), will be completed this month. A great number of lives have been sacrificed in its erection.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼ lb., ½ lb., and 1 lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

# Commercial Report.

## STRAITS, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—We are able to report a slightly better tone in this market, which is due to the gradually increasing confidence in the Mikado's Government, and the expected arrival of the Court at Yedo. The improvement was, however, not very marked, 16/24 Yarn and 8 lb. 4 Shirtings alone having advanced, and that but slightly. Other goods remained as last quoted, prices being nominal, as holders remained firm, and refused to part with their goods at figures which were in many instances considerably below home rates. Woollens remained dull, a slight demand for Blankets and some forced sales of Camlets being all we have to notice. Metals as before. Quotations:—G.E. Grey Shirtings, 7 lbs., per piece, $2.35 to 2.40; 8¼ lbs., $2.70 to 2.75; G.E. White Shirtings, $2.60 to 3.20. T-Cloths, 6 to 7 lbs., $1.70 to 2.15; Velvets, Black, 35 yds. 22 in., $9 to 9.50. Cotton Yarn: Nos. 16-24, per picul, $46.50 to 47; 28-32, $47.25 to 47; 38-42, $49.50. Camlets, BBB and S, per piece, $15 to 16; SS, $13.50 to 14.50; Cloth, Medium and Broad, 54 in., per yard, $0.80 to 2.50; Union, 29 in., $0.50 to 1; Spanish Stripes, $0.75 to 1; Long Ells, Assorted, per piece, $8 to 8.75; Blankets, per lb., $0.40 to 0.50. Iron, flat and round, per picul, $3 to 3.50; nail rod, $3.30 to 3.70; hoop, $3 to 3.20; pig, $1 to 1.10; wire, $6.50 to 7; Steel, $7 to 8; Lead, $6.50 to 7.

TIENTSIN.—A slight improvement had taken place in the market, but deliveries were checked, owing to want of water in the canals. Grey Shirtings, 8¼ lbs., were quoted Tls. 2.1.5 to Tls. 2.2.0 per piece.

SHANGHAI.—Cottons: There having been several days' partial holidays during the fortnight, the business in Piece Goods had not been large; there had also been but a limited demand among Native dealers. The principal part of the business had been in Grey Shirtings, at a slight advance. 7 lbs. and 8¼ lbs. had been sold, for arrival, at Tls. 2.0.0 to 2.0.5 and Tls. 2.2.3 to 2.2.7 respectively. The stocks of T-Cloths in Chinese hands had accumulated, and with the want of demand thus occasioned prices had declined somewhat. White Shirtings: Quotations must be considered almost nominal, as sales had been very small, and these goods had been neglected. The market for Drills was quiet. Sheetings were enquired for at previous prices. Jeans had attracted little attention. Fancy Goods: The market for most kinds is weak. Woollens: Long Ells: Scarlet lower; Assorted unchanged, some transactions being reported at the quotations given. Spanish Stripes were weaker. Small sales of Camlets had been effected at previous rates. Figured Orleans were not in request, but the prices of Plain Goods were maintained. Medium Cloths dull. Crape Lastings and Lustres were enquired for. Metals—Nail Rod Iron: A few sales of Nail Rods had been effected at Tls. 2.40 to 2.50 per picul, and some fifty tons of Bar Iron had been placed at Tls. 2.48 to 2.50 per picul. Stocks of the former were estimated at about 30,000 bundles, whilst of the latter only about twenty-five tons remained unsold. Quotations—small size, Tls. 2.30 to 2.40; fair to good, Tls. 2.45 to 2.50; Hoop, Tls. 1.90 to 2; Flat and Round, Tls. 2.45 to 2.50. Lead: There had been some little activity, and a parcel of L.B. was sold to arrive at Tls. 6.20. The market had become quieter, and this price was not obtainable at the close; 2,828 piculs had been added to stocks since April 13, and 7,688 piculs shipped to outports. Rates for ready cargo, Tls. 5.90 to 6.52. Coals: Prices of Cardiff and Australian coals had declined, and the market was dull, large supplies having arrived or being expected; sales had been made at the quotations. American coals were in some request. No arrivals of English had taken place, and there was no demand for this quality. The arrivals had been: From Great Britain, 1,428 tons; from Australia, 3,980 tons; from Japan, 324 tons; from Formosa, 640 tons; in all, 6,372 tons, of which 1,309 tons were to order. The current quotations at the departure of the mail were as follows:—Grey Shirtings, 7 lbs., per piece, Tls. 2.0.2 to 2.0.6; 8.4 to 8.6 lbs., Tls. 2.2.3 to 2.2.7. White Shirtings, Tls. 2.2.8 to 3.5.0. T-Cloths, 6 lbs., Tls. 1.4.5 to 1.7.5; 7 lbs., Tls. 1.6.5 to 2.0.0; 8 to 8.4 lbs., Tls. 2.0.5 to 2.5.5. American Drills, 40 yards, Tls. 4.2.0 to 4.3.0. American Jeans, 30 yards, Tls. 3.6.5 to 3.7.0. English Drills, 40 yards, Tls. 3.9.5 to 4.1.0. Dutch Drills, 40 yards, Tls. 3.8.0 to 3.9.5. Velvets, black, 22 in., per yard, Tls. 0.1.9 to 0.2.1; blue, 22 in., Tls. 0.1.9 to 0.2.0. Camlets, English, Tls. 12 to 12.6. Spanish Stripes, per yard, Tls. 0.5.5. to 0.8.0. Medium Broad and Habit Cloths, Tls. 0.9.0 to 1.6.0. Long Ells, Scarlet, 24 yards, per piece, Tls. 6.4.5 to 6.5.5; assorted, Tls. 6.5.0 to 6.5.5. Coals, Cargo quotations afloat, Cardiff, per ton, Tls. 9; North Wales, Tls. 8.5.0; English, Tls. 8.5.0; Anthracite, Tls. 11.

HANKOW.—An improvement in the business in Plain Cottons had taken place during the fortnight. Gray Shirtings had been in good demand at firmer prices for 8¼ lbs. goods. Closing quotations:—For 7 lbs. Tls. 2.0.2., to 2.0.4; 8¼ lbs., Tls. 2.2. to 2.2.5; 9¼ lbs., Tls. 3.1 to 3.2. White Shirtings were inquired for, at previous rates. T-Cloths were unchanged, and dull. A reduction in the price of drills was quoted, with a large business doing. Dutch Drills, 40 yards, Tls. 4.1 to 4.1.5; English, Tls. 3.8 to 4. Fancy Cottons steady. Woollens and Worsteds: Camlets—Indigo and Gentian in fair demand; S, Tls. 13 to 13.5. per piece; SS, Tls. 12 to 12.6. Lastings had been sold at low prices. There was but little inquiry for Long Ells. Spanish Stripes and Medium Cloths were not wanted. Figured Orleans had been in some demand, but the market closed less active, the last quotations being Tls. 3.7 to 4.1.

FOOCHOW.—The transactions during the interval had been 1,000 pieces 7 lbs. T-Cloths at $2.57½ per piece, and 180 piculs Lead at $9.25 per picul.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated 12th May:—Cotton Yarn: Operations have been moderate, and buying has again been confined to purchasers desirous of supplying their immediate demands only, as importers have continued to advance their prices as dealers showed disposition to purchase. All numbers are dearer, and while Nos. 38 to 42 show a marked rise of $5, Nos. 16 to 24 and 28 to 32 have only felt it to the extent of $2.50 per bale, the inquiry, though fair, not having been so good as for the higher numbers. The market closes very firm. Piece Goods: With small stocks Foreigners have been very successful in sustaining prices, and, although considerable quietness prevailed during the first few days of the fortnight, rates have gradually hardened, and an advanced market is noticeable at the close. 7 lb.

Digitized by Google

Grey Shirtings have continued in reduced stock, and are now eagerly inquired for at an advance of 5 cents per piece; 8.4 lb. are held at dearer figures, but have not participated so freely in the rise. Higher weights are without change, though a slight demand exists at present prices. T-Cloths are dearer, and common qualities are particularly wanted; 6 lb. and 7 lb. are quickly disposed of at an advance of 5 cents upon previous quotations; other weights, however, are not in immediate request. Fair sales of good fine White Shirtings have been made at $4.80 to 6.25 per piece, showing an advance of 10 cents; 64 to 66 and 68 to 72 reed are also dearer, but no transactions have taken place, and no present demand has shown itself; 54 to 60 reed are nominally at former quotations, but there are none offering, and arrivals will move off easily at these rates. 30 yard English Drills are wanted, while 40 yards are neglected. Dutch are not so much inquired for, while both American Drills and Jeans are desired at higher values; the only lot of 40 yard Drills on offer was disposed of at $5.60 to 5.70 per piece. Sheetings are a little firmer, but holders of the small lots offering are asking over buyers' ideas. Turkey Red Shirtings have also felt the enhancement of other kinds. Woollens.—The market has shown some little animation, and a slight recovery in prices is noticeable; Scarlet Long Ells are nominally 10 cents dearer, but are not saleable at the advance; Assorted have been inquired for at a similar increase, and sales are 1,400 pieces at $8.80 per piece. Lastings have advanced, and 200 pieces have found buyers at $15. Blankets are readily saleable at prices 10 cents better. Metals: Business has been upon a somewhat increased scale, and Nail Rod, Bar, and Hoop Iron have gone rather dearer. Wire is steady. Steel has materially declined. Malacca Tin has advanced $2 per picul, while Straits is firm at previous quotation. Lead is still very dull. Quicksilver is without change. Coal: Stocks are heavy and demand light. Arrivals have been 800 tons Anthracite, to consumers, 2,099 tons Sydney, and 750 tons Welsh. Sales have been two small cargoes of Sydney, aggregating 577 tons at $6.25. Ginseng: There is still an absence of demand and an unimportant business has again resulted. Sales comprise 7 packages Crude Root at $133 to 151 and 8 packages Clarified at $170 to 190—less customary discount. The market closes firm. The following were the closing quotations:—Cotton Yarn, Nos. 16 to 24, per bale, $125 to 135; 28 to 32, $140 to 147.50; Grey Shirtings, 7 lbs., per piece, $2.55 to 2.65; 8.4 lbs., $2.80 to 2.87½; White Shirtings, $2.50 to 5.10; T-Cloths, 6 lbs., $2 to 2.25; 7 lbs., $2.20 to 2.60; 8 to 8.4 lbs., $2.75 to 3.30; Turkey Red Shirtings, 8 lbs., per piece, $2.85; Velvets, 22 in., per yard, $0.25 to 0.27; American Drills, 40 yards, 15 lbs., per piece, $5.25 to 5.50; Spanish Stripes, scarlet, per yard, $0.75 to 0.92½; assorted, $0.74 to 0.93; Medium, Ladies', and Habit Cloths, $1.15 to 2; Long Ells, Scarlet, per piece, $8 to 8.50; Assorted, $8 to 8.50; Camlets, SS Scarlet, $17.50 to 18; SS Assorted, $16.50 to 16.75; Blankets, per lb., $0.45 to 0.63; Iron Nail Rod, per picul, $2.50 to 2.80; Round, Square, and Flat Bar, $2.80 to 2.90; Hoop, $3 to 3.10.; Wire, $7.25 to 7.50; Lead, $7 to 7.30; Steel, per tub, $4.25 to 4.50; Coals, English, per ton, $10; Welsh, $10.50 to 10.75.

BATAVIA.—Messrs. Hunter, Houghton, and Co., report: Our market remains without much change. Some speculative purchases of a few staples have imparted some little confidence to dealers, but the retail demand is quiet; we look, however, for more activity shortly, when the natives will have money in hand from the crops now being got in. Shirtings, White, 40 yards: 45-inch may be quoted at f.11.50 per piece, but many houses refuse to sell at less than f.12, and this figure will likely soon be obtainable; 41-inch are in fair demand at about f.10 to f.10.25 per piece; 36-inch medium quality we value at about f.9.25 per piece. Grey Shirtings, 38¼ yards: The rates for this class of goods also scarcely rule so high as at this time last month. Stocks being small, however, we look for an improvement. In the meantime, we quote 39 inch 7 lb. at f.7.25 per piece; and 45 inch 8 lb. and 39 inch 8¼ lb. at f.8.25 per piece. Maddapollams, 24 yards: The demand has slightly increased. Dutch White, 33/34 inch may be valued at f.5 to f.5.25 per piece; 40/41 inch at f.6 to f.6.25. Grey continue without much change. 34/35 inch we may value at f.5.25 to f.5.50, and 43/44 inch at about f.6.50 per piece. English White, 32 inch, we value at f.3.50 to f.3.75 per piece; Grey, 3 lb., at f.3 to f.3½ per piece. Prints: The demand is chiefly for new and fancy designs, but rates rule low. At present we quote Green Grounds at f.8 to f.8.50; Pink Pads at f.7.75 to f.8; Steams, imitation Madders, at f.4.75 to f.5 per piece. Twist, Grey: Some speculative purchases of No. 40s have been made, and we may now quote this quality at f.4.10 per bale, with an upward tendency. In other numbers there has been little doing, but they will, doubtless, soon fetch proportionate rates. Iron, Swedish: This article we quote at f.10 to f.10.50 per picul; English: The market continues heavily supplied, and it cannot be valued higher than f.6 per picul; Hoop: In heavy supply, nominal value about f.7 per picul; Sheet, Square, and Round: Market overstocked; sales can only be made at extremely low prices; Galvanised Corrugated: Very dull, at f.17 to f.18 per picul.

SINGAPORE.—A very fair business had been done during the fortnight in Grey goods, although prices had slightly given way, chiefly owing to the supplies to hand per Eleanor, Lorton, and Edinburgh Castle. Grey Shirtings, 7 lbs. and 8¼ lbs., had commanded steady prices, and sales of considerable magnitude were reported of 7 lbs. at $2.50 to 2.42½, the larger sales at the latter rate; there had been considerable transactions in 8¼ lbs., for which quotations ranged from $2.90 to 2.85, chiefly at the lower price. In Maddapollams a moderate business had been done, and sales were reported of 2¾ lbs. at $22, 3 lbs. at $22½. In T-Cloths sales had been large and prices well maintained; sales of 4½ lbs. at $1.50 per per piece; 5 lbs. at $1.60 to 1.65, 6lbs. $1.75 to 1.85 per piece; 6½ lbs. at $2.0.2 to 2.0.5; 7 lbs. at $2.15 to 2.25. In Drills the business had been unimportant, quotations nominal, stocks light. White Shirtings: Business large, prices advanced on last quotations; sales almost entirely of the finer makes; lower qualities in light stock. Cambrics: No. 24's sold at $19 $19½, finer qualities rather lower in value; a fair amount of business had transpired. In Grey Yarn the lower numbers had met with a better demand at higher rates. T. R. Yarns, 10 lbs., scarce and inquired for; more request for the heavier bundles, prices firmer and stock much reduced; Colored Yarns quiet, little change to report, green in limited inquiry. Plain dyed shirtings, and dyed figured shirting in limited inquiry, sales small. T. R. cloth in better demand, prices firmer, stock of lighter makes low. Prints of good assortments in good request. Sarongs in heavy stock and difficult to move, Batticks extremely dull and low rates taken to effect sales. In Metals, Iron of all descriptions dull and prices drooping; nail rod had been sold ex ship at lower rates. Yellow Metal in some demand, price firm. Lead unaltered, market bare. Gunpowder saleable only in very small quantities, at low prices. Coals in heavy stock and large supplies on the way; the last sale recorded was a cargo of 700 tons Cardiff at $7⅛ per ton.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—The Tea Market continued very quiet; unfavourable advices from New York, coupled with the smallness and inferiority of stocks, prevented purchasers from operating to any extent, and the business of the fortnight had been confined to a few parcels of good medium grades for San Francisco, and of common grades for London. Settlements amounted to about 550 piculs, which had been made at prices as last quoted.

SHANGHAI.—Black: The only settlements for the fortnight had been two chops Shanghai-packed Congous at Tls. 10 to Tls. 13. Settlement for the fortnight, 570 chests; stock, 1 chop, or 207 packages. Green: Transactions for the fortnight had been small, and there was but little change in prices. The settlements had been chiefly country-packed teas, of which only about 1,175 half-chests remained in stock. Settlements for the fortnight, 2,037 half-chests; stock, 3,175 half-chests. Quotations (duty paid, exchange for credits, six months' sight, at 6s. 2¾d. per tael, and freight at £4 per ton) were as follow:—Fychow and Moyune Gunpowder 1s. 6¼d. to 3s. 9d., Imperial 1s. 2¾d. to 2s. 11¾d., Young Hyson 1s. to 3s. 6d., Hyson 1s. 2¼d. to 3s. 7d., Twankay 9½d. to 1s. 2¾d.

HANKOW.—The picking of the leaf will have commenced pretty generally throughout the producing districts. It was reported that the market had been opened in some districts, but no reliable information as to price or quality had been received. The weather so far was said to be favourable. Quotations were nominal. Export of Tea from Jan. 1 to April 16, 1869, 277,158 lbs.; June 1, 1868, to April 7, 1869, 45,959,821 lbs.

AMOY.—By the departure of the A. E. Vidal, to fill up at Hong Kong for New York, the season's export to America had been completed; her cargo had not been circulated, and it will doubtless not be reported until she leaves Hong Kong.

CANTON.—About 1,300 boxes of Gunpowder had been settled from the stock of old Tea, intended, it is thought, as a flooring chop for one of the vessels expected to take new Teas. Confidence had been somewhat restored as to prospects for the coming crop by a favourable change in the weather, and much benefit to the leaf was looked for should it continue fine. A few musters of small quantities of District Congou and Gunpowder had been shown, but not sufficient to justify an opinion as to quality of the supplies to be received. The preparation of Scented Teas was said to be progressing favourably, and musters were looked for.

### SILK.

YOKOHAMA.—There had been but little change in the tone of the market during the interval. A moderate demand for all available Hanks, combined with a lower Boo-value of the dollar, had kept silkmen stiff in their pretensions, while the stock had been reduced by the return of some parcels to the interior. About 150 bales had been settled, consisting chiefly of common to medium Hanks, at $700 to 850.

SHANGHAI.—The following is from Messrs. Skeggs and Co.'s Circular:—"Just before the close of last mail nearly 200 bales more than had been estimated were shipped off, principally on native account. Business for the fortnight amounts to 300 bales, mostly medium to common Tsatlees and re-reeled descriptions. Although we do not alter quotations, prices for the former sorts must be considered fully higher, as Red Peacocks have been taken at Tls. 460, with other purchases on a similar scale, whilst exchange has advanced; on the other hand, Re-reels, Trams, and Organzines are a trifle lower, which, however, may be accounted for in the quality. The market is cleared of Chop Silks, and the next English mail will virtually close season 1868-69. News from the country is very satisfactory regarding the worms so far, and should the weather continue favourable we shall undoubtedly have a very large yield; the critical period, however, will not arrive for nearly three weeks yet."

### STRAITS PRODUCE.

SINGAPORE.—There had been little animation in the market during the interval; supplies of most articles had been coming forward slowly, and there was not much alteration in quotations. Gambier had been more active; supplies had come in freely; there was a good inquiry, and the market closed firm; about 1,300 tons had been contracted for, principally at high quotations. Black Pepper unaltered, supplies trifling. White Pepper in fair inquiry at previous rates, and obtainable only in small parcels. Sago Flour firmer, good demand, supplies limited. Pearl Sago had an upward tendency; a small business had transpired at an advance on last prices. Rattans in active demand, and prices advancing. Malacca Tin lower in value; a moderate business had been done chiefly at $30 per picul. The Rice market had been quiet, and business had been small for local consumption; stocks heavy. Hides and Horns in good inquiry.

## LATEST TELEGRAMS.

(RECEIVED VIA GALLE, JUNE 15.)

CHINA.

HONG KONG, MAY 27.—Intense indignation has been aroused throughout the Foreign communities in China by the decision of the Home authorities regarding the disturbance at Formosa. The comments of the Duke of Somerset have elicited most indignant denials from the Press, the Chamber of Commerce, and the public. The *fracas* which arose between the French Chargé d'Affaires, Count Rochechouart, and Prince Kung has been settled, the Chinese authorities having apologised.

COMMERCIAL.

SHANGHAI, MAY 21.—Gray Shirtings, 6½ catties, 8¼ lb., 2.25 taels. Cotton: Shanghai, 15¾ taels. Tea: Nothing doing. Silk: Inanimate. Settlements since departure of last mail, 300 bales. Export to date (China and Japan) from commencement of season, 65,250 bales. Exchange on London: Bank bills, six months, 6s. 1¼d. Freights: Tea, £4 10s.

HONG KONG, MAY 26.—Gray Shirtings, 6½ catties, 8¼ lb., $2 85c.; Water-twist, 16-24, $135. Cotton: Bengal, fair medium, $18. Tea: Nothing doing. Total export (China and Japan), 140,000,000 lb. Exchange on London, bank bills, six months, 4s. 8d.

## Shipping Intelligence.

ARRIVALS.

At SHANGHAI.—From Rotterdam, May 2, Emma; from London, June 3, Silver Eagle (reported by telegram).

At HONG KONG and CANTON.—From Penrath, May 7, Pelger; from Glasgow, &c., 10, Ocean Queen (str.); from Hamburg, 2, Nahotka; 6, Edouard; from New York, Malay.

At SINGAPORE.—From London, May 12, Eleanor; from Cardiff, 12, Manila; 11, Burgermeester van Midelburg; from Liverpool, 12, Lorton; from Bordeaux, 9, Mysore; from Bourbon, 12, Arrakan.

At BATAVIA.—From Liverpool, Cragie Lea.

DEPARTURES.

From HONG KONG and CANTON.—For Callao, May 5, Cecilia; for Havana, 2, Mongol.

From MANILA.—For London, April 30, Roza del Turia; for Boston, 14, Mindoro.

From SINGAPORE.—For London, 8, Queen of Devon, 18, Siberia; for Liverpool, 13, Wemyss Castle; for Marseilles, Isaure; for Havre, 13, Amaranth; for New York, 16, Selim; for Boston 18, Aurelia, Humbolt.

VESSELS LOADING.

At SHANGHAI.—For London, Forward Ho, Argonaut.

At HONG KONG and CANTON.—For London, Belted Will (expected); for New York, A. W. Stevens, A. E. Vidal.

At FOOCHOW.—The following vessels are in port waiting for the new teas—Spindrift, Lahloo, Thermopylæ.

At MANILA.—For London, Southern Cross; for Falmouth, China, Marion; for Cork, Cavalier; for Hamburg, Valadora; for Cadiz, Bilbiana; for Boston, Hazard, Sooloo; for New York, Rattler, W. G. Russell.

At SINGAPORE.—For London, Eleanor, Frances, Meggie; for Liverpool, Edinburgh Castle, Star, Ville de Grenade.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London, the Argonaut and Forward Ho are loading at £4 10s. per ton. The Erl King and Agamemnon load at Hankow at £8.

At FOOCHOW.—Rate not settled.

At HONG KONG and CANTON.—The Chillingham, which arrived from Shanghai partly laden for London, is filling up at Hong Kong at £3 10s. per ton; and the A. E. Vidal, chartered at Amoy for New York via this port, is taking cargo at £3 5s. per ton.

At MANILA.—The following settlements have taken place:—The Roza del Turia, 460 tons, to London, £3 15s. and £3 10s. per ton for wet and dry Sugar respectively, and £4 10s. per ton for Hemp and light freight. Cavalier, 1,089 tons, from Iloilo to Falmouth for orders, at £4 per ton for wet Sugar. The W. G. Russell, for New York, a chartered vessel, has engaged, at outside freight, 700 tons dry Sugar at $15 gold per ton.

At SINGAPORE.—For London, the Maggie, now nearly full, the Eleanor and Frances, at £2 5s. to £2 10s. For Liverpool, the Star and Edinburgh Castle are on the berth, the former nearly full, the latter just laid on, at £2 5s. and £2 10s. per ton.

## SHIPPING POSTSCRIPT.

DEPARTURES.—June 26, from London, for Cardiff and Hong Kong, Glenaros; from Amsterdam, for Batavia, Cornelia; 20, from Shields, for Colombo, Margaret; 12, from San Francisco, for Shanghai, Macedon; from Amsterdam, for Batavia, Jannetje.

SPOKEN.—Cornelius Gipps, Batavia to Rotterdam, April 16, 30 S., 49 E.; Jacoba Cornelia, Batavia to Rotterdam, April 24, 32 S., 34 E.; Viscount Canning, Hong Kong to Falmouth, May 2, 34 S., 17 E.; Madura, Newport to Singapore, April 26, 14 S., 31 W.; Lochleven Castle, Clyde to Singapore, April 26, 36 S., 78 E.; Helenslee, Colombo to London, May 12, 50 days out, with loss of sails, &c.

MISCELLANEOUS.—At St. Helena, May 15, Waterloo, Abrahams, from Banjoewangie; Henrietta, Brower, from Batavia, and both sailed 16 for Amsterdam; St. Paul, Martin, from Singapore, and sailed for New York; 17, Antelope, Hill, from Sourabaya, and sailed 19 for Amsterdam; Jacob Roggeveen, v. Marken, from Batavia, and sailed 18 for Amsterdam; Reina de los Angelos, Kuhnel, from Manila, and sailed 18 for Cadiz; 18, Cecilia, Lokander, from Pasaroeang, and sailed 19 for Falmouth; Jane Leech, Morrison, from Ceylon, and sailed for London; J. H. Schwensen, Voigt, from Saigon, and sailed 19 for Falmouth; 19, Ouderkirk aan den Anstel, Dingemans, from Batavia, and sailed 20 for Rotterdam; Henry, Blair, from Sourabaya, and sailed 20 for Falmouth; 21, Susanna Johanna, Heymericks, from Java, for Rotterdam; 27, Leaping Water, McNeily, from Batavia, and sailed 27 for London; 28, California, de Wyn, from Banjoewangie, for Amsterdam.

## BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BROWN—On the 1st May, at 4, West-terrace, Hong Kong, the wife of C. W. Brown, Esq., of a son.

DE LA CONDAMINE—On the 21st June, at Bedford, the wife of Robert C. De la Condamine, Esq., of a daughter.

REIS—At Yokohama, the wife of Ad. Reis, Esq., of a daughter.

RIACH—On the 8th May, at Rose Villa, West Bonham-road, Hong Kong, the wife of Mr. J. Riach, of a son

SHEARER—On the 9th April, at Hankow, the wife of George Shearer, M.D., of the London Mission, of a daughter.

TELGE—On the 23rd April, Mrs. B. Telge, of a daughter.

MARRIAGES.

LETHEM—HOBBS.—On the 16th June, at St. Mary's, Islington, Alexander Lethem, of Douglas-road, N., to Alice Costley, second daughter of H. J. Hobbs, Esq., of Church-road, Islington. No cards.

PECK—BAXTER.—On the 17th May, at Galle, Ceylon, by the Rev. J. Clarke, M.A., Leonard Wm. Peck, H.M.'s 59th Regt., to Julia, youngest daughter of the late Charles Frederick Baxter, of London.

TILBY—INSULL.—On the 6th May, at Trinity Church, Shanghai, by the Rev. Canon Butcher, M.A., A. R. Tilby, Esq., to Anne, widow of the Rev. J. J. Insull, of Bedford.

WHITE—BLENKINSOP.—On the 16th June, at St. Mary's Church, Bathwick, by the Rev. H. M. Scarth, rector, Francis William White, Esq., Commissioner of Customs, Ningpo, China, youngest son of the late Rev. J. White, M.A., to Alicia Mary, daughter of the Rev. W. T. Blenkinsop, late Senior Chaplain, Madras establishment. No cards.

DEATHS.

GREEN—On the 23rd April, at Yokohama, Capt. Henry Green, late of the American steamer *Mars*, of typhoid fever.

JARDINE—On the 23rd June, at Brighton, Major-General Jardine, second son of the late Sir Alexander Jardine, Bart., of Applegarth, Dumfriesshire, aged 61.

OWEN—On the 6th May, at Shanghai, at the London Mission, Agnes Emilie, daughter of the Rev. George Sydney Owen, aged 2 years and 11 months.

PERRY—On the 26th April, at Kobe (Japan), P. Percy, Quartermaster of H.B.M.'s iron-clad *Ocean*, of typhoid fever, aged 33 years.

ROSE—On the 16th May, at Hong Kong, Maria Turner Rose, beloved wife of Mr. Thomas Rose, of the P. and O. Company's Factory, West Point, Hong Kong, aged 43 years.

WATSON—On the 13th June, at Blachford House, Aberdeenshire, aged thirteen months, Edith Bannerman, youngest daughter of Mr. and Mrs. J. P. Watson.

## WESTERN CHINA.

THE question of the opening up of Western China to British trade appears still to rest in the hands of the Council of India, the Home Government being content to let that curiously constructed body do as it pleases about the matter. How totally unfitted the Council is to advise upon or to promote any plan for the extension of commerce, may be seen at a glance by referring to a return lately moved for in the House of Commons by Mr. BAINES, who wished for information as to the constitution of the Council. This return shows that the whole fifteen members of it have served for long periods in India; that a majority of them have been members of the Council for over ten years, and that six of them were directors of the old East India Company. As regards their qualifications, nine are retired members of the Company's civil service, three of the Indian Army, one a retired Indian judge, and the remaining two also retired legal officers of the Indian Government. Twelve of them are between sixty and eighty years of age, the youngest being fifty-three. The active business of this Council is divided among six working Committees or Departments, namely, Revenue, Finance, Political, Military, Judicial, and Public Works; *for Commerce there is no provision whatever!* Some slight modification will be made by the Government of India Act Amendment Bill, now under discussion, which substitutes a ten years' tenure of office for the life membership hitherto enjoyed; but the main characteristics of the body, its exclusively Indian constitution and utter unfitness to deal with matters affecting trade, remain untouched. It would be absurd to expect from such a Council any enlightened views or action with regard to commerce — a subject on which their ignorance is only equalled by their profound indifference. It is not without good reason, therefore, that the Huddersfield Chamber of Commerce has recently petitioned the House of Commons to insert a clause in the Bill above alluded to, providing that in future one-third of the Council shall consist of gentlemen fully conversant with the interests and requirements of British trade, and therefore competent to give sound advice on questions relating to the development of commerce with the East. We hope to see the prayer of the Huddersfield Chamber backed up by many others, and would suggest, as an additional reform that may safely be advocated, the further reduction of the terms of service to five years, instead of ten. The VICEROY and Presidential Governors in India, as well as Colonial Governors generally, are limited to a five years' term of office; there are no reasons why members of the India Council should enjoy a longer lease of power, but many good reasons against it.

We have on several occasions adverted to the pertinacity with which the Indian Government upholds the Bhamò route into Western China, notwithstanding the undeniable failure of Captain SLADEN'S operations, while systematically decrying Captain SPRYE'S far more legitimate and practicable route from Rangoon to Kiang-hung. The latter gentleman has just had occasion to write to *The Times* to expose another instance of the cool way these Indian councillors have of burking a project they have conceived a prejudice against. At a recent meeting of the Society of Arts, some papers were read on routes for trade between Calcutta and Tibet, and between Calcutta and Western China, *via* Bhamò. Sir HENRY RAWLINSON, a member of the Council of India, and previously a director of the East India Company, being present, spoke on those routes, and expressed—without assigning reasons — authoritative commendation of the Bhamò route through Talifoo, as being "the real line of traffic." After which, on being asked "to give the meeting his opinion of the route recommended by Captain SPRYE," Sir HENRY stated, "The SPRYE route does not conduct to "Yunan. It passes into Cochin China, far to the south, in "order to arrive at a convenient point for sea communication "with Hong Kong; and we, the Council of India, cannot "squander the resources of India on Quixotic undertakings." Now, this was either a deliberate misrepresentation, or a ludicrous display of ignorance. If Sir H. RAWLINSON had inquired, even in the most cursory manner, into the subject on which he pronounced such an authoritative judgment, he must have known that every word he uttered was the reverse of true. The route proposed by Captain SPRYE *does* lead direct to Yunan; its course is north-east, not south; it goes away from, not towards, Cochin China, and has not the remotest reference to sea communication with Hong Kong. Such flagrant misstatements as these, emanating from such a source, are likely to be most prejudicial, and cannot be too energetically protested against. But, as Captain SPRYE points out, it is a very old official device to misrepresent a projector's plans, and then ridicule and run down the absurdities that exist only in the imagination of the speaker. At present the mode of introducing British trade into Western China may be a somewhat dry subject for readers whose interests are chiefly centred in the ports on the eastern sea-board of that country; but it is a subject that we are convinced will become one of great importance before many years have passed away.

---

THE postponement of the opening of the Suez Canal has been officially announced. The ceremony is now to take place on the 17th November. Vessels with visitors on board will be free of all dues. They will have to be at Port Said by the 16th November at latest. On the 17th they will proceed to Lake Timsah; stop before Ismaila during the 18th, on which day the VICEROY will give a *fete;* and on the 19th they will cross the Bitter Lakes and enter the Red Sea. The Empress EUGENIE, if the last programme of her Eastern tour be not altered, will quit Paris on the 15th October for Cairo, will ascend the Nile as far as the Second Cataract, and return in order to inaugurate at Suez the opening of the canal on the 17th November. The EMPEROR'S sole reason for not going with her is the fear that he might give umbrage to the SULTAN were he to accept the VICEROY'S invitation.

---

WE have very lately had a signal instance of the inestimable benefits accruing from the more rapid communication with Japan afforded by the Pacific Route. A message dated Yokohama, May 29, carried across the Pacific, telegraphed across the American continent to New York, and thence by Atlantic Cable to London, embodies the momentous announcement that "The QUEEN'S birthday was celebrated enthusiastically by the British residents in Japan." It is quite awful to think that without the wondrous chain of steam and electric communication recently perfected, we might have remained ignorant of this stupendous fact for another month! Seriously, though, how can Mr. REUTER—or anybody else—afford to pay for the transmission of such rubbish as this through 4,000 miles of telegraph wire?

---

ONE of our daily contemporaries last week gave currency to a report that the P. and O. Company proposed taking over from the Government the basin and building slips belonging to Woolwich Dockyard, with the view of using them for the construction and repairs of their steamers. Mr. HOWELL, the secretary to the company, writes to state that there is no foundation for the rumour, which he is instructed to contradict.

---

OUR latest telegrams from Hong Kong—dated May 27th —announce that the difficulty at Peking between the French Minister and the Chinese Government had been settled by an apology from Prince KUNG. So the French journals that denied that any indignity had been offered to Count ROCHECHOUART were wrong after all.

## ANNUAL REPORTS OF THE FRENCH STEAM PACKET COMPANIES.

(FROM OUR PARIS CORRESPONDENT.)

The Messageries Impériales and the Transatlantic Companies of France have lately presented their annual reports to their shareholders, and it may perhaps be useful, *pour encourager les autres*, as our neighbours said when poor Admiral Byng was executed, to give a few extracts from these documents.

The directors of the Messageries Impériales Company inform their shareholders that the fears entertained respecting the effect of the change made in the arrangements of the P. and O. Company have turned out unfounded, for, in place of a diminution, the receipts of the French company show an increase of 2 per cent. in the amount.

The first of the vessels intended for the double service of the Indo-China line has been running since January, and the new organisation will be completed in July, 1870. The following shows the progress of the French Indo-China service:—

| | Passengers. | Merchandise. |
|---|---|---|
| 1864 ... ... | 4,401 ... ... | 3,896 tons. |
| 1865 ... ... | 7,231 ... ... | 5,463 ,, |
| 1866 ... ... | 8,986 ... ... | 7,089 ,, |
| 1867 ... ... | 8,520 ... ... | 7,333 ,, |
| 1868 ... ... | 10,623 ... ... | 9,581 ,, |

The company has found it necessary to employ larger boats for its Transatlantic lines, and during the current year the present vessels will be replaced by others of the same power as those employed on the India and China lines, namely, of 500-horse power, and 4,000 to 4,500 tons displacement. The fleet of the company now amounts to 65 vessels, of 20,885 total horse power, and 137,384 tons displacement, valued at £3,820,800. Its stock of stores of all kinds is set down at £1,146,480; its sinking fund amounts to £1,417,337; its insurance fund to £260,000; a special fund for the replacement of boilers to £10,411; and its reserve fund to £115,080. The working of the year 1868 gives the following results:—Passengers carried, 191,489; merchandise, 240,464 tons; specie and articles of value, £10,027,580. To which is to be added the gratuitous carriage for the Government, we suppose, 27,561 passengers, 32,249 parcels of merchandise, weighing 5,100 tons, specie, &c., of the value of £548,000.

| | |
|---|---|
| The total receipts of the company amounted to ... | £1,837,673 |
| Expenses, including sinking fund and insurance... | 1,564,069 |
| Balance ... ... ... ... ... ... | £273,604 |
| Interest on debentures ... ... ... ... | 41,182 |
| Net balance ... ... ... ... ... ... | £232,422 |

Of this sum £11,621 is set apart, according to the regulations of the company, for the reserve fund; and the shareholders receive a dividend of 50f. per share of 500f.

The General Transatlantic Company is not in such flourishing circumstances as the Messageries, nor does it so immediately interest our readers, but there are some few points in its report which have a decided importance for the British public. Referring to the recent debate in the Corps Legislative on the extension of the powers of the company, the directors, with natural pride, quote the dictum of Admiral Bouët-Willaumez, to the effect that the French company excels the English companies both as regards speed and comfort. The capital, or rather the means of the company, consist of—

| | |
|---|---|
| A loan on debentures of ... ... ... ... | f.13,600,000 |
| An advance from the State to be repaid, without interest, in twenty years ... ... ... | 18,600,000 |
| Capital in shares .. ... ... ... ... | 40,000,000 |
| | £2,888,000—f.72,200,000 |

The New York line shows the following progression:—

| | 1867. | 1868. |
|---|---|---|
| Passengers ... ... ... | 7,368 ... ... | 8,318 |
| Merchandise ... ... ... | 21,000 tons... ... | 27,093 tons |
| Specie, &c. ... ... | f.36,000,000 ... | f.66,000,000 |

The rates have, however, been lowered by competition, and the average net profit per voyage was, in 1868, only f.219,000, against f.233,000 in 1867. The increased competition is evident enough from the fact that since the establishment of this company the total number of voyages from Europe to New York by steamships has grown from nine to thirty-six regular departures per month. The only companies who carry no emigrants are this and the Cunard on the New York line, and the latter and the Royal Mail Company are the real competitors of the Transatlantic. The number of passengers carried by the French company on its two lines of Colon and Mexico during the year 1868 was, in 24 voyages, 6,352; and on the New York line, in 26 voyages, 8,318; total in 50 voyages, 14,670; while the Royal Mail Company carried in 24 voyages, 3,932; and the Cunard, in 52 voyages between Liverpool and New York, 9,173; total in 76 voyages, 13,105.

No comparative account of merchandise is given, which leaves the parallel incomplete. As regards speed the French company is stated to have averaged on the New York line, in 1868, 12·20 knots, against 11·65 for the Cunard Company.

As regards working expenditure, we have the following results, as given in the report:—

| | |
|---|---|
| The French Company, in 1868, employed 15,000-horse power, with an expenditure of, in round numbers ... | f.16,070,000 |
| The Royal Mail Company, in 1867, spent, with 12,000-horse power ... ... ... ... ... ... | 14,550,000 |
| The Messageries Impériales, in 1867, with 17,000-horse power ... .. ... ... .. ... ... | 40,969,000 |
| And the P. and O. Company, with 24,000-horse power, nearly ... ... ... ... ... ... ... | 58,000,000 |

The result of the year's working, even with a certain allowance from Government, only yields f.19.20 per share of f.500. The new year, however, began badly for the company with the absconding of its cashier with a sum of about £14,400.

The company has issued 16,000 new bonds of f.500 each, to be paid off in nineteen years, to meet the cost of new vessels for the Pacific service. Three of these steamers are now building at Penhoet and Bordeaux. They are modelled after the packets of the English Pacific boats, with some slight modifications; they are 287 feet long, 40 wide, and 28 feet in depth, and will be fitted with twin screws driven by two engines, each of 250-horse power. These are arranged to carry 120 first and 50 second class passengers; their holds have a capacity of 1,100 tons, and they are calculated to consume, for a speed of 10½ knots, not more than 30 tons of coal. These vessels are to commence running about the middle of next year.

# Foreign Intelligence.

## GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, June 20.

The new commercial treaty between the Zollverein and Japan has been laid before the Zollverein Parliament for approval, discussed, and finally unanimously passed. It will be found to contain some new features, at least, as compared with the original Prussian treaty of 1861. It is dated Yokohama, February 20, 1869, and is concluded with "His Majesty the Tenno of Japan." It comes into operation on the day of being signed, without waiting for the usual exchange of the ratifications, and is not limited to any fixed period of duration; but it provides for a revision on the 1st of July, 1872, should either of the high contracting Powers wish it, and in that case a year's notice of such intention must be given to the other party. The treaty contains twenty-three articles, and there is an appendix in seven divisions, containing the regulations for carrying on the German trade in Japan, together with the revised tariff of custom-house duties. The new concessions accorded to Spain, Sweden and Norway, Russia, and especially those of 1866 granted to France, England, the United States, and the Netherlands, are all embodied in the present treaty, more particularly those affecting the currency of Japan and the foreign exchanges. Four new ports are added to those already opened for foreign trade, and the German Consular authorities obtain the right in all cases of shipwreck, and attempts on life and property of Germans, to exceed the usual limits, and under certain circumstances enter the rest of the Japanese territory. On the other hand, it is stipulated in Art III., and urged by the Japanese as an indispensable condition, that in other cases Germans exceeding the prescribed territorial limits are subject to a fine of 100 dols. for each offence. The punishment for false declarations in ships' manifests is no longer the double amount of duty, but a money fine; so that the receivers of goods are not made responsible, but those who commit the errors. With regard to the export of copper, which has given rise to so many disputes, a fixed export duty of 5 per cent., *ad valorem*, replaces the former system. And finally, there is a reduction of about 15 per cent. in the import duties of cotton and mixed cotton manufactures, that form an important part of the exports from Saxony. All these facilities, however, are to come into operation coevally with the new export duties on tea and silk. In regard to an extension of the fixed circuit of territory open to Foreigners at Nagasaki, the "Tenno of Japan" has promised to convene a meeting of the Daimios and confer with them on the subject, as he deems it needful to obtain their consent and confirmation.

There was but little debate when the subject came before the Zollverein Parliament. Mr. Edgar Ross, member for Hamburg and head of the firm of Ross, Vidal and Co., in this city, in bringing up the report of the committee, remarked there is no perfection in this world, and even treaties of commerce are liable to typographical mistakes. Thus he found in Art. 54 that the tree called Lugi had been translated *ceder* (the German for cedar), but the printers had made *leder* (leather) out of it; "and yet," he continued, "on closer examination it will be perceived that even in Japan they know that leather is not made of wood." He considered the treaty as a great boon to German trade, as four more ports were opened to the German flag, and in all other respects they were placed on the footing of the most favoured nation. Among the other advantages it is stipulated that the Custom-house must be open for business from sunrise to sunset. I only regret that the Japanese Monarch did not insist on reciprocity, for then our offi-

Digitized by Google

cials at home would not be able to shut up their offices for a couple of hours to enjoy their afternoon nap without interruption as they do now, but would be relieved at regular intervals. It is just possible that we may take a leaf out of this Japanese book; for this stipulation of the treaty might be introduced at home with great advantage. (Applause.) The only other remark I have to make is to express my regret that our representative in Japan could not obtain for the Germans at Nagasaki a little further extension of their right of taking a country walk, a very innocent amusement, but considered improper and dangerous by the Daimios, who were understood to be a sort of Japanese Upper House, like our Federal Council. But I suppose we ought not to blame him too severely when we look round and find that many trifling liberties and innocent amusements are denied us by our own Daimios in this country." (Cheers.)

Herr Camphausen, as one of the members of the committee, recommended the House most earnestly to confirm and ratify the treaty unanimously. It must be considered as a great step in advance that the Japanese had broken through their old law, and now permitted Foreigners to go twenty miles into the interior of the country in all the ports open to foreign commerce, with the sole exception of Nagasaki, where the consent was required of the Daimios, who, however, were not to be compared with our modern House of Lords, but rather to the feudal barons of the Middle Ages. But the most important advantage achieved by the treaty was the extension of all the concessions obtained to the whole of the Zollverein.

The treaty was then unanimously confirmed.

The journey of the King of Prussia to Hanover and Bremen has been so often postponed that like the Boy and the Wolf in the fable no one any longer believed in it. However, he is now fairly off, having left Berlin on Sunday afternoon by special train for Hanover. As he is also to visit Bremen, and will go down to Bremerhaven in one of the North German Lloyds' Transatlantic steamers, the departure of the North Pole Expedition, which was to have sailed last Saturday, has been deferred, in the hope that his Majesty, who takes a great interest in it, and has supported it by a fresh donation of 2,000 dols., will inspect the ships, and see them steam away,

COMMERCIAL.

Cassia lignea is firm, and commands an easy sale at former rates. Rice neglected, but not lower. On the recommendation of Prussia, as president of the North German Confederation, the Federal Council have resolved to bring in a Bill for the reduction of the import duty on rice from 3 dols. to 1½ dols. per 100 lbs. for the whole of the Zollverein. After a long period of stagnation it is refreshing to be able to report that Spelter has again come into favour. The first sale was 1,500 centners in loco last week, for which 13 marks 10 schillings banco per centner were paid, since which the price has been continually rising, the last price paid being 13.15½, the sales amounting altogether to 19,000 centners. None is now to be had under 14 marks banco, but hitherto no transactions are reported at that figure.

SHIPPING.

SAILED.—Randers, to Hong Kong; J. W. Lorenzen, to Singapore.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, June 19.

The elections for the Second Chamber of the States General have resulted in the brilliant success of the Liberal cause, they having gained a positive victory over the united factions of Conservatives, Roman Catholics, and anti-Revolutionists, who had no other aim in view than to overthrow the Liberal Instruction Law of 1857, and to replace the neutral anti-sectarian instruction by a strict sectarian system. The ecclesiastical parties abhor the free lay instruction, and desire that the Bible should be made the standard work in every school, and that priests and ministers should alone direct the instruction. That the majority of the nation is not in favour of this plan is shown by the fact that the Opposition has been defeated, and that the Cabinet is in possession of a strong majority in Parliament.

The Ministerial party has only lost one member, namely, Mr. Pypers, in the district of Breda; while, on the other side, seven new Liberal candidates have been duly elected by overwhelming majorities, namely, Messrs. T. J. Stieltjes and J. de Lange, at Amsterdam; Dr. W. H. Jaserda, at Sneek; Jhr. Mr. J. A. Sandberg, junior (who has defeated Mr. Gefken), at Zwolle; Mr. K. A. Rombach, at Brielle; Jhr. Mr. D. van Akerlaken, at Hoorn; and the General W. J. Knoop (who, *mirabile dictu*, has beaten the ultra-Orthodox Van Foreest), at Alkmaar. The Conservative party has lost six members, Messrs. J. K. van Goltstein, M. J. Pynappel, Gefken, van Foreest not having been re-elected; whilst Messrs. Rochussen and de Bosch Kemper, who preferred to retire from the contest, have had their seats filled up by Liberals. The orthodox party in Parliament is reinforced by four members, Messrs. van Loon, van Lynden van Sandenburg, Luyben, and Haffmanns. The ex-Minister, Mr. Hasselman, was elected at Tiel in opposition to Mr. Lidth de Jeude.

In four districts there was no definitive result arrived at. In Gouda a ballot must take place between Jhr. Mr. W. M. de Brauw and Dr. J. Bosscha, jun.; at Leyden, between Mr. H. A. Neeb and P. H. Baron Taets van Amerongen; at Haarlemmermeer, between Jhr. Mr. J. W. H. Rutgers van Rozenburg and Mr. J. J. W. van der Biesen; and at Zuid Horn between Mr. N. Olivier and H. W. Wierda.

A few days before the elections took place a rumour obtained currency at the Hague that serious revolutionary riots had occurred in the East India colonies, resulting in the dismissal of the resident of Souracarta, Mr. Zoetelief. The *Vaderland*, however, contradicts the latter statement, and affirms that private letters from Batavia state that the dismissal of Mr. Zoetelief resulted solely from the fact that he had failed to do his duty. In the meanwhile these troublesome rumours have found their way abroad, so that even the *Asiatic* told its readers that a revolution was imminent at Java.

The Second Chamber of the States General will meet on the 17th inst. for the despatch of business, but I do not think any matters of high importance will be dealt with before the close of the Session. The section report upon the Agrarian law has been published. The majority in the sections is of opinion that it is urgently necessary to finish what is called the "Colonial question," if it is not already too late. The proprietorship of grounds is now regarded as the principal condition of free cultivation, but opinions are so divided that I begin to think that we shall never be enabled to settle the question satisfactorily.

H.M. the King has given orders that artificial breeding of silkworms shall be carried on at his seat, *het Loo*. Mulberry trees and eggs are already being transported from Amersfoort to the Royal seat. A rumour has been circulated in the Hague that the Government had appointed Mr. Mieling, manager of the States printing-offices, to reorganise the Government printing offices at Java. Mr. G. Kolff having protested energetically in the *Nieuwe Rotterdamsche Courant* against this appointment, the papers declare that Mr. Mieling had refused the post. In a few days H.M. the Queen will return from France to *het Loo*, where her Majesty's birthday will be celebrated. H.M. the King and the Prince of Orange are residing at Apeldoorn.

General indignation prevails in the tin trade because the Government does not take measures to diminish the stock at Banca, which amounted last March to 180,455 slabs, representing a value of ten millions of guilders. It is asked why this quantity is not transported to Holland, in order to be sold, not only in behalf of the interest of the trade, but also in that of the taxpayers.

COMMERCIAL INTELLIGENCE.

Very little business has been transacted in the Stock Market, dealers in all kinds of securities being disinclined to enter into engagements. Dutch Two-and-a-Half per Cents., 55¼; Three per Cents., 64½; Four per Cents., 87½; Netherlands Bank, 234; Trading Company, Four-and-a-Half per Cents., 122½; Netherlands India Railway Company, Four-and-a-Half per Cents., 93⅜; International Bank, 35. The balance-sheet of the International Credit and Trading Company, Rotterdam, has been published; the deficit on the 31st Dec., 1868, amounted to f.818,218.94¼. There has been rather more activity in the Discount Market, but no alteration in the Bank rate of discount has been effected. The Trading Company has chartered the undermentioned vessels to convey produce from Java to the following harbours:—To Amsterdam—Aurora, at f.82.73 per last; Java, at f.84.90 per last; Zaanstroom, f.86.93; to Rotterdam—Laurens Coster, at f.83.83; Oceanus, at 87f.; to Schiedam—Maarten van Rossum, at f.87.50.

## Monetary and Commercial.

A Treasury warrant has lately been issued, which under certain conditions reduces the rates of book, pattern, and newspaper postage between the United Kingdom and our Colonial possessions, as well as some foreign countries, including Ceylon, Hong Kong, China, Japan, Java, Borneo, and Manila. Until now the minimum rate of postage for book-packets or newspapers for the above places has been 2d. *via* Southampton, and 4d. *via* Marseilles. From the first of July next the charges will be:—*via* Southampton, 1 oz. or under, 1d.; over 1 oz. but not exceeding 2 oz., 2d. *Via* Marseilles, 1 oz. or under, 2d.; over 1 oz. but under 2 oz., 4d.

The Messageries Imperiales once more gives its shareholders a dividend at the rate of 10 per cent. per annum—that is £2 per £20 share—for the past twelve months. The value of the company's naval plant stood at the close of 1868 at £3,620,000. Three large steamers were added to the company's fleet in the course of last year, viz., the *Hooghly*, of 500-horse power and 4,000 tons burden; the *Tanais*, of 280-horse power and 2,700 tons burden; and the *Tage*, of 280-horse power and 2, 700 tons burden. Since the commencement of 1869 two other steamers, the *Scamandre* and the *Ebre*, have been added to the company's Mediterranean liners. One other steamer, the *Peiho*, is about to be added to the Indo-Chinese line, the business of which is stated to be increasing. The total receipts of the company in 1868 on revenue account were £1,837,674, and the working expenses were £1,564,069, leaving a balance of £273,605.

The directors of the Chartered Mercantile Bank of India, London, and China notify that a dividend of 4 per cent., free of income-tax, for the half year ending the 30th instant, will be paid to the proprietors on the 1st of July.

At the meeting of the Colonial Company (Limited) the directors' report was adopted. It mentioned that the net profit for the year amounted to £72,260, and announced a dividend of 12s. per share, making, inclusive of previous distributions, a total payment of 8 per cent. for the twelve months, free of income-tax.

At the meeting of the Ceylon Company (Limited) the directors' report was adopted, and a dividend declared at the rate of 6 per cent. per annum, free of income tax. This, with the interim distribution made in December, and the interest on the debentures, will absorb £43,994, and leave £2,069 to be carried foward.

There has been a moderate demand for Mexican dollars for transmission to China at 4s. 11⅝d. per ounce, but the supply here

Digitized by Google

is very limited. Considerable remittances are expected to come to hand shortly, chiefly *via* New York, owing to the low rates of freight charged by that route. Bar silver is unchanged, at 5s. 0⅛d.

The report of the Assam Company, to be presented on the 29th inst., gives a favourable estimate of the crop of the present year, and, in consequence, proposes a resumption of dividends in the shape of an interim distribution of 2½ per cent.

The *Manchester Courier* intimates that a meeting has been held of the creditors of Messrs. Watson and Sherburn, cotton spinners and manufacturers, Padiham. Mr. M. Bateson Wood, solicitor, presented a statement of accounts, which showed liabilities amounting to £9,566. The assets showed a dividend of from 7s. 6d. to 10s. in the pound, according to the scale upon which the mill would be valued. A committee of investigation was appointed, and the meeting was adjourned, with a view to the reception of their report.

Advices from Glasgow report the failure of Messrs. Murdoch and Dodderell, sugar refiners, and state that it has been chiefly caused by the importers of sugar on the Clyde altering credits from four to two months, and that the estate, according to the lowest estimate, will produce from 12s. to 13s. in the pound. The works, it is stated, have been mortgaged to a Scotch bank for £35,000.

The liabilities of Messrs. Felix Leach and Co., of Manchester, are thought to amount to £70,000. At a meeting of the creditors of Messrs. John Clough and Sons, machine wool combers, Providence Mills, Bradford, the accounts showed liabilities on acceptances and open debts of £6,460, with small assets.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 26th inst., was in gold, to Alexandria, £38; to Bombay, £100; to Madras, £2,277; in silver, to Penang, £4,500; to Singapore, £7,500; to Hong Kong, £42,828; to Shanghai, £2,250; total in gold, £2,415; in silver, £57,078.

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the present month, which contain details of the quantities of Cotton Manufactures and Yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th June, 1869, compared with the corresponding periods of the two preceding years:—

### HONG KONG AND WHAMPOA.

## FREIGHTS AND CHARTERS.

We have no improvement to note in berth freights to the Eastern ports; rates remain without alteration; in coal freights from the Northern outports there is a little more doing, and rates have in some instances advanced.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 40s. weight, 50s. meast. To Hiogo: 50s. weight or meast. To Tientsin: 60s. weight or meast. To Chefoo: 60s. weight or meast. To Shanghai: 35s. weight, 30s. meast. To Foochow: 50s. weight, 45s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Amoy: 50s. weight, 45s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £44. For Hong Kong: £38. For Singapore: £25. For Galle: £24. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. For Shanghai: £2 2s. 6d. For Hong Kong: £1 15s. For Singapore: £1 6s. For Galle: £1 6s.

The Admiralty have invited tenders for the conveyance of about 90 tons stores to Hong Hong.

## CASUALTIES.

Advices from Capetown, dated May 4, state that the Johanna Mathilda, Lohse, from Saigon to Falmouth, which put into Simon's Bay April 10, leaky, &c., had discharged, and would be repaired on the slip.

Advices dated May 4, received at Amsterdam June 10, state that the leak had not been found in the Hollandia, Nieuwenhuis, from Amsterdam to Macassar, which put into Simon's Bay, April 9, leaky; the vessel had strained considerably, and lost some sheets of copper and part of her false keel. She had been hauled on the slip, and was being caulked and recoppered.

Advices from Nassau, N.P., dated May 29, state that a Spanish ship (? Golden West), from Havana to China, with coolies, got on shore at Ship Channel cays, on or about May 20, but was assisted off by wreckers.

The Edith Banfield, of Scilly, Mitchell, from Saigon, to Hamburgh, was anchored in the Downs, after being ashore on the south part of the Goodwin Sands, and assisted off with loss of anchor and chain.

Advices from Amsterdam, dated June 17, state that the Dunedin, McMillan, from Sourabaya to that port, was aground on Horsenmond, near Nieuwe Diep; she was towed off by three tugs on the morning of the 17th, and appeared to be uninjured, but had lost three anchors.

The Carnarvonshire, Davis, from Shanghai and Halifax, which arrived at New York, June 10, reported having been on her beam ends, and had to cut away sails, during a hurricance, March 26.

The Xulla, Ward, from Penang, which arrived at New York, June 11, reported that during a violent hurricane from E. to N., March 21, in 26 N., 51 E., she was on her beam ends for 9 hours.

## MISCELLANEOUS.

Off ASCENSION.—April 25, Miranda, from Colombo, for London; 28, Chanticleer, from Foochow, for London; Batavia, from Batavia, for Amsterdam; 30, Star of Jamaica, from Singapore, for London; May 1, Jeanne and Joseph (French brig), from Hong Kong, for Marseilles; 17, Meander, from Bangkok, for Falmouth.

At ST. HELENA.—April 27, Padang Packet, Huide Koper, from Padang, and sailed for Amsterdam; Nellie Chapin, Wass, from Manila, and sailed 28 for New York; 28, Burmah, Yeo, from Sourabaya, and sailed for Rotterdam; Bulwark, Kelly, from Java, and sailed May 3, for Amsterdam, Telanak, V. Galen, from Sourabaya, and sailed April 29, for Amsterdam; May 5, Sir George Pollock, Watt, from Sourabaya, and sailed 7 for Amsterdam; 12, Concepcion, Tuton, from Manila, and sailed 13 for Cadiz; 13, Amstelstroom, Kretchmer, from Banjoewangie, and sailed for Amsterdam; 13, United Service (str.), Gaine, from China, Singapore, &c., and left for London; 14, S. v. Heel v. Munchen, from Sourabaya.

Off ST. HELENA.—April 29, Euterpe, from Colombo; May 9, Eureka (Amer. barq.), from Bangkok.

# HONG KONG AND SHANGHAI BANKING CORPORATION.

Capital, 5,000,000 dols Paid up, 3,000,000 dols.

COURT OF DIRECTORS AND HEAD OFFICE IN HONG KONG.

LONDON MANAGER—W. H. Vacher, 32, Nicholas-lane BANKERS.—London and County Bank.

BRANCHES AND AGENCIES:

| | | |
|---|---|---|
| Hong Kong | Hankow | Singapore |
| Shanghai | Japan (Yokohama) | Bombay |
| Foochow | Manila | Calcutta |
| Ningpo | | |

The Bank grants DRAFTS upon and negotiates or collects BILLS at any of its Agencies or Branches; also receives DEPOSITS for fixed periods, at rates varying with the period of deposit.

THE STRAITS TIMES.—Daily, weekly, and fortnightly editions; published in Singapore, for circulation throughout the STRAITS SETTLEMENTS, JAVA, BORNEO, SIAM, FRENCH COCHIN CHINA, CHINA, and JAPAN.

This paper, which is the oldest in Singapore, and the most widely circulated throughout the FAR EAST, offers an excellent medium for the advertisements of shipbuilders, machinists, manufacturers, patentees, &c., in the United Kingdom.

Advertisements to be forwarded through an Agent in Singapore, or GEORGE STREET, 30, Cornhill, London.

HOLLOWAY'S PILLS.—This medicine has resisted every test which time, prejudice, and vested interest could impose upon it, and it at length stands forth triumphant as the most reliable remedy for those derangements of the system so common at the change of seasons. When the air grows cooler, and the functions of the skin are retarded, an occasional dose of Holloway's Pills will call on the liver and kidneys for greater activity, and compensate the system for diminished cutaneous action. As alteratives, aperients, and tonics these Pills have no equal. To every aged and delicate person whose appetite is defective digestion infirm, and tone of health low, this medicine will be a precious boon, conferring both ease and strength.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £8,200.000.

Reserved Fund ... ... f 20,000,000 ... £800,00

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

### LONDON AGENTS.

Messrs. MACTAGGART, TIDMAN, and CO., 34, Great St. Helens.

E. M. SMITH, Manager.

SINGAPORE, CHINA AND JAPAN.

No. 22, Gre t St. Helen's, E.C.

In lieu of the "Fort Regent." To follow the "Ocean Rover." Will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful clipper ship OCEAN BEAUTY, A1 16 years, 585 tons register; ROBERT WATSON, Commander; West India Docks. This magnificent high-classed Clipper, built last year, under special survey, offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Rates:—15s. per ton of 20 cwt., or 40 cubic feet. No Creosoted Timber, nor manure of any description, taken by this vessel.

To follow the Ocean Beauty. Will be despatched about the 1st August.

DIRECT for COLOMBO, the beautiful teak built clipper ship PALMERSTON, A1 15 years, 894 tons register; J. N. SEAGROVE, Commander; London Docks. This magnificent high-classed clipper, built under special survey, offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Malabar Coast. To follow the "Robert Jones." Will meet with the usual quick despatch.

DIRECT for COCHIN, CALICUT, TELLICHERRY, CANNANORE, and MANGALORE, the beautiful clipper ship STAR OF JAMAICA, A1, 9 years: 306 tons register; A. SACK, Commander; West India Docks. This splendid vessel offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage, apply to JOHN C. CAMPBELL' 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Steam from London to Shanghai direct. To sail punctually on the 28th of July.

FOR SHANGHAI, the splendid new composite full-rigged steam clipper ship OBERON, A 1 16 years at Lloyd's, 1,200 tons register, 300-horse power; JOHN KEAY (late of the ARIEL), Commander; East India Docks. This fine ship, built expressly for the China trade, combining all the latest improvements of the fastest clippers, with the addition of the best description of marine engines, offers a most favourable opportunity to shippers of fine goods. The passage to Shanghai is expected not to exceed 75 days.

For Freight only, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

To sail punctually on the 10th July.

FOR SHANGHAI, the celebrated Clipper Ship, LAUDERDALE, A1 15 years; 851 tons register; G. MOODIE, Commander, East India Docks.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

Regular line of Packet Ship. To sail on the 5th July.

FOR HONG KONG, the splendid Liverpool-built Clipper GEOLOGIST, A1 13 years, 854 tons register M. CLARKE, Commander; East India Doc 1s.

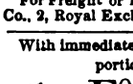
For Freight apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

Regular line of Packet Ship.

FOR HONG KONG, the splendid composite clipper, CLETA, A1 16 years, 519 tons register; C. H. MIDDLETON, Commander; East India Docks. This ship sails very fast, and presents a favourable opportunity to shippers of fine goods.

For Freight or Passage, apply to SHAW MAXTON Co., 2, Royal Exchange-buildings, London, E.C.

With immediate despatch. Having a considerable portion of her cargo engaged.



FOR SHANGHAI, direct, the favourite and powerful clipper ship SIR WILLIAM WALLACE, A1, copper red and copper-fastened, 967 tons register; A. H. TAYLOR, Commander; loads in the East India Docks. This magnificent vessel, built under special survey in 1866 by Messrs. John Duthie, Sons and Co., of Aberdeen, for the China trade, has proved herself thoroughly adapted for it by smart passages and sound delivery of cargo.

For Freight or Passage apply to NORRIS and JOYNER, 60, Cornhill, E.C.

### THE MAILS, &c

—o—

The next inward mail will be that bringing Hong Kong advices to May 27, expected in London on Monday next. Telegrams in advance of the succeeding mail (June 10) have been in some time, and those of June 17 are now due. *Via* Kiachta we have Shanghai telegrams to June 15, received on the 3rd instant.

### LIST OF PASSENGERS.

—o—

PASSENGERS INWARD.

Per French mail steamer *Moeris*, arrived at Marseilles July 2.—From Yokohama: Messrs. Verny, Shimiza. From Shanghai: Messrs. Smith, David, Simpson, Farina, Fremigau, Tapic. From Hong Hong: Messrs. Domingo, Gonzalez, Lopez, Quesada, Garcia, Simon, Albarez, Da Silva, Yon, Espino, Delamy, M. le Abbe Chinon. From Saigon: Messrs. Bran, Bagi Conquerant, Caswell, Lambourke, Hugues. From Batavia: Messrs. Van Roggen, Ruyter, Watendorf, Kuppers, Van Bloremm, Van Sulkoff, Hasinus, Cummings, Kern, Madame Henry. From Singapore: Messrs. Dammiler, Bungener, Michel, Deden.

Per P. and O. steamer *Great Republic*, arrived at San Francisco June 19.—For New York: Mrs. J. L. Hammond and two children, C. J. Emery and wife, Mrs. McGrath and two children, J. S. Lulum, Rev. Mr. Gunoceut, wife and child, J. Boyle, Mrs. Henderson, Mrs. Goodrich, Mrs. Williamson, C. H. Cleaveland, Daniel Gaw, F. P. Almedia, Mrs. Dana and child, G. B. Thomas, W. Watson, W. Lambeth, Captain Samuel Newton, wife and child, W. S. Kauffman. J. L. McGowan. For Europe: A. S. S. Palmer, O. S. W. Walker, and James Rutherford.

PASSENGERS OUTWARD.

Per P. and O. steamer *Ripon*, from Southampton, June 26.—To Yokohama: Mr. E. H. Pratt. To Hong Kong: Mr. E. Monger, Mr. J. Russell Skey, and two second-class passengers. To Singapore: Mr. J. D. Vaughan. To Penang: Mr. and Mrs. Thompson and child. To Ceylon: Four second-class passengers.

Per P. and O. steamer *Nyanza*, from Marseilles, July 4.—To Ceylon: Mr. Wm. Somerville.

Per P. and O. steamer from Suez, July 11.—To Penang: Mr. Victor Kruger.

Per P. and O. steamer *Massilia*, from Southampton, July 10.—To Shanghai: Mr Broughall. To Hong Kong: Mr. F. Cumberland. To Ceylon: Mrs. Halliley, child, and two sons, Mr. H. Skrine, Mr. W. B. Ainger.

From Gibraltar.—To Singapore: Mr. A. Mosley.

Per P. and O. steamer *Tanjore*, from Marseilles, July 18.—To Ceylon: Mr. F. R. Sabonadière.

Per P. and O. steamer *Ripon*, from Marseilles, August 1.—To Batavia: Mr. and Mrs. Pietermaat. To Ceylon: Mr. W. J. Carver.

Per P. and O. steamer from Suez, August 8.—To Hong Kong: Mr. and Mrs. Bade, Mr. F. Dreyer.

## Summary of News from the Far East.

—o—

### JAPAN.

YOKOHAMA.

The French mail delivered this morning brings no news worth quoting from Yokohama; but by the Pacific route (the steamer *Great Republic* having arrived at San Francisco on the 19th June) we have advices from that port to May 29, of which the following is a summary:—

The Mikado arrived at Yedo on the 9th May. Numerous outrages are reported to have been committed upon Foreigners. The English Minister had complained to the Japanese Government regarding the matter.

The anniversary of the birthday of Queen Victoria was observed in a splendid manner. Sir Henry Parkes reviewed the English troops of the garrison and the marines from the fleet. There was a regatta during the day.

The whole fleet of the Mikado had arrived safely at the port of Arvomori.

Admiral Enomoto was strongly fortified on the island of Yesso, impatiently awaiting an attack by the Mikado's forces. Three of the Admiral's vessels attempted to capture the ram *Stonewall*, but the attack was unsuccessful. One of the Admiral's vessels was beached and burned.

Since the return of the Mikado to Yedo the city was full of armed men. The retainers of the Daimios had been summon d to meet his Majesty. The Parliament, consisting of 270 members, was in session in Yedo.

The markets were dull, with only a few sales of cotton goods · woollens were unchanged. The business in silk was limited; the settlements amounted to 150 piculs, chiefly medium and lower class. The stock of silk had been reduced to 50 piculs, and prices were unchanged, with symptoms of a weakness for inferior kinds. The weather is favourable to the new crop, and the worms had successfully reached the second stage. The exports for the present season amount to 14,400 bales.

Teas: The exports from Yokahama for the season amount to 10,936,700 pounds. But few samples of new tea have been received; not enough to report on satisfactorily. Settlements for American markets, 300 piculs. The stock was low and prices firm.

Freights: To New York, per sail, £3; per steamer, 45 dols.

Exchange: On London, 4s. 7½d.; on Paris, 5f. 80c.

### CHINA.

—o—

SHANGHAI.

(FROM AN OCCASIONAL CORRESPONDENT.)

SHANGHAI, May 13, 1869.

The English mail of 26th March arrived here yesterday, per steamer *Sunda*. The troop ship *Adventure*, which left Hong Kong a few hours before the *Sunda*, brought news in anticipation. The Admiral sailed in the *Salamis* for Tientsin, *en route* to Peking, immediately after the arrival of the mail; and the *Adventure*, it is reported, will take Lady Keppel to Yokohama, there to await the Admiral. It is understood that Sir H. Keppel has gone to hold a conference with Sir Rutherford Alcock at Peking on the policy lately enunciated by the Home Government of allowing the Chinese to do as they like. It is not probable that either Sir R. Alcock or the Admiral can be in favour of such a policy, as their experience of China and Chinese must convince them, as well as every rational person, that the plan proposed by the Home Government is most likely to lead to war; whereas demanding redress for injuries on the spot from the actual aggressors is more

Digitized by Google

likely to conduce to peace. In the history of our dealings with the Chinese there is no instance of their declaring war against us. Each war that we have had with the Chinese has been initiated by us to obtain reparation for a series of wrongs perpetrated, or for breach of distinct treaty provisions. The Chinese are again becoming impressed with the idea that they can cope with Foreigners, and are strong enough to expel them from their borders. The late outrages occurring simultaneously at different places seem to go a long way towards proving a preconcerted action on the part of the mandarins. It would be desirable if it could be impressed on the Government and people at home that the Peking Government has merely a nominal power in the provinces, where the Viceroys hold almost unchecked power; and that the Chinese have never conceded to us any privileges whatever, but that all the treaty rights or powers have been extorted by force of arms. The Peking Government now exist upon the revenue derived from the Foreign trade, and are now willing to open as many ports on the coast as we desire, on the sole condition that a Foreign Customs be established and a Consul appointed. The opening up the rivers to steamers and the working of mines they steadily oppose, although beneficial to their own people; in fact, if we are ever to obtain those concessions we must take them. The desirability of bonded warehouses is now under discussion between the Chamber of Commerce and the Customs authorities, and doubtless some arrangement of the kind will before very long be arrived at. The sale of transit passes for goods into the interior by Foreigners to Chinese, which has latterly been carried on, on a large scale, in order to avoid the squeezes at the inland barriers, has been complained of by the local Chinese authorities as interfering with their revenue. The probability is that the Chinese will be forced sooner or later to alter their system, which assimilates very much to that in vogue amongst the different potentates in Africa, where each local authority squeezes as much as he can on all persons or goods passing through his territory. There is a plan in contemplation by the Customs to establish telegraphic communication from the Beacon below Woosung to Shanghai, instead of the present system of look out ships and flags. If this arrangement be carried out it may inaugurate a new era in China of *progress* versus *inertia*. A beginning has already been made by Mr. Hart towards improving the ports, and two competent engineers are at work here surveying the harbour and entrances, and putting the lights into an efficient state, and the lighthouse on Gutzlaff Island is in course of construction.

Much indignation has been aroused in Shanghai by the aspersions of the Duke of Somerset in the House of Lords against the morality of the place. He has evidently been misinformed by some foolish or designing persons, as Shanghai may compare favourably with many seaport towns in England. There is very little crime here, there being a well-ordered community of Foreigners, and the Chinese give very little trouble. A large proportion of the Foreign residents are married, and have their wives and families here, so we are at a loss to know where this great immorality is to be found. The only foundation for it seems to be that a low class of Chinese pander to the vices of the sailors on shore, but their number even is not great, and has no influence whatever on the residents.

The proceedings at the meeting of the Chamber of Commerce, held on the 7th inst., were unusually lengthy, but of great importance. The members present were:—F. Porter, Esq., in the chair; Messrs. Hogg, Lavers, Probst, Hayes, Bell, F. B. Johnson, King, Gubbay, Monro, Groom, Dow, Purdon, R. Miller, J. I. Miller, Helbling, and Gilmour. The first question discussed was that of transit dues, on which the following resolution was passed:—

"That this meeting considers that the proposed modification of the treaty as to transit dues, by which 2½ per cent. should be made payable at the ports of entry, and cease to be optional, is the least satisfactory of all forms by which the levy could be collected, and contrary to the general interest of trade, and that it would only add by so much to the cost of taking goods into the interior; as local dues, in some shape or other, are sure to be superadded; and this meeting, therefore, still adheres to the views expressed in the Chamber of Commerce memorial, in regard to the best means of collecting transit dues."

A majority of the members voted against the proposal of the Silk Committee, that the present system of paying duties before shipment should be changed. The question of measurement of teas came up again for discussion; the balance of evidence was shown to be in favour of measurement here; but a resolution expressing an opinion in favour of this course was rejected in favour of an amendment which virtually declared the matter to be entirely a matter of option and arrangement.

The subject of bonded warehouses was also discussed, in connection with Mr. Dick's letter on the matter; and it was unanimously agreed that their establishment would be advantageous. It was suggested that a list should be opened at the Custom-house to ascertain what firms would wish to bond their godowns on the terms proposed.

The Duke of Somerset's late speech in the House of Lords was taken up, and a resolution requesting the Committee to protest against the slur cast by him on the community offered. But it was eventually left an open question whether the letter should be written merely on behalf of the Chamber, or whether the community should be invited to join in a general protest. At the close of the meeting a letter from Mr. Dick, asking the opinion of the Chamber regarding a line of telegraph from Shanghai to the Kintoah Beacon, was read and warmly applauded. The project of course meets with warm support.

One of the grossest absurdities we have heard of for a long time is reported from Tientsin. The members of the various missionary bodies there seem to have agreed, after some difficulty, on a set of rules for the governance of the Union Church, at that port. Amongst other things, they exclude from membership all dealers in opium, and have excommunicated a respected member of the community, who has declined to promise not to sell the forbidden article. We all know that widely different views are entertained regarding the opium trade, but our missionary friends may rest assured that excommunication will not stop it. It is surprising how they can overlook the incongruity of their own action. They exclude the sinner from his only chance of conversion—persuasion at their hands.

A Newchwang correspondent of the *North China Herald* writes:—We have not heard anything about the Corea being opened, and I hope people will not be induced to ship goods on the strength of the rumour you mention, as the stock of grey shirtings left from last year is nearly all on hand yet; and holders cannot get more than Tls. 2.26 to Tls 2.30. The *Sophie and Hellen*, which vessel was aground on West Bank, has come into port, and is loading for Hong Kong. An English three-masted schooner is ashore; boats have been sent to her assistance. The *Kiushiu* is loading the first cargo of beancake from the steam factory for your port.

The Hankow correspondent of the *Evening Courier* writes:—We understand that the market for the new tea crop in some of the country districts has been opened at comparatively low prices. At Yung-low-loong the tea leaf has been bought at 400 to 420 cash per catty, equal to about Tls. 26 in Hankow. At Nip-kasee the prices were 320 to 340 cash, equal to Tls. 22 to 23. From the Onfa country no news has been received. Musters were expected at Hankow about the 20th inst.

## HONG KONG.

The present inward mail left Hong Kong on the 20th May, on which day the outward mail of April 9 was due there. Up to the hour of going to press none of our despatches from this port have come to hand, from which we infer that they have all missed the steamer, or in some way miscarried. On making inquiry we have ascertained that many of the principal firms, &c., connected with China are also without any Hong Kong papers.

Some changes have recently taken place in the Foreign Consulates in China, a record of which may interest our readers. Mr. Tettenborn, late Consul-General at Shanghai, has been recalled; and Mr. Anneke, late Chancellor of N.G. Consulate-General at Butcharest, has been nominated Consul of the North German Confederation at Shanghai. He arrived in the last French mail, and proceeded immediately to take up the duties of his post. Since the departure of Mr. Heinssen (of Messrs. Siemssen and Co., at Shanghai) to Europe, half a year ago, the Hanseatic Consulate has been given over to the Prussians. The hitherto existing Prussian Vice-Consulate at Shanghai, of which Mr. Probst has been the Vice-Consul, will, on the establishment of the N.G. Consulate there, be dissolved. At Canton Baron Carlowitz has been nominated as Consul of the North German Confederation, but the Consulate has not yet been established, owing to the temporary absence of that gentleman, who is at present at Peking, but will return very soon. Mr. Eimbcke, partner of Messrs. Carlowitz and Co. in this colony, has been nominated as Consul of the North German Confederation; and we hear that the Prussian Consulate here, with that of the Hanseatic Towns, now managed by Messrs. Pustau and Co., will be handed over to the gentleman in question. The Consulates at Hong Kong and Canton will receive a salaried Chancellier; this is some improvement in German policy in China, because if the Confederation avoids the large (?) expenses of creating salaried Consuls, it at least sends salaried Chancelliers who have studied in universities. Why does it not send out student interpreters?

## PHILIPPINES.

—o—

### MANILA.

The following important communication, dated the 4th May, and received from Her Majesty's Consul at Manila, detailing certain important modifications of the customs, export, and port dues for the Philippine Islands, is published in the *Hong Kong Government Gazette* for general information:—

H.B.M.'s Consulate, Manila, May 4, 1869.

SIR,—I have the honour to transmit herewith inclosed to your Excellency a decree in translation, issued by the Provisional Government at Madrid on the 29th December, 1868, and published in the *Manila Gazette* on April 5 last, relating to certain modifications in the customs dues of this place.

The advantages offered by this reform on the present rate of customs' dues most worthy of notice are the reduction by 50 per cent. of the differential duties, and their total abolition at the end of two years from the date of the "cumplase," *i.e.*, from the 5th April last, the suppression of all export dues, and the merging of several troublesome port-taxes into one charge.

Such measures, I need hardly remark, are likely to produce a salutary

Digitized by Google

influence on the future commercial interests of this colony. The decree in question will, I believe, be brought into operation in the course of the present month.

I have the honour to be, with the greatest respect, Sir, your Excellency's most obedient and most humble servant, G. T. RICKETTS.

His Excellency Sir Richard Graves MacDonnel, C.B.,
Governor of the Colony of Hong Kong.

TRANSLATION.

Art. I. The Reform of the Customs' Tariffs of the Philippines which was effected and brought into operation by the suppressed General Finance Superintendency, in compliance with the Royal Order of 21st November, 1860, is approved; with the modification, that for all operations of Revenue, the metrico-decimal system shall be followed, and woollen fabrics be classified by weight like the rest, instead of the dues being graduated by lineal measure of the pieces.

Art. II. The modification resolved on by the said Superintendency in portions of the Tariff in this form are approved of.

Lot 35. Duty on Geneva spirit, wormwood or others, including the outside case; the duty is retained as in the Tariff, but the outside cases shall be taxed separately.

The Intendency, taking the opinion of the administration of the department, will grant a proportionate reduction in the duty on this article, which, as the substitution of that reform is contrary to the usual practice of Custom Houses, will be submitted to the Supreme Government, without, however, preventing it from being at once put in force *ad interim*.

Lot 268. Impure Carbonate of Soda reducing the valuation of 16 assigned by the tariff, to 8.

Lot 1,035. Smooth corduroys and velvets, worked or stamped, are taxed at the rate of 260 escudos the quintal, instead of 520 as fixed in the said lot.

Lot 298. Barley stripped of the husk pearled or peeled, the valuation is reduced to 24 escudos per quintal, instead of 1½ dollar per lb. as fixed in the tariff.

Lot 1,004. Cotton crimson cochineal colour for weaving.

Lot 1,005. Cotton, white, raw, or of other colours for weaving.

Lot 1,006. Cotton, yellow, rose-colour or green, for weaving.

The merging of these three Lots into 1,005 being stated in the following form.

Spun Cotton for weaving raw, white, or coloured; quintal 120 escudos, dues 7 or 14 per cent. according to flag proceeding from abroad, or 8 or 8 per cent. respectively if the exportation be national.

Tariff of mixed woven stuffs. The addition to this Tariff of the cloths fine Lastings, Cashmeres and serges of wool and cotton, by halves in warp and woof, at the valuation of 75 cents of a dollar per square yard; valuation in future will be modified by unity of weight according to Article 1 of this decree.

The explanation referring to the conditions of light stuffs, in the sense that any cloth which between every two threads admits another of the same thickness shall be considered as light stuff not pressed close.

And the declaration of freedom from Export duty of the Coal from the mines of Cebu.

Art. III. The Intendency will dedicate itself in preference to the new reform of the tariff, reducing by 50 per cent. all the charges mentioned therein over 3 to 8 per cent. the averages cale of duty; and by 50 per cent. the differential duty on foreign flags, which shall be kept up for the space of two years, to be counted from the time this decree is endorsed by the "cumplase," both charges being suppressed at the end of that term.

Art. IV. That in the new tariff the export dues on all articles charged therewith be suppressed; the exporters, nevertheless, being still compelled to declare the goods which they export, their quality and quantity, and it being the duty of the customs' administrations to supervise and make note thereof, in order to frame the commercial statistics of the Archipelago.

Art. V. The tax of 2 per cent. upon European goods imported in Spanish ships proceeding from the ports of Asia and Oceania, and that of 1 per cent. on those proceeding from Singapore are suppressed likewise.

Art. VI. The Intendency, on consulting with the Councils of Tariffs and Finance, will merge into one sole tax, to be called "Discharge Tax," and which shall be paid according to the tonnage (ton of 1,000 kilogrammes) of the goods discharged, all the duties known at present by the name of light cleansing, anchorage, shipment, and discharge, and others of the kind; managing so that the amount of the new tax may represent the due equivalent of those suppressed; different scales being drawn up for ships navigating the high seas, for coasters, and among them for ships measuring less than twenty tons. When a vessel in distress or from other cause is forced to transfer its cargo to another, or to discharge it to be reshipped afterwards, it will not pay the duty, which is only to be exacted from goods discharged for the purpose of being introduced into the islands.

Art. VII. The Discharge Due will be collected by the Custom House, the amounts, like all other general Taxes, being paid into the public Treasury.

Art. VIII. The Customs' Administration of Manila will at once take charge, with the character of Central Administration of that branch, of the despatch of the business confided for this purpose to that of taxes. The chief of the latter will retain nevertheless the title of Inspector of the Revenue, together with the duty of conducting the proceedings of invalidity or complaint against the decisions of the former.

(Signed) AYALA, Colonial Minister.

Madrid, 29th December, 1868.

TRANSLATION.

Art. 1. The introduction of ships of all kinds into the Philippine Isles, of wood as well as of iron hulls, is permitted on their satisfying the following duties:—

| | Escudos. |
|---|---|
| Those of wood, up to the burden of 100 tons, of a cubic metre, will pay per metrical ton ... ... | 13 |
| From 101 to 300 tons, idem... ... ... ... | 10 |
| From 301 upwards, idem ... ... ... ... | 5 |
| Those with an iron hull, whatever their burden ... | 5 |

Art. II. When foreign vessels have been repaired in the Archipelago, and put in a perfectly navigable condition, and their owners desire to nationalise them, they will pay only four escudos per ton, if the repair cost more than three times the value of the ship's purchase-money, and eight escudos if it should be more than double and should not amount to treble.

Art. III. The tons of a cubic metre treated of in the preceding articles shall be what the ships measure in bulk, without any deduction of space or compartment below deck. But the duties on all instruments, machinery, tools, and chattels referred to in notes 20 and 21 of the Customs' Tariff in force in the Peninsula, are included in the dues thus fixed per ton.

Art. IV. Every Spanish ship may be freely careened and surveyed in any foreign place.

Art. V. Owners of Spanish ships may freely sell or hypothecate them to countrymen or Foreigners, to which end Art. 592 of the Commercial code is abrogated.

Art. VI. Ships may be manned by the number of men agreed upon by the owner and captain, in accordance with Art. 24 title 10 of the existing Registry laws, and with the 1° and 4° of the Royal decree of the 27th November, 1867. When the captain or owner cannot find a sufficient number of Spanish seamen in a Foreign port, the crew may be completed with Foreigners with consent of the Consul or of the naval authorities.

Art. VII. Materials of all kinds imported for the construction, careening or repair of iron or wooden ships, of whatever tonnage finished material necessary for their armament, and material introduced for the construction and repair of marine steam boilers, whatever be the system or forces of the said apparatus, will pay the dues fixed in the Customs' Tariff; but the dues will be returned to the constructors and manufacturers, upon their petition, when the introduction and employment of the said material and effects, in the aforementioned constructions or repairs of ships, machines, or boilers, has been proved.

Art. VIII. For the reimbursement of the dues the weight or volume of the materials or effects as noted in the tariff will be compared with the weight or volume shown by the made or completed work, so that the proportion of dues corresponding to the waste or dismantled parts, which result from the construction or transformation thereof on their application to the works aforesaid, goes to the benefit of the revenue.

Art. IX. Articles 387, 390, and 391 of the instructions of the Philippine Customs are abrogated.

(Signed) AYALA, Colonial Minister.

Madrid, 29th December, 1868.

## BORNEO.

—o—

### PIRACY ON THE SARAWAK COAST.

(FROM A CORRESPONDENT.)

It is now some years since a pirate has been heard of or seen in these seas; in fact, not since the Sarawak steamer *Rainbow* destroyed the Sooloo fleet off Tanjong Kidorong. On the 21st April, however, an express boat arrived at Sarawak from Bintulu with the intelligence of a Lamur boat having attacked several trading boats, killing or capturing the crews, and plundering the boats, which, being unarmed, had fallen easy prey to the ruffians. This boat, it was said, being a very fast one, was in advance of her consorts, who, however, to the number of nine, were on their way down from Labuan, where they had been as traders, and having disposed of their cargoes, had then laid in stocks of arms and ammunition. On receipt of this news A. C. Crookshank, Esq., Administering Government of Sarawak, at once started off in pursuit with the gunboat *Heartsease*, followed by the steamer *Royalist*, and as it was probable that the pirates would divide their forces, one half keeping out to sea, the steamers did likewise, the *Heartsease* creeping in shore, while the *Royalist* kept in deep water, eight or ten miles out, with orders to rendezvous at the Redjang next morning. Going out of the Moaratabas river the *Heartsease* met and spoke H.M.'s gunboat *Starling*, which proved to be from Labuan on the same errand, and about to run into Sarawak for coal. She got enough wood to carry her on to the Redjang, and on the *Royalist* arriving there her fuel was transferred to the *Starling*, and she was sent back to Sarawak. The two gunboats then, finding no signs of the piratical fleet at the Redjang, proceeded towards Muka, but, owing to the dullness of the *Starling*, the *Heartsease* reached that place eighteen hours before her, and hearing then that a pirate boat was on its way back north, pushed on at once for Bintulu, when they found that the Lamur had been seen passing the river, on which Mr. Sinclair, the Assistant Resident of Bintulu, manned and armed five boats, carrying 100 men, and with these he chased the pirate, eventually capturing him off Kidorong, the scene of the *Rainbow's* gallant exploit. All the pirates on board, nine in number, were killed, two little boys were taken alive, and the captives released, excepting one man accidentally killed, and a woman who, having been wounded during the chase, was put an end to by one of the pirates. The boat was full of valuable plunder and specie, but unfortunately the Bintulu people boarded her all at once and on the same side, so that she heeled over, filled, and sank, whereby the conquerors lost a most valuable prize, and one which they richly deserved.

Had it not been for Mr. Sinclair's prompt and energetic action these rascals would have got clean off, as the *Heartsease* would have gone past Bintulu, and the *Starling* would certainly have not caught them; she only steams about five and a-half knots, and those who known Lamurs need not be told that they pull easily quite as fast as that; moreover, her *Labuan coal* smoke betrays her long before she could sight a pirate craft, and these gentry, on catching sight of her smoke, creep in shore, and lay close in some creek or small river until she has passed; in fact, they did so, according to the depositions of some of the captives. The *Heartsease*

Digitized by Google

burns one sort of wood, which gives little or no smoke, and that white, so that end on the officers of the *Starling* did not recognise her as a steamer until she got quite close, while the *Starling's* smoke was seen from the *Heartsease* two hours before she was spoken.

As only one boat was seen, and the boy prisoners and captives agree in saying that she had no consort, it is probable that the report of there being ten boats was simply an exaggeration; but it is said that on the day the *Starling* left Labuan two large Sooloo boats sailed thence with large stocks of lilas, muskets and ammunition bought there. These may possibly have gone towards the Natunas, as they have not been seen on this coast.

It is astonishing the amount of mischief effected by this one boat; she plundered ten boats, killed ten men, and captured eleven or twelve, the rest managing to escape on shore. It also shows how daring these men are, when one boat carrying eleven men braves the whole population of this coast.

This boat came from Jawie Jawie, and, according to the two boys, all alone, with the understanding that if they got back safely they were to pilot a whole fleet which they say is being fitted out at Jawie Jawie, to consist of ten boats, with the brother of Datu Mout, who was killed in the fleet taken by the *Rainbow*, as commander; the lads say the intention is to sail round Borneo, going eastward, first by Coti point. Both these boys agree in their statements, and no doubt some plan of the kind does exist; they could hardly have invented such a tale.

### FOREIGN TRADE WITH SARAWAK.

The trade of Sarawak with foreign countries has fluctuated a good deal during the last six years, but on the whole the returns present a satisfactory appearance, as will be seen by the following comparative statement:—

| Year. | Imports. | Exports. |
|---|---|---|
| 1863 | $414,756 | $386,439 |
| 1864 | 556,366 | 636,598 |
| 1865 | 504,200 | 464,834 |
| 1866 | 372,640 | 332,666 |
| 1867 | 300,468 | 333,190 |
| 1868 | 401,395 | 446,348 |

The years 1664-65 were extraordinarily busy years, caused entirely by a sudden demand for gutta percha and india-rubber, two of the principal articles of export, and on the ceasing of inquiry for these articles the trade fell off during the two following years, but in 1868 showed symptoms of again improving, and the demand for gutta percha having this year again appeared a further increase in both imports and exports may be looked for. The extent of the trade, however, is only about one-half of what might be done were more attention directed to the country and more activity infused into the port by the introduction of capital and British enterprise. The local trade is entirely in the hands of Chinese, and only one single European firm exists, while there is room both in Sarawak and at the rapidly improving outports on the Redjang, Muka, and Bintulu rivers for the successful establishment of mercantile houses. It is a great mistake to fancy that the trade of Sarawak is a monopoly; it is, with the single exception of one mining monopoly, perfectly free; the import duties are very light, and only levied on certain articles, such as wines, beer, spirits, and tobacco; while the exports are free, except timber, which pays 1 dollar per ton, and raw sago, which pays 60 cents per 100 passus, about 2½ tons. The chief articles of import are cotton goods, iron and steel, brassware, tobacco, treasure, and opium, the last named article being, as usual, in the East, prohibited, except to the Government farmer. The exports consist of raw sago, sago flour, gutta-percha, india-rubber, rattans, canes, damar, and other gums, birds-nests, beeswax, camphor, antimony ore, timber, gold dust and diamonds. A quicksilver mine discovered in 1867 has been opened by simple quarrying, and some samples of Cinnabar have shown 70 and 80 per cent. on analysis. Coal has been found lately not far from Sarawak, but as yet no arrangements have been come to for working it.

The outports are making very rapid progress; the coasting trade during the past year amounted to 1,548,994 dols., and the Foreign trade to 194,159 dols.

The total value of the trade of the territory of Sarawak, home and foreign, may be taken at 2,600,000 dols. for 1868, and will, in all probability, reach three millions of dollars this year, and this trade is carried on by one European firm and a few Chinese! The whole territory is covered with immense forests, and the supplies of gutta percha, rattans, &c., may be said to be inexhaustible, while the valuable timber would keep half-a-dozen steam sawmills going to very profitable tunes. Sarawak is very rich in minerals. but capital would be required to work them; and careful surveys by experienced mining engineers would have to be made in the first instance, as most of the really valuable mines lie hidden in the dense forests.

## JAVA.

(FROM OUR SPECIAL CORRESPONDENT.)

SAMARANG, May 22.

The damage occasioned by the breaking down, some time since, of the dam of the railway at Kedoeng Djatti having been completely repaired, the line will be opened for traffic in July as far as Solo, a distance of 109 kilos. from Samarang. The line at present is only running as far as Kedoeng Djatti, a distance of thirty-five kilos. The traffic at the present time is about 3,500 per month for natives, 3rd class, and about 400 Europeans in 1st and 2nd class. This return is for the past two months, and represents the traffic out of season; when the crops of coffee, sugar and indigo come in the traffic will probably be more than doubled. The carriage of a portion of this season's produce has been undertaken by the railway company, and will prove a large source of profit, or rather of saving, to the planters. At present a large quantity of the produce goes by a circuitous river route to Sourabaya, occupying weeks in the journey, as the tea does in many parts of China. When will the sound of the railway whistle be heard in that country? The receipts of the company up to the present time have been trifling, but will largely increase when the goods traffic comes into operation. A line is in course of construction, and is expected to be completed in 1870, from Kedoeng Djatti, by Temporan, to Ambarrawte. Another is also commenced, which may be completed in a couple of years, from Solo to Djokjakasta, where there are many factories. The same company has in hand the line from Batavia to Buitenzorg; but this is without a guarantee from Government,* while the lines have a subsidy of 4½ per cent. per annum on the authorised capital, seventy million guilders. The difficulties experienced in laying the line have been considerable, owing to mountain torrents and floods. The company would have saved a large sum and much time had they contracted with a firm of experience in constructing Indian railways. The cost of these Java lines is enormous.

The Samarang merchants being dissatisfied with the cargo boats running here have subscribed a capital of 300,000 guilders, for the purpose of forming a cargo boat company and building more suitable boats. The directors are Mr. McLachlan, of the firm of Messrs. McNeill and Co., the agent of the Trading Company; Mr. Erdman, of Gelherman and Co.; and Mr. Jacob, of Moorman and Co.

The construction of the new canal in connection with the railway is now nearly completed, and it is expected will be opened next October. The entrance to the canal is decidedly too narrow. The canal was much wanted, and nothing but the long suffering endurance of the Dutch could have put up with the miserably small and filthy stream which now exists. It is generally blocked up with boats, and the landing-place and road to the town for passengers is a disgrace to a civilised Government; but this condition of affairs is no exception to the general run of the town, which is in a most deplorably uncared-for condition, entirely without drains, unless dirty open ditches can be so termed. Such is the condition of Samarang in 1869—utterly disgusting, cholera and fever stricken by the marshes, and filth on all sides. The inhabitants should combine (they include many wealthy merchants and planters), and have the town drained, roaded, and lighted by Government, by a Municipal Council, or by some other agency, but they certainly should not dwell in such dirt and discomfort, whilst at the same time they are rolling in wealth.

An extra steamer leaves here on the 26th for Batavia, to carry passengers to the Festival. The enthusiasm here with regard to this event is conspicuous by its absence, and the subscriptions collected by the committee of management amount to a few pounds only, and at Sourabaya the same. The truth is, that the Dutch and other nationalities in Java are almost to a man disgusted with the Government of Holland, whose system is simply that of using Java as a lemon, to be squeezed as required. It is really lamentable to witness the want of development of a country and soil second to none in the East. Java requires a Governor-General aud a Council to legislate on the spot, and take the responsibility of acting according to the actual requirements of the place, and not merely follow blindly the suicidal orders which come from the Home Government. A Governor-General who would resign rather than act against his conscience for the well-being of the country would be a martyr that the inhabitants of Java would not pass over without substantial support for his self-sacrifice in their behalf. Your readers must understand that the voices raised here against the policy of the Government are not simply those of a few English or other Foreigners, but proceed from the Dutch themselves in every part of the island. They feel daily that they suffer from the want of development of the land and general resources of the country. The tracts of land unimproved are immense, and the Government will neither sell nor improve it. The estates which are leased out are only for ten years, and as the occupier has to run the risk of getting a renewal, what outlay will he make on such a holding? The Dutch Government are owners of the land, and they should realise on it, and give up being themselves merchants. It must come to this. Give up forced labour, and people will cease to talk about a rising, as they now continually do.

Samarang, like Batavia, and other ports of Java, has its Chinese population, who turn their trading abilities to good account, and arrive at considerable wealth and position. Of course some remain purely as labourers and itinerant vendors of "chow chow" stuff and "nicnacs." Some of them carry in baskets all descriptions of European sundries for ladies, including cotton, pins, tape, &c. The number at Samarang, and on plantations in the in-

* A Government guarantee has been granted; see *London and China Telegraph*, March 22.—ED. *L. and C. T.*

Digitized by Google

terior, is computed at 50,000, There are, also, a large number of Arabs and Jews, who likewise become wealthy as traders.

Steam tugs for the straits and coasts of Java are much needed, and there would be no obstacle offered to any nationality undertaking this enterprise. Vessels are often weeks knocking about in calms and currents, merely for the want of a few hours' steam. The ship *Athol*, from London, is now over five months out, and is probably beating about not a hundred miles distant. In the Straits of Sunda alone there is employment for a couple of tugs. The vessels to and from China would certainly be good customers.

Samarang is still without a harbour, and in the west monsoon communication with the shore is often impossible for days; even steamers have to take their cargo and passengers on to Batavia or Sourabaya. There is nothing but the open roadstead, notwithstanding that Samarang is an important loading port for produce for Europe, &c. The lights along the coasts are also very deficient, and it is only recently that a light has been completed on the North Watcher. This is to be opened next month.

The troops in Java are composed chiefly of natives; out of the total of 25,000 or 30,000, less than a third are European; these Europeans are very well dispersed throughout the regiments; the Dutch not having committed a similar mistake to that made in Bengal. There is this to be said, however, that English troops will not amalgamate with natives. Your English soldier is of higher metal than the Swiss, German, Dutch, and Italians composing the recruits from Holland, who come out on six year's service. Not twenty per cent. of them find their way back to Europe; what with the climate and expeditions to Borneo, &c., about seventy per cent. die, while many marry native women, and get some employment. The Government allow these soldiers to take up with native women, and even pay their passages, when they are transferred from place to place in Java. This is done to avoid disease; but here again the character and discipline of the British army in India would not permit of this custom being followed.

The action which was brought against the old Steam Company by Mr. Versteeg, of Sourabaya, for missing the connection with the French mail at Singapore, has just been decided in his favour, and damages will be assessed accordingly.

---

(FROM ANOTHER CORRESPONDENT).

BATAVIA, May 14, 1869.

The three last days of May are to be kept as holidays, in commemoration of the two hundred and fiftieth anniversary of the foundation of Batavia, by Governor-General Jan Pieterzoon Koen (1619). On the 29th the first stone will be laid by his Excellency the present Governor-General, P. Myer, for a monument to the founder of Batavia. In the evening there will be a grand concert in the Opera-house. On the 30th a flower show will be held in the Botanical and Zoological Gardens, where there will be a grand illumination and fireworks in the evening. On the 31st, distribution of prizes for the flower show in the above-named gardens; and in the evening the festivities will finish off with a grand fancy dress ball at the Civil Club. When we consider the length of time the Dutch have held Netherlands India, and the little they have done for it during an almost uninterrupted possession of two and a-half centuries, we cannot refrain from asking what there is that justifies the jubilee they intend giving; what there is to be proud of in their past acts towards either their own countrymen or their native subjects. When we think that until very recently all was darkness and oppression, actuated by a sordid love of gain, unmindful of the wounds it caused, and that even at the present moment three fourths of her subjects are as benighted as they were when Holland first conquered them, is it a wonder that in those sordid souls there should arise in the midst of intended rejoicings a "a conscience which doth make cowards of us all," fearful of a coming retribution, which is only in their imagination? We allude to the general fear existing amongst our European community of a rising of the natives during the festivals, and caused by an insignificant outbreak at Becassie, a district about twenty-two miles from the capital, on the 3rd April last, by a band of vagabonds, who managed to murder the Assistant-Resident of the district, a schout or police officer, a native doctor, and a couple of native policemen, who had gone to meet them on their way to an estate belonging to a Chinaman who had turned Mahomedan, and who had been in the habit of screwing it out of his tenants. He, however, escaped. If we are to believe the reports about town, plots against the Dutch rule, having branches all over the island, have been discovered, but fears are entertained that, though these have been discovered, they are not yet totally frustrated. The approaching storm is the topic of the day, and though some pretend to laugh at the fears of their friends, there is an evident uneasiness in their own minds, however much they may wish to conceal it; in fact, the uneasiness is general, and it is supposed that the jubilee will be, if not a total at least a partial failure. That there is discontent amongst the natives there is no doubt; but that they intend to rise I very much doubt. Indeed, I do not give them credit for sufficient courage to attempt it, notwithstanding the fact that we have lost all prestige here. But discontent is not rife amongst the natives only. Our European population is also unsatisfied with the way in which legislation is being carried on in the "Vaderland." The army is grumbling, and has held meetings to demand amelioration of its present condition. The selfish policy of the Home Government begrudges even the common necessaries of an Indian life to the handful of faithful soldiers who keep their possessions of eighteen million souls in subjection for them. Such conduct towards and treatment of their brave little band can scarcely prove *amoris stimuli*. Business is extremely dull. The late tremendous failures of European and Chinese houses have given a blow to our commerce which will long be felt. The French coolie ship *Tamaris*, from China, for Havana, with three hundred coolies, which had been deserted in the Straits of Sunda by the European mates and crew landed here last month, has been picked up at sea by a Dutch man-of-war sent after her, and taken into Padang, on the west coast of Sumatra. The captain, whom the crew reported had been left on board bound hand and foot by the coolies, but who the latter swear jumped overboard when the crew left the ship, is missing. The chief mate, of whom the ship's log gives a very bad report, has been sent home overland. The crew have been taken to Padang by the French Consul to be confronted with the coolies, and an officer of the French mail boat has proceeded to that port to take the ship on to her destination. The affairs of the Tramway Company are improving. Shares which a few months ago were being thrown away for a mere song, have gone up, and are to-day quoted at sixty premium. It is really delightful to see what a general use is made of this mode of locomotion, both by the Europeans and natives. The latter seem to have cast away all old prejudices, and mix with their wives in the same carriages with Europeans. Your readers will be surprised to learn that 250 years have not been sufficient time to give us proper means of conveyance, and that at the present moment we have but an embryo railway of about twenty miles at Samarang. Had we been in the hands of any other nation Java would have been intersected by railways twenty years ago. Her produce could amply pay the expense of laying them down; but we are Dutch, and would be traitors to our proverbial slowness were we to hurry on like other folks.

---

## STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from Singapore to the 29th May. The outward P. and O. mail of April 23 was delivered there on the 26th May (two days early.) The latest London telegrams extended to May 15. We select the following items of news from the *Straits Times*:—

It is very probable that his Excellency the Governor will proceed to Java in a week or two, on a visit to the Netherlands Authorities there, which, rumour says, has something to do with a revision, or at least interpretation of the treaty of Holland of 1824. The Governor, who is believed to have warrant from the Foreign Office for his intended voyage, keeps his own counsel; and it is uncertain when, or how, he may decide to go. A strong opinion has been expressed, that if the visit be undertaken in Imperial interest the cost should not fall upon the Colony; but yet, if the object be to rectify such a treaty as that under which the Dutch are forcing their way on the north east of Sumatra, it is impossible to deny that the benefits will accrue to the Penang division of the Colony.

The *Penang Gazette* seems to be authoritatively informed respecting his Excellency's approaching visit to Java; it has the following paragraph on the subject:—"The Governor will proceed to Batavia early in June to meet the Governor-General of Netherlands India. We understand that the Foreign Office, for which Sir Harry Ord ably and satisfactorily conducted a negotiation with the Dutch Government some years ago at the Hague, has entrusted him with the duty of discussing with the Government of Netherlands India the objections that have been taken to the acquisitions of territory which that Government has for many years been making on the east coast of Sumatra. Sir Harry Ord's efforts will doubtless be principally directed to obtaining an effective guarantee that our trade with the Pepper ports will not, at any future time, suffer from heavy duties or monopolies. If he succeeds in this, there can be no question that it will be for our interest, as it clearly will be for that of the Malay and Batta natives, that all the countries on the east coast should exchange their present semi-piratical, slave-dealing and sharp-trading rulers for a strong European Government."

It is rumoured, but we cannot say with what degree of truth, that a new Red Flag Secret Society has lately been organised by the Kling boatmen residing in the district of Teluk Ayer. Should this rumour have any foundation we trust that the police authorities will keep a watch on them.

We learn from the Penang papers, "That five thousand acres of land at the Dindings have been applied for by Penang people, chiefly Chinese, in the expectation that it is to come under our Government. This is nearly the area of Pulo Pankor, and shows that if a large province, extending back towards the Perak river, and northward towards the Krian were occupied, its progress under a liberal administration would be rapid. The island and the tract of hillocks and creeks on the right bank of the river, devoid of streams of fresh water, are not worth having, and would, under the colonial system of Government, be a burden on the finances of these Settlements."

Digitized by Google

The same papers also state that "the Dili tobacco exported from Penang has, it seems, received a high character from the Bremen merchants. It has a fine and silky texture, and is used in the outer envelopes of cigars made of common tobacco, and hence the high price, sixty dollars per picul, that has been obtained. The tobacco which is grown in small patches in Province Wellesley produces, when manufactured, a capital article; but the plant requires a good soil, and plenty of manure. Some of the virgin soils of the Dindings will probably yield two or three crops of tobacco without manure, and if prices are encouraging the cultivation may be tried upon them. Tobacco seems to be one of the most exhausting crops grown, and only one is taken from the rich lands of Dili. A rich soil and successive long fallows seem to be required for the cultivation of this plant, which is such a luxury of civilised as well as of savage life."

The following, on the movements of Governor Ord, is from the *Straits Observer*:—

The Government steamers continue their active service. Last week the *Peiho* was used to convey his Excellency the Governor, his friends, dogs, &c., to Johore, that they might enjoy a day's shooting, the party returning, we believe, the following day. We have been unable to learn the amount of game bagged on this excursion, but it can scarcely be sufficient to excuse the amount expended in coals, &c.

Whether his Excellency and the officials who accompanied him took advantage of the opportunity to transact some important public business, or whether, in addition to providing free passages for them, their travelling allowances will have to be defrayed out of the colonial exchequer, has not yet transpired. The party could have gone overland in carriages, on a good road, to Sungie Krangie, and thence across the water in some of the many ferry-boats plying there; but as this would involve personal outlay, the trip may be set down as another of the wanton extravagancies of which we so loudly complain.

We learn also that the *Peiho* is to go to Java very shortly, to convey the Governor on official business. What the nature of this business is is at present a State secret; but as the Governor has no independent power to make treaties with the native States, it is barely possible that some petty excuse has been invented, in order to saddle upon the colony the expense of all the Governor's holiday-making. The cost of maintaining the *Peiho*, as she is at present used, is quite enough for the Colonial treasury to bear; and we can only trust to the good sense of Earl Granville to save us the continued heavy burden of supporting a vessel nearly double her size, for the especial accommodation of the Governor and his personal friends.

## ARRIVALS.

At SHANGHAI.—From Shields, May 9, Seringapatam.

At SINGAPORE.—From Liverpool, May 23, Dewa Gungadhur, H. Courage; from Cardiff, 23, Matador; 27, Codan; 28, Maassluis, Violet, Metis, William Mitchell; 29, Cornelius Smit; from Downs, 29, Maitland; from Rotterdam, 22, Cornelia Hendrika; from Glasgow, 24, Lochlevyn Castle.

At SAIGON.—From Cardiff, May 12, Empress.'

## DEPARTURES.

From SINGAPORE.—For London, May 28, Francis Billett.

From SAIGON.—For Falmouth, f.o., May 12, Nederland.

## SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—June 17, at San Francisco, from Hong Kong, Windward; July 1, at Falmouth, from China and West Indies, Patrician; 2, at Falmouth, from Bangkok, Isles of the South; 3, at Liverpool, from Java, Deukehandige.

DEPARTURES.—July 1, from London, for Hiogo and Yokohama, Johanna Maria; for Osaka and Hiogo, Sampan; for Shanghai, Omba; for Cardiff and Japan, Pysche; June 28, from Cardiff, for Hong Kong, Hansa; 29, from Shields, for Batavia, Freia; from Rotterdam, for Batavia, Jacoba Helena; May 22, from Buenos Ayres, for Ceylon, St. Pierre; July 3, from London, for Singapore, Panic; for Cardiff and Hong Kong, Fort Regent; 2, from Glasgow, for Manila, Maria de C.

LAID ON.—At Glasgow, for Singapore, Kate Carnie; at London, for Hong Kong, Borealis.

SPOKEN.—Anna Nelson, Liverpool to Shanghai, May 4, 22 S., 33 W.; Oliver Cromwell, Swansea to Singapore, June 11, 8 S., 33 W.; Killarney, for Hong Kong, May 27, 5 S., 31 W.; Ravensbourne, London to Japan, April 25, 16 S., 28 W.

MISCELLANEOUS.—At Mauritius, May 31, Sidonie, Bourge, from Singapore; at St. Vincent, C. V., May 25, Moneka (s.s.), Barkley, sailed for Japan.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

ALABASTER—On the 21st June, at 71, Cadogan-place, Sloane-street, Mrs. Henry Alabaster, of Siam, of a son.

DAVIS—On the 15th May, at Alexandria, the wife of the Rev. E. J. Davis, H.B.M.'s Consular Chaplain at Alexandria, of a son.

DE LA CONDAMINE—On the 21st June, at Bedford, the wife of Robert C. De la Condamine, Esq., of a daughter.

RIACH—On the 8th May, at Hong Kong, the wife of John Riach, Esq., of a son.

RIPLEY—On the 30th June, at Farm-terrace, Clapham, the wife of Horace Ripley, Esq., of a son.

WEIR—On the 12th June, at Newcastle-on-Tyne, the wife of James Weir, Esq., of Singapore, of a son.

### MARRIAGES.

BERGMAN—SIBLEY.—On the 14th June, at All Saints' Church, Bayswater, by the Rev. W. A. Newton, Robert Henry Bergman, of the P. and O. Company's service, to Louisa Mary Spry, youngest daughter of the late Captain Edward Reynolds Sibley, of the 37th Madras Grenadiers. No cards.

BUNTING—LIDGETT.—On the 21st June, at Christ Church, Regent's-park, by the Rev. H. W. Burroughs, Percy William, only son of Percival Bunting, Esq., to Mary Hyatt, second daughter of the late John Lidgett, Esq., of Tunbridge Wells.

LETHEM—HOBBS.—On the 16th June, at St. Mary's, Islington, Alexander Lethem, of Douglas-road, N., to Alice Costley, second daughter of H. J. Hobbs, Esq., of Church-road, Islington. No cards.

PECK—BAXTER.—On the 17th May, at Galle, Ceylon, by the Rev. J. Clarke, M.A., Leonard Wm. Peck, H.M.'s 59th Regt., to Julia, youngest daughter of the late Charles Frederick Baxter, of London.

WHITE—BLENKINSOP.—On the 16th June, at St. Mary's Church, Bathwick, by the Rev. H. M. Scarth, rector, Francis William White, Esq., Commissioner of Customs, Ningpo, China, youngest son of the late Rev. J. White, M.A., to Alicia Mary, daughter of the Rev. W. T. Blenkinsop, late Senior Chaplain, Madras Establishment. No cards.

### DEATHS.

WATSON—On the 13th June, at Blachford House, Aberdeenshire, aged thirteen months, Edith Bannerman, youngest daughter of Mr. and Mrs. J. P. Watson.

## REUTER'S TELEGRAMS.

### (RECEIVED VIA GALLE, JUNE 28.)

### CHINA AND JAPAN.

HONG KONG, JUNE 9.—A scientific expedition from Australia has arrived here. The Imperialists had gained a signal victory over the Mahomedan rebels; 20,000 of the latter were killed.

Advices from Japan state that further insults had been offered to foreigners, and disturbances were expected.

COMMERCIAL.

SHANGHAI, JUNE 4.—Gray Shirtings, 6½ catties, 8¼ lb., $2.25c. Silk: season closed. Export to date (China and Japan), 65,250 bales. Exchange on London: Bank bills, six months, 6s. 1¼d. Freights: Tea, £4 10s.

HONG KONG, JUNE 9.—Gray Shirtings, 6½ catties, 8¼ lb., $2 85c. Water-twist, 16-24, $1 35c. Cotton: Bengal, fair medium, $18. Tea: the new crop is ready, but no settlements have yet been made. Exchange on London, bank bills, six months, 4s. 7¾d.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

## THE MODEL SETTLEMENT.

(To the Editor of the *London and China Telegraph.*)

SIR,—I observe by your report of the debate in the House of Lords, on the 9th March, 1869, regarding the Yangchow difficulty, that his Grace the Duke of Somerset made the following statement:—

"Naval and civil officers who are acquainted with all the chief ports in Europe, America, and Asia, inform me that though seaport towns are not very moral places, there is no such sink of iniquity as Shanghai."

It is much to be regretted that his Grace did not, before expressing such an opinion, endeavour to ascertain whether the statements of his informants had any foundation in fact. The entire Foreign community at Shanghai, consisting chiefly of English and Americans, has felt deeply hurt and aggrieved by this sweeping assertion made by a leading member of the highest and most respected legislative body in England.

Before attempting to controvert his Grace's position, allow me to make the following quotation with reference to it from a judgment delivered on the 8th inst. by Sir Edmund Hornby, Chief Judge of Her Majesty's Supreme Court for China and Japan:—

"Notwithstanding the animadversions which have so recently been cast on this settlement, I do not hesitate to express my conviction that there is no better governed community in the world, or one which has so thoroughly understood the object which self-government has in view, or one in which greater personal sacrifices have been voluntarily made for the general good; and all this in the face of difficulties which have not been created by the community itself, but which have arisen rather from the inability of the different Governments from which the different sections of the community depend, to devise a scheme which would recommend itself alike equally to all, and to which the force and authority of law can be given. The very essence of the Government of this community is a voluntary adherence of each member to it without too curious an inquiry into the means at hand to compel such adherence. The community has voluntarily taxed itself in no insignificant amount to produce results which in every other country are enforced by the strong hand of the law, and to its credit be it said, in the Foreign settlement of Sanghai, there is a greater respect for order, and far less crime or vice than exist in other places, and in spite of the climate there are very few towns where so much solicitude is shown for the health of the inhabitants. I think it but right and fair in me to take this public opportunity of acknowledging the assistance which every member of this Cosmopolite community has given to the voluntary maintenance of order and respectability, and I trust the willing testimony I now bear will be allowed to have its due weight."

This is the opinion of the Chief Judge, based upon an experience of four years in Shanghai, as opposed to the opinion of the Duke of Somerset, based upon no experience at all, and it may, therefore, be accepted as at least of equal authority with the latter.

Perhaps, however, the most satisfactory argument is to be derived from official statistics, and I will therefore with your permission compare the police statistics of Shanghai with those of Hong Kong. I take Hong Kong alone, partly because its official returns are readily accessible, partly because it is situated in circumstances somewhat similar to those prevailing at Shanghai, but especially because, from the sweeping nature of the Duke of Somerset's remarks, one well authenticated fact in opposition to them is as good as a hundred.

From the official report of 1868, published by the Captain Superintendent of Police at Hong Kong in the *Hong Kong Government Gazette* of the 17th April, 1869, it appears that the total strength of the police force in that colony was 633, viz., 113 Europeans, 328 coloured, and 192 Chinese. In Shanghai, for the same period, the police force numbered 105, viz., 39 Europeans and 66 Chinese. In both places the Chinese element in the police force is useful only against crime committed by Chinese, and, therefore, so far as the prevention of crime by Europeans is concerned, Hong Kong maintains 441 police against 39 in Shanghai. By the census taken in Hong Kong on the 31st December, 1867, published in the *Hong Kong Government Gazette* of 14th March, 1868, it appears that on that day the number of Foreigners of all nationalities resident in the colony was 3,551. Hence assuming, which may fairly be done, that the number of Foreigners leaving Hong Kong in 1868, about balanced the number arriving, it will appear that the police were in the proportion of about one to seven Foreign Residents.

In Shanghai the number of Foreigners at present is, exclusive of police, 4,699. Hence the Foreign police force is to the Foreign residents in the proportion of one to one hundred and twenty.

As to crimes:—In Hong Kong during 1868 there were 1,033 convictions of Foreigners under the heads of "Murder," "Manslaughter," "Robbery with Violence," "Burglary," "Assault," "Larceny," "Kidnapping," "Unlawful Possession," and "Piracy." This is a percentage on the whole number of Foreign residents of twenty-nine convictions for serious offences. In Shanghai for the period of twelve months, from April, 1868, to March, 1869, the number of Foreigners apprehended and convicted was 565, of which 387 were simple drunkenness, 17 were "Desertion," 2 were "Forgery" (of which one wa an ex-*employe* of the Hong Kong Government), and 24 were "Furious Riding." Thus 135 may fairly represent the number of more or less serious crimes committed by Foreigners during the twelve months indicated. Of these the worst were three cases of "Cutting and Wounding," and 61 cases of "Assault." But 135 bears to 4,699 the proportion of 2.9 to 100, or exactly one-tenth of the Hong Kong percentage of convictions to the number of residents.

It is obvious from the above figures that a much smaller police force is required to keep order in Shanghai than is required for a like purpose in Hong Kong, although Foreigners here are more numerous by 1,187 than in Hong Kong. It will further appear that, in spite of this, order is much more effectually maintained here than it is there, although Hong Kong is a colony under a well organised Government, regulated by English law, while in Shanghai we have to deal with the Courts of no less than twelve different Foreign Governments.

The deduction from my argument is, I trust, obvious—that in comparison with Hong Kong alone Shanghai cannot justly be denominated a sink of iniquity exceeding in its immorality all other ports of Europe, America, and Asia.—I am, Sir, your obedient servant,

A. J. JOHNSTON, Secretary Anglo-American Municipal Council.

Shanghai, 13th May, 1869.

## LEGAL.

### COURT OF QUEEN'S BENCH.—JUNE 29.

WEHNER V. THE CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

This was an action on four bills of exchange, drawn by Nathoo Pussoo on the defendants, payable to the order of Sleeman and Co., and endorsed by the latter to the plaintiff, and the bills were accepted by the defendants under a letter of credit conditionally on certain shipping documents being handed to them. There was a plea of fraud upon the record.

Sir J. Karslake, Mr. Mellish, and Mr. Cohen were for the plaintiff; Mr. Hawkins, Mr. J. Brown, and Mr. F. White were for the defendants. Sir J. Karslake was opening the case for the plaintiff, when

Mr. Hawkins intervened, and said he did not impute moral fraud, but that the plea of fraud was the technical way of raising the defence that agents at Bombay knew to be untrue what principals in London stated to be the fact, and proposed to withdraw the plea of fraud if the plaintiff's counsel would allow a plea which the defendants' counsel had ready, stating the actual facts.

The Lord Chief Justice asked the learned counsel if it was not one of the chief questions between the parties whether invoices were shipping documents within the meaning of the letter of credit.

This appeared to be the case, and there being now no suggestions of fraud, there was no question left for the jury, and it was agreed to state a special case for the opinion of the Court, with liberty for the plaintiff to amend the pleadings if the Court should think fit.

### ADMIRALTY COURT.—JUNE 30.

THE ROYAL STANDARD.—CLAIM FOR SALVAGE SERVICES.

These were two suits against a large vessel called the *Royal Standard*, from Colombo for London, with a cargo worth £105,000, which, with the value of the ship and the freight, amounted to about £200,000. When off Dover she took a pilot on board, and on her way to Gravesend encountered a tempest, lost her anchors, and was assisted by the *Albion* and three luggers. The question was the amount to be awarded. Mr. Butt, Q.C., and Mr. Clarkson were for the *Albion*, as plaintiffs; the Admiralty Advocate (Dr. Deane, Q.C.) and Mr. Wood Hill appeared for other parties; Mr. Lodge was for the owners of the cargo.

After a long consultation, the parties agreed to a decree by which the owners of the ship would pay the three luggers £200 and the *Albion* £100. The owners of the cargo would pay the luggers £600 and the *Albion* £300, and costs to follow.

His lordship said, seeing the value of the property, the arrangement was a proper one. Decree accordingly.

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.—THE "MAGGIE LESLIE."—This was an appeal from the High Court of Admiralty, in a cause of distribution of salvage. On the 9th of October, 1867, the barque *Fusi Yama*, with a master and seventeen hands, fell in near Gaspar Island, in the East Indies, with the ship *Maggie Leslie*, derelict and in a very disabled state. The value of the *Fusi Yama* and her cargo was about £70,000. The chief mate and four of the crew of the *Fusi Yama* volunteered to take the derelict into Batavia, which, after undergoing much personal hardship and being exposed to considerable perils, they accomplished on the 21st day of October, the *Fusi Yama* keeping them company for the first five days. The amount to be distributed was £8,250, which the Court below apportioned as follows:—To the owners of the *Fusi Yama*, £1,400; to her master, £900; to the twelve men who remained on board the *Fusi Yama*, £1,900; to the mate who took charge of the derelict, £1,000; and to four men who accompanied him, £3,050. Mr. Field, Q.C., and Mr. E. C. Clarkson appeared for the appellants; and Dr. Deane, Q.C., Mr. Butt, Q.C., Mr. Lushington, Q.C., Dr. Tristram, and Mr. Pritchard for the other parties.—Judgment in the case was delivered on the 18th ult. by Lord Romilly. The distribution of salvage was a matter of discretion, and although their lordships could have made a different apportionment, giving more to the owners and others, yet they did not feel called upon to reverse the judgment given by the Court below. The judgment was affirmed, and one set of costs to be allowed out of the fund awarded by the Court of Admiralty.

*LONDON, MONDAY, JULY 5.*

## SUEZ CANAL, AND DIRECT LINE OF RAILWAY FROM LONDON.

THE Suez Canal Company, in answer to rumours afloat of an intended loan, announce that the only financial operation it is about to propose to its shareholders at the meeting appointed for the 2nd of August is the realisation of the thirty millions of francs due to the company by the VICEROY of Egypt; and, as regards the doubts expressed about the opening of the Canal, the direction adds that the contracts with MM. BOREL and LAVALLEY, and the progress made with the works, assure the completion, during the month of October, of the Canal, to the width of 100 mètres (325 feet) over the greater portion of the line, of sixty mètres for the remainder of the distance, and to a depth of eight mètres (twenty-six feet) throughout. A letter has been published from M. LANGE, the London agent of the company, which confirms the statement in our last issue as to the postponement of the opening.

It is said that a palace is being built at Ismaila for the reception of the EMPRESS. There were twenty applicants for the contract, and the estimates amount to £28,000, and the work is to be finished by the 1st of October, the contractor to forfeit £12 per day in case of delay, and to receive a bonus of the same amount if the palace is finished before the specified time. The building is to be two hundred feet long and one hundred and thirty feet in depth, and the masonry amounts to 5,800 cubic metres. The centre of the palace is to be occupied by a magnificent court surrounded by arcades, decorated with great magnificence, and surmounted by a dome fitted with *jalousies*, by means of which the admission of air and light may be modified at will. Truly the preparations of the VICEROY are on an Imperial scale.

The Municipal Council of Dijon has opened a preliminary inquiry respecting a direct line from London to the Mediterranean. The proposition is to construct a new line from Amiens to Dijon, leaving Paris far to the west, and achieving a saving of more than forty-six miles as compared with the present route by the Northern and Lyons and Mediterranean railways, and making one continuous journey without a break. There is no doubt that such an arrangement would be very welcome to travellers generally between the north of Europe, India, and China, although the through journey would be a long one. For Dijon the advantages would be incontestable; the old capital of the Dukes of BURGUNDY would become the grand starting point for Italy by Mont Cenis, and for Switzerland by the Simplon; but what will the Government and the Great Northern of France say to the matter? However, we are not likely to wait long for information on that head. Time presses, and the Dijon authorities will doubtless soon sound those of Paris on the subject.

There is probably no ground whatever for the statement first made in the organ of the Turkish Government at Constantinople, that the Viceroy of EGYPT has attempted any negotiations with the Courts he has visited with the view of securing the neutrality of the Suez Canal. His Highness would naturally avoid raising a question which must be settled by the Great Powers, with the concurrence of Egypt, when the Canal is actually completed. The question of the neutralisation of the Canal, like that of the independence of Egypt, is one which ISMAIL PASHA and his Ministers, if they are wise, would be the last persons in the world to agitate.

AT a recent meeting of the Straits Settlements Association, Mr. HORSMAN, M.P. (the President) in the chair, it was resolved to invite some of those members of Parliament who are more especially interested in Straits affairs to become Vice-Presidents of the Association, the following being, we believe, among those indicated:—Sir JAMES ELPHINSTONE, Mr. J. D. NICOL, Mr. JACOB BRIGHT, Mr. H. A. MITCHELL, and Mr. R. N. FOWLER. We understand that it is also contemplated to invite a conference of all gentlemen interested in our Asiatic Colonies (namely, Hong Kong, Ceylon, and the Straits), with the view of discussing the programme of action adopted by the Association, and taking measures for procuring a stronger and more general expression of opinion on the subject. Preparations are also being made for another interview with Lord GRANVILLE.

THE discussion on our relations with China, which was expected to come off on the 29th, did not take place after all; Colonel SYKES either withdrew or postponed his notice of motion, and the subject was not even mentioned. On the previous evening, however, the COLONEL asked a question relative to the Franco-Chinese complication at Peking, and received from the UNDER-SECRETARY for FOREIGN AFFAIRS a reply to the effect that Her MAJESTY'S Government had received no official information of the affair, and that the published accounts of it were greatly exaggerated.

THE substance of our last telegram from China, that in advance of the mail leaving Hong Kong on the 9th ult., would be satisfactory if it were credible. But we are quite prepared to find the Imperial victory, and slaughter of 20,000 rebels, converted into a defeat with heavy loss, when full particulars come to hand. The portion of it relating to Japan is more likely to prove correct. It will be marvellous indeed, if such a total revolution in the system of government, and in the relations between the Daimios and their Sovereign as are now in progress, can be carried through to a satisfactory termination without any disturbance of the peace of the country; and we have already had bitter experience of the fact that all intestine commotions there are fraught with danger to Foreign residents. It is to be hoped that for some time to come, both our land and sea forces in Japan will be kept up to a sufficient strength to convince the anti-Foreign party that any aggressive movement on their part will be promptly punished.

## THE SILK MARKETS IN FRANCE.

(FROM OUR PARIS CORRESPONDENT.)

The Silk markets have undergone great changes during the last month. During the third week of May the Lyons officials passed 135,440 kilogrammes, and the market exhibited unusual animation. At Marseilles, at the same period, the market was active, and prices firm; 500 kilogrammes of Japanese fetched 26 francs. On the following week only 63,246 kilogrammes were registered at Lyons, without any change in quotations, the best qualities being rare, and inferior sorts quite neglected. The week after the quantity passed at Lyons fell to 45,118 kilogrammes, and the market was very flat. At Marseilles the case was much the same; there was a slight reduction in prices asked for silk and cocoons of first quality, while ordinary and inferior samples found no buyers even at diminished rates. Last week only 38,911 kilogrammes were registered at Lyons, and the market was in the dullest possible condition, every one watching the results of the new crop.

On this last head we have now some definite news. In the Drome the price of cocoons has fallen considerably, and they now fetch only 2f. 25c.; the crop is abundant, but the results are mediocre; the proportion of spotted cocoons, which are utterly worthless, is very large. At Tournon the case is the same, best yellow cocoons fetching as low as 5f. and inferior ones from 2f. to 3f.; green, 7f. to 8f. 50c. At Dragnignan yellow cocoons of the district sold for 6f., and Japanese annual at 4f. the kilogramme. At Vidauban yellow cocoons fetched 8f., and Japanese 6f. to 6f. 50c.

Accounts from Mines state that the crop of cocoons in the Gard is excellent; Japanese fetched, ten days since, 7f. to 7f. 50c., but the large supply has brought them down to 5f. 25c.

From Alais we have brilliant accounts of the crop; the Japanese eggs have succeeded almost in all cases, with the exception of some cards bearing the date of July. The worms have been so numerous that breeders who had sold their leaves at 12f. the two cwts. were compelled to purchase afterwards at 30f.

The number of eggs imported has been so great that cards were to be had at fivepence each, and the consequence was a superabundance of worms and an immense yield of cocoons. Such a crop has not been known since 1847. It must be noted, however, that while the Japanese seed has succeeded marvellously, the eggs of the same stocks reproduced in France have proved a total failure.

The accounts from Italy are much the same as those here in France.

## THE SITUATION IN JAPAN.

A correspondent of the *Allgemeine Zeitung* at Nagasaki gives some curious information as to the present state of affairs in Japan, of which the *Pall Mall Gazette* gives an outline. He says that, although the principal daimios have all agreed to abdicate their power in favour of the Mikado, their acts are not in accordance with their professions, and it is probable that before long Japan will again be plunged into a civil war as disastrous as that which has just terminated. Many of the daimios, and Satsuma in particular, are deeply involved in debt, notwithstanding which they continually buy arms and ships in large quantites. The real reason of the submission of the daimios was that the princes of the south, who led the rebellion against the Tycoon, and eventually conquered him, were unable to agree as to the division of the spoil, and consequently made over the Tycoon's revenues to the Mikado. Most of these revenues proceed from confiscated property in the north of the island, where many of the daimios are secret adherents of the Tycoon; and the southern princes knew that if they divided this property among themselves they would not be able to defend it against their enemies. As it is, the Mikado is totally dependent on the southern daimios, who furnish him with the funds necessary to carry on the government, and any disputes among them are just as likely to produce a civil war as before. Under the new system the Tycoon, or temporal sovereign, is to be abolished, and a confederation not unlike that which formerly prevailed in Germany to be created, with the Mikado, or spiritual sovereign, at its head. This arrangement, though it promises little for the maintenance of order, has at least one advantage for European merchants in Japan. Instead of the two sovereigns, with powers and responsibilities so vague that no European could understand which of them was really responsible for the due execution of tre aties and the conduct of officials, there will now be a single government with a tangible head. Europeans may now expect some reform in the system of currency, which has brought on them so many severe losses. Under the treaties of 1866 the silver coin (*boo*) was to be 134 grains in weight, nine-tenths of which were to consist of pure silver; but the quantity of silver in the coins actually in circulation has always been much less. The reason of this is that hitherto there has been no Government mint, the money having been coined under the direction of individual daimios, who of course do not consider themselves bound by treaties.

## THE NEW COLONIAL ORDER.

We have already explained the change recently made in the Order of St. Michael and St. George. In its reorganised form, this Order, which was originally available only for services in connection with the Mediterranean possessions of Great Britain, becomes available as a reward for distinguished services in any of our colonies; and the first batch of appointments to it under these new regulations has just been gazetted.

The chief appointments in connection with our Asiatic Colonies are, Sir Hercules Robinson, lately Governor of Hong Kong, and at present Governor of Ceylon, to be a member of the Second Class, or Knight Commander; William C. Gibson, Esq., late Colonial Secretary of Ceylon, and Thomas Skinner, Esq., late Commissioner of Roads, &c., in Ceylon, to the third class, or Companions of the Order.

The first class, or Grand Cross of the Order, is conferred on Lord Monck, late Governor-General of Canada, and on the following noble Lords who have held the office of Colonial Secretary:—Earls Derby, Grey, and Russell. The second class is conferred on the following gentlemen, who have held office in the Colonial Department at home:—Mr. Adderley, Mr. Frederick Peel, Mr. Henry Taylor, and Lord Lyttelton.

## GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, June 29.

The King of Prussia, having left Berlin on his visit to the North, as mentioned in my last, the two Parliaments—that of the North-German Confederation and that of the Zollverein—which have been sitting for the last month coevally, and not without considerable inconvenience and confusion, as many of the members belong to both Assemblies, were dismissed by Count Bismark, who read the King's speech, proroguing them till the autumn. The Session has not been a fortunate one for Ministers, as they have suffered a series of defeats, which, however, does not oblige them to resign office. Of all the eight financial schemes for "raising the wind," the only one that passed the ordeal of the two Parliaments was the Stamp Law, which enacts that all inland and foreign bills drawn upon places in any part of Germany shall be liable to one uniform rate of stamp, which is fixed at half per mille. So far, so good; but now comes the grievance, which is, that the revenue thus received is no longer to go into the exchequer of the local Governments where raised, but into the insatiable maw of the German Confederation. Now the stamps raised at Hamburg and Bremen have hitherto sufficed to cover about a fifth part of their expenses, and amount annually to much more than those of all the other twenty States of Germany put together, including Russia. In vain did the members for the two Hanseatic cities point out to the Parliament the unfairness of being thus treated, in addition to the other expensive burdens they have to bear for the honour of belonging to the Confederation, and the $850,000 annually to the Zollverein for the privilege of retaining their rights as free ports, and in lieu of their share of import duties. The utmost they could obtain as indemnification was the guarantee of a return of 40 per cent. on the amount collected for the first two years, 15 per cent. for the third, and afterwards 2 per cent. annually to cover the expenses of collection. Thus Hamburg will have to lose annually about $500,000, to be credited with $10,000, and Bremen to nearly one-half of those figures.

But the other new taxes proposed were ignominiously rejected without even a division. The only one on which there was any debate of importance was the duty of half a dollar per 100lbs. on petroleum, which was estimated to produce two millions of dollars; and as the Ministers seemed to set their hearts on taxing an article so essentially a tax on the working classes, they offered as a sop the repeal of the import duty on raw iron, and a general revision and reduction of the tariff. But even this tempting bait would not be taken, and both Parliaments rejected the Petroleum Duty Bill by overwhelming majorities; and as they proved refractory, and nothing more could be squeezed out of them, the Session was closed the next day.

Though the French accounts agree in stating that the reception of the King at Hanover, and the other parts of his newly-acquired dominions, was as cold and formal as could be, the German papers unite in giving a most glowing description of the enthusiasm that prevailed everywhere; and I believe the latter to be the correct version, from what I learn from persons who were present and had a full opportunity of judging for themselves. At all events, there can be no doubt about the genuine enthusiasm of the King's reception, which was quite equal to that accorded him last autumn on his visit to Hamburg. Amongst other parts of the programme of the festivities was a trip down the Weser to Bremerhaven in one of the North-German Lloyd's large transatlantic steamers, on board which that company offered him a *déjeuner à la fourchette*, after which his Majesty went on board the vessels belonging to the "North Pole Expedition"—as it is somewhat pompously denominated, though a simple "Arctic Exploring Expedition" would be more to the purpose—inspected the arrangements, shook hands with Captain Koldewey and the scientific gentlemen, wished them success, and saw them actually get under weigh and steam out to sea.

From Bremen the King paid a visit to the Grand Duke of Oldenburg, and then proceeded, accompanied by Count Bismark, Admiral Prince Adalbert, General von Roon (the Minister of War and for the Navy), and a large suite, to inaugurate the new docks and naval arsenal at Hippens, in the Bay of Yahde, on the North Sea, which is intended in the course of time to become the Sebastopol of the German Ocean, and to which the King gave his own name, and it will in future be known as Wilhelmshaven. Although ten millions of dollars have already been expended on the works, they are by no means finished, and it will cost at least five times as much more, and the labour of twenty years before they can become anything like completed, offering shelter to their own ships of war, and capable of resisting the attacks of hostile fleets. The soil is far from being favourable, consisting of morass or peat bog, and the whole country is protected from the incursions of the sea by a mud dyke 22 ft. above average high water at spring tides. In fact, it is very similar to the same sort of unpromising spot selected by Peter the Great for the site of his new capital. But then, it is not everybody that has the power, the will, or the genius of a Peter the Great.

The departure of the steam corvette *Arcona*, 28 guns, Captain Köhler, for the China and Japan station, has again been postponed. After having been in dry dock at Bremerhaven, and undergone a strict survey, she proceeded round to the Jahde-Busen to take part in the festivities at Wilhelmshaven, and is now under orders to return to Kiel. According to the latest arrangement she will not finally sail from the Baltic till the autumn, and then remain absent three years. Lieutenant von Hassenpflug is the chief executive officer. The crew of the *Arcona* numbers 280, all hands told, including the two surgeons and the Protestant chaplain.

### COMMERCIAL.

Rice is in a neglected condition, but the firmness of holders prevents the prices from giving way. The Tea market is calm; 456 chests Moning Congou, ex Skyold, were sold by the importers at previous rates, and a few hundred chests of Congou, Souchong, and Pecco were disposed of by the dealers to the trade. Cassia Lignea still commands an easy sale, and prices rule firm, at 12¾ to 13 sch. bco. per lb. In Pepper not much has been done, but the market is firm, as the large holders will not listen to lower offers. Some few parcels of Spelter have been sold at 14 mks. bco., when holders raised their demands, but not being supported they would again be glad to accept that figure, which, however, nobody will now give, and the market closes heavy. Money plentiful, and discount 3¾ per cent.

### SHIPPING.

ARRIVED.—Malvina Vidal, from Bangkok, 500 chests cassia, 7,016 pieces sapanwood, 34,198 bags rice; Otto and Antonie, from Saigon, 49,485 bags rice, 2,000 pieces sapanwood; Heimdal, from Batavia and Passaroeang, 20,570 kranjangs sugar, 2,461 bundles rattans.

SAILED.—Figaro, to Shanghai; Lola, to Manila; Herzog Ernst, to Hong Kong; Excelsior, to Shanghai.

ARRIVALS AT BREMERHAVEN.—Nayaden, from Saigon, 8,720 bags rice; Rangoon, from Rangoon, 19,500 bags rice.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, June 30.

As I stated in my last letter, no definite result was obtained in five districts at the general election, so that a poll had to be taken, which

Digitized by Google

has resulted in favour of the Liberal cause. In the districts of Alkmaar, Zuidhorn and Haarlemmermeer, Liberal deputies have been elected, and there is no doubt that the new Second Chamber will support the Cabinet by an overwhelming majority. On the 17th inst. the members met for the despatch of business, but it is probable that they will leave the Hague in a very short time. By a majority of 41 (49-8) a Bill was passed abolishing all patents for industrial inventions. Mr. Heemskerk protested most energetically against this measure, requesting its postponement, and promising that he would lay before the members in September next a Bill to ameliorate the patent laws, but all without success. As soon as the Bill is approved of by the First Chamber this protection law will belong to the past. Another important measure has been passed by the Second Chamber, viz., the joining of the Southern and Northern Rotterdam Railways, so that the line will cross this town from the one end to the other. Mr. Blom interpellated the Cabinet respecting the stock of tin at Banca, which, as noticed in my last, is so large as to create discontent among the traders. The Minister stated that measures would be taken to secure the immediate shipment of the excess. The question about the passage money paid by Mr. Hasselman on behalf of Mr. Busken Huet has again been raised by Mr. Lenting, who said that if a law existed regulating the financial responsibility of the Ministry the affair could not have occurred.

Rumours have been circulating with reference to an impending alteration in the Cabinet. It has been said that, now the elections have resulted so favourably for the Liberal cause, it has become necessary that the most eminent representatives of that party should take the places of those members of the Cabinet who had shown themselves too weak, irresolute, and wavering. It was thought that a really Liberal Cabinet would be able to retain the reins of Government for ten or twelve years, during which period much could be reorganised or improved which was at present prevented by the continual Ministerial changes. The *Arnhemsche Courant* contradicted these rumours, but the *Utrechtsche Courant* ascertains that they are quite correct, and that the alterations, which are only a question of time, will be commenced by the appointment of a Vice-President of the Council of India, and by the recalling of Governor-General Myer. The *Dagblad* is assured that the reorganisation of the Cabinet is hindered only by the renewed dispute on the colonial question between the "Putteans" and the "Thorbeckians." But of course there is no fear of such a political blunder occurring as should give an opportunity to the Conservatives to reassume the Government for two or three years. Some sensation has been created by the appointment of the ex-secretary of the Rotterdam Bank, Mr. P. F. Hubrecht, as Secretary-General of the Home Department. Time will show whether this choice is a good one.

The Minister of the Colonial department has laid before the members of the Second Chamber a Bill to regulate the cultivation of sugar in India, and to alter article 60 of the India constitution. The members, however, will not deal with it at the present sitting. The Conservatives are greatly opposed to this Bill, which will, they say, entirely demolish sugar-culture.

The Catholic paper *De Tyd* again makes an appeal to Dutch young men to take service, as Zouaves, in the Papal army. Of course this fact can have no interest for your readers, and I should not have mentioned it had not the *Tyd* added that Rome would need help for only *one* year, and that before 1871 all its troubles and difficulties would be swept away.

The Netherlands India Trading Bank has issued its annual report, which states that the net profits during the year 1868 amounted to f.364,669 64, so that the dividend is fixed at f.14.50 per share of f.250. This result may be regarded as a very good one, because not only was trade in India dull, but the bank was involved in several bankruptcies. The gross profits amounted to f.741,215.91¼. It was asserted that the bank would probably not incur any considerable loss by the failure of the firm of Morgan, Melbourne, and Co.

The Royal Commissary of the Province of Groningen was ordered to compliment the King of Prussia at Emden, some days ago. It is stated by the local papers that King William took this opportunity to declare that he felt the warmest interest in Holland, and to contradict most positively that he had formed any plans which could be dangerous to the preservation of its independence. He further declared that he felt a warm sympathy for our Royal House.

The King is still at *het Loo*; H.M. the Queen will return from thence in a day or two to the Hague.

A strike has broken out amongst the printers, and at one time it was feared that the Amsterdam papers would not be published in due time.

A meeting of the shareholders of the Bank of Rotterdam was held on the 29th ult., when the new statutes, projected by the commissioners and a committee of the shareholders, were approved of by a majority of 247 votes. At Amsterdam, as well as here, the printers are on strike; they demand, at the instigation of the international union, higher wages for fewer hours work; the private printing-offices at Amsterdam are closed, 700 men being on strike; the publication of the newspapers, however, has not been interrupted. His Majesty has approved the appointment of Mr. H. Polano as Consul for Denmark at Hiogo (Japan). According to the *Handelsblad*, a Bill will shortly be laid before the members of Parliament for abolishing capital punishment.

## PRODUCE MARKETS.

COFFEE.—The Trading Company offered for sale on the 16th inst. 64,320 b. Java, Menado and Padang, but 38,032 b. were bought in. There was a firm demand for the Menado, and 1½c. to 4c. was paid above valuation. Since the auction prices have remained firm, but the transactions are unimportant. An advance of 1c. has been paid for the Menado, resulting from the last auction. The private transactions include 325 b. Java, ex Australie; 1,000 b. do., ex County of Elgin.

RAW SUGAR.—Since the departure of last mail there has been a lively demand, and about 9,000 mats sold at ½f. to 1f. under May value, for export. Last week, however, the demand slackened, and only the following parcels changed hands:—283 mats Passaroeang, No. 14, per Wilberforce, at 35½f.; 402 mats Sourabaya, ex Dunedin, No. 19½, at 35½f.; 246 mats do., ex Anna Maria Wilhelmina; 397 mats Batavia, floating per Haamstede.

RICE.—A good business has transpired. The following parcels sold:—1,400 b. Java, ex Petronella, at prices that did not transpire; 6,265 b. Java, ex Australie, at 7⅞f. to 9f. For cleaned Rice there is a good demand for consumption, and it is thought that prices will improve.

TEA.—On the 14th of July 4,033/4, 21/8, and 70/12 chests Java Tea will be offered privately. The valuation is as follows:—

| | | | | | |
|---|---|---|---|---|---|
| Boey ... ... | 60c. | to 83c. | Pekoe ... ... | 250c. | to 325c. |
| Congou Boey ... | 80 | to 88 | Oranje Pekoe ... | 88 | to 102 |
| Congou ... | 72 | to 115 | Tonkay ... | 80 | to 130 |
| Kempoey ... | 103 | to 105 | Schin ... ... | 70 | to 88 |
| Soepoey Pekoe | 106 | to 150 | Hysant... ... | 80 | to 150 |
| Souchong ... | 80 | to 125 | Uxim ... ... | 150 | — |
| Pekoe Souchong | 130 | to 175 | Joosjes ... ... | 100 | to 180 |

TOBACCO.—There is only a small demand for Java, and only 284 b., mark Krosjok Kedirie, have been sold.

MANILA CIGARS.—In public auction were offered 300 mille Cortados, 1868, of which two lots were sold at 36f. in bond, whilst the rest was bought in at 36f.; 50 mille Secunda Habanos, 1868, of which one lot was sold at 35¾f., the rest bought in at 36f.; 150 mille Secunda Cortados Cavita, 1868, but this parcel was not brought under the hammer.

MOTHER-O'-PEARL SHELLS.—26 chests were sold by the Trading Company. The quantity amounted to 2,190 kilo., which were bought at 3¾f. to 10¾f. per half-kilo.

JAVA INDIGO.—Only trifling quantities have been sold, holders declining to operate without a further advance.

BANCA TIN.—Some transactions have taken place at 79f. to 81f. At 80f. great quantities are offered. Billiton now realises 77½f., whilst last week the quotation was 78½f.

HIDES.—The following parcels changed hands:—68 Batavia Buffalo, ex Noach II.; 2,313 Samarang Rinder, ex Twee Gezusters.

ARRACK.—20/1, 40/2, and 30/2 casks Batavia, ex Northumberland, sold at prices that did not transpire.

RATTANS.—There is an active demand; 1,840 bundles, ex British Crown, 2,960 bundles ex Liverpool, 4,000 bundles ex Spanker, 8,266 bundles ex Atlantic King, 388 bundles ex Johan Kepler, 4,663 bundles ex Frank Marion, 7,881 bundles ex Golden City, 2,473 bundles ex Henriette Maria have been sold.

MISCELLANEOUS.—Gutta Percha: 4,330 kilo. sold by the Trading Company at prices that did not transpire, also 3,974 kilo. ex Henrietta Maria. Tamarinds: the large quantities imported have met but small demand. Cassia Vera: 168 pic sold at prices that did not transpire. Gum Damar: 110 ch., floating per Bezochie, sold. Kapok: Of 542 b. offered in public auction, 40 b. cleaned were sold at 32c. to 33c.; 45 b. uncleaned at 15c.; 11 b. cleaned were sold before the auction at 55c.

## SHIPPING INTELLIGENCE.

ARRIVALS.—June 16, at Brouwershaven, from Batavia, Petronella; from Passaroeang, Burmah; at Hellevoet, from Saigoon, Mexicana; at Texel, from Batavia, Wilberfore, Hendrik-Ida-Ambacht; from Banjoewangie, Bellatrix, Ymuiden; from Sourabaya, Dunedin; 17, at Texel, from Padang, Padang Packet; from Batavia, Batavia; from Passaroeang, Wilhelmina; from Saigon, Stanley, Teazer; 18, at Brouwershaven, from Banjoewangie, Rotterdam; from Samarang, L. R. C.; from Batavia, Nyverheid; 21, at Brouwershaven, from Saigon, St. Croix; at Texel, from Banjoewangie, Wyk aan Zee; 22, at Texel, from Banjoewangie, Tjilingsie, Cilminar; from Passaroeang, Brothers German; 23, at Texel, from Batavia, Anna Maria Wilhelmina; June 30, H.M. steamer Java, from Batavia.

DEPARTURES.—June 18, from Brouwershaven, for Batavia, Professor van der Boon Mesch, Jason, Jannetje, Acolus; for Samarang, Maarten van Rossem; for Sourabaya, Ada; for Macassar, Vrachtzoeker; for Sydney, Alblasserwaard; 19, from Brouwershaven, for Batavia, Dordrecht, Jedo, Willem Kroonprins der Nederlanden (*via* Cardiff); from Texel, for Batavia, Willemina and Clara, Dageraad, Kennemerland; 20, from Texel, for Batavia, Cornelia; 21, from Brouwershaven, for Batavia, Graafstroom, India; 23, from Texel, for Samarang, Vertrouwen; 24, from Texel, for Batavia, Luctor and Emergo; 25, from Texel, for Samarang, Doesborgh; 26, from Hellevoet, for Batavia; Noord-Brabant; 27, from Brouwershaven, for Batavia, Noach II.; from Texel, for Batavia, President van Ryckvorsel, Eensgezindheid; 28, from Brouwershaven, for Batavia, Maria Sarah; for Sourabaya, Hebe; from Texel, for Batavia, Passaroeang; June 29, from Texel, for Sourabaya, Sindbad; for Batavia, Jacoba Helena, Kandanghauer, Bestevaer.

PASSENGERS INWARD.—From Java, per Bellatrix: Mr. Strengnaerts and family. Per Hendrik-Ida-Ambacht: Mrs. D. Bolk, Mr. Klaverwezel, Mr. T. Pos and family. Per Ymuiden: Mr. S. Kuntze and family, Mr. J. de Graaf, Mr. C. Muller. Per Doelwyk: Mr. Haantjes, Mr. Dekker and family, Mr. van Coeverden and family, Mr. Mansveld, Mrs. van Dyk and family, Mr. Jasper and family. Per Cheribon: Mr. D. Kock. Per Petronella: Mr. W. Graafland, Mr. M. Niessens, Mr. F. Blom van Geel; Mr. A. Ter Gunner, Mr. P. Hoflands, Mr. Arends. Per Padang Packet: Mr. J. Moolenbrugh and family, Mr. C. Keuling and family. Per Nyverheid: Mr. C. A. Ochler and family, Mr. T. van Docsen and family, Mr. J. W. Hannaart and family.

PASSENGERS OUTWARD.—Per Noach II.: Mr. Heyligers and family, Mr. J. R. Bok, Mr. V. U. Bosscha, Mr. Noman and family, Mr. Warren, Mr. Coenen, Mr. Broekhof, Mr. Bogaard, Mrs. Walker and family, Miss Hoefman, Miss Boot, Mr. Heyligers, 125 soldiers. Per Voorlichter: 150 soldiers.

---

## AGRICULTURAL IMPROVEMENTS IN JAVA.

Mr. R. W. Besier has issued a prospectus of a company for the exploration of a tract of land in Java. As soon as the rights of pro-

Digitized by Google

perty are properly recognised and regulated by the Agrarian Bill (says the prospectus), then the moment has arrived for the employment of capital upon land in Java. Mr. Besier has the opportunity of purchasing a very large property, which represents a value—according to the produce of the last few years—of three million guilders. The greater portion of these grounds is situated in the Buitenzorg district; the remaining part, which is partly cultivated, being in the Preanger regency and the residency of Cheribon; there is a sugar manufactory in the last-named residency. The Buitenzorg grounds are valued by the owner at 2,500,000 guilders, but Mr. Besier does not think them worth more than two millions. The property has an area of 36,000 bouws, with a population of 15,000 souls. The rice grounds have produced in the last few years 12,000 piculs paddy per annum. In 1863 tea gardens were established, and the crop amounted in 1867 to 200,000 pounds, whilst it is calculated that the production in 1870 will equal 600,000 pounds. There are a million coffee trees, the half of which will produce in the future. The crop of 1873 is estimated at fully 4,000 piculs. Further, the land produces Arang sugar, which has been farmed out during the last four years at 600f. per month. There are young ashes, which will produce 50,000f. a-year, as well as 1,000 piculs nutmeg-trees, and 400 cacao-trees. In 1867 wages were paid to an amount of 93,800f. Mr. Besier estimates the yearly production at 800,000 pounds tea, 2,500 piculs coffee, and the remaining articles 50,000f. The profit is set down at 331,000f.; viz., expenditure, general costs 120,000f, transport of 800 /m pounds of tea to Batavia, 144,000f.; freights and costs of tea to Europe, 280,000f.; freight and costs of 2,500 pic coffee to Europe, 12,500f. Receipts, 100 /m. pounds tea at 2f., 200,000f.; 700 /m pounds tea at 75c., 525,000f.; 2,500 pic. coffee, at 45f. per picul, 112,500f.; other productions, 50,000f., total, 887,500f. Notwithstanding that half the sum could be borrowed upon the grounds at an interest of 6 per cent., Mr. Besier thinks it better to raise a capital of 2,000,000 francs, on which, according to present estimates, a dividend of 15 per cent. can be paid to purchase the Buitenzorg grounds immediately, leaving for future consideration the question whether it will be advisable also to obtain possession of those situated in the Preanger regencies, and at Cheribon.

# Monetary and Commercial.

—o—

We understand that the arrangements are complete for the laying of the New Red Sea Cable at the end of the present year. It is hoped that before April, 1870, there will be a direct telegraphic communication between India and England by this route. The ship *Calcutta*, which was disabled some time ago through collision, has again sailed for Aden with the telegraph cable for the Persian Gulf.

It is stated that the New York bankers are now receiving the bulk of their San Francisco remittances of specie overland, and that the last Aspinwall steamer of the Pacific Mail brought only a comparatively small total. It appears to be considered not unlikely that the opening of the railway may, before long, affect the receipts of gold at San Francisco by diverting the gold in its crude state from the mines in the interior, near the line of the railway, to the Philadelphia Mint or New York Assay-office, in place of San Francisco.

The report of the Oriental Hotels Company (Limited), to be presented on the 2nd of July, describes a continued improvement in the business of the Galle Hotel, but states that the Cairo Hotel, owing to the way in which the Government plans have interfered with the locality, has been attended with greater disappointment than had been anticipated, and that they have been obliged to rely on the forbearance of their contractor for delay in the payments for the completion of the structure.

At a meeting of the creditors of Messrs. Felix Leach and Co., of Enfield Mills, near Accrington, the liabilities were estimated at £83,972, and the assets at £23,353. A committee of investigation was appointed.

## BOARD OF TRADE RETURNS.

The Returns of the Board of Trade for the month and five months ended the 31st May have been issued. The total declared value of the exports of British and Irish produce and manufactures for the month ending the 31st of May in the last three years is stated as under:—May, 1867, £15,936,864, May, 1868, £14,670,035, May, 1869, £16,316,540. The figures for the present year thus show an increase of £1,646,505, which is equal to an increase of 11 per cent. on the total of the corresponding month of last year, and 2½ per cent. on that of May, 1867. Of this augmentation nearly half arises from the cotton trade, and nearly half from the iron trade. Unless, therefore, the Manchester manufacturers are steadily shipping at a loss, the adverse accounts from that city must be deceptive or the figures of these statistical returns are not to be relied upon. The general comparative results as regards the principal articles of our trade are as follows: Our consignments show an increase in cotton yarn of 7 per cent. in value and 25 per cent. in quantity; in cotton manufactures, about 16 per cent. both in value and quantity; in haberdashery, 9 per cent. in value; in hardware, 23 per cent.; in machinery, 32 per cent.; in iron manufactures, 43 per cent.; in woollen manufactures, 16 per cent. in value and only 1 per cent. in quantity; and in miscellaneous goods, 8 per cent. in value. The instances of decreased shipments are—25 per cent. in coal, 8 per cent. in earthenware, 17 per cent. in linen yarn, 4 per cent. in linen manufactures (with an increase of 2 per cent. in quantity), and 15 per cent. in silk manufactures. The total exports for the first five months of the year also present a satisfactory increase over those of the two previous years, the figures being as under:—Five months, 1867, £72,123,393; five months, 1868, £70,668,103; five months, 1869, £74,744,620.

While the exports have thus increased, the statement of the "computed real value" of the principal imports for the month of April (being the latest period for which values are given) exhibits a decided falling off; thereby indicating a more economical consumption in this country of the great staples of foreign and colonial production. The import values are annexed:—April, 1867, £19,827,353; April, 1868, £21,969,564; April, 1869, £17,858,517; four months 1867, £64,173,882; four months 1868, £68,416,563; four months 1869, £66,949,136.

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East:—

## ARTICLES OF IMPORT.

—o—

### TEA.

The market has been very quiet during the fortnight, but there is no material alteration to notice in prices. Importers, seeing the general indisposition to buy, refrain from pressing sales, looking to the small quantity now afloat of old season's teas, the gradual reduction in stocks, and the comparative moderation shown in China in the opening of the new season's teas, the Hankow market being the only one opened up to the date of the latest telegrams, whereas at the corresponding period of last year about fifteen millions had been settled at Foo Chow, and four millions at Canton. Siftings and broken-leaf Congous remain steady at previous prices. Fair to good common have been less saleable, and may be quoted ½d. per lb. lower, say 1s. 0½d. to 1s. 0¾d. per lb. Fair to good flavoury kinds show no alteration. Good to fine Kaisows have been saleable in small parcels at former prices; a few finest have realised from 2s. to 2s. 6d. per lb. Pak Lins remain as last advised. Amoy kinds have ruled rather easier, in sympathy with the decline in good common. Common to fair black-leaf kinds show no change, but transactions have been small. Fair to good medium show no material change in prices, though there has been less doing in them. Fine to finest have remained steady, and the few parcels which have changed hands have shown no variation in price. In new make kinds there have been some further sales of overland arrival at about 1s. 4d. per lb., and of recent sailing vessels at 1s. 1d. to 1s. 4½d. for fair to very good quality. Oolongs, Souchongs, and Flowery Pekoes show no change either in the demand or range of prices. Scented Teas—Capers : There have been some sales of very common Canton make at 8d., fair to good 1s. 1d. to 1s. 2d., but the demand has been quiet. Foochow kinds have been inquired for, but there are now but few left in first hands. Orange Pekoes: Canton-make show no improvement, notwithstanding the delay in shipping the new season's. Foochow kinds remain steady at the low rates current for fair to good quality; fine are still wanted. Uncoloured Japans remain unchanged in the absence of fresh supplies. Green Teas: There has been a better assortment on offer, ex Corsair and Assyrian. Moyunes have sold at full prices, though showing some decline on the extreme rates paid for first arrivals. In other kinds there is not much change to notice, but the export demand has been small, and prices consequently rather in favour of buyers.

### SILK.

Business remained in the same dull state as reported in our last, until the date of the public sales, which were held on the 23rd and 24th June, when some few importers and holders showed themselves anxious to meet the market, and 2s. to 3s. fall on the nominal quotations of the day, where sales were forced, was the immediate result. The decline has been general on all classes of silk, but less so on Tsatlees than others, Japans and re reeled Chinas having experienced the greatest fall, through having been more pressed to sale. Even at this altered range of prices buyers are not at all anxious to purchase, the continental demand especially being very unsatisfactory, and our own manufacturers not caring to do more than a hand-to-mouth trade, now that the arrival of the new Asiatic Silk in this market is only distant a few weeks. In Cantons some business was done last week in good ordinary No. 1 Tsatlee reel at 19s., but consumers do not appear willing to continue purchasing at these prices. Bengal Silk is entirely neglected and unenquired for. The deliveries last month were by no means good ; still, considering the condition of the market, as large as could have been expected. China Silk Piece Goods: No new transactions. The market has been very quiet throughout the past month. In the public sales next week there will be but a limited assortment of goods, but owing to the extreme quietness of the trade very little business can be looked for.

---

COTTON.—The improvement manifested in the Liverpool market at the date of our last report has continued to gain strength, and the market at the close of last week exhibited a good demand, at an advance of ¼d. per lb. upon the rates then current. A very buoyant feeling has since continued to prevail, and a further advance of about ¼d. per lb. has been effected. The following are the current quotations :—Surat, 9d. to 11¼d. ; Madras, 9¾d. to 10¼d. ; Bengal, Scinde, &c., 8¾d. ; fair Dhollerah, 10¼d. ; fair Oomrawuttee, 10¾d. ; fair Broach, 10⅞d. ; fair Bengal, 8⅛d. ; fair Egyptian, 13¼d. ; fair Pernam., 12¼d. ; middling Boweds, 12⅜d. ; middling Orleans, 12⅝d. The latest business for "arrival" has been at the following rates:—Dharwar, fair due, 10¼d. ; Broach, good fair new merchants, ginned, sailing April, 11¼d. ; March and May, 11¼d. ; Dhollera, fair new merchants, sailing May and June, 10⅛d. ; Oomrawuttee, fair new merchants, sailing April and May, 10¼d. ; Comptah, fair new merchants, late May sailing, 9½d. ; Bengal, fair new merchants, March sailing (late on 29th), 8⅝d. ; ditto fair new, ship named, 8½d. The London market has also exhibited increased activity and improved prices.

COFFEE.—Without any general animation we have had a fair market during the interval. Plantation Ceylon has gone off readily, the coloury kinds mostly realising an advance of 1s. per cwt., grey sorts showing hardly any change. The small quantity of Native sold establishes no quotable alteration. In other kinds nothing of interest has been done, the public sales having been few in number. The latest prices realised at the public sales have been: plantation Ceylon triage, &c., 35s. to 59s. ; grey, 60s. to 71s. 6d. ; coloury, 72s. to 81s. ; peaberry, 80s. to 84s. ; Wynaad triage, 52s. to 59s. 6d. ; small to bold, 60s. to 79s. ; Naidosbatum triage, 58s. to 59s. 6d. ; small to bold, 62s. to 83s. 6d. ; peaberry, 77s. to 78s. ; Ccurtallum triage, 36s. to 56s. ; good ordinary grey to middling coloury, 59s. to 75s. ; peaberry, 77s. to 79s. ; Penang, 49s. ; Singapore, 35s. 6d. to 43s.

COIR GOODS.—The supply of Yarn has been moderate, but as arrivals continue large the demand has been slow, and prices have further declined 20s. to 30s. per ton for common to medium qualities. 170 bales Cochin Yarn chiefly sold, good common to middling, £26 to £28 10s. ; good, £30 to £30 5s. ; superior, £70 ; 4,852 dholls (9 tons) common sold at £24 5s. to £25 5s. ; 66,314 dholls 1,650 ballots (109 tons) Cey-

Digitized by Google

lon chiefly sold, very common, £23 10s. to £25 5s.; good common to middling, £25 10s. to £27; good middling, £28 5s. to £29; good, £32 15s. to £34 5s.; very fine, £46. Of 133 bales Cochin Fibre 83 bales sold, middling to good middling, £22 10s. to £24; ordinary, £20 5s. per ton.

CHINA MATTING.—Of 769 rolls in auction only 110 rolls sold, stained, 4s. 4d.; red at 17s. to 19s.; stained, 4s. 4d.; white, 18s. 6d. to 21s. 6d.; sound, 2s. 4d.; white Gowqua extra contract at 31s. 6d.; the remainder bought in, 4s. 4d. red and white at 28s. per roll.

CAMPHOR.—There being but little now afloat as per last advices, the quotation to arrive is nominal, but on the spot market is quiet at lower prices, China being sold at 97s. 6d. to £5 per cwt., and Japan held for £5 7s. 6d. per cwt. At these quotations large sales have been effected.

COCOA NUT OIL.—Considerable business has been done in Ceylon at £41 per tun.

GALLS.—China: 547 boxes have been offered at auction, and met a very ready sale at 47s. to 47s. 6d. for middling, generally dark, and very much broken. Privately a good business has also been done at 47s. to 47s. 6d., and the market at these quotations appears firm; a sale of 328 cases will take place; good clean bold sifted still inquired for; Japan in moderate inquiry; 726 boxes withdrawn, above value.

HIDES AND SKINS.—Messrs. Dyster, Nalder, and Co.'s report for the past month is as follows:—The sales of East India Hides during the past month have been 237,797 hides. The demand has been good, both for consumption and export, and at the last sales prices were fully ¼d. per lb. higher on the better descriptions, whilst the lower qualities, of which the proportion was unusually small, show an advance of ¼d. to ½d. per lb. Batavia, &c.: No sales are reported. Singapore, &c.: The supply of Ox and Cow Hides have been unusually large, and met a fair demand at about late prices. Buffalo Hides have met more inquiry at ¼d. to ½d. per lb. advance on the better qualities. The sales comprise 18,127 Cowhides:—Light, 8½d. to 10d. per lb.; Heavy, 6½d. to 8½d. per lb.; Small, 9d. per lb.; Thirds, 5¾d. to 7d. per lb.; Fourths, 5d. per lb.; Brined Light, 8¾d. to 10d. per lb.; Heavy, 6¾d. to 8½d. per lb. 4,541 Buffalo Hides:—Best Heavy, 5¾d. to 6¼d. per lb.; Light, 5½d. to 6¼d. per lb.; Seconds, 4¾d. to 5¼d. per lb.

INDIA RUBBER.—The market is very dull; all offers at the public sales have been withdrawn, and the business doing privately is very limited.

JAPAN WAX.—We have again to report a dull market and lower prices. Auctions have not been important; only 561 boxes, of which about one-third has sold at 70s. for good saucers, very slightly mixed with soft. Privately exceedingly fine has been offering at 75s., but sales of 100 boxes have only been effected, constituting a decline of 2s. to 3s. per cwt.

MANILA HEMP.—The market is firm, with moderate business upon fully former terms—viz., £49 to £49 10s. per ton for good roping, and £50 to £51 superior; 729 bales sold at auction at £46 15s. to £48 15s. middling to fair.

MUSK.—Rather cheaper; 15 caddies Tonquin at auction sold at 19s. to 19s. 6d. per oz. for ordinary, and 14s. to 14s. 6d. inferior.

PLUMBAGO.—We have to report Ceylon descriptions again cheaper; of 2,647 barrels at auction, half sold at 13s. 6d. to 24s. per cwt. for fair to fine lump, 10s. 9d. chips, and 6s. 3d. to 12s. 6d. dust.

PEPPER.—Messrs. Brookes and Faith report as follows:—Singapore Black has been in very fair demand, at the quotations given in our last, viz., 3⅞d. per lb. for good, and about 4,809 bags have been quitted by auction at this, together with a large quantity by private contract; fine WA in diamond B at the side, per United Service, retired at 4⅛d., but subsequently quitted at 4d.; grey and dusty, 3 13-16d. The above quantity consisted chiefly of arrivals per Lammermuir, Loudoun Castle, and United Service. Penang: The auctions have comprised 5,888 bags, chiefly per Albuera, Alice, James Paton, and Tek Li. Of these, only a small portion sold, viz., the damages, the sound being chiefly bought in at 3¾d. for fair dusty, and 3⅞d. for good bold heavy, West Coast. Since the sales, a considerable quantity has been quitted at 3¾d. to 3⅞d. per lb. as in quality, but ending at 3¾d. prompt, and 3 11-16d. cash for average quality. Stock of black pepper, 2,000 tons, against 2,138 tons last year. Afloat from Singapore and Penang, 1,855 tons against 1,644 tons last year. The crop appears to be larger than was at first looked for, especially from Penang, and it would not surprise us to see this description lower. White: Very large quantities have been brought to auction since our last, viz., 2,498 bags Singapore, and 629 bags Penang. Of these, a large portion consisted of recent arrivals per Loudoun Castle, Lammermuir, and Alice; remainder old specs, and a desire to realise being general, a large portion was quitted at and ex the sales. Singapore: Very good at 5⅞d. to 5½d.; middling, 5¼d. Yesterday good fair was held for 5⅞d., but unsaleable thereat. Penang: Good fair bold at 5½d. to 5¾d.; dingy, &c., 5d. to 5⅝d. Really good is scarce, and such has been placed at 5½d. cash. The Continent appears to be getting bare of stock, and we feel, therefore, that on receipt of orders a slight improvement may possibly occur. Trang is considerably lower; good fair quality, per Parana, being quitted yesterday at 4d. per lb.; very grey at 3⅞d., and 1 C S D at 3⅝d. One shipment having occurred, it is possible that several arrivals may now shortly follow, and with such a further fall would not surprise us. Aleppee badly wanted, and value of good 4½d. to 4⅝d. Shot: A few bags good have been quitted at 5½d. to 5¾d. per lb.

RHUBARB.—Large quantities of China, chiefly common quality, continue to be offered, and the supply being considerably in excess of demand, prices, where sales have been forced, show a decline varying from 3d. to 9d. per pound. Anything good has and will continue to meet a ready sale, fine pinky being extremely scarce; 18 cases of such met the keenest possible competition, and realised 8s. per pound; the following are the prices realised:—Common pale coated, mixed fracture, 1s. 4d. to 1s. 9d.; fair, 1s. 11d. to 2s. good fair, 2s. 9d. to 3s.; good bright coated, part fairly trimmed, and of generally pinky fracture, 3s. 4d. to 3s. 8d.; good held for 6s.; and preferable O and Co. H under for 7s. 6d.; good tips, 1s. to 1s. 2d.; and low, 6d. to 8d.; about 455 cases offered and half placed. Stock 31st May, 1,678 packages against 1,007 last year.

RATTANS.—The market is steady; and of 15,338 bundles Java, 7,962 bundles Singapore, and 1,602 bundles Penang at auction, nearly the whole sold at 2s. 6d. to 4s. 2d. per 100.

RICE.—A slight improvement has taken place in the market. The unsettled state of the weather, assisted by an improved Continental demand, has drawn considerable attention to the article, and prices have rallied—spot parcels to the extent of 3d. to 4d., and floating soft grain cargoes 4d. to 6d., and a very large business transacted. On the spot fine Bengal has been quitted at 13s. to 13s. 6d.; good, 12s. 3d. to 12s. 9d.; middling held for 10s. 6d. to 11s. 6d.; Askhoolie placed at 9s. to 9s. 6d.; Dacca at 7s. 6d. to 8s.; and low white, 7s. 6d. Rangoon of old season has been taken in quantity at 8s. to 8s. 3d.; new at 9s. to 9s. 3d.; and 300 tons, first of the new crop, at 9s. 9d., ex ship; Siam garden, at 8s. 1½d. cash, landed; Siam just arrived, at 6s. 6d., ex ship, in mats and bags, and 7s. 3d. landed; and Madras early in last month at 8s. to 8s. 3d. Afloat, Rangoon has been sold on Continental terms—at 9s. to 9s. 3d. for February and March sailing; 9s. 4½d. to 9s. 6d. for February and April sailing. Necranzie at 9s. 10½d. for February sailing; 9s. 9d. for February-May sailing. Saigon at 8s. 6d. for March sailing (quality guaranteed). In all about 12 cargoes are reported. The market closes quiet.

SPICES.—Cassia Lignea: Steady, with limited business at full prices; 200 packages, from the United States, at auction, retired. Buds: Quiet, upon former terms, with very little doing. Cinnamon: We quote 1st sort 1s. 8d. to 3s. 6d. per lb.; 2nd, 1s. 6d. to 3s. 5d.; 3rd, 1s. 4d. to 3s. 2d.; 4th, 5th and Jungle, 10d. to 2s. 5d.; dearer; 168 bales sold at auction. Chips: Plentiful and cheaper; 1,539 packages mostly sold at 2½d. to 4d. for low to middling. Cloves: Penang steady; 30 cases at auction sold at 10½d. to 11½d. per lb. for good to very good; Zanzibar rather cheaper; of 700 bags offered two-thirds sold at 3½d. to 3¾d. for a few lots. Mace: Steady but quiet; one case Penang at auction sold at 2s. 10d. per lb. for very good reddish. 15 packages Batavia retired. Nutmegs: Very firm; 15 cases Penang and 10 cases Singapore at auction mostly sold at 3s. 8d. per lb. for good bold, and 1s. 5d. to 2s. 2d. middling small to good medium.

SAPANWOOD.—Quiet; of 58 tons Siam at auction a portion only sold at £10 per ton, and of 27 tons Ceylon half sold at £9 12s. 6d. to £10 5s.

STICKLAC.—The market for Siam is steady, and of 84 cases offered at the auctions about two-thirds sold at 59s. 6d. to 60s. per cwt. for very good quality.

SOY.—China is steady; 150 casks of recent arrival at public sale realised 2s. 8d. to 2s. 9d. per gallon.

TERRA JAPONICA.—Cutch: Flat, and again cheaper, moderate business done privately at 26s. for fine. Gambier Cubes cheaper: of 3,402 bags and mats at auction about one-fourth sold at 21s. per cwt. for fair squares, and 18s. to 20s. pressed; Block steady; 737 bales sold at 17s. (with a few lots 17s. 3d.) for good; fair business privately at 16s. 9d. to 17s.

TIN.—The dulness in the market noticed in our last report has continued throughout the interval, and a further decline of about £2 per ton has taken place, the current quotations being, Banca, £135; Straits on the spot, £130; for arrival, £125 to £126 per ton.

### FREIGHTS AND CHARTERS.

We have no improvement to note in berth freights to the Eastern ports; rates remain without alteration; in coal freights from the Northern outports there is a little more doing, and rates have in some instances advanced.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 40s. weight, 50s. meast. To Hiogo 50s. weight or meast. To Tientsin: 60s. weight or meast. To Chefoo: 60s. weight or meast. To Shanghai: 35s. weight, 30s. meast. To Foochow: 50s. weight, 45s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Amoy: 50s. weight, 45s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £44. For Hong Kong: £33. For Singapore: £25. For Galle: £24. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. For Shanghai: £2 2s. 6d. For Hong Kong: £1 15s. For Singapore: £1 6s. For Galle: £1 6s.

The Admiralty have invited tenders for the conveyance of 105 tons stores to Ceylon, and 7 tons to Hong Kong.

### CASUALTIES.

A telegram dated Galle, June 26, states that the Coral Nymph, Sunderland to Shanghai, was totally wrecked in Gaspar Straits, June 18.

The Dione, Grace, from Colombo to London, put into Algoa Bay May 8, to repair bulwarks, sails, &c., having encountered a heavy N.W. gale about sixty miles W. of Cape Recife.

### MISCELLANEOUS.

At TENERIFFE.—June 17, Diomed (str.), Crompton, from Liverpool and left for Mauritius, Singapore, China, &c.

Off ST. HELENA.—May 15, Lady Agnes, from Colombo, for London; Underly, from Ceylon, for London.

Off CAPE GOOD HOPE.—Choice, Hyacynth, both from Colombo, for London.

At ALGOA BAY.—May 8, Dione, Grace, from Colombo, for London.

At TABLE BAY.—May 12, C. J. Textor (s.s.), sailed for Japan.

Gatty, Stephen Glover, P. Guglielmo, G. F. Handel, J. L. Hatton, W. Hills, J. Hobbs, C. Horn, F. Kucken, A. Leduc, A. Lee, Miss Lindsey, Mendelssohn, Mozart, S. Nelson, H. Smart, B. Richards, H. Russell, J. R. Thomas, W. V. Wallace, W. T. Wrighton.—London: 6, New Burlington-street.

HOLLOWAY'S OINTMENT and PILLS.—SORE THROATS, DIPHTHERIA, AND BRONCHITIS.—These medicaments boldly face the evils they profess to remedy. Local relief and general purification progress together; disease is cured while the whole system is cleansed. Holloway's Ointment rubbed on the throat and chest exercises the most beneficial influence over sore throats, diphtheria, and cough, whether resulting from catarrh, asthma, or bronchitis. This unguent acts miraculously in arresting the extensions of sores, healing ulcerations, curing skin diseases, and completely stopping all destructive inflammation, irrespective of its exciting cause, character, situation, duration, or severity. Holloway's Ointment, aided by his Pills, gives most immediate and most marked relief to those irritating itchings and painful swellings of the shins occasioned by mercury or latent syphilitic virus.

A WIDOW LADY, who has resided several years in the EAST, wishes to RECEIVE INTO HER FAMILY TWO or THREE CHILDREN whose parents are abroad. First-class educational advantages are offered, and unexceptionable references given. The house, which is airy and pleasant, stands close to the sea, in the best part of Ramsgate.

Address, J. N. B., Post Office, Ramsgate.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

Per P. and O. steamer, from Southampton, Sept. 4.—To Hong Kong: Mrs. Hackin

# Summary of News from the Far East.

## JAPAN.

### YOKOHAMA.

The present mail brings our advices from this port down to the 14th May. The outward French mail, with letters to March 17 and London telegrams to April 6, was received there on the 9th May. The *Japan Times* gives the following summary of the fortnight's new:—

The Mikado arrived in Yedo on the 9th May, and the Daimios are coming in fast. The Great Council of nobles, which has been on the point of assembling to settle the future constitution of the country any time these three years, is really now to meet. The most important subject for its deliberation is, of course, the proposition made by a majority of the leading men in the country to concentrate the whole civil, military and naval power in the hands of his Imperial Majesty, to abrogate the independent rights and privileges of the several Daimios, as princes, and to make of them high officers, governors of provinces, &c., under the supreme Government, and thus to consolidate the power of Japan, and enable it to take its legitimate place among the nations. Of the value of this proposal to the country there can be but one opinion, and so far as our necessarily limited view of Japanese political movement extends, there seems to be little danger of its rejection. That such extension of the Mikado's material power over the country will be followed by the opening of the whole of Japan to Foreign enterprise there can be no manner of doubt, and it is clearly our interest now to support and strengthen the Central Government by every means in our power.

We shall be glad to be able to report the settlement of affairs in the North. The Imperial fleet, including the *Stonewall*, has arrived in safety in Awamori Bay, where about 12,000 troops are understood to be concentrated, and we are in daily expectation of hearing of the commencement of hostilities.* The presence of Foreigners in the camp of the fugitive *kerais* of Tokugawa has materially complicated the question. But for these few French officers the pirates would have long since yielded without a blow; they have encouraged, taught, and assisted them to resist, and such is the *prestige* and real value, too, of Foreign skill in the art of war that, overwhelming as is the Mikado's power compared to that of the handful of rebels opposed to it, it may be long before his authority is re-established, and his forces may have to undergo shameful defeat. It is surprising, and is the subject of universal comment, that the representative of France in Japan, after his formal acknowledgment of the Mikado as supreme ruler of the country, has hitherto refrained from demanding from Enomoto the rendition of the French officers now with him, some of whom are actually deserters from their flag. It is quite worthy of notice that during the fortnight three cases of assault upon Frenchmen have occurred in Yokohama. An attempt has also been made to fire the French Legation. It is difficult to disconnect political feeling from these outrages.

The concourse of Daimios to Yedo has naturally filled the Tokaido with *samourai* from all parts of the country, many inimical to Foreigners, and most ignorant or careless of the new laws enjoining them to treat us with respect. The consequence has been that during the fortnight several passengers have been stopped on their way to or from Yedo, and ordered, in some cases compelled, to alight from their carriages while a noble's train was passing. Among those so challenged have been Captain Chandos Stanhope, of H.M.S. *Ocean*, the senior naval officer, and Russell Robertson,

* Since the above was written, we have received information of an attempt to cut out the *Stonewall* on her way up, of which we give particulars below.

Digitized by Google

Esq., H.M. Vice-Consul for Yokohama and Yedo. The matter has been warmly taken up by H.M. Minister, and no doubt proper apologies will be made, and any renewal of the annoyance is not anticipated. To the Mikado we are willing to leave the road clear, as to our own Sovereign or to any Foreign Monarch moving in state along our own highways, but the nobles of Japan must be content with the same or less attention than we pay to our own aristocracy.

We are glad to be able to state that the accident on the Tokaido, due to the carelessness of a Foreigner, which we mentioned last mail, turns out to have been unattended with fatal results. The two children who were left for dead, and for some time were insensible, recovered, and a new massacre of the innocents has not to be added to the long catalogue of such sacrifices. We are ashamed to say that the culprit is a man under the protection of the English flag. Some small pecuniary fine has been levied on him, we hear; he would have been deported by Sir Rutherford Alcock.

The Foreign Ministers have made no sign as yet upon the currency question, the memorials addressed to them being still unanswered. We look for a meeting of the Chamber of Commerce shortly, when these memorials will be produced, and we shall be able to discuss them.

The other important local subject, that of municipal reform, has not been neglected. The committee whose appointment we recorded in our last has completed its work, and its address to the Ministers is ready for presentation immediately after the departure of the outgoing mail.

### NAVAL ENGAGEMENT IN MIACO BAY.

We (*Japan Times*) are in possession of full particulars of a naval engagement, or, rather, a surprise, in Miaco Bay, in which the *Eagle*, the best ship of Enomoto's piratical squadron, distinguished herself by a most gallant attempt to cut out the ironclad *Stonewall*. Our authority is the European captain of one of the Mikado's fleet, whose ship was in the action, and the following account may be relied on as accurate:—

The Mikado's fleet, having reached on the 12th of April Miaco Bay (rather more than half-way to Awamori, where we have heard of their subsequent arrival), lay there till the 6th May, the weather being rather misty. About 5 A.M. on the 6th a strange sail was seen from the deck of the *Bushi Maro* (late *Filipino*), flying American colours. Captain Webster, an English officer in command of the *Filipino*, immediately made her out to be the *Eagle*, and warned his Japanese crew to prepare for action. No preparations were made on board the *Bushi Maro*, nor, indeed, on board any other of the Imperial ships, the *Stonewall's* broadside guns, in particular, being still hampered up with firewood and tubs of *saki* and provisions, as on board all Japanese vessels under Japanese control. After reconnoitring for some time, and seeing that no preparations were making to receive her, the *Eagle* put on a full head of steam and came straight into the harbour, passing close to the *Filipino*, which had hoisted English colours, and drove stem on to the *Stonewall*. There is only one way of accounting for this piece of stupidity—that, in the excitement of the moment, the order "full speed astern" was mistaken for "full spead ahead;" for before she struck the ironclad she was seen to stop her engines once. Of course the result was that the *Eagle's* bow was completely stove in, and we have probably heard the last of her, for she must have been in a sinking condition when she afterwards fled. Very little damage was done to the *Stonewall*, of course, her bulwarks only suffering. A gallant attempt was then made by the *Eagle's* crew to board the ram, under cover of a very heavy fire of musketry, but it was unsuccessful, every man who reached her deck being immediately cut down. Just then a young Satsuma man on board the *Filipino* foolishly fired his rifle and brought down upon the transport the broadside of the *Eagle*.

A fire was kept up on her from three guns, one loaded with heavy conical shot, the other two with grape and canister; the crew being unprepared to reply, ran below, and had she been boarded she might have been taken with the greatest ease. Two of her officers, two paymasters, two boatswains and six men cut the falls of a boat in the davits, dropped into it and made for the shore. For fifteen minutes the captain was the only man left on the deck. One conical shot came in through the side, went through two Japanese cabins, the captain's cabin, the engineer's cabin and the engine room door, finally breaking off two large iron bitts and going out through the other side. Another passed through the side, the cook-house, killed three men and wounded four, then passed through the European officers' mess-room, smashing their crockery and preserved provisions, and finally through the other side. A third struck about four inches above the water line, making a hole which had to be plugged and covered with lead and copper before the ship could move. The whole of her starboard side was pitted with the grape and canister, and the rigging, masts and sails badly cut up. The captain's steward got a rifle bullet through his leg, being the only man wounded. By this time another of the Imperial ships, the *Keangsee*, had prepared for action, and opened fire on the *Eagle*, upon which she turned round and steamed out of the harbour. She must have suffered considerably, besides the probably fatal damage to her bow, for what men were on board the *Stonewall* (part of her crew were on shore) kept up a sharp fire of rifles upon her decks at about pistol-shot distance. Of seven Foreigners noticed on her bridge when she came into action three were seen to fall, and, as we have said, none of the boarders that attempted to take the *Stonewall* escaped.

Two gunboats were hovering about outside during the fight, bur did not enter the bay, and took no part in the affair. As soon as steam could be got up on board the Mikado's fleet and the men shipped, the ships got under way in pursuit, the *Filipino* being sent down with forty wounded men, her own and the *Stonewall's*, to Yedo, where she arrived on the 9th inst. We have since heard of the arrival of the Imperial fleet in Awamori Bay, but nothing had been seen of the *Eagle* or her companions. There is reason to believe that Enomoto was made acquainted with the unprepared state of the Imperial fleet while it was lying in Miaco Bay.

## YEDO.

### THE JAPANESE PARLIAMENT.

The Japanese House of Representatives was formally opened on the 18th of April. It consists of 276 members, each representing a Clan or Daimiate, and elected by its councillors. The Japanese Parliament in its present crude form does not profess to represent the opinions of the nation, but only of the *Kerais*: the Kuges and Princes now assembling in Yedo at the summons of their Sovereign will compose an informal Upper House, consisting of the high nobility, meeting in the presence of the Emperor. As yet the people at large are unrepresented; their measure of political life is confined to the privilege of thrusting complaints or suggestions into boxes erected in various places for their receipt. Even this, however, is an improvement on the past, and the Japanese expect soon to see commerce represented in the National Council.

The opening of the House of Representatives was attended with some ceremony. More than two hundred of the members were present, and a number of the highest dignitaries in Yedo, dressed in their robes of state, also attended as spectators. Prince Akidzuki Ukio no Sake occupied his Presidential seat, and read out an Imperial Message commanding the House to commence its labours in the country's cause.

The rules of procedure of the House have not yet been definitely settled; a scheme, however, has been drawn up and privately circulated, rather, perhaps, with the view of eliciting opinions and of courting discussion than with the idea that it is to become permanent law. The Japanese have in some respects adopted the American system, particularly in the proportionate majority, and the important provision that members of the Government shall not sit in the House.

The Imperial message to the House was as follows:—

"Being on the point of visiting our Eastern capital, we have convened the nobles of our Court and the various princes in order to consult them upon the means of establishing the foundations of peaceful government. The laws and institutions are the basis of government. The petitions of the people at large cannot be lightly decided. It has been reported to us that brief rules and regulations have been fixed upon for the Parliament, and it seems good to us that the House should be opened at once. We exhort you to respect the laws of the House, to lay aside all private and selfish considerations, to conduct your debates with minuteness and firmness; above all things, to take the laws of our ancestors as a basis. Adapt yourselves to the feelings of men and to the spirit of the times. Distinguish clearly between those matters which are of immediate importance and those which may be delayed, between things which are less urgent and those which are pressing; in your several capacities argue with careful attention. When the results of your debates are communicated to us it shall be our duty to confirm them."

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, May 20, 1869.

The Pacific mail, three days overdue, arrived on the 8th inst., bringing Washington dates to the 4th April. All the European news had been anticipated, but by the *Niger* (Diamond line) we received on the 9th London telegrams to the 14th April, which had been brought on from Calcutta to Hong Kong. On the 12th the English mail of the 26th March reached us, with telegrams to the 17th ult., and on the 15th the Chamber of Commerce received, *via* Kiachta, a London telegram to the 27th ult.

On the 16th inst. Mr. Bonman, the newly appointed agent of the P.M.S.S. Company arrived; Messrs. Russell and Co. will therefore be relieved of this agency for the future.

The *Huntley Castle*, the first tea-ship of the season, was despatched on the 9th inst. for Hankow, in tow of the S.S.N. Company's steamer *Moyune*, by Messrs. Adamson, Bell, and Co. Several vessels have since gone up the river.

The firewells recently constructed by the Municipal Council have proved failures, but fortunately very little money has been expended upon them. Calculated to provide as much water as would keep a local fire-engine, known as "The Deluge," pumping for twenty-four hours, actual experiment has proved that that identical engine pumps them dry in seventy-five minutes.

On the 17th inst. the balance of the China Fire Insurance Company's claim of £2,849 on the Commercial Bank Corporation, on

Digitized by Google

which ten per cent. has already been paid, was sold for Tls. 2,100. A similar claim on the estate of Mackellar and Co., on which three per cent. has been paid, was purchased for *one tael*.

Notifications have been issued announcing that for the future the import duty on clocks and watches alike will be five per cent. *ad valorem*. By the tariff the import duty on clocks has hitherto been five per cent., and on watches one tael per pair. The two are now made uniform.

Boat-races were held on the river a few days ago, between (1) two eight-oar gigs, (2) two fourteen-oar man-of-war launches, and (3) two four-oar gigs. We have, however, become wonderfully callous to amusements, and very few of the residents cared to witness the events, which were, I believe, very keenly contested. Cricket matches are now the order of the day. One between the "first eleven" and the "second twenty-two" of the club, completed on the 8th inst., resulted in a victory for the former, who made up the score (126) with nine wickets to go down.

The Philharmonic Society gave their last concert for the season on the evening of the 17th inst.

The Supreme Court has recently been occupied with a case in which the the Municipal Council were the plantiffs, and Messrs. Gibb, Livingstone, and Company defendants. Judgment was delivered on the 8th inst. I sent you a copy by the French Mail, which left this on the 14th inst., and I would beg attention to the protest made in it, against the utterly unjustifiable and unstatesmanlike remarks of the Duke of Somerset, in regard to this settlement. These remarks were also made the subject of bitter comment at the meeting of the Chamber of Commerce, held on the 8th inst. The proceedings of that meeting I sent you (by French Mail), and you have no doubt already noticed the salient points of discussion.

The Consular report of Chinkiang trade for the year 1868 has just been published here. It is worth noticing that there was an increase of 70 per cent. on imports over 1867, and of 450 per cent. if opium be left out of consideration. The surrounding districts are rapidly recovering from rebel devastation, and are now both populated and cultivated. Of Grey Shirtings, during 1868, 174,780 pieces were imported as against 14,384 in 1866. This promises something like an "opening up of the country."

It is stated that the market for the new tea crop has been opened in some of the country districts at low prices. Musters are expected in Hankow about this date, the tea being contracted for at rates varying from Tls. 22 to Tls. 26 laid down at Hankow.

On the 2nd inst. the new Church of St. John the Evangelist at Hankow was opened. Morning prayers were read by the Rev. A. C. Hohing, of the American Episcopal Church, the communion service by the Rev. E. W. Syle, of Shanghai, and the sermon was preached by the Rev. Canon M. Clatchie, from the text Heb. x. 25. The entire community at Hankow has contributed liberally to the fund necessary for the erection and decoration of the church, and it is said that the result is extremely satisfactory.

Letters from the North announce the bursting of the banks of the Peiho, so that water communication with the North-Western Provinces has been stopped. In my last letter I told you of a rumoured misunderstanding at Peking between the French Secretary of Legation and a brother of the Prince of Kung, mentioning at the same time that although ample time had elapsed no confirmation of the story had been received. I now send you a circular letter, addressed by M. Dabry, Acting Consul-General for France, to the local papers :—

Shanghai, le 14 Mai, 1869.

Monsieur l'Editeur,—Je vous prie d'insérer dans un des premiers numéros de votre estimable journal la rectification suivante :

Le Consul Général de France est autorisé a déclarer qu'il n'existe aucune affaire entre la Légation de l'Empereur et le Tsong-ly-Yamen de nature à troubler leurs bonnes relations. Tous les bruits qui ont couru à Shanghai et que les journaux ont rapportés n'ont pas de fondement.

Agréez, Monsieur l'Editeur, l'assurance de ma considération très distinguée. P. DABRY.

On the 8th inst. letters, under date of the 25th April, were received from the Yangtsze exploring expedition. The gunboat had been left at I-chang, as it was not deemed advisable to attempt to stem the rapids in her. Messrs. Swinhoe, Michie and Francis, Lieutenant Stokes, of the *Opossum*, and two surveying officers went on in a native junk as far as Kuei-fu, a station one hundred miles from I-chang. Kuei-fu is the Quai-chow of Captain Blakiston. The people proved extremely civil and obliging. At Kuei-fu the commissioners were fortunate enough to meet one of the sexennial tribute-bearing embassies from the Lama of Thibet. A member of the embassy stated that he knew Mr. T. T. Cooper, and had exchanged a mule for his gun at Ta-tsien-lu. On the 18th intelligence reached us that the surveying party had arrived at Hankow from I-chang, where they had last been heard of. They have prepared plans of the rapids and maps of I-chang and Shasi. The river was found to be navigable beyond Yoh-chow only for vessels of seven feet draught, and the rapids are believed to be altogether impracticable for foreign craft. The commissioners had not returned from Chung-King, but the *Opossum* was awaiting them at I-chang.

A slight affray between a party from the Russian gunboat *Sable* and a Corean village is reported. One of the naval officers had gone ashore on the Corean coast for a little shooting, and was fired upon by a body of soldiers, who issued from a fort near where he had landed. The gunboat immediately opened fire on the fort, and landed a party, by whom the officer was brought off.

Mr. W. M. Cooper has been appointed acting Consul at Taiwan vice Mr. Gibson, and has been relieved at Chinkeang by Mr. G, Jamieson. Mr. Gibson is removed to Canton, vice Mr. Mayers on temporary leave of absence.

The Shanghai Gas Company seems at last to bear some promise of success. At its annual general meeting, held on the 18th instant, it was resolved to devote the profits of 1868 (equal to Tls. 13,000, or about 11 per cent. on the paid up capital) towards paying off the debentures, which will thus be reduced from Tls. 40,000 to 27,000.

The Shanghai Club is in difficulties again, and rumour says will probably be shut up for a time, and re-opened on another system. The shareholders are now calling on the members to increase their subscriptions by another dollar a month, and if this measure is agreed to they may tide over their present danger.

## FORMOSA.

From Formosa we (*China Mail*) learn that there is local trouble at Gauchai, a place about 100 miles north of Takow. The inhabitants shut their gates against the new General-in-chief, on his going up with a force of Honam braves, to attempt the capture of some people who had been doing a little quiet piracy. Report says he was thoroughly defeated on trying to storm, but that on the arrival of the Anping governor with more men a settlement was come to and the place was nominally taken, some men being executed. [Qy., the pirates.] This place is always giving trouble, and is a very hotbed of piracy. It is a pity that the general was not more successful; but the native merchants appear to look upon the expedition as a failure.

Mr. Gibson, H.M. Consul, is still at Takow, and will, we believe, not move until relieved. We trust he will not go until Leong Taoutai is removed, according to the promise of the special commissioner. The latter is still at the Yamen, however, and since the death of the old Fu, has actually resumed his duty, although Foreigners do not, of course, recognise him. The new Fu, general and other officials, appear, from all we can learn, to be good men, and anxious to get on well with Foreigners.

## HONG KONG.

Advices from this port extend to the 27th May. The English mail of April 9 arrived out on the 19th May, with London telegrams to May 1. The French mail of April 18 was hourly expected. The following summary of news is chiefly from the *China Mail* :—

H.M. gunboat *Bouncer* has been doing some good service in discovering pirates.

The libel case, at the instance of the Macao Procurador, against Mr. A. de Souza, printer and publisher of the Portuguese newspaper *Echo do Povo*, came on for hearing at the Criminal Sessions on 18th inst. Defendant's counsel applied for time to plead, saying that in the meantime the proceedings instituted against plaintiff by his own Government in Macao would have been decided. Justification on the ground of the truth of the libel it was intimated would be the plea put forward. Another application was made to quash the information, upon several grounds; but the argument on this point was postponed to another day. The trial was adjourned to the June Sessions.

At Macao, Mr. Gregorio Jose Ribeiro, who has filled the office of Colonial Secretary for the last nine years, has retired, and Mr. Joao Climacho de Carvalho is appointed in his place. Senhor Fernandes, the Superintendent of Chinese Emigration from Macao, has resigned his office; the Acting Attorney General has, at his own request, been suspended, Mr. Francisco Silveira being appointed in his place. These changes do not, it is said, exhaust the list.

Although the recent difficulty at Peking turns out to have been trifling in its nature, we cannot say that either the public or the papers were wrong in attributing to it much possible importance. The true version appears to be that a coolie belonging to the French Legation was struck by Prince Kung's brother for jostling his horse. An apology was claimed; the Tsung-li-yamen replied that the Charge d'Affaires was moving without any escort to mark his rank, and it really was not known that the coolie belonged to his train. Had they known it, he would not have been struck. So far there is nothing to complain of. The argument used by the Chinese is unanswerable. But we cannot help suspecting that more must have transpired than this simple narrative would lead us to believe. We know upon positive authority that the Foreign ministers generally supported the demand for an apology, and this they would scarcely have done had the evidence of intentional insult been so exceedingly slight. . . . . .

While we may, therefore, dismiss from our minds any further speculation as to probable results from this cause, it will not be unprofitable to take note, not merely of the readiness with which such rumours are received by Foreigners generally, but the eagerness with which warlike predictions are uttered so soon as the faintest suspicion that a difficulty has arisen is conceived. We could scarcely have a better exemplification of the state of feeling generally than that just afforded us by the circulation of reports regarding an insignificant squabble scarcely even worthy of the name of a diplomatic "difficulty." It is perfectly evident that

Digitized by Google

all Foreigners in China are anticipating, and we may almost add hoping for, the commission on the part of the Chinese of some overt act of hostility which will blow Mr. Burlinghame's misrepresentations and Lord Clarendon's suicidal policy to the winds, and coerce either the British or some other government into taking immediate measures of a warlike nature. We commend to the consideration of our home authorities the feeling thus evinced, and would furthermore remind them that though our interests undoubtedly—at present—preponderate, other nations have interests at stake also. France and Russia may be termed the war-policy Powers; Prussia, the United States and others being those by whom coercion would probably not be attempted. But a spark may give rise to the eruption which but waits to burst out on the part of either of the former, and if France commences a war with China we must either join or abdicate our position.

From Swatow we hear that a portion of the British Consulate fell in with a crash on the 20th instant, and some fear is entertained lest the whole house follow. Much dissatisfaction prevails at the withdrawal of protection, and it is supposed that Chow Chao Fu, lately opened by H.M.'s energetic representative at that port, will have to be again closed.

The *Gazette* gives the following account as the duly-certified average amount of bank-notes in circulation in Hong Kong during the month ending 30th April, 1869:—

| Banks. | Average amount. | Specie in reserve. |
|---|---|---|
| Oriental ... .. | ... dols. 336,826 | dols. 112,276 |
| Chartered Mercantile ... | 526,430 | 200,000 |
| Chartered ... ... | 287,380 | 100,000 |
| Hong Kong and Shanghai | 1,163,480 | 500,000 |
| Total ... | dols. 2,314,116 | dols. 912,276 |

It is notified that the Lubeck, Hamburg, and Oldenburg Consulates at Hong Kong have been suppressed by their respective Governments.

The prisoners charged with the murder of Mr. Holworthy are still awaiting their trial. Additional evidence against them, it is said, is being collected and put in form from various sources.

### KIDNAPPING IN TONQUIN.

We have been placed in possession of some startling information regarding the kidnapping which goes on in the Tonquin Gulf. Our authority is derived from the statements of European eye-witnesses, who speak the language of the locality, and have seen enough to satisfy them that the evils described to them by natives are not exaggerated. As will presently be seen, Hong Kong has, if the reports be true, a vivid interest in making full inquiry into the facts, which are said to be as follow:—

1. That within the last two years the number of Annamites kidnapped by the crews of piratical Lorchas from the South of China amounts to twenty thousand persons.

2. That within one of the missionary districts in the Tonquin territory six hundred women have disappeared during the past year.

3. That our informants came to Backhoi in company with a lorcha freighted with kidnapped Annamite girls, who were sold by the pirates at that and other Chinese ports. The captain of the pirate junk offered some of these girls to the master of the passenger junk, but they were refused.

4. That according to the missionaries labouring amongst the Annamites, hundreds of Annamite girls are sold to Chinese coolie-crimps, and exported by them to the United States and other parts of America. It is also alleged that many of the women carried by the Pacific Mail steamers are thus stolen from Annam. Others in great numbers are sent to various points on the China coast for the purpose of prostitution—Macao, and even Hong Kong, receiving some.

5. That the Chinese subordinate officials are aware of the practice, but are heavily bribed to connive at it.

Such are the statements, put in the simplest possible form. They demand an immediate investigation. If, as asserted, vessels leaving Hong Kong carry women thus kidnapped, a British port is being used as a depot for a traffic as nefarious as anything which has yet been dragged to light regarding the "emigration system." If, again, the Pacific mail steamers or any other vessels carry passengers thus kidnapped and sold, they are in effect carrying slave cargoes, and the U.S. Consular authorities should make immediate inquiry. No half measures will be sufficient; a practice so disgraceful (in which, of course, hitherto our own officials and the Mail Company can only have been unwitting agents) must be stamped out. Of course we have no right under treaty to interfere with any kidnapping operations conducted by Chinese upon Annamites. But we are much mistaken in the spirit of our executive—and we may fairly add of the American officials and agents also—if they do not hold the claims of humanity and the actual evil inflicted upon our reputation in Chinese eyes as somewhat superior to the rendering of an inoperative document. We shall see.

Considerable discussion has been caused (says the *Overland Trade Report*) by the intelligence, which has come from an authentic source, that the Chinese Government have applied for permission to appoint a Consul to Hong Kong. The manner in which this proposal was made leads to the impression that the object of the measure is to collect taxes from the natives on the trade of the port, as a proposition was to that effect, which was of course refused, was made to the British Minister before the one for the appointment of a Consul. Of course, if the Chinese Consul merely confines himself to taking steps to secure that the proper duties be paid at the places of import on goods exported in junks from Hong Kong, there can be no objection taken, but it is feared he may make use of his position to attempt to levy taxes in the place, or to do what would be equivalent to it, which would be contrary no less to sound principle than to the interests of the colony.

## BORNEO.

(FROM A CORRESPONDENT.)

LABUAN, May 13.

There is only one matter of public interest here, and which, I think, worth your notice, which is the solution of the labour question by the Governor. The great difficulty heretofore has been the want of labour, the population on the island being too small to furnish the number of hands required to work the coal mines, and, of course, workmen had to be brought here at considerable expense and trouble. But, besides the number of regular hands required for working the mines, you can understand how that, occasionally, we have to employ twenty, thirty, or even fifty men for a few days to get a piece of work out of hand; but, as there was no population to fall back upon, a large number of idle hands had to be kept about the place in case of emergency. This difficulty has happily been got over by the Governor, who now allows the manager of the mines to have the use of any number of convicts he may require, and thus places him in a position to work the mines with fewer hands than he could otherwise do, and it is owing to this, I believe, more than to anything else that the mines are now being worked with good prospects of success.

## STRAITS SETTLEMENTS.

### SINGAPORE.

(FROM A CORRESPONDENT.)

SINGAPORE, June 3.

The steamer *West Indian* has left for Hong Kong, consigned to Messrs. Jardine, Matheson, and Co, and is understood to be chartered to load at Foochow for London. According to the published accounts from China there are three of Holt's line of steamers engaged to load at Foochow and Hankow, and also the *Erl King*, which has been for some time running on the coast.

It is rumoured here that the *Glengyle*, now running between Calcutta and Hong Kong, has been sold by her owners, Messrs. Jardine, Matheson, and Co., to the Union Steam Company for the Yangtze traffic. This company very much requires such a steamer.

The new boat for Messrs. Jardine's Calcutta line, the *Glenartney*, is expected here from home, under the command of Captain Bolton, in July. It is stated that two boats are now building on the Clyde, and will shortly follow the *Glenartney* for the China coast trade. Captain Hamlin, who lately sold the steamer *Negapatam* in China to Mr. E. A. Reynolds for 25,000 dols., is a passenger by the present mail for England.

The refusal by Messrs. Maclaine, Fraser, and Co., as agents for the insurance offices, to pay the claims of a China firm accruing at the late fire—which was communicated a few mails since—has been arranged and the claims paid under legal advice, owing to the unreliable nature of Chinese evidence to prove arson. The effort of Mr. Duulop, the partner of Messrs. Maclaine, Fraser, and Co., is nevertheless very praiseworthy, as the tendency of natives in these places to impose on insurance offices is very strong.

### GOVERNOR ORD'S VISIT TO JAVA.

The *Penang Gazette* says: "The Governor will proceed to Batavia early in June to meet the Governor-General of Netherlands India. We understand that the Foreign-office, for which Sir Harry Ord ably and satisfactorily conducted a negotiation with the Dutch Government some years ago at the Hague, has entrusted him with the duty of discussing with the Government of Netherlands India the objections that have been taken to the acquisitions of territory which that Government has long been making on the east coast of Sumatra. Sir H. Ord's efforts will doubtless be principally directed to obtaining an effective guarantee that our trade with the Pepper ports will not, at any future time, suffer from heavy duties or monopolies. If he succeeds in this, there can be no question that it will be for our interest, as it clearly will be for that of the Malay and Batta natives, that all the countries on the east coast should exchange their present semi-piratical slave-dealing and sharp trading rulers for a strong European Government."

The *Straits Observer* has the following on the same subject:—"His Excellency has taken advantage of the opportunity to have the *Peiho* painted, gilded, and decorated, at an expense, we are told, of not less than 3,000 dols., after which she will be docked, and have her bottom cleaned. From the fact that his Excellency goes in the *Peiho*, and not in the *Rinaldo*, we are seriously inclined to doubt the accuracy of the *Gazette's* information. But should it prove true, the public will hardly rest content at being burdened with the expense of the

Digitized by Google

trip. The same remark will apply equally well in the event of it being merely a holiday excursion. As the *Rinaldo*, we believe was willing to convey his Excellency, had he been inclined to avail himself of her, the despatch of the *Peiho*, we think, demands some official explanation. It is generally understood here that the *Rinaldo*, was asked, not to convey his Excellency, but to convey the *Peiho*, and that because he could not go in right regal style, with a man-of-war to escort him, he determined to go in his own yacht,—that is, the Colonial steamer perverted to that use. We shall have more to say on the subject of this Java excursion by-and-bye, and are only awaiting the end of the laughable farce that is being played to acquaint the public with the full extent of the folly."

## CEYLON.

(FROM OUR SPECIAL CORRESPONDENT.)

GALLE, June 15.

The S.W. monsoon, which is late this year, is now on us. The *Emeu*, which arrived on the 12th June, was nine days from Singapore, including the stoppage at Penang of six hours, and experienced a strong S. and S.W. wind. The *Deccan*, from Suez, with the London mail of 21st May, arrived on the 13th, and brought the Governor, Sir Hercules Robinson, and family, and also the new commander of the forces, General Renny, to relieve General Hodgson, who goes home by this mail. Sir Hercules stops in Galle for a day or two, and then proceeds to Colombo.

The *Surat* arrived yesterday from Calcutta for Suez, and leaves to-day with about one hundred passengers, including those from Australia, China, Java, Singapore, &c. The *Geelong*, from Australian ports, also arrived to-day, and the *Behar* from Bombay. We have five P. and O. Company's steamers in this miserable harbour. To coal and transship cargo for these vessels is almost a miracle, and reflects the highest credit on the P. and O. agent, Captain Bayley. Telegrams from Calcutta announce a cyclone, but no particular damage to houses or shipping.

It is believed that Sir Hercules Robinson is now fully prepared to go into the question of a breakwater, and decide on the best plan for making the harbour secure. The erection of wharves should certainly be included in the scheme. There will be a special tax levied on shipping and goods to meet the interest on outlay. Something must be done, for the present state of things is intolerable. The Home Government have at length decided to build the lighthouse on the Great Basses rock, the neglect of which you have so often called attention to.

The Oriental Hotel here (Galle) is a great boon to the large gatherings of passengers which meet at Galle, but, like most things of the present day which are in any way successful, it is not large enough. The two upper stories are devoted to married folks, and the lower one to bachelors. The dining saloon is a fine room, accommodating one hundred. The manager, Mr. Barker, conducts the establishment with great ability considering the masses suddenly thrown on his resources. In the old times the hotels were completely taken charge of by the passengers, but in Mr. Barker they find a competent and obliging man.

# Commercial Report.

## STRAITS, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—There was a decidedly better tone in the market, though the business done had not been large. We are able to report a light advance in our staples of cotton goods, and holders were firm. Woollens and Fancy Goods had not shared in the improvement; Metals were much as last quoted. The current quotations were as follow:—Cotton Yarn: Nos. 16-24, per picul, $47.50 to 48.25; 28-32, $48.50 to 49.50; 38-42, $49.50 to 51. Cotton Piece Goods: Grey Shirtings, 7 lbs., per piece, $2.45 to 2.50; 8¼ to 8½ lbs., $2.77½ to 2.82½; White Shirtings, $2.80 to 3.60; T-Cloths, $1.80 to 2.25; Camlets, S, per piece, $13.50 to 14.50; SS, $12 to 13; Long Ells, $8 to 9.50; Blankets, per lb., $0.40 to 0.45. Metals, &c.: Iron, nail rod, per picul, $3.30 to 3.60; hoop, $3.10 to 3.40; bars, $3.30 to 3.60; pig, $1.05 to 1.15; wire, $6.50 to 7; Lead, $7.50 to 7; tin, $17 to 18; tin plates, $6.75 to 7.

TIENTSIN.—The market was quiet, there being only a demand for local consumption.

SHANGHAI.—Cottons: The principal business during the fortnight had been in Drills and T-Cloths, of which a fair quantity had been sold both of Goods to arrive and on the spot. Prices of these articles show no important alteration, but other descriptions were rather lower, the market generally being very quiet. Woollens: At the ruling low prices, Long Ells had attracted some attention for speculation. In Spanish Stripes and Medium Cloth no improvement had taken place. Crape Lastings and Lustres were in request, as also Plain and Figured Orleans, of which moderate sales had been made. Metals: Nail Rod Iron had been rather more inquired after, and holders having given way slightly on their demands, sales to the extent of 5,000 to 6,000 bdls. had been made at Tls. 2.8.8. to 2.4.5 per picul. An invoice of Round Iron had also been placed at Tls. 2.5.2 per picul, being an advance of 2 candareens per picul. Lead: 250 piculs had been received from Hong Kong and about 3,200 piculs per *Lennox Castle*. Buyers were extremely cautious. Sales of L B had been made at Tls. 6.2.0 to 6.2.5 and 6.30; there were sellers at Tls. 6.1.5 Sales to arrive by March ships had been made at Tls. 5.75. Coal: The prices of most descriptions of Coal had been reduced to low figures, owing to abundant supplies still on the market. One cargo of Australian was sold at Tls. 6.5.0 per ton, and a cargo of Cardiff at Tls. 8.2.5 from ship. Transactions in other kinds had been chiefly in small parcels. The arrivals had been: From Great Britain, tons 1,308; Australia, tons 2,147; Japan, tons 128; Formosa, tons 320;—in all, tons 3,903, of which tons 1,655 were to order. The following were the current quotations:—Grey Shirtings, 7lbs., per piece, Tls. 2.0.0 to 2.0.4; 8.4 to 8.6 lbs., Tls. 2.2.2 to 2.2.6; 9 to 9.12 lbs., Tls. 2.7.0 to 3.1.5. White Shirtings, Tls. 2.2 0 to 3.2.5. T-Cloths, 6 lbs., Tls. 1.4.5 to 1.8.0; 7 lbs., Tls. 1.6.5 to 2.0.0; 8 to 8.4 lbs., Tls. 2.1.5 to 2.5.0. American Drills, 40 yards, Tls. 4.2.0 to 4.3.5. American Jeans, 30 yards, Tls. 3.6.5 to 3.7.0. American Sheetings, 40 yards, Tls. 3.8.0 to 3.9.5. English Drills, 40 yards, Tls. 3.9.5 to 4.1.0. Dutch Drills, 40 yards, Tls. 3.8.0 to 3.9.5. Camlets, English, SS Tls. 12 to 12.6. Spanish Stripes, per yard, Tls. 0.5.5. to 0.8.0. Medium Broad and Habit Cloths, Tls. 0.9.0 to 1.6.0. Long Ells, per piece, Tls. 6.4.5 to 6.5.5.

HANKOW.—The market had been inactive, owing to discouraging advices from the interior and scarcity of money, which was to a considerable extent locked up in the Tea districts. Gray Shirtings had been sold to a limited extent. Closing quotations were:—Tls. 2.0.2. to 2.0.4. for 7 lbs.; Tls. 2.2.1 to 2.2.5. for 8¼ lbs.; and Tls. 3.0.8. to 3.2.2. for 9½ lbs. White Shirtings had declined, quotations being 56 to 60 reed, Tls. 2.2.0. to 2.3.5.; 64 to 66 reed, Tls. 2.4.5. to 2.6.0. T-Cloths were unsaleable; 7 lbs. were quoted at Tls. 1.7.0. to 1.9.5. Drills.—Fair inquiry for good English, at Tls. 3.9.5. to 4.0.0. Fancy Goods had been dull. Woollens and Worsteds: Camlets—No change in prices, demand less active. Lastings were not in request. Scarlet Long Ells slightly lower, but assorted colours firm. Spanish Stripes showed but little improvement. Medium and Broad Cloths were not inquired for; Figured Orleans were not wanted, and prices were weak.

FOOCHOW.—The following transactions had constituted the business of the fortnight:—1,000 pieces 8¼ lbs. Gray Shirtings, at $3.05 per piece; 700 pieces 7 lbs. T-Cloths, at $2.50 per piece; and 16 piculs White Wax, at $200 to 202 per picul.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated 26th May:—Cotton Yarn: Transactions have been smaller than for some time past, and a quieter feeling has prevailed throughout the interval. Dealers who bought fairly, previous to the despatch of last mail, of Nos. 16 to 24, have been unable to quit their purchases, and with considerable unsold stock upon their hands, and the uneasiness occasioned them by the increase in quantities upon offer by late arrivals, they have stopped buying, and a concession will have to be made by importers before business is resumed. The market for these Nos. is weak, and the quotation is lower. Nos. 28 to 32 maintain their value, but no sales have been made and no demand exists. Nos. 38 to 42 have been in fair request, and holders have succeeded in putting the rates rather higher; at the close the inquiry continues good at the advance. Piece Goods: A fair amount of business was done during the first of the fortnight at previous rates, but the arrival lately of several home ships with considerable quantities of manufactured goods, has had a depressing effect, and a decline in quotations is the consequence. Grey Shirtings of all weights are down 2½ to 5 cents. in value; 7lb. meet with sale at the decline, as the demand has existed most for this weight, and stocks are light. 8.4lb. are altogether neglected, and Chinese dealers, in fear of an overplus of stocks, are willing to sell upon the market at the decline. T-Cloths have been acted upon by a like pressure, and good qualities are 5 cents per piece lower. 6lb. of common make have undergone no change, and a fair inquiry continues at last rates. 7lb. at the decline show a slight margin to dealers, and some demand is still noticeable. White Shirtings are lower; the request for 54 to 60 reed continues, but 64 to 66 and 68 to 72 are not wanted. Favourite chops of good fine move off fairly, and we note sales of 2,490 pieces at $4.80 to 6.90 per piece. English, American, and Dutch Drills are all inquired for, and advices from Northern markets tend to increase the firmness of rates at this. Sales of Dutch amount to 10,860 pieces at $5.00 "to arrive." American are in most enquiry, but there are no stocks on offer. Sheetings are without attention. Spotted Shirtings show no change. Turkey Reds, though fairly dealt in, are cheaper. Woollens: A better feeling is gradually showing itself in the market, though no marked change has yet occurred. No sales of Long Ells have been made and prices are as last advised; Assorted can find buyers, but Scarlets are out of favour. Small sales of Spanish Stripes are reported, but without change in rates. Blankets have advanced and a further rise is expected; we note sales of 1,240 pairs at $5.90 "to arrive." Lastings are dearer, and the market is very firm. Camlets show a better feeling. Metals: Operations have been more extended, and Nail Rod and Hoop Iron have advanced 5 cents; Bar is lower, while Wire is unchanged. Steel has further declined. Lead has been in more demand and rates are rather better. Tin is very firm at $32.50 to 33.50 for Malacca. Quicksilver is dearer. Coal: Arrivals have been 1,300 tons Cardiff and 596 tons English; sales comprise 750 tons Welsh at $10.75, 311 tons English at $10.00, and 350 tons Australian at $6.50 per ton. Ginseng: The enquiry has been light, though sales have been larger than for the preceding fortnight; settlements amount to 23 casks good and superior Crude Root at $148 to 161 per picul. Clarified remains scarce and dear, and no sales have been effected. Importers are very firm. The following were the current quotations:—Cotton Yarn, Nos. 16 to 24, per bale, $125 to 135; 28 to 32, $140 to 147.50; 38 to 42, $145 to 150; Grey Shirtings, 7 lbs., per piece, $2.55 to 2.65; 8.4 lbs., $2.77 to 2.85; 9.12 to 10 lbs., $3.90 to 4.10; White Shirtings, $2.50 to 5.10; T-Cloths, $2 to 2.95; Spotted Shirtings, White, $2.75; Dyed, $3.40 to 8.50; Turkey Red Shirtings, 8 lbs., per piece, $2.85; American Drills, 40 yards, 15 lbs., per piece, $5.25 to 5.50; Spanish Stripes, scarlet, per yard, $0.77 to 0.81½; assorted, $0.75 to 0.77; Medium, Ladies', and Habit Cloths, $1.15 to 2; Long Ells, per piece, $7.75 to 8.50; Camlets, SS Scarlet, $17.50 to 18; SS Assorted, $16 to 16.75; Blankets, per lb., $0.45 to 0.60; Iron Nail Rod, per picul, $2.90 to 3.10; Round, Square, and Flat Bar, $2.50 to 2.80; Hoop, $2.95 to 3; Wire, $6.50 to 7.40; Lead, $7.20 to 7.45; Tin, $32.50 to 33; Tin Plates, per box, $6.25 to 6.40; Steel, per tub, $4.25 to 4.50; Quicksilver, per picul, $64 to 64.50; Window Glass, per box, $3.60 to 3.70; Coals, English, per ton, $9.50 to 10; Welsh, $10.75.

SINGAPORE.—Messrs. Boustead and Co., in their circular dated June 8, report as follows:—Since the date of our last advices there has been a continued fair demand for many descriptions of goods, and considerable

Digitized by Google

sales have been made, but at rather lower rates, owing to the large supplies that have come to hand, and the desire of holders to place arrivals at present prices. 39-inch Grey Shirtings: 8¼ lbs. have been in limited inquiry, and sales have been made at $2.85 to 2.80, at which latter price they were last sold. 7 lbs. continue in demand, and large sales have been made at $2.42½ and 2.45; 6 lbs. have also been in request, and holders have met the demand at $2.10 to 2.12½. 45-inch are in less inquiry; limited sales have been made of 7 lbs. at $2.45, and 9 lbs. at $3.10, but these rates cannot now be obtained. 36-inch White Shirtings: The demand for fine descriptions has greatly subsided during the past fortnight, and rates are weaker. Common qualities continue in good inquiry, and several sales are reported. 64 reed are in moderate request, and a good many sales have been made at $3.10 to 3.20. 45-inch are rather more inquired for, and sales have been made at $3.65 to 3.70. Gray Yarn: Low numbers are much wanted, and stocks have been cleared; sales have been made of medium quality at $118, and of a very superior description, "to arrive," at $125; 30s are in small demand, and a few bales have been placed at $119.21. 40s continue in very limited request at $128 to $129 per bale. 36-inch White Spots: These goods have been sold to some extent at $2.82½ to 2.85. 45 White Cambrics: Low qualities are wanted, and several sales of 24s have been made at $19 per corge. Fine descriptions are in large stock and very limited demand; a few sales of 15s and 16s are reported at $33 to 34½. 33 Imitation Irish Linens: These goods continue to be inquired for, but at lower rates; a sale has been made on the spot at $2.20. 30-inch White Maddapollams are wanted, and are worth last quotations. 32-inch Grey T. Cloths: Low weights have been inquired for, and several sales of 4¼ lbs. are reported at $1.47½ to 1.50. 5 lbs. are in less demand and have decreased in value, sales having been made at as low as $1.57½. 6 lbs. are much wanted, and several newly arrived lots have been disposed of at $1.80 to 1.85. 7 lbs. are in large stock and very dull of sale; limited transactions have taken place at $2.10 to 2.20, according to quality. 32-inch Grey Maddapollams are inquired for; sales have been made at 2¾ lbs. at $22, and 3 lbs. at $21½ to 22½. 29-inch Grey Drills: 40 yards English have been placed at $98½ for 14 lbs. Dutch 9½ lbs. have been sold to a small extent at $66 to 66½; an arrival of 40 yards has not yet been placed. 32-inch Turkey Red Cambrics: All descriptions have been in fair inquiry, but holders are very firm, and the transactions have been few, at about last rates. Coloured Yarn: Imperial Red is worth last rates. Green has been sold at $86. Turkey Red continues in fair demand; 10 lbs. are worth $435, and 12 lbs. have been sold at $139 to 140. Woollens remain without change. Camlets are saleable to a limited extent, at last quotations. Scarlet Long Ells continue very dull of sale. Scarlet Bombazetts have been sold at $3.12½ and $3.27½. All Wool Lastings: Assorted are wanted, and worth 42½ to 45 cents per yard; Black are in very limited demand at the present moment. Brocade Lustres are unaltered. Metals: Copper Sheathing is in some request at $27 to 27½ per picul. Yellow Metal has been sold at $23 to 23½. Govan Iron is in demand, and has been placed at $2.65 for Bar, and $2.60 for Nail Rod. Pig Lead is in fair request, a sale of small slabs at $6⅜ per picul. Brass Wire of coarse numbers has been sold at $26¾, and Nos. 10 to 20 at $25½ to 25¾ per picul. Miscellaneous: Gunpowder continues quiet, at $8½ to 9. Paints and Linseed Oil are in heavy stock, and only saleable at lower quotations. A sale of Coal Tar at $3½. Swedish Tar is wanted at $6¼; none here. Pitch almost unsaleable. Canvas and Cordage continue in good demand. Flints have been sold at 45 to 57½ cents per picul. Coals are again lower, sales having been made of Cardiff at $7 to 6¾, West Hartley at £6¼, and Brymbo at $5½ per ton.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—The only new feature to note in the Tea Market has been the arrival of a few hand musters of the new season's Teas, and the crop bids fair to be fully an average one. The business of the fortnight had resulted in the settlement of some 250 piculs only of the old stock, and the season may now be said to be virtually closed, the export to date being two and a-half million pounds over that at the same time last year. Prices were unchanged, and must be considered quite nominal. The Ariel took 236,395 lbs. for London. The export for the current season had been —to New York, 8,637,605 lbs.; to San Francisco, 1,327,031 lbs.; to England, 489,387 lbs.; to China, 1,800 lbs.; total, 10,455,823 lbs.

SHANGHAI.—Black: No transactions had been reported, and the stock remaining was insignificant, say 192 chests. A few musters of the new season's Tea had been received from Hankow, but no decided opinion of the crop could be formed from them. Green: There had been no business transacted during the fortnight. No authentic information had been received from the Green Tea districts with regard to the new crop, but if the reports of natives may be relied on as correct, the new Pingsueys will cost, laid down in Shanghai, from 10 to 15 per cent. less than last season's. Stock, 4,475 half-chests.

HANKOW.—Reports had been received from all the producing districts, giving quotations of the cost of the new leaf, and prices ruling in the country seem, on the whole, to be reasonable. Chest musters were expected to arrive on the 20th May. Quotations were nominal.

KIUKIANG.—Black Teas: But little definite information had been received from the Tea districts concerning the new crop. In the Ningchow district it appears that small purchases of the finest leaf had been made at the equivalent of Tls. 26 to 27 per picul in Kiukiang, but buying had not commenced generally. In Kien Teh purchases had been made, laying down the teas at Tls. 23 to 24 here. From Hohow and Loong Kong no reliable advices had been received. Quotations were nominal.

FOOCHOW.—There had not been any transactions in old tea, the few parcels remaining on offer being common, and of undesirable quality. On the 18th May about 800 half-chests new season's Congou, and 200 half-chests Oolong came to hand, but since then, owing to very heavy freshets in the river, further arrivals had been prevented. A few musters of Packling Congous had been placed on the market, but these appeared to be rather inferior in quality. There was no reliable information as regards prices paid in the country, but the teamen reported that generally higher rates had ruled.

AMOY.—Some small musters of new crop had been received, but not of sufficient importance to deserve attention. The leaf was reported by teamen to be good, and prices under those of last year had been paid in the interior.

CANTON.—Nothing whatever had been done by foreign buyers, and, judging from the indifference thus far shown by them in hastening purchases, it was generally believed that the opening would be unusually late. The entire first crop of district Congou, comprising some 10,000 to 11,000 boxes, is said to have been received and packed ready for shipment. The preparation of scented teas had been much retarded by a short supply of the scenting flowers, and considerable quantities of leaf had been lying in native tea houses awaiting receipt of this article, but this difficulty will, it is thought, be overcome by the abundant supply of the flower subsequently brought forward owing to fine weather. Quantities of Gunpowder, to the extent of about 20,000 boxes had been received, but could not be packed until musters were shown, owing to the different shades of colouring upon the leaf. The picking of the second crop is said to have commenced in some of the districts, and buying had been conducted at reduced figures.

### SILK.

YOKOHAMA.—Business in Silk had again been trifling, not exceeding 150 bales. The same condition of things prevailed—viz., meagre supplies, inferior stocks, and little disposition on the part of holders to make concessions. Of the new crop it is too early to speak, but the weather had been very favourable for vegetation.

SHANGHAI.—Messrs. C. J. Skeggs and Co. report as follows:—The French mail which left here on the 14th May, and the American mail of the 19th May, took 81 and 11 bales respectively, which might be considered as closing the season, no settlements of importance being reported for this steamer. It is possible, however, that a few bales may be shipped on native account at the last moment. News from the country continues to be most satisfactory, and although natives complain of the high cost of mulberry leaves, we take that to be a good sign as to the healthy condition of the worms, and that they will yield a large produce accordingly. Of course misfortune may still overtake the first crop, but the result will be fairly known within the next week. It is expected that the price of Taysaam Silks will rule unusually high at the beginning of the season, as native manufacturers are quite bare of stock, and will be able to outbid foreigners until they have supplied themselves. In other descriptions, the market will be entirely in the hands of Foreigners, but past experience leaves little hope that the trade will advantage itself by the exercise of patience in opening the campaign.

### STRAITS PRODUCE.

SINGAPORE.—Messrs. Boustead and Co.'s Circular contains the following report:—Malacca Tin: There has been less general inquiry for this article since our last, but about 1,400 picals have been taken at $29¾ to $29½. Gambier: Owing to a considerable decline in rates of freight there has been a demand for this article at higher prices; purchases to a large extent have been made at $3.02½ to $3.05, but dealers now demand $3,07½. Black Pepper: A few contracts for six weeks' delivery have been made since our last at $6.80, and for 2,500 piculs, Sumatra, on the market $6.35 is asked. White Pepper has been rather weaker since arrival of last mail with lower quotations from England; purchases have been made at $10.92½ to $10.65. Pearl Sago: Large contracts have been made since our last, at $13.0, and 1,300 piculs have just been contracted for at $3.15. Sago Flour: Small purchases of Singapore and Sarawak at $2.45; a recent arrival of about 9,000 piculs, Borneo, brought $2.50 to $2.53½. Tapioca is in more inquiry; purchases of Flake and Pearl at $4.75 for the former, and $4.60 for the latter. Buffalo Hides are in less inquiry, late purchases at $10¾ to 10⅞. Gutta Percha: A purchase of 160 piculs Banjermassen, Nos. 1 to 3, mixed, at $59. Arrivals have been trifling, and for No. 1 quality $80 is demanded. Indiarubber: Small arrivals have brought $89. Buffalo Horns: Some small arrivals have been taken at $9½. Gum Damar continues in demand; a small parcel here for which $18 is asked. Rattans of all kinds are extremely scarce, and prices have advanced considerably; purchases of Banjermassen at $6. A sale of 3,000 piculs Cotí at $4. Camphor: Market cleared at 20½ for English market; no late arrivals. Cassia Lignea: A sale of 300 boxes at $22½. Cubebs: None here and wanted, nominally $9. Coffee: No Bontyne or other good quality on the market; 1,000 piculs picked Bally on the market for which $10½ is asked. Nutmegs: An arrival of 150 piculs has been taken at $49. Mace: An arrival of 13 piculs brought $55.

## ARRIVALS.

At SHANGHAI.—From London, May 15. Lennox Castle. Reported by telegram: From London, Challenge, Fusiyama, Weymouth, Dilkhoosh; from Liverpool, Milbrek; from Cardiff, Lieutenant, Star of China.

At HONG KONG and CANTON.—From London, May 16, Drouning Louise; 17, Albert Victor; 20, Mary Nicholson; 24, Douglas Castle, Kaisow; from Liverpool, 18, Nestor (str.); 15, Windhover; from Newcastle, 13, Pons Œlii; from Cardiff, 20, Carin; from Callao, 12, Fray Bentos.

At SINGAPORE.—From London, May 24, Hanover; 31, Istapa; from Liverpool, 29, Twilight; from Cardiff, 30, Verina; 31, Mayotte, and Nossi Be, Aggie M.; from Newcastle, 30, Petrina; 31, Peri, Hertha. Reported by telegram: from London, Jungfrau; from Clyde, Blenheim.

At YOKOHAMA.—From London, Hopewell.

## DEPARTURES.

From HONG KONG and CANTON.—For London, May 28, Chillingham; for Portland, 31, Onward; for New York, 23, A. E. Vidal.

From MANILA.—For London, May 14, Southern Cross; for Falmouth, 12, China; for Cork, 7, Cavalier; for Cadiz, 9, Hong Kong; for Boston, 12, Hazard; for New York, 12, Rattler.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, £4 per ton of 50 cubic feet; to New York, per sailing vessel, £2 15s. to £3, nominal; per str., $45 per ton of 40 feet.

At NAGASAKI.—To London, £3 10s. per ton; to New York, £3 10s.

At SHANGHAI.—The vessels on the berth for London are asking £5 for new season's teas, but no engagements are as yet reported. The rates demanded for the steamers which are to load from Hankow, are as follows, £8 per ton of 40 cubic feet if the voyage is performed in a less time than 85 days, £7 10s. if over 85 and under 90 days, and £6 10s. if over 90 days.

At SHANGHAI (reported by telegram), June 23.—To London, rates £3, with downward tendency.

At FOOCHOW.—Rate not fixed.

At HONG KONG and CANTON.—To London, nominal; to New York, £3 5s. per ton.

At MANILA.—To London, the Voladora has filled up with fine freight at £4 10s. per ton of 50 feet.

At SINGAPORE.—In consequence of abundant tonnage a decline of 10s. per ton has taken place on rates for home, which may now be quoted at £1 15s. to £2 per ton.

## SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—July 6, at Clyde, from Java, Modesty; 7, at Deal, from Colombo, Underley; 6, at Falmouth, from Rangoon, Jessie Jamieson; 7, from Bangkok, Eureka; 6, off Falmouth, from Saigon, for Bremen, Jessie; 7, at Liverpool, from Bassein, Berlin; — at Queenstown, from Rangoon, Bonniton; June 24, at New York, from Singapore, St. Paul; 25, at Boston, from Batavia, Otto; July 7, at Liverpool, from Java, Achilles; 8, in the Downs, from Colombo, Jane Leach; at London, from Sarawak, Kœrnbiter; at Deal, from Colombo, George Kendall; 7, at Liverpool, from Rangoon, Genii; — at Havana, from Macao, Chine and Havane; 8, at London, from Colombo, Edith Maria; 9, at Deal, from Rangoon, Revenue; at Liverpool, from Manila, Loyolo; — at Deal, from Batavia, for Amsterdam, Amsterstroom; 7, from Rangoon, for Bremen, Hudson; 9, from Colombo, Helenslee; 8, at Falmouth, from Akyab, for Antwerp, T. B. Ord; 9, from Saigon, for Bremen, J. W. Schwensen; 8, at Queenstown, from Rangoon, Asina; 10, at London, from Colombo, Russell, Enterpe; 7, off Dungeness, from Java, for Amsterdam, Bulwark, Antelope, Areta, Sir George Pollock; 8, from Padang, for Amsterdam, Henriette; 9, at Plymouth; from Sourabaya, Cecilia; 9, at Liverpool, from Rangoon, Tythonus; off Dungeness, from Java, for Rotterdam, Jacob Roggeveen, Neerlands Vlag; 9, at Falmouth, from Rangoon, Tinnevelly; 7, at Texel, from Banjowangie, Telanak; June 28, at New York, from Padang, Royal Berkshire; July 10, at London, from Penang, Helensbank; at Liverpool, from Manila, Feliz.

DEPARTURES.—July 7, from Liverpool for Shanghai, City of Agra; for Singapore, Corra Linn; 6, from Shields for Batavia, Signe; from Rotterdam for Batavia, Voorlichter; from Flushing for Batavia, Stad Middelburg; 9, from London for Yokohama, Rockliff; for Canton, Pepita; 7, from Cardiff for Singapore, Drache; 8, from Sunderland for Galle, Shields; —, from Rotterdam for Batavia, Alblasserdam; 9, from Cardiff for Hong Kong, Ludwig; 9, from Glasgow for Ceylon, Glenaray.

LAID ON.—At London, for Hong Kong, Cleta; for Shanghai, Laurel; for Hong Kong and Foochow, Corypheus; for Hong Kong, Isles of the South; for Shanghai and Yokohama, Oberon (st.); at Liverpool, for Singapore, Huddersfield, Glenlyon.

SPOKEN.—Jeverland (N. Ger. barq.), Newcastle to Bangkok, June 7, 7 N., 23 W.; Ocean Gem (barq.), for Japan, June 8, 8 N., 24 W.; Hindostan, Bordeaux to Batavia, May 21, 3 S., 30 W.; John Peacock, Cardiff to Shanghai, June 20, 25 N., 22 W.; Loyola (Span. barq.), from Manila, 142 days out, June 13, 41 N., 23 W.; Nieuwe Waterweg (Dutch), Amsterdam to Batavia, May 15, 29 S., 30 W.; Doune Castle, Clyde to Singapore, May 26, 11 S., 39 W.; Sarah Scott, Bangkok to London, April 8, 11 S., 104 E.; Estrella, Manila to Liverpool, April 8, 11 S., 104 E.; Scottswood, Ceylon to Havre, May 5, 33 S., 34 E.; Essids Tegner, from Saigon, May 26, 33 S., 15 E.; Nabob, Padang to Boston, May 9, 35 S., 29 E.; Eunomia, Colombo to Havre, April 20, 27 S., 59 E.; Henry Grenfell, Foochow to London, April 28, 26 S., 68 E; Robert Drape, Rotterdam to Batavia, June 28, 47 N., 8 W.; N W R L (commercial code), (Dutch barque), Batavia to Amsterdam, June 10; (Henrietta (Dutch barque), Java to Amsterdam, June 24, 45 N., 24 W.; Antelope (ship), Java to Amsterdam, July 2, 49 N., 14 W.; Fanny Kershaw, Liverpool to Batavia, 22 S. (?), 35 W.; Glenclune, Cardiff to Japan, April 13, 36 S.

CASUALTIES.—Advices from Capetown, dated June 4, state that the Sydpolen, Silversparre, from Singapore to New York, which put into Table Bay May 27, for repair, was discharging. A telegram from Galle, dated 4th July, states as follows:—"The Miss Preston, Sunderland to Singapore, has been lost in the Straits of Sunda; crew saved."

MISCELLANEOUS.—At Ascension, May 24, Jacoba Cornelia (Dutch barque), from Batavia, and sailed 26 for Rotterdam; off Ascension, May 20, Waterloo (Dutch ship), from Sourabaya, for Amsterdam; 24, Cornelius Gips (Dutch barque), from Batavia, for Rotterdam; 30, Helenslee (English ship), from Colombo, for London; at St. Helena, June 7, Carrick Castle, Peters, from Singapore, and sailed for London; at Table Bay, May 27, Sydpolen, Silversparre, from Singapore, for New York, for repairs; at Simon's Bay, May 20, Hollinside, Bains, sailed for Ceylon; at Algoa Bay, May 21, Chryseis, Cowie, from Bangkok, and sailed 24 for Falmouth; 30, Queen of the West, King, from Colombo, put in for supplies.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

BRUCE—On the 4th June, at Plaines Wilhems, Mauritius, the wife of Charles Bruce, Esq., of a son.

BRAGA—On the 28th April, at Hiogo, the wife of Mr. F. Braga, of a daughter.

FINDLAY—On the 7th May, at Swatow, the wife of Captain Alexander Findlay, of the British barque *Heather Bell*, of a son.

SHEPPARD—On the 17th May, at Shanghai, the wife of Captain Sheppard, of the ship *Princess of Wales*, of a son.

### MARRIAGES.

FESEFELD—PUNCHARD.—On the 15th May, at St. John's Cathedral, Hong Kong, by the Rev. Canon Beach, Gustav Heinrich Friedrick Fesefeld, to Rosa Rebecca, youngest daughter of Captain W. Punchard, London.

HILL—DENNISON.—On the 23rd June, at Westbury-on-Trym, Bristol, by the Rev. A. Hill, vicar of St. George's, Leicester, brother of the bridegroom, assisted by the Rev. J. H. Bright, the Rev. Isaac Hill, widower, vicar of Helperthorpe-cum-Luttons-Ambo, Yorkshire, to Grace, youngest daughter of the late William Dennison, Esq., K.N.L., of Sindang Laut, Cheribon, Java.

LOPES—NORONHA.—On the 15th May, at the Roman Catholic Cathedral, Hong Kong, by the Rev. Domingo, Mr. Bazilio Lopes to Miss Esmenia Glafira Maria, third daughter of the late José Noronha.

### DEATHS.

LONEY—On the 22nd April, at Ilo Ilo, of gastric fever, Nicholas Loney, Esq., H.M. Vice-Consul.

MARQUES—On the 12th May, at Macao, Maria das Dores, daughter of Mr. and Mrs Lourenco Marques.

WEST—On the 11th May, at Shanghai, suddenly, on board the steamer *Kiu Sha* & Thomas West, chief engineer, aged 20.

*LONDON, MONDAY, JULY* 12.

## AN OVERLAND ROUTE THROUGH BRITISH NORTH AMERICA.

WHEN the old sea route to India and China *via* the Cape of Good Hope was superseded as a means of conveying mails, passengers, treasure, and the more costly descriptions of merchandise, by the "Overland Route" of the P. and O. Company, it was doubtless thought that the problem of direct and facile intercourse with the Far East was solved for all time. The subsequent development of our monthly service into a fortnightly one, and the creation of a competing line by the French Government, merely multiplied the opportunities for using the same route; but of late years the rapid growth of both European and American trade with India and China has stimulated various important projects for still further accelerating the rapidity of transit. The most important of these, as far as European nations are concerned, are the Suez Canal, now to all appearance nearly approaching completion, and the endeavour to reach the Western and Central Provinces of China, by means of a trade-route or railway from Rangoon to the Western frontier of China, both of which undertakings will be materially aided by one or more direct railway routes through Europe (either over or through the Alps) to Brindisi, and ultimately, no doubt, by a tunnel beneath the Channel, or a bridge across it. The revulsion of public opinion with regard to schemes of this sort, that were but a short time since scoffed at as wild and visionary in the extreme, is something extraordinary. The project of M. DE LESSEPS was but very lately openly derided by the press, not only of this country, but of almost every other, except France; some of the sceptics regarding it as purely Quixotic and impossible—a mere chimera, originating in the brains of a few enthusiasts—while others denounced it as a transparent subterfuge whereby French supremacy was to be slowly, but surely, established in Egypt at the expense of our own hardly-earned ascendency there. Now however, it seems to be admitted on all hands that the complete success of this great work is only a question of time and money, the engineering difficulties that remain being trivial in comparison with those already surmounted. Certainly, the opening of the Canal has already been once put off, after a period had been definitely fixed, and there are some awkward rumours of a further postponement until February next, owing to the difficulty of filling the Bitter Lakes, a process that is said to be proceeding far less expeditiously than was at first expected; but, as we have said, this will in all probability be only a matter of mere time and outlay. Another marked instance of the increased favour with which this class of enterprise is at present regarded may be found in the plan for tunnelling under the Channel, a scheme that has now the decided sanction of the French EMPEROR, and to which the consideration even of the English Government—never too ready to promote anything having a venturesome appearance—has been promised. Again, the promoter of the direct route from Rangoon to Kiang-hung, after being for years stigmatised as an impracticable enthusiast, and being met with the most determined resistance by the Indian authorities, has succeeded in convincing the public, if not the Government, of the merits of his proposal, and has so far obtained the support of the most influential Chambers of Commerce in the kingdom that energetic memorials are being rapidly sent in supporting his claims. The great undertakings for the extension of telegraphic communication that have lately sprung into existence cannot fail to exercise a strong influence in the same direction, and we may hope that before long it will cease to be a standing reproach to a great commercial nation like Great Britain that all efforts to promote the increase of trade and intercourse with foreign countries and distant possessions are fated to be smothered with official circumlocution or strangled with red tape.

On the other side of the globe, the growth of trade between the United States, Japan, and China, has brought forth, firstly, a splendid line of steamers across the Pacific, and secondly, a chain of railway communications between the two oceans, to which the whole civilised world offers no parallel; and already there is some talk of a "Pacific Telegraph," a work of such magnitude as would throw the existing Atlantic cables into the shade altogether. Of course, it is at present "only talk," but then all great things must be talked of a good deal before they are accomplished. And now that our own vast possessions on the American continent are so rapidly rising in importance, the question has come to be asked:—Why should not they also be made available for an inter-oceanic railway? Last year we had occasion to review a pamphlet by Mr. ALFRED WADDINGTON, in which this proposition was boldly set forth. At that time it was in many quarters received with doubt, and in others thrown aside with contempt; but, on the whole, Mr. WADDINGTON tells us, in a supplementary pamphlet lately issued, his proposal has attracted even more attention than he himself expected, so we may conclude that it is at least worthy of some consideration. It is a peculiarity with our American cousins that, when once convinced of the utility of any proposed work, they set themselves down to do it with a resolute determination to overcome all obstacles, and they generally succeed. With ourselves it is different; we are apt, in the first place, to magnify the difficulties that do exist, and if they are not enough to frighten us, we forthwith invent a host of others. And Mr. WADDINGTON strenuously avers, and with a good show of reason, that many of the objections urged against his scheme, in Parliament and elsewhere, belong to the latter category. In the first place, it was asserted that no practicable route existed through the mountains of British Columbia; but it is now pretty clear that one has been found. Then the surrender of the North-Western Territory by the Hudson's Bay Company does away with another obstacle, formerly considered all but insurmountable. A general confederation of British North America will undoubtedly follow, and this must of course include British Columbia, with its great extent of Pacific coast. A large tract of difficult and uninhabited country will still separate the East from the Western portion of the North American Empire, and to consolidate it, and reap the full advantages of confederation, this must be crossed by a railroad; but, after all, this is quite as practicable as some portions of the Union Pacific. The Columbians indeed demand such a line, as a condition of their adhesion to the Confederacy; and, if it be not granted, there will be danger to the cohesion of our possessions. The line of the North Pacific Railway runs for some 1,500 miles very near to them, and a report of the Senate Committee on Pacific Railways, dated February 19th, 1869, affirms that it will drain the agricultural products of the rich Saskatchewan and Red River districts and the gold country on the Fraser and other rivers west of the mountains. "The opening by us first of a North Pacific Railroad seals the destiny of the British possessions west of the 91st meridian. They will become so Americanised in interests and feeling that they will be in effect severed from the new Dominion, and the question of their annexation will be but a question of time." This is perhaps an exaggeration, but it has a basis of truth, and to counteract such an injurious tendency a British line of railway is the only expedient. Such a line would undoubtedly be of incalculable value to the colonists themselves, and of great importance as an alternating means of communication between England and Japan and China, though we cannot endorse Mr. WADDINGTON'S assertion that it would make Canada the emporium of the trade of Europe with those countries. Its length would be less by nearly 500 miles than that of the railways now open across the United States; the distance from Montreal to the Pacific being 2,822 miles, against 3,305 between New York and San Francisco. As regards cost, the estimated outlay (thirty-two millions) looks rather alarming, but applications have been made to Parlia-

Digitized by Google

ment this session alone for authority to raise capital to more than half this extent for new railways in the United Kingdom. Perhaps we shall not be far wrong in placing this scheme in the same class as that to which the Suez Canal belongs; very startling at first sight, becoming more feasible the more closely it is looked into, and in the end resolving itself into a question only of time and money.

## THE DUKE OF SOMERSET ON SHANGHAI.

WE are glad to see that Mr. A. J. JOHNSTONE, the Secretary of the Municipal Council of Shanghai, has undertaken the vindication of that settlement against the most unfounded charge brought against it by the Duke of SOMERSET. With regard to the manifest untruth of the DUKE'S statement it is needless for us to offer any remarks; the strong expression of public opinion in Shanghai, through the local press, the Chamber of Commerce, and by the Judge of the Supreme Court, are sufficient. But a few words on the DUKE'S source of information, although late, may not be altogether out of season. "Naval and civil officers who are "acquainted with all the chief ports in Europe, America, and "Asia"—gentlemen, evidently of a very wide range of experience — have informed his GRACE that "there is no such sink of iniquity as Shanghai." Now, leaving Shanghai morals out of the question, as having been already sufficiently vindicated, we can confidently assert, from personal experience of almost as wide a range as even that of the Duke of SOMERSET'S friends, that there is no port in the world where naval officers have received more unbounded hospitality than the English residents in Shanghai have been accustomed to show them. In the better days of the China trade Shanghai was a very paradise for shore-going naval officers; many of the principal firms kept "open house" for them, and altogether "Shanghai hospitality" became proverbial. Now, some of the houses that in those good old times were the most renowned for their generous profusion have succumbed to a series of disastrous years, and the remaining ones, owing to a generally depressed state of trade, are probably compelled to be somewhat more economical in the management of their establishments; a change which has perhaps been considered in the light of a personal injury by some officers who thought the chief duty of the merchants was to provide them with unlimited tiffins, brandy and soda, and cheroots. But it has never been customary for residents in Shanghai to treat their naval visitors otherwise than kindly and courteously, so long as by their demeanour they showed themselves worthy of such treatment; and it is evident from the Duke of SOMERSET'S statement either that certain officers have ungratefully slandered the Shanghai residents by calling their settlement "a sink of iniquity," or, that the DUKE has slandered the officers by imputing to them an aspersion originating in his own imagination.

## BATAVIA TRAMWAY COMPANY.

The following is an abstract of a report recently issued by the directors of this undertaking, which was briefly noticed in our Java correspondence of a recent issue.

I. *Establishment of the Company.*

On the 24th of October, 1866, Messrs. Dummler and Co. applied for a concession of a tramway from the city of Batavia to its suburbs, running through the most populated parts, in all ten miles. This concession was granted by Government on the 6th December, 1867.

The capital of 450,000f., in shares of 1,000f., having been fully subscribed for, Messrs. Dummler and Co. transferred the concession to a Limited Liability Company, under the style of the Batavia Tramway Company. In the meeting of shareholders held on the 16th December, 1867, a plan of the lines, part of which were to consist of double rails, was submitted and approved of. The calculations were based upon "single rails," but no fears were entertained in regard to the means necessary for laying a second rail, as the company enjoyed great popularity.

The board of directors appointed in this meeting consisted of Mr. M. P. Pels, Mr. F. I. van Hewert, and Mr. L. McLean. By a decree of 30th March, 1868, Government gave its approbation of the intention of the company carrying *goods* by the tramway, at a minimum freight of five cents per picul per kilometre. Moreover, the company applied for the preference in establishing any additional lines in Batavia and its suburbs.

II. *Preliminary Works.*

The plans for stations and buildings were ready in February last, and orders for materials transmitted to Europe, under the supervision of Messrs. van Binsbergen and Bellingwont, engineers, Rotterdam.

III. *Grounds.*

A few pieces of ground were either granted by Government to the company on lease, or purchased. The value of one is estimated by Government at f.23,963.30, but the company have petitioned to fix a value of 12,000f., the former amount being too high. One tract of ground was purchased at f.2,500.

IV. *Buildings.*

In the city of Batavia three buildings were erected—the one a station, the other a working shop, with machineries and utensils required for fitting and repairs to the rolling stock; the third, a stable for 164 horses. At Mr. Cornelis and Tanatang stations were built, and at the former a stable for six horses. The cost of all the buildings amounts to f.150,000, and, besides, f.6,000 for an iron shed for carriages at Messrs. Cornelis.

V. *Rolling Stock.*

Rails, posts, and everything required for laying them and keeping the road in order were contracted for with Messrs. Ch. de Berque and Co., of London, for f.231,553, and only in December last a portion arrived, so that the laying of the rails could not be commenced before January, 1869. The machinery for the workshop was furnished by Messrs. Ch. de Berque and Co., with the exception of the steam-engine purchased from Messrs. P. van Kissengen and Dudole van Heel, of Amsterdam. The total cost of machinery was f.31,900. Much use has been made of the workshop for laying the rails, and several works have been undertaken also for outside parties, so that this branch promises to be an additional source of profit to the company.

The carriages have been ordered from Messrs. Ch. Bonnefond and Co., of Ivry (near Paris), at the cost of f.101,746, for eighteen first-class carriages, twenty-five second-class carriages, twenty axletrees and wheels, and several accessories.

Three American carriages were ordered from Messrs. John Stephenson and Co., of Boston, at a cost laid down here of f.13,178. In elegance of construction the French carriages surpass the American. The remainder of the rolling stock has at last arrived from Europe by the *Bastiaas Pot*, after a voyage of six months. Three hundred harnesses were contracted for and finished by a Samarang saddler at f.23.10 per harness. The store furniture, desks, &c., have been procured at a small cost, not exceeding 1,400f.

VI. *Horses.*

An attempt to procure the horses through a sale by public tender having failed, the company appointed a person to buy the required quantity in the interior, and up to the moment 179 were furnished, at an average price of f.138.20 each, whilst nine horses were bought here at 120f. each. These horses appear very healthy and strong.

It cannot be said that the illness among the horses has taken any serious proportions; in fact, only four horses died during the last four months since their arrival. Necessary precautions have been taken for *good* food.

In the commencement four horses were used for each carriage, in order not to subject them at once to unusual work. Afterwards, however, three only were found quite sufficient, and it is contemplated to stick to this number. Every care is taken not to overwork the horses; and the drivers are strictly surveyed with respect to the manner of treating them.

The fears hitherto entertained in regard to the inability of Java horses to perform the work have been contradicted by experience.

VII. *Labour on the Road.*

The rails were laid as soon as they arrived, but from sundry causes much delay has been occasioned. At present, however, there is no reason whatever to complain, coolies being plentiful. The company has had to contend against a difference of opinion between the Director of Public Works and the First Government Engineer about the manner of laying the second rail.

When the single rail was laid permission was asked from Government to open the line, but not granted, on the ground of unsafety for the public. Again, the company petitioned to permit it, as the public was anxious to avail of the tramway, and the company became deprived of the income it would otherwise have enjoyed. After several controversies on both parts, the Governor-General was pleased to grant the permission for opening the line from Batavia to the "Harmony," in a decree dated only two days after the company's petition, and it is but due to justice to say that the company is much indebted to his Excellency for the prompt and candid manner in which he has complied with their request.

VIII. *Staff.*

The company's staff consists of one administrator, one controller, three inspectors, seven inferior European employés, and thirty native coachmen or drivers, besides some native clerks. The expenses for salaries have been fixed with a due regard to economy, and this charge is a comparatively light one.

IX. *Financial Management.*

The original capital of the company of 450,000f. was paid in full on the 15th September, 1868. At a meeting on the 8th July, 1868, the board of directors were authorised to issue 350 new shares of 1,000f. each, to enlarge the capital, or to raise this amount by mortgage. Owing to want of confidence on the part of the public, the shares were not subscribed for, and the directors were compelled to raise the required funds by mortgaging the company's property to three banking establishments at Batavia, for an amount of 300,000f., under rather favourable conditions as regards interest, &c. Thus the company have made use of an amount of 762,300f.

Considering the immense increase of passengers by tramway in the United States, the directors have no hesitation in declaring their confidence in the future of this company, and the results thus far obtained bid fair to bring this tramway on the same level with those in America, the success of which has by far surpassed the general expectation.

It is the full consciousness of the success of the undertaking which has prevented the directors from placing the 350 new shares at anything under par. Indeed, the public has become so sanguine as to the financial results, that the directors now propose allotting the new shares to the old shareholders *pro rata* of 9 to 7, since they are convinced that nothing should be sold under par. An application has been made of late by several financiers for the 350 shares at 100 per cent., but the directors are of opinion that the old shareholders should

Digitized by Google

have the preference to take them at this figure, and feel assured that within a short time the quotation will be much above par.

At this moment the results attained by the company exceed by far what has been calculated in Messrs. Dummler and Co.'s prospectus, and taking them as a basis for the *whole line* when completed, it is quite safe to estimate the receipts at 900f. to 1,000f. daily, whereas the expenses and charges, everything included, will not be over 450f. to 500f. The table of passengers shows the important increase that has taken place during the short period of only twenty days.

During the first five days of the opening of the line 1,219 passengers were carried; in the second period, 1,842; in the third, 2,709; in the fourth of 3,174; showing an increase during the last five days upon the same period in the commencement, of upwards of 160 per cent.!

From the fact that the number of natives going by the tramway is daily increasing, and above all, that native *women* are making use of it, we may safely infer that the undertaking is a popular one, inasmuch as it finds ready support and favour at the hands of those who constitute the "million," upon which the company chiefly depends.

With a view to this enormous increase, and the difficulty of a complete control of the daily receipts, the directors have in contemplation to introduce the American system of a uniform tariff, instead of the one now in practice, of 12½ cents per etappe of one and a quarter English mile for first-class passengers, and 5 cents for second class, or 20 per cent. less for agreements for a fixed period in the form of tickets.

The line (single) from the "Harmonie" to Tanatang is now on the point of being completed, and the company is only waiting the Government sanction for opening it. All materials having arrived now, the line will be completed in about two months.

The above report has been adopted unanimously.

## THE ATLANTIC AND PACIFIC RAILROAD.

(To the Editor of *The Times*.)

SIR,—As several articles have appeared on the Atlantic and Pacific Railroad calculated to give erroneous impressions, I beg to call your attention to a few facts within my own experience. The following extract from the *Economist* will give the gist of the argument:—

"The whole distance is given as 3,305 miles, and the time of the continuous journey six days seventeen and a-half hours, which is probably a longer strain than the human constitution can stand."

Having made the journey myself across the continent from New York to this city, I can assure those who purpose making it, that there is no strain at all in it. The journey is a delightful one, even for ladies, and the weakest invalid would be strengthened by it. There is a constant succession of novelties. Starting from New York by the route I travelled (the Pennsylvania Central), the traveller is taken through Trenton and its vicinity, in New Jersey, made historic by the revolutionary war—through Philadelphia, the great commercial mart, and Harrisburg, the capital of Pennsylvania, over the beautiful Alleghany Mountains, and through the busy iron and coal regions of Pennsylvania. A glimpse is given of Pittsburg, the Manchester of America, in soot, smoke, dirt, and immense shops sacred to Vulcan. The railroad, now changed to the Pittsburg, Fort Wayne, and Chicago line, takes the stranger through one of the most delightful and beautiful countries, in the State of Ohio, ever beheld by human eyes. Winding rivers, verdure-carpeted hills covered with fat cattle, treeclad mountains, snug farmhouses, and air having a clearness and balminess never felt in England—all make a picture such as England's pastoral poets would delight to render in immortal verse. Chicago, 910 miles from New York, is reached after forty-three hours' travel. Chicago is the representative inland city of America in the marvellous rapidity of its growth, in its daring enterprise, in its varied railroad connections, and in all that goes to make up a live Yankee go-ahead city; a prairie land but lately now reclaimed to civilisation and cultivation. The distance from Chicago to the Missouri river and Omaha, the initial point of the Pacific Railroad, is 490 miles, and the cars of the Chicago and North-Western Railroad make the trip in twenty-two hours, conveying passengers through the great rich and deep pastures of Illinois and Iowa—the granaries of the world, as Americans delight to call them. These lands, when first their virgin freshness was broken by the plough, yielded fifty to sixty bushels of wheat to the acre.

The Omaha and the Union Pacific Railroad are reached after a passage across the muddy and tortuous Missouri river, and now the great plains are reached, called the great American Desert—the home of the wild buffalo, and of the wilder but rapidly disappearing Indian. There is a great sameness about the journey now, but the dryness and exhilarating qualities of the air, the beauty and variety of the cloud effects, compensate the traveller for this sameness. The air of the plains has a marvellous effect upon the animal spirits, which it raises to a high pitch. The stations along the line, with their sunken and loop-holed round houses for protection against former Indian attacks, are most interesting and novel, as, indeed, is everything which is seen. The Westerner is seen here in all the glory of abundant elbow-room, and, at the summit of physical enjoyment, here, if anywhere, he feels as though he could carry out his traditional boast of "whipping all creation" with ease and despatch.

At Laramie, 562 miles from Omaha, the Rocky Mountains proper are reached. The railroad company selected a line through that route which offered easy grades, and the tourist will be rather disappointed at not seeing such mountains as the Alps in Colorado. Such mountains he can behold, however, further south, but not near the railroad line; and yet the scene from Sherman, the point of greatest altitude on the entire road—8,242 feet above the level of the sea—is one which can never be forgotten; distance seems to be annihilated by the transparency and purity of the air; the entire chain of mountains, with their every ravine and projection, are cut so clearly and distinctly that objects which are twenty miles distant seem to be but five or six. Then there are great expanses of valleys stretching away between the main ranges, giving the idea of boundless distance and o a boundless land. The "watershed" of the Continent, at Bridge's Pass, is reached in two days and a half from Omaha, and now all water runs Pacificwards. The journey through Weber and Echo Canons, or Passes, is one of the most weird and frightful possible. The line winds along the side of deep chasms, over roaring torrents, under overhanging mountains, round towering cliffs, past wonders of nature in her wildest moods, with beauties of mountain scenery unsurpassed probably anywhere. Then comes the great valley of Utah, with its wonders of Mormon tillage and irrigation. The wilderness does indeed blossom as the rose, and only man is vile here. The Great Salt Lake shines like a huge mirror in a setting of lofty mountains. The evidences of industry abound on all sides. At Promontory Mountain we reach the junction of the two lines which constitute the through Pacific railroad from Omaha to San Francisco. The cars of the Central Pacific road are now taken; this company controls the Western or Pacific, and by far the most valuable, half of the trans-continental line. And now, through Utah and Nevada, we have alternate stretches of circular plains and mountains of rounded forms; we pass the river Humboldt, known as the river of death to early emigrants to California; and, finally, the Sierra Nevada Mountains are reached. They are truly grand and precipitous. Magnificent crests, eternal snow, beautiful lakes, silvery waterfalls—all, in fact, mountains can exhibit that is lofty, beautiful, imposing. Now, when the trip is drawing to a close, its greatest beauties, and by far its greatest difficulties, are seen on the road. The summit of the Sierra is crossed at an altitude of 7,042 feet, and this altitude is attained in a distance of 112 miles locomotive climbing, and the highest engineering science was, therefore, necessary at this place. The journey to the ocean is now rapidly downward—so rapid, indeed, where there is a descent of 116 feet to the mile, that steam is altogether shut off and the breaks partially applied. In 6¾ days from New York the traveller westward is landed at San Francisco; and in a short time, when close connections and some improvements are made, the journey may be made in less than six days. The distance is only 3,181 miles, not 3,305, as stated by the *Economist*.

And now about the "longer strain than the human constitution can stand," which the *Economist* declares the journey to be. There is not a spot in the whole trip in which there is not something new to be seen—something startling, something beautiful. Something grand, and to be seen nowhere else, is constantly attracting our attention, keeping the mind engaged and making the time pass pleasantly. The sleeping car arrangements are now in perfect order, and I can testify that the soundest sleep can be enjoyed in them. Everything connected with the beds is of the most luxurious nature. In addition to the sleeping cars, eating or hotel cars are now provided. A description of one of these cars appeared in the *Evening Bulletin* a few days ago, which I subjoin:—

"The car is about 60 ft. long by 10ft. wide, supported on eight-wheeled-tracks, giving sixteen wheels to each car. This arrangement and an elaborate combination of steel springs give such steadiness that no serious jolting unsettles a dish. The exterior of the car attracts attention chiefly by its appearance of solidity. Constructed of the best materials, at a cost of nearly $20,000, and braced and secured in every conceivable manner, it seems almost absolutely free from the casualties of an ordinary riding car. In the only case where a Pullmann car has been known to leave the track in company with its train, it rolled down a forty-feet embankment, sustaining no other injury than the breakage of glass on one side and a few scratches and bruises. No passenger sitting in it suffered anything worse than a bruise. As the car did not break, and was neither twisted nor strained out of line, it was ready for immediate service when restored to its place on the rails. The uses of the dining cars are indicated by its exterior decorations, in carvings and paintings, representing fruits, fish, game, and other edibles. The interior is elegantly finished in black walnut, mounted with silver wherever metal is essential. Seats for dining forty-eight persons at once are arranged at twelve separate tables, on each of which is abundant space for the service of four persons. These tables are portable, and may be removed and stowed away out of sight at a moment's notice. At either end of the car are water tanks, closets for wine, canned fruits or condiments, ice-boxes for cooling wine, and the usual toilet arrangements—so that the traveller may remove the dust from hands or face before sitting down to his meal. Midway between the two ends of the car, and occupying its entire width, with the exception of a narrow passage, is located a compact kitchen, especially designed for the Pullman car, and fitted up with every possible contrivance and facility for preparing food quickly and well. Its success was amply demonstrated in the trip across the continent, for nothing could be better than the meals placed before the party three times daily. Immediately beneath the kitchen floor, and communicating by trap-doors, are dust-proof ice boxes and provision cellars. Here are packed the fresh meats, the butter, eggs, and other edibles requiring cool quarters for preservation. Spacious water tanks are connected with the kitchen by a force-pump; and the cook and his assistant have everything at hand, almost without turning round. Entering the car to dine, you take your seat. At your side you find a bell. One stroke upon it, and a waiter, neatly clad in white jacket bearing the monogram of the Pullman Company, appears and presents you a bill of fare. Your order is fulfilled, and your savoury steak of beef or antelope, your mountain trout or broiled chicken, are placed before you smoking hot. Wine, tea, coffee, or fresh milk are also at command; and for sauce, what can be more appetising than the air of the Rocky Mountains and the elevated interior plains of the American continent, except, possibly, the reflection that you may enjoy your meal in elegant leisure while the train bears you swiftly forward towards your journey's end? A traveller may obtain a 'good square meal' of plain food for the dollar or a dollar and a quarter which is charged at the station restaurants, while those who desire only a light lunch can command it at trifling cost."

Digitized by Google

By the reduced rates which have just taken effect the journey from New York to San Francisco can now be made for $126 in gold, or £25 4s. English. £5 will cover all incidental expenses for meals, bed, &c., on the trip. A first-class passage by sea, *via* Panama, costs about $175 in gold. Such a trip as I have briefly described is a great help to a liberal education; it expands the mind and ideas and all connected with the mental faculty, and gives the foreigner a thorough insight into the great country of the United States. I have made the voyage betweed this city and New York, *via* Panama, some six times, and I can assure you that there is more suffering, more *ennui*, more of a strain in one day's steamer experience in the tropics, where one feels as though issuing from the bath, perspiration exuding from every pore, than from the entire railroad journey across the American continent. New conveyances and comforts are being added by the two railroad companies (the Union Pacific and the Central Pacific) every day, and each road is being constantly improved in the great race to get the road finished. Many details of construction are slighted, but everything is now being placed in first-class order, and at no distant day it may be anticipated that the great through line will be one of the most thoroughly constructed roads in the world. As it is, it makes one of the greatest engineering facts of the 19th century.—I am, Sir, most truly yours,

THOMAS MAGEE.

San Francisco, California, June 15.

# PARLIAMENT.

—o—

## HOUSE OF COMMONS.

—o—

### CONSULAR BUILDINGS IN CHINA, JAPAN, &c.

(July 8th.) In Committee of Supply on the vote of £37,585, to complete the sum of £62,585, for the Embassy-houses at Constantinople, China, and Japan,

Mr. AYRTON said that the balance which the Committee was asked to vote was less by £10,000 than the original estimate.

Mr. MONK was not aware whether that reduction referred to the Embassy-house at Constantinople. Presuming that it did, he wished to ask the Secretary to the Treasury to explain—for he knew that, as an independent member, he objected to the sums which were expended on some of our Foreign Embassies—how it was that the sum of £10,000 which had been voted for the purpose of building a country house for our Ambassador at Therapia had been exceeded by £3,000. He desired also to call attention to the large sums which year after year the House was asked to vote for the Embassy-house at Pera, in building which a sum of £80,000 was not many years ago spent. He desired further to say that there appeared to be two sets of plans for the house at Therapia, the one those of some local architect, which were superseded by the plans of Colonel Gordon, whose plans, he understood, had since been modified by those of some other official at Constantinople. He hoped his hon. friend the Secretary for the Treasury would inform the Committee which of those plans had been finally fixed upon.

Mr. AYRTON said he entirely sympathised with the dissatisfaction which his hon. friend seemed to feel at the expenditure which was incurred in connection with the establishments which we kept up at Constantinople. It had, however, been the policy of this country for some years to keep up great establishments in that city. His hon. friend was right in stating that he had constantly protested against so large an expenditure, but was obliged to take matters as he found them, and to accept the expenditure which was deemed to be necessary for the purpose of making our Ambassador comfortable. (A laugh.) He did not know what demands might be made from Constantinople another year; all he could say was, that he would do his best to resist them.

Sir H. BULWER observed that previous to the change of the clerk of the works the Ambassador had no control whatever over the expenditure. The clerk of the works made a job of the whole business. It was found very advantageous to do away with the clerk of the works altogether. As to the House at Therapia, he should like to have some idea of the work done and what there was still to construct. He did not think the expense would be confined within the £10,000.

Colonel SYKES was altogether at a loss to understand how there had been a diminution under this vote of £10,000. There was a great fallacy in the statement of his hon. friend as to that reduction. He strongly objected to the sum of £174,000 proposed to be taken for the purchase of land in China and Japan. He was very glad to hear from the right hon. gentleman below him (Sir H. Bulwer), who had occupied so distinguished a position in Constantinople, that the clerk of the works had not been restored, and that subsequent to his dismissal a considerable saving had been effected.

Mr. STANSFELD begged to inform his hon. and gallant friend that the Treasury had sent out an extremely able and economical public servant to make inquiry with reference to the erection of the proposed consular establishments in China and Japan, and on the report he made the estimate had already been reduced. That officer was expected daily to arrive in England; it would be his duty to communicate with him on the subject, and he could assure his hon. and gallant friend the vote would not remain at its present amount unless he were satisfied it should.

Lord BURY had always understood it was the duty of the Secretary to the Treasury to consider what sum was necessary before proposing a vote; he was therefore rather surprised to hear it stated that the proposed sum was as final as expenditure usually was, and no hope was held out that it would not be ultimately exceeded. Unless some member of the Government gave a more satisfactory explanation he should move to reduce this vote.

Sir H. BULWER explained.

Mr. AYRTON said he had stated that this money was required to complete plans and estimates made before the present Government came into office. At the same time he must say he did not admire the policy of keeping up an expensive establishment at Constantinople.

Sir H. VERNEY had never heard a less satisfactory explanation of a vote, for if any one could explain those votes it was always the Secretary to the Treasury. He hoped some assurance would be given that no more money would be asked for.

Mr. MONK thought the Committee had a right to know whether £4,000 would be enough to complete the buildings. Last year he had taken the sense of the Committee on this subject, but he had been beaten by two to one.

Mr. AYRTON said there was a superintendent at £300 a-year, who was responsible for the expenditure. The sum now to be voted was to complete the house and to furnish it. Of course, demands were always made for keeping up these establishments, but it would be the duty of the Government to resist any further expenditure for these buildings.

Mr. Alderman LUSK would like to know something about the expenditure in China and Japan. Last year the Government asked for £37,000 for Japan, and now £10,000 more was asked for buildings, but no one knew what they were for.

Mr. STANSFELD said with reference to the charge for ordinary repairs, and for the salary of superintendent, the Treasury was not satisfied, and they had remonstrated on the subject. He would undertake to say that these charges would not reappear in the Estimates next year without having received full consideration. With respect to the new buildings at Teheran, that was an arrangement made by the late Government, and, as far as he could judge, it was a reasonable one. A proposal came home as to the old buildings, which were in an extremely bad and ruinous condition, and would cost £15,000 to repair. But the noble lord thought that a better site could be chosen, upon which a new residence could be built, while the old property might be sold. It was important to have a good supply of water, and that would be obtained at the new site, and he had reason to believe that the estimate of £20,000 would not be exceeded.

The vote was agreed to.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, July 6.

The latest news received from the West Coast of Africa shows the state of affairs there to be in a very bad condition. H.M.S. *de Amstel* had arrived at Commendag, and a boat, with a crew of two officers (Messrs. J. Vriemoet Drabbe and F. Zegers Veeckens), one sous-officer (Mr. J. C. van Es), and eight sailors, was ordered to land to reconnoitre the coast, the population of which was formerly under the government of England, but since the drawing of the new demarcation line under that of Holland. As soon as the crew of the boat had landed the men were surprised by the negroes and made prisoners. The commander of the *Amstel* resolved, after a conference with the Governor of the Coast of Guinea and the English Governor of the Cape Coast, not to make use of his military force, trusting that the natives would not murder the "white men" if the negroes were left alone. It was said, however, that one of the sailors was dead. Nothing further is known with any certainty with regard to the occurrence. According to an official statement in the *Staats Courant* there is still hope that the crew will be saved.

The Second Chamber has carried the Bill for reorganising the military academy at Breda by thirty-eight against fourteen votes. The members then separated, so that the session may be regarded as closed. Mr. Van Reenen, the President of the Second Chamber, has declined the Presidency of the new Chamber, which will meet in September next.

It is stated that Mr. C. Busken Huet, editor of the *Java Bode*, will shortly assume the editorship of the ultra-Conservative *Dagblad*; Mr. Lion having retired owing to bad health. This rumour, spread by the Hague correspondent of the *Arnhem Iche Courant*, is contradicted most positively by the *Dagblad*.

The strike among the printers will lead to no serious results, the masters having consented to a general increase of wages.

### PRODUCE MARKETS.

COFFEE.—The market remains unaltered. There is a good demand for consumption, and holders decline to operate without an advance. The transactions include about 2,200 b. Java, ex several ships. The total stock of coffee in Holland was on the 1st inst. 718,300, against 641,100 b. in 1868.

RAW SUGAR.—The Trading Company has announced that 47,800 mats will be sold by auction on the 22nd inst. The market remains very firm, and there is a firm demand at somewhat advanced prices. About 7,500 mats changed hands at f.1¼ to f.¾ under May value. The stock was on the 1st inst. 67,585 mats (Trading Company), and 33,169 mats (private).

RICE.—There is a lively demand. The following parcels have been sold:—4,419 b. Java, ex Nyverheid, at f.7¼; 1,420 b. do., ex Petronella, at f.7¾ to f.8; 6,235 b. do., ex Petronella, at f.7¼; and 2,832 b. do., at f.7¼ to f.8¼; 2,050 b. do., ex Rotterdam, at f.8.

SPICES.—Very dull. The unsold stock was on July 1, Nutmegs, 974 casks; mace, 375 casks; cloves, 390 casks; and the Trading Company's stock on warrants, nutmegs, 3,822 casks; mace, 316 casks; cloves, 2,735 casks; cinnamon, 143 b.; pepper, 813 b.

JAVA TOBACCO.—Dull. The transactions are unimportant. The stock is 22,448 bales.

DRUGS.—The market is inanimate, there being no demand.

RATTANS.—Firm in price, with good demand. The following parcels have been sold:—250 piculs, ex Spanker; 250 piculs, ex Liverpool,

Digitized by Google

55 piculs, ex Bellatrix; 300 piculs, ex Laurens Koster; 110 piculs, ex Madura; 400 piculs, ex Petronella; 100 piculs, ex Doelwyk.

JAVA INDIGO.—Very dull.

KAPOK.—180 b. E. I. half cleaned sold at 14½c.; 49 b. E. I. cleaned, at 31½c.; 125 b. half cleaned, at 15c.

TIN.—Prices having declined to 78½f., there has been a good demand. Several hundreds of slabs sold at 78½f. to 79½f., and small quantities may now be had at the last quotation. Billiton is quoted 77f. In the beginning of the week 600 slabs were sold at 76½f. The unsold stock of Banca was, on the 1st July, 37,167 slabs, and of Billiton 1,064 slabs.

HIDES.—The sales have been 1,766 p. Sourabaya Rinder, ex Cheribon; 3,554 p. do., ex Laurens Koster; and 1,511 p. do., ex Burmah.

SHIPPING.

DEPARTURES.—July 1, from Texel for Sourabaya, Pauline Constance Eleonore; for Samarang, Sliedrecht; July 2, from Brouwershaven, for Samarang, Landbouw; from Texel for Samarang, Sliedrecht; July 3, from Brouwershaven for Batavia, Voorlichter; from Hellevoet for Batavia, St. Jan; from Flushing for Java, Stad Middelburg.

PASSENGERS INWARD.—From Java, per Kandanghauer: Mr. F. R. Huysers and family, Mr. W. Sauvlet, Mr. W. Schwertsel and family, Miss J. Mastenbroek, Miss A. Voermans.

PASSENGERS OUTWARD.—For Java, per Voorlichtor: Messrs. J. B. A. de Josselin de Jong, K. J. v. d. Veen, M. A. van der Wyck, G. van Herwaarden, G. Ek, J. F. M. de Lange, E. J. Hons, H. C. Achenbach, R. W. J. van Pabst van Bingerden, H. van Stockum, T. R. Corman, J. A. Lawaay, P. D. G. Suilbrord Piccardt, W. K. M. Hazen, M. J. Vitringa, and 134 soldiers. Per Alblasserdam: Mr. F. C. Eizerman and family.

# Monetary and Commercial.

In the Court of Queen's Bench, on Tuesday, it was decided to postpone the trial of the directors of Overend, Gurney, and Co. (Limited), till December next, on the ground that there does not remain sufficient time to carry the case through at the present sittings. It is understood that the Attorney-General has been retained for the prosecution; and meanwhile a committee has been formed and trustees appointed with a view to the necessary funds being raised for the purpose of conducting the trial in a manner befitting the importance of the case. In the interest of the commercial public, however, it would be far better could the matter be brought to an issue with the least possible delay. The postponement for a period of five months may be regarded as fraught with injury to commercial enterprise, the revival of which is impeded in proportion as the miserable financial wrecks of the past are still pressed upon the attention of the public. The liquidators of Overend, Gurney, and Co. (Limited) have issued a circular, in which they ask the creditors to accept the balance of their debts, due on the 15th of September next, and to allow the payment of interest to be deferred to the 30th of June next. They pursue this course in preference to making a further call. Accompanying this circular is a note from Mr. Charles Oppenheim, the creditors' representative, recommending the adoption of the proposed arrangement.

The suspension has been announced of Messrs. George Smith and Sons, of Preston, cotton spinners and manufacturers. As the house had been established in Lancashire nearly half a century, and enjoyed fair credit, the liabilities are supposed to be large. They employed about 200 operatives, while the firms of Messrs. R. and W. Jackson and Mr. Bourne, which have also stopped, employed about 300 each, making a total of 800 thrown out of employment. The cotton trade in Preston and the vicinity—indeed, throughout Lancashire—is in a most wretched condition, and there are rumours of other misfortunes impending. In fact the depression is so great that meetings are being held in various parts of Lancashire for the purpose of asking Government to take active measures for the removal of duties imposed on cotton yarns and manufactured goods imported into India, the encouragement of the growth of cotton in India, and the appointment of commercial men as members of the Indian Council. The *Manchester Courier* reports meetings held at Burnley and Rochdale. At the latter meeting it was said that since the commencement of the American war the average growth of India was a million bales per year, and that before the war America produced four millions of bales yearly, and since the war only two and a half millions.

A petition for the winding-up of the Northern Assam Tea Company (Limited) is to be heard before the Master of the Rolls on the 17th inst.

There is a moderate demand for bar silver for the Continent, at 5s. 0½d. per ounce, but no inquiry for the East. Mexican dollars are rather firmer, at 4s. 11⅞d., but there are none here.

The directors of the London Joint-Stock Bank have resolved to declare at the half-yearly general meeting, to be held on the 15th inst., the usual dividend at the rate of 12½ per cent. per annum, carrying forward £5,700.

## ARTICLES OF IMPORT.

*(For Quotations see Table of Prices Current.)*

TEA.

The following is from Messrs. W. J. and H. Thompson's Circular dated 7th instant:—There has been little alteration to notice in the tone of the market during the past week. Large public sales are at present in progress, the catalogues mostly consisting of common quality, and, so far, late prices have been maintained. Foochow Congous: Dust and siftings are little inquired for, but quotations remain the same; good common is still 1s. 0¾d., and but little offering at this; fair 1s. 1d. to 1s. 2d. per lb.; medium and fine continue to sell only in very small quantities at about late prices. Black-leaf Congous: Very common at 1s. 0½d.; good common remains firm at 1s. 0¾d., with but little inquiry. Dust, "with all faults," at public auction, sold at 6d. to 6½d.; sound, at 7d. to 7½d. At 1s. 1d. to 1s. 1½d. fair quality can be obtained, but the demand is extremely limited. Medium and fine continue to sell in moderate quantities at 1s. 4d. to 1s. 9d. per lb. Tayshan Congous: Several parcels have been sold at the auctions at 1s. 1½d. to 1s. 1¾d. for fair, and new season's overland at 1s. 5d. to 1s. 6d. for good. Souchongs: Common to fair has been sold at 1s. 1½d. to 1s. 3d. per lb. Scented Orange Pekoes: Common has been sold at 9½d. to 9¾d. Scented Capers: Several parcels of spurious mixed have been sold at 7d. to 7½d., to 11½d. for common; the former shows ½d. per lb. decline; the medium qualities have been more saleable at the slight improvement noticed in our last. Green Teas: In these descriptions there is no change. The public sales now in progress consisted of 29,653 packages, and so far 17,819 packages have passed. Former prices have generally been maintained. Letters by the French mail were delivered on the 5th instant, bringing dates from Hong Kong to the 20th, and from Foochow to the 13th, and from Shanghai to the 14th May. The latest telegrams are dated Foochow 8th, and Shanghai 15th June. There have not been any arrivals. The United Kingdom stock was on the 30th ultimo estimated at about 86,000,000 lbs. in 1869, against 77,000,000 lbs. in 1868.

SILK.

The dulness noticed in our last report still continues. Some sales of Chop Tsatlees have been made during the past week at a considerable decline from previous quotations, though without influencing the market, buyers still waiting information in regard to the supply of Asiatic silk, and the market will doubtless be guided to a considerable extent by the advices to be received during the next fortnight. In Japans the only transactions have been a few sales of the inferior descriptions of Mybash, which have found buyers at a reduction of about 2s. per lb. from last prices. All other classes are entirely neglected. In Cantons but little has been done, holders not being willing to concede the reduction expected by buyers. Bengals are heavy of sale, even at the reduced rates now asked. The imports warehoused in June were:—China, 636 bales; Canton, 160 bales; Bengal, 345 bales; Chinese Thrown, 76 bales; Japan, 265; and from 1st to 5th July inclusive the deliveries were:—Bengal, 49 bales; China, &c., 496 bales; Japan, 128 bales.

COTTON.—The Liverpool market remained firm until the 6th inst., when a much quieter feeling prevailed, the sales being to small amount, at a reduction of ⅛d. per lb. The market has since been quiet at unchanged rates. The current quotations are:—Surat, 8½d. to 11⅜d.; Madras, 8⅝d. to 10½d.; fair Dhollerah, 10½d.; fair Oomrawuttee, 10⅜d.; fair Broach, 10½d.; fair Bengal, 8⅝d.; fair Egyptian, 13½d.; fair Pernam., 12⅝d.; middling Boweds, 12½d.; middling Orleans, 12⅜d. The London market has also become inactive, at corresponding reduction in prices to that effected at Liverpool.

COFFEE.—There are export orders of fair extent in the market for Plantation Ceylon, and business is doing at steady prices. Public sales of both Plantation and Native have gone off steadily at previous rates.

CAMPHOR.—About 170 cases China have been sold at 97s. 6d. per cwt.

CUTCH.—In auction, of 700 boxes Pegue offered 100 boxes fine sold at 26s., one lot 26s. 6d., the remainder rather inferior being bought in at 25s. to 25s. 6d.

COCOA-NUT OIL.—There have been small transactions since our last report in Ceylon at £43 10s. per ton.

GAMBIER.—The market is firm at the current quotations; 20 tons of fresh import have been sold at 17s. per cwt.

JAPAN WAX.—An important supply of 1,326 boxes offered on the 6th inst. met few biddings, and only 250 boxes sold at a further decline,—good middling saucer 65s.; middling greasy, 59s. to 60s.; dirty, 52s.; one lot good slab at 71s., the remainder bought in at 75s. to 78s.

PLUMBAGO.—At auctions 182 barrels Ceylon realised 6s. 6d. to 9s. for low and medium dust, and 12s. for soft lump and dust.

RICE.—Since our last report 2,500 bags (200 tons) new Rangoon, ex Blanche, have sold at 9s. short prompt. For arrival at London a cargo of 600 tons new Rangoon, and 450 tons the half of another, March-April sailing, have been sold at 9s. ex ship, or 9s. 6d. landed, usual conditions. A cargo of 1,000 tons Siam, off the coast, has been sold for London at 7s. 6d. landed, or 7s. ex ship.

SUGAR.—There is but little animation in the market, but current prices are steadily maintained. The public sales have included 360 baskets, low soft to good ordinary Penang (duty 8s.), which realised 27s. to 28s. 6d. Of Manila 938 bags unclayed have been bought in at 28s. 6d. per cwt.

TIN.—The current rates for Straits are unaltered, but no business has transpired since our last report.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks, and at average spring tides can receive vessels of 16 to 17 feet draught. It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200.000.

Reserved Fund ... ... f.20,000,000 ... £800,00

## FOOCHOW DOCK.

*RIVER MIN.*

THE above granite floored DOCK, of the following dimensions, viz., Length, 300 feet, breadth at bottom, 40, is capable of receiving vessels drawing 13 to 16 feet, as the state of the tides will allow. The Dock runs dry to the blocks, and is pumped out by steam.

The above premises comprise a large Machine Shop, containing a

WHITWORTH'S 12-INCH SCREW CUTTING GAP LATHE, DRILLING AND SCREWING MACHINES,

A LARGE SMITHY, &c., &c., &c.

Large Godowns are on the premises for STOWAGE OF CARGO, &c., &c. A large stock of Woods, Metal, &c., &c., always on hand.

The Dock steam tug *Woosung* is available at all times to tow vessels to or from sea.

JOHN C. SKEY, Superintendent.

## THE "CHINA MAIL,"

No. 2, WYNDHAM-STREET, HONG KONG.

NOTICE.—THE BUSINESS heretofor^h carried on under the style of "Shortrede and Co," was this day purchased by the undersigned, [n whose name and by whom it will henceforth be conducted, and to whom all outstanding accounts owing to the said business are to be paid.

Hong Kong, Aug. 15, 1867. CHAS. A. SAINT.

NOTICE TO ADVERTISERS.

THE DAILY CHINA MAIL.—Six pages; published every evening (except Sunday). Subscription, 24 dols. per annum. Circulates in Hong Kong and along the China and Japan coasts. Terms of advertising:—Ten lines and under, 1 dol.; each additional line, 10 cents; one-half of these charges for repetitions. In Chinese, 2 cents per character for any number of days during the current week.

THE OVERLAND CHINA MAIL.—Compiled from the *Daily China Mail*, is published twice a month on the morning of the English mail's departure, and is a record of each fortnight's current history of events in China and Japan, contributed in original reports and collated from the journals published at the various ports in those countries. It contains, besides, a Shipping List for Shanghai, Hong Kong, Canton, and Macao, and a complete Commercial Summary.

Subscription, 12 dols per annum, payable to any of the undermentioned agents. Postage added. Terms of advertising:—Same as in *Daily China Mail*.

AGENTS.—London: F. Algar, 11, Clement's-lane, Lombard-street, E.C. San Francisco: White and Bauer, 518, Clay-street, San Francisco. Swatow: Drown and Co. Amoy: Giles and Co. Foochow: Thompson and Co. Shanghai: H. Fogg and Co. Manila: Karuth, Heinzen, and Co. Australia: Gordon and Gotch, Melbourne and Sydney. Singapore: Locke. Hongghee, and Co. Batavia: H. Van Dorp.

THE STRAITS TIMES.—Daily, weekly, and fortnightly editions; published in Singapore, for circulation throughout the STRAITS SETTLEMENTS, JAVA, BORNEO, SIAM, FRENCH COCHIN CHINA, CHINA and JAPAN.

This paper, which is the oldest in Singapore, and the most widely circulated throughout the FAR EAST, offers an excellent medium for the advertisements of shipbuilders, machinists, manufacturers, patentees, &c., in the United Kingdom.

Advertisements to be forwarded through an Agent in Singapore, or GEORGE STREET, 30, Cornhill, London.

## THE SAIGON ADVERTISER & SHIPPING GAZETTE.

A SUMMARY of Commercial and Shipping Reports from SAIGON, and a Record of Progress in COCHIN CHINA.

Subscription, £5 per annum, exclusive of postage.

HOLLOWAY'S PILLS.—LIVER COMPLAINTS AND DISORDERS OF THE BOWELS—Incautious diet or heedless living, as regards quality or quantity of food and beverage, or unavoidable exposure to changing temperatures, are ever present to undermine the constitution. It is impossible to exaggerate the extraordinary virtue of this medicine in the treatment of all affections of the liver or irregularities of the bowels. For curing bowel complaints they should be taken rather more sparingly, for every medicine in the form of an aperient requires caution when the bowels are disordered, though a more gentle aperient than these Pills in moderate doses has never yet been discovered. If taken according to the printed instructions, they conquer the complaint and strengthen the system.

No. 22, Great St. Helen's, E.C.

To follow the Ocean Beauty. Will be despatched about the 25th July.

## DIRECT for COLOMBO, the

beautiful teak built clipper ship PALMERSTON, A1 15 years, 894 tons register; J. N. SEAGROVE, Commander; London Docks. This magnificent high-classed clipper, built under special survey, offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Malabar Coast. Will meet with the usual quick despatch.

## DIRECT for COCHIN, CALICUT, TELLICHERRY, CANNANORE, and MANGALORE, the beautiful clipper ship STAR OF JAMAICA, A1, 9 years: 306 tons register; A. SACK, Commander; West India Docks. This splendid vessel offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Steam from London to Shanghai direct. To sail punctually on the 28th of July.

## FOR SHANGHAI and YOKOHAMA, JAPAN, the

splendid new composite full-rigged steam clipper ship OBERON, A1 16 years at Lloyd's, 1,200 tons register, 300-horse power; JOHN KEAY (late of the "Ariel"), Commander; East India Docks. This fine ship, built expressly for the China trade, combining all the latest improvements of the fastest clippers, with the addition of the best description of marine engines, offers a most favourable opportunity to shippers of fine goods. The passage to Shanghai is expected not to exceed 75 days.

For Freight only, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

This ship will proceed to Japan immediately on the discharge of the cargo at Shanghai.

## FOR SHANGHAI, the celebrated Clipper Ship, LAUDERDALE, A1 15 years; 851 tons register; J. J. SMITH, Commander, East India Docks.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

Regular line of Packet Ship. To sail on the 15th July.

## FOR HONG KONG, the splendid Liverpool-built Clipper GEOLOGIST, A1 13 years, 854 tons register, M. CLARKE, Commander; East India Doc.

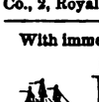
For Freight apply to SHAW, MAXTON, and Co., 2 Royal Exchange-buildings, London, E.C.

Regular line of Packet Ship.

## FOR HONG KONG, the splendid composite clipper, CLETA, A1 16 years, 519 tons register; C. H. MIDDLETON, Commander; East India Docks. This ship sails very fast, and presents a favourable opportunity to shippers of fine goods.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

With immediate despatch. Having a considerable portion of her cargo engaged.



## FOR SHANGHAI, direct, the

favourite and powerful clipper ship SIR WILLIAM WALLACE, A1, coppered and copper-fastened, 967 tons register; A. H. TAYLOR, Commander; loading in the East India Docks. This magnificent vessel, built under special survey in 1866 by Messrs John Duthie, Sons and Co., of Aberdeen, for the China trade, has proved herself thoroughly adapted for it by smart passages and sound delivery of cargo.

For Freight or Passage apply to NORRIS and JOYNER, 60, Cornhill, E.C.

With immediate despatch.

## FOR YOKOHAMA (KANAGAWA) DIRECT, the well-known

clipper MOUNTAIN ASH, A1 10 years, 437 tons register; JACOB CARE, Commander. Loading in the East India Docks. This splendid vessel is noted for her rapid passages in the China and Japan trade, and sound delivery of cargo.

For Freight or Passage apply to Messrs. RUCKER, OFFOR, and Co., 115, Leadenhall-street, E.C.; or to NORRIS and JOYNER, 60, Cornhill, E.C.

Printed for the Proprietors by RICHARD KINDER, Milford-lane, Strand, W.C., and published by JAMES WEST, at the Office of the "LONDON AND CHINA TELEGRAPH," 2, Cowper's-court, Cornhill, in the parish of St. Michael's, in the City of London.—Monday, July 12, 1869.

### THE MAILS, &c.

Twice this year we have had to report the arrival of the P. and O. Company's Mail in advance of its due date, and now we have to note an exception in the opposite direction, to the almost unvarying punctuality of the service; the present inward Mail being one day late. The next inward Mail will be the French, with dates from Yokohama to the 8th, Shanghai 11th, Hong Kong 17th, and Singapore 26th of June; it will be due here on Monday next; it was, however, two days late in reaching Suez, so may not be here until the following day or Wednesday. Our latest telegrams, *viâ* Galle, are in advance of the Mail leaving June 24.

## List of Passengers.

### PASSENGERS INWARD.

By this mail, to Marseilles, per P. and O. steamer Ripon, arrived July 25.—From Hong Kong: Mr. R. D. Crawford. From Singapore: Capt. Winchester. From Batavia: Mr. T. Dowrie. From Galle: Mr. Mitchell.

To Southampton, per P. and O. steamer Syria, expected to arrive July 31.—From Yokohama: Assistant-Surgeon Lambert. From Shanghai: Mr. and Mrs. Dow, two children, and servant. From Hong Kong: Mr. W. G. Wratten, Mr. E. Byrne, Mr. Hay, Capt. Andrews, and three second-class passengers. From Singapore: Mr. W. Walker, Mr. T. Anderson, Captain S. Loss. From Penang: Assistant-Surgeon Eames. From Galle: Mr. J. McDonald, Mr. Nicolls, Master Mackenzie, Lieutenant-Colonel Bourne and servant, Mr. Robert Pughe, and four second-class passengers.

By last Bombay mail, to Marseilles, per P. and O. steamer Poonah, arrived July 15.—From Penang: Mr. Caux.

### PASSENGERS OUTWARD.

Per *Tycho Brahe* (s.s.), sailed from Liverpool July 15.—For Penang: Mr. E. H. Man, Miss Man. For Singapore: Mr. J. Story. For Hong Kong: Mr. R. Grant, R.N., Lieut. A. C. May, R.N. For Shanghai: Mr. R. Blackwell.

Per P. and O. steamer *Ripon*, from Marseilles, August 1.—To Batavia: Mr. and Mrs. Pietermaat. To Penang: Mr. Brown. To Ceylon: Mr. W. J. Carver.

Per P. and O. steamer from Suez, August 8.—To Hong Kong: Mr. and Mrs. Bade, Mr. F. Dreyer.

Per P. and O. steamer *Syria*, from Southampton, August 21.—To Ceylon: Mr. W. Raikes.

Per P. and O. steamer *Bangalore*, from Marseilles, August 29.—To Shanghai: Mr. J. J. Tucker, Mr. Douglas Jones. To Singapore: Mr E. J. Tolson.

Per P. and O. steamer from Suez, Sept. 5.—To Hong Kong: Mr. and Mrs. C. C. Smith.

Per P. and O. steamer, from Southampton, Sept. 4.—To Hong Kong: Mrs. Hackin.

Per P. and O. steamer from Marseilles, Sept. 12.—To Shanghai: Mr. Russell.

Per P. and O. steamer from Southampton, Sept. 18.—To Hong Kong: Mr. J. Y. V. Shaw. To Ceylon: Mr. M. Finch.

Per P. and O. steamer from Southampton, Oct. 20.—To Hong Kong: Mrs. E. Arthur. To Ceylon: Mr. E. Buchanan.

Per P. and O. steamer from Marseilles, Oct. 28.—To Ceylon: Mr. and Mrs. M. H. Thomas, Miss Creswell, Mr. J. W. Gossett, Mr. Stanley Daniell, Miss Sconce.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Advices from this port extend to the 28th May. The outward mail of March 27th was received there on the 19th May, and that of April 9th on the 27th May. The latest London telegrams were to May 1st. The *Japan Times* gives the following summary of the fortnight's news:—

The work of centralising and strengthening the Mikado's Government in Japan goes on rapidly and steadily, as will be seen from an analysis of the lists of Daimios who have lately returned their lands and independent rights to the Crown, which we publish below. More than half of the whole revenues of the country, as at present accruing, are thus placed at the disposal of the Imperial Government, and there is no reason to doubt that the other Daimios will follow the example set. A proper employment of these means, combined with a wise economy, will soon place Japan on a better footing among the nations than she has ever before occupied. The sterling, self-denying patriotism which has inspired the movement it is impossible too much to admire.

It is to be hoped that, when Japan is become an united, homogeneous Empire, its people will not begin to think of turning us out of it. But it is impossible to shut one's eyes to the fact that a party exists, and one of no mean strength or importance, which professes such a policy. Great difficulty was experienced in obtaining a satisfactory settlement of the affairs we mentioned in our last—the stoppage of Captain Stanhope, Mr. Consul Robertson, and others on the Tokaido. Indeed, a threat of suspension of diplomatic intercourse was found necessary before the Foreign Ministers' demands were complied with. Notice boards are now displayed at short intervals along the Tokaido, as far, we hear, as Hakoni, denouncing punishment against any Samurai who shall in any way molest Foreigners, stating that his clan, as well as the offending individual, will suffer for such offence, and informing all whom it may concern that we have an equal right to the high road with Japanese of all ranks, and are to have given to us our fair share of it when passing troops or processions. On the other hand, however, we are sorry to say that a counter notice by persons unknown, of which the following is a translation, was placed a few days ago on the Niphon-bashi, a principal bridge in Yedo:—

"Although in consequence of the sudden outbreak of war in the spring of last year we were obliged to contract friendly relations with Foreigners, yet the expulsion of the Barbarian is the most important law of our country. The possibility of the Empire being overthrown by the hateful Barbarian, and the difficulty with which the dignity of the Emperor is maintained, are at present matters of grave reflection with the Government. Gradually, too, the detestable Barbarian becomes more overbearing, and the instances of his insolent conduct are numerous; riding about in carriages, and so forth, he often inflicts wounds on those walking in the streets, and rides on without any concern. Since, then, their conduct is of this atrocious nature, be for the future as careful as you can (to avoid a collision) when walking in the streets, and when the Foreign Savages act in this unlawful manner cut them down, and by thus displaying the patriotic intrepidity of the men of Japan, crush the courage of the Barbarian."

This is anything but pleasant reading—the less so, because we cannot deny that we have given too much cause for the accusations made against us. Only a few days ago, two more children were run over by Foreigners in Yedo, and the late occurence on the Tokaido of a similar character is fresh in our readers' minds. The behaviour of not only the lower classes of Europeans, but of many who ought to know better, in their daily intercourse with this high-spirited people, can only be defined by the terms used in this hostile proclamation, and an example of condign punishment is sadly wanted. It is not a little significant that in a

Digitized by Google

recent official notification from Sir Harry Parkes, on behalf, too, of his colleagues, informing the public that Foreign guards are again stationed in the streets of Yokohama for our protection against possible attack by Japanese ruffians, the following paragraph should have been a necessary addition to the usual form:—

"The duties of these guards will consist in assisting any Foreigners who may be attacked or who may apply to them for protection, and also in repressing any disorderly conduct on the part of Foreigners that may come under their observation."

If Foreigners had not been guilty of too much "disorderly conduct," the guards might not have been necessary at all.

From the North we have no positive news since we last wrote, beyond the confirmation of our statement that the Imperial fleet had reached Awamori Bay in safety. They were left there by a Foreign steamer, which brought us news, too, of the loss of one of Enomoto's few remaining ships. This is said to be the *Ashuelot*, but is more likely to have been the *Eagle*, a far more serious loss to him. This vessel left Miaco Bay, after her futile attempt on the *Stonewall*, in very bad case, and nothing is more likely than that she should have foundered. The Government here is quite confident—over-confident, we think—of success in their present expedition against the pirates.

---

THE RETURN OF THE DAIMIOS' LANDS TO THE CROWN.

An analysis of lists compiled from the *Kioto Government Gazette* shows that up to the 16th April the Memorials of 118 out of the 276 Daimios of Japan had been published, begging to be allowed to restore their fiefs to the Sovereign. The aggregate revenues,* on paper, of these fiefs amount to 12,034,053 kokus. The koku is worth at present about £2 sterling.

The party that has joined this movement, which was originated by the Princes of Chosiu, Satsuma, Hizen and Tosa, is composed as follows:—

1. Prince Tokugawa Kaménosuke, who succeeded the ex-Shiogoen as Chief of the Tokugawa Clan.

2. Of the Gosanké, or three great families, in which the succession to the Shiogoonate was vested, two have sent in memorials—Owari and Kishiu. The third clan, that of Mito, of which Prince Mimbu Taiyu, brother of the ex-Shiogoon, is the chief, has been for many years disturbed by internal feuds and dissensions, and this may account for its tardiness in joining the movement.

3. Of the eighteen *Kokushi*, or principal independent nobles of Japan, only five names are missing from these lists. These are Sendai, Awa, Satake, Nambu, and Uyesugi. The Prince of Awa, who has been a firm supporter of the Mikado's party, will probably not be slow in sending in his memorial; and the remaining four are Northern Princes who, with the exception of Satake, have until recently been rebels.

4. Only two of the *Junkokushi*, or nobles next in rank to the above, have as yet joined the movement.

5. Of the *Fudai*, or vassals of the Shiogoonate, whose ancestors swore allegiance to Iyeyas, the founder of the last dynasty, before the storm of the castle of Osaka, sixty-eight have sent in memorials.

6. Of the *Tozama*, vassals of the Shiogoonate, whose ancestors submitted to Iyeyas, after the taking of the castle of Osaka, twenty-five have joined the movement.

7. Eight Princes, chiefs of cadet branches of different noble families.

During the recent political troubles the two parties which Foreigners have spoken and written of as North and South have been regarded by the Japanese as East and West. It is not surprising to find that a movement originated by the leading members of the Western faction has not as yet been generally followed by the Princes of the East. All parties are however fairly represented in the lists we have analysed, which show an amount of power sufficient to compel the less liberally disposed nobles to join in the measure.

The answer returned to the memorials has been the same as that first given to the Princes of Chosiu, Satsuma, Hizen, and Tosa, viz., that the question must stand over until it has been considered by the nobles about to meet in council in Yedo.

---

YEDO.

Yedo is refilling fast, and a general activity prevails in all quarters. Many yashikis are being rebuilt, though they will not be in such numbers as formerly, economy being the order of the day, and a return from ostentation to simplicity the fashion. A very large number of Daimios are at present in Yedo, and those whose territories are farthest from the capital are already far on their way to take part in the approaching Council, and are expected daily. The appearance of the city is completely changed; the streets are full of motion, trade has revived, the number of beggars is curiously diminished, and everything wears an appearance of returning prosperity. The only spot of desolation in the midst of the rejuvenescent city is the Foreign concession.

* Actually "assessments," as we have before explained. The revenues exceed these figures.

## CHINA.

—o—

SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, June 3, 1869.

The P. and O. steamer *Ganges* arrived on the 25th ult., with the London mail of the 9th April, and telegrams to the 1st May. By it Mr. Horatio Nelson Lay arrived, quite unexpectedly, and the news was brought of Captain Roderick Dew's death, and of Lord Clarendon's exposition of the suicidal policy to be henceforward adopted by Great Britain in China. It is no exaggeration to say that we English residents are now openly laughed at by our American and French fellow-citizens, whose home authorities contrive to keep out of the ridiculous mistakes which have for some years past made our Foreign policy a by-word.

On the 23rd ult. we received a commercial telegram *via* Kiachta to the 4th May, followed on the 31st by a telegram per same route to the 11th May.

The M. I. steamer *Phase* arrived on the 1st inst., with the French mail of the 17th April, and telegrams to the 7th May.

The New York mail of the 9th April, with San Francisco papers of the 1st May, arrived yesterday. Its telegrams had of course been all anticipated.

The S.S. *Niger*, which left for Hankow about a fortnight ago, broke her propeller when approaching that port, and it is feared that she may have to make some delay at Shanghai, in order to have the damage repaired.

An "express" was circulated on the 25th ult. announcing that the P. and O. Company have reserved space to the extent of 300 tons in the outgoing steamer *Malacca* for the new teas, at the rate of Tls. 50 per ton. This represents about 1½d. per lb. laid down in London.

The *Evening Express* makes the following announcement about the local steam marine:—

Several changes are, we hear, about to take place in the commands of the vessels of the Shanghai Steam Navigation Company's fleet. Captain Clarke, at present of the *Manchu*, leaves the service to take charge of the *Suwonada*, vice Captain Jayne, who is going home. Captain Morse, of the *Kiangse*, takes the *Manchu*. Captain Bell, pilot of the *Hirado*, gets the *Hangchow*, whose present captain, Andrews, goes to the *Kiangse*.

The old light-ship is being fitted up for the river police, and when completed will be anchored off the Custom-house. It is proposed to get up a triple lottery for the tea-clippers from Hankow, Shanghai, and Foochow, the proceeds to go to the winning ships in a certain ratio.

On the 26th ultimo a meeting of the silk merchants was held, to consider the opposition offered by the Chinese to the resolution passed at the meeting of the 19th of March, that, "fractions of pounds should not be counted, and that each bale should weigh eighty catties." In order to meet the native dealers half way it was resolved:—

"That this meeting, strongly approving of some general action being taken in all questions affecting the interests of the Silk Trade, are disposed to meet the silk dealers, who decline to allow bales to be weighed as 106—107 lbs. only; and to recommend that buyers should, in future, agree to weigh only half pounds and to discard quarters."

The meeting then proceeded to organise itself into a society for the promotion of silk interests, under the name of the North China Silk Association.

The Annual Land Renters' meeting was held on the 27th and 28th ult., the attendance on both days being extremely meagre. Full reports go home by this mail. The chief topics settled were:—

The reduction of Foreign house tax from 6 to 4 per cent., of native house tax from 8 to 6 per cent., and of lighting rate from 1¾ to 1½ per cent.

The right of the Council to detain goods as security for wharfage dues, payment of which is refused.

The advisability of entering into an arrangement with the owners of the Soochow Creek-bridge, by which tolls may be commuted.

The election of Messrs. Cunningham, Miller, Baker, Yates, Adams, Hoppins, and Gubbay as members of the incoming Council, and of Messrs. F. B. Johnson and James Hogg as associates with the Council, for the purpose of reassessing land and houses.

Permission for the construction of lines of telegraph throughout the settlement.

The omission of the French ground in designating the municipal limits.

The settlement of municipal questions by a majority of the Foreign representatives, instead of by a unanimous vote as hitherto.

The recognition of the right of voting by proxy at Land Renters' meetings.

The reduction of the minimum number of municipal councillors to five.

The right of the Council to levy wharfage dues on exports as well as imports.

The extension of the franchise to annual ratepayers of Tls. 10, and householders paying not less than Tls. 500 per annum assessed rental.

That all suits against the Council be tried in the English Supreme Court for China and Japan.

At the first meeting of the new Council, held on the 31st ult., Mr. Cunningham was elected chairman and Mr. Adams vice-chairman. The secretary was directed to apply to the bund lot-holders for permission to construct pontoons at the ends of the roads at right angles to the river, such pontoons to overlap the frontages to the extent of about twenty feet on each side.

The French Municipal Council for the ensuing year, elected on

Digitized by Google

the 31st ult., consist of Messrs. Aymers, Duforest, Groom, and Martin.

The following is the Chief Judge's decisions delivered yesterday, in the case of Walter, Hamilton and Co. *v.* the Estate of Jarvie, Thorburn and Co. :—

Jarvie, Thorburn and Co., not being parties to the bills, permission to prove which on their estate is now asked, such proof cannot be allowed. And I am further of opinion that, with respect to the goods purchased by Buchanan, Hamilton and Co., and invoiced by them to Jarvie, Thorburn and Co., there was no such privity of contract as would render the latter liable to Walker, Hamilton and Co. I therefore dismiss the proof tendered. Each party to pay their own costs of this application. The costs of the commission to come out of the estate of Jarvie, Thorburn and Co.

On the 24th ult. a royal salute was fired by H.M.'s *Zebra*, in honour of Her Majesty's fiftieth birthday. All the ships in harbour were gaily dressed, and the banks were closed.

An interesting passenger arrived here the other day from Hong Kong, in the shape of a young girl, one of the betrothed wives of the Emperor. The lady is only twelve years old, and was under the care of her father and mother. Of course much curiosity was excited, which the party managed to baffle with tolerable success by leaving the Hong Kong steamer directly on her arrival, and going without delay to the Tientsin steamer.

A cricket match was played on the 21st ult. between the Racquet Court eleven and an eleven selected from the Cricket Club. The result was a victory for the Racquet Court eleven, the total scores being S.C.C. 145, S.R.C. 172. On the evening of the same day the fourth and final lecture of the Temperance Course was delivered by the Rev. Canon Butcher, the subject being "Biography." These lectures have proved very popular, and the society have resolved to follow up the experiment by something more pretentious for next winter.

The Public Gardens, which proved so great a boon to the exhausted community last summer, are being prepared for the approaching hot season. Benches and screens have been placed, and a row of gas lamps line the drive by the river side. Much skill and attention have been devoted to the horticultural department, and this is now a very pleasing element in the picture.

On the 25th ult. the amateurs of the German Club Concordia and of the Lyceum Theatre united in a performance in aid of the Public Library. The pieces were "Ein Berliner en Wien" and "The Critic." The performance was most successful, and no less than $700 was realised. A few hours before the curtain rose the mail of the 9th April arrived, bringing the news of Mr. Gibson's recal, and of the apology to be tendered to the Chinese Government for his vindication of British honour. The indignation felt here was excessive, and the amateurs had just time to introduce a *tableau* at the end of the last piece, representing *Britannia on her knees humbling herself before John Chinaman*. At the same moment the band struck up "Rule Britannia!" The effect was electric; the audience rose, and yells and hisses saluted the illustration of British policy. Three boxes were filled by Chinese, who thus received a polite hint of what the English in China will do for themselves if they are deserted by their Government.

Grace Egerton (Mrs. George Case) and Mr. George Case opened their season here on the evening of the 1st inst. They were met by a large house, and there is every reason to believe that their career in Shanghai will prove highly successful.

The barrier squeezes in the neighbourhood of Chinkiang are again coming into notoriety. An impression seems now to be prevalent among the Chinese that the intention of the officials is to prevent the purchase of foreign goods from resident foreign merchants. There is some misty idea that in process of time Foreigners will be discouraged from coming hither in person; they will send goods, and native merchants will occupy our stately hongs. This I may remark is to be the Chinese official millennium.

From Hankow we hear of the opening of the tea season on the 24th ult. at Tls. 31 to Tls. 34, the equivalent of prices 3d. to 4d. per pound in excess of London quotations by last mail for similar chops of last season's growth. The *Fusiyama*, which arrived on the 1st inst., brought down 4,000 chests, and reported that the *Erl King* and *Agamemnon* had some cargo engaged, but that the sailing vessels had done nothing. A report has got about that 70,000 chests have been settled at a reduction of Tls. 3.

From Ningpo we hear that there is an advance on last year's prices for Ping Suey leaf. This is due principally to the competition. The prices paid have been 33 to 35 dollars, or about Tls.37 to 30 per picul laid down in Shanghai.

From Chefoo the attempted murder of a German employed by the Taoutai as a detective is reported. He lies in a very precarious state. His occupation at once suggests sufficient reason for the deed.

Last American mail brought the news that the Hon. J. Ross Browne, United States Minister to Peking, is to be succeeded by Mr. W. A. Howard, of Michigan.

Li Hung-Chang has been advanced to the dignity of *Tsai-hsiang*, a Cabinet Minister, and on the strength of it several congratulatory poems have been addressed to the great man's mother, who is now in her seventy-first year. This old lady has two sons, Governors-General (of the two Hu, and of Chekiang and Fuhkien respectively). Two more are Taoutais, and one holds a very important military command. One of the addresses presented to the venerable Madame Li is thus translated by a writer in the *Courier* :—

"Noble lady! eight-bearer-borne;
Relict of one distinguished;
Mother of many sons;
Venerable in years, of family famous;
Exalted! having in one
Chief of soldiers and Minister of State,
Wondrous attainment of a son!
Wondrous of a younger son!!"

---

(FROM ANOTHER CORRESPONDENT.)

SHANGHAI, June 3, 1869.

The most exciting topic of discussion here at present is the new policy enunciated by Her Majesty's Government in the Formosa difficulty. The information conveyed to us by the mail of the 9th April that a humble apology was to be tendered to the Chinese for giving them a good thrashing, which they richly deserved, was received here with mingled amazement and incredulity. The entire ignorance of the Foreign-office as to the circumstances of the case is positively disgraceful, and the cockney self-sufficiency and ignorance with which the so-called leader of public opinion at home comments on the case is not creditable.

The real circumstances, which have been fully published in the local press, may be shortly stated. An attack was first made upon a Mission station in Formosa, which was destroyed, and several natives killed and injured. Afterwards a lot of camphor, which had been purchased by an English merchant, was seized and confiscated by the Mandarins, on the ground that it was contraband, contrary to treaty. Other outrages were perpetrated, and an attempt made to get the Consul into an ambush and murder him, on the pretext of going to see the delinquents punished. Finally at an interview the Mandarin struck the English Consul with his fan on the knuckles. Negotiations went on for *nine months* without obtaining any redress, and eventually a high officer was sent over from Foochow by the Chinese Viceroy there, to try and settle the matter. The Consul acted on his own responsibility, but disapproved of the indemnity exacted by the naval officer as prize money or indemnity. Sir R. Alcock also disapproved of this, and ordered the money to be returned, and recalled the acting Vice-Consul for not waiting till Mr. Swinburne, the Consul, arrived to arrange the matter. Both those acts were done before any orders came from home, so that the only thing we have to thank the Home Government for is the "humble apology." The tendency of thus acting is almost sure to bring on further complications, unless the Chinese take it in the light of a joke, which it is just possible they may do.

*The Times* says :—"A mission-house was attacked, a gunboat was naturally at hand, and the Vice-Consul *immediately* called upon the commander to demand adequate reparation;" the real fact being that it was only after a considerable time and a further series of outrages that satisfaction was obtained by force of arms, after all other means had failed. *The Times* presumes that, "as representing the whole Empire, the Chinese Government is responsible for the acts of all its subjects," the fact being that the Chinese Government has very little control over its own subjects, and does not hold itself responsible for their actions, which it professes its inability to curb. If we are to wait for the due punishment of offenders till the Central Government do it, we shall have to wait a long time. The missionaries, for any good they do, might as well be at home; but that would not answer the people at home, who think they do good by sending them out here. The expedition up the Yangtsze Kiang has been most successful, and was well received by the people. They found the river navigable a considerable distance above Hankow, but a detailed report will doubtless be published on their return.

The U.S. ship *Piscataqua* has left this port for Japan. The tea ships are moored in tiers opposite the town, in readiness to load the new season's produce, which it is to be hoped may turn out more profitable than last year.

The propriety of vessels coming to China from England during the N.E. monsoon, coming round to the southward of Van Diemen's-land, and to the eastward of New Caledonia, instead of the eastern passage, *via* Manila, has been lately suggested. Several ships, and notably the *Thermopyla*, have made a voyage to Australia, discharged a cargo there, taken in another, and come on here, arriving in China before the vessels which left England direct for China at the same time. This goes to prove that the delay caused by light airs and calms in the narrow seas might be avoided by taking the outer circle, where a fair wind can be calculated on, and the destination reached sooner. This is well worthy the attention of shipowners at home, who are deeply interested in the duration of the voyages of their respective ships. The land-renters' meeting has just taken place, and the municipal budget showed a large surplus, so that a proposal to reduce the taxation was carried. On the whole Shanghai is well governed, and very little crime is committed. I have not heard of a murder since I came to reside here, and petty thefts seem the only offences brought before the Courts, with occasional drunken sailor cases. The "sink of iniquity" case is a puzzle to every one here.

Mr. Horatio Nelson Lay has gone to Peking, and speculation is rife as to his object in proceeding there.

I observe that the Home Government take credit for the present quiet state of affairs in China, as being the result of their policy, while we are aware here that it is the result of the wholesome

Digitized by Google

lessons the Chinese have received before the orders for Britannia to eat humble-pie had arrived.

News has just arrived here that Mr. Ross Brown, United States Minister, is to be superseded by a newrman from home, owing to the change of President. Mr. Ross Brown is thought more highly of here than Mr. Burlingame.

The Chinese are now running three steamers on their own account, purchased recently, viz., *Prince Kung*, to Foochow; *Dragon* to Tientsin and Newchang, and *Fenella*, on the coast. This is only a beginning; but in addition they are large shareholders in the Hankow steamers. The thin edge of the wedge has entered, and bright days are yet in store for China. In addition, the Chinese Government have numerous steam gunboats, and the Imperial Customs also. Who can therefore say that the Chinese people are not willing to progress? It is the Government which bars the road, not the people—Burlingame to the contrary, notwithstanding.

The mails to Japan are in future to go to Yokohama direct from Hong Kong, without touching at Shanghai. This is an improvement.

It is reported that the "Tsung Le Yamun" has demanded that Mr. Alabaster should be prosecuted after the manner of Governor Eyre, for his share in the Swatow affair. Who can now say that the Chinese are not imbibing Western ideas?

## FOOCHOW.

A Foochow correspondent writes:—"You will recall that, a few weeks ago, I wrote in regard to the high freshet which then prevailed. Contrary to expectations and the welfare of farmers, the freshet is upon us again, nearly, if not quite, as high as formerly. The paddy fields in this vicinity are overflown, and boats go now where ordinarily is dry ground. The foundations of many houses are submerged from one to several feet. If the flood continues for many days the crops will suffer materially. For the last week or so members of firms, tea-tasters, &c.—some late from England, and some from Hong Kong only—have arrived here in considerable numbers. The market for teas will probably soon open."

## FORMOSA.

From Formosa we learn that there is local trouble at Gauchai, a place about one hundred miles north of Takow. The inhabitants shut their gates against the new General-in-chief, on his going up with a force of Honam braves to attempt the capture of some people who had been doing a little quiet piracy. Report says he was thoroughly defeated in trying to storm, but that on the arrival of the Anping governor with more men a settlement was come to, and the place was nominally taken, some men being executed. (Qy., the pirates.) This place is always giving trouble, and is a very hotbed of piracy. It is a pity that the general was not more successful, but the native merchants appear to look upon the expedition as a failure.

Mr. Gibson, H.M. Consul, is still at Takow, and will, we believe, not move until relieved. We trust he will not go until Leong Taoutai is removed, according to the promise of the special commissioner. The latter is still at the Yamen, however, and since the death of the old Fu has actually resumed his duty, although Foreigners do not, of course, recognise him. The new Fu, general and other officials appear, from all we can learn, to be good men, and anxious to get on well with Foreigners.

## AMOY AND SWATOW.

A correspondent at Amoy points out that the Customs at that port have claimed double tonnage dues, in the case of a vessel, which had already paid them, being sold. It seems that a Spanish subject, Don Mariano, bought the Dutch barque *Padang Panjang*, from Messrs. Tait and Co., and obtained from his Consul a sailing letter for her to proceed to Havanah under the name of the *Villa de Comillas*. Upon this the Customs claimed a second payment of tonnage dues before granting her clearance. The amount was paid under protest, and the matter has been referred to Peking.

The following protest has been made by merchants at Amoy to H.B.M. Consul on the subject of the exportation of coolies in vessels belonging to non-treaty Powers:—

Sir,—In consequence of the abuses connected with the shipment of coolies from this port, in vessels belonging to countries which have no treaty with China, the undersigned merchants of Amoy have resolved that the Foreign Consuls here be requested to make representations to their ministers at Peking, for the purpose of preventing the further introduction of an illegal coolie trade at this port, or the exportation of coolies to the Chinchas or other objectionable islands.

From affidavits made before H.B.M. Consul, and on the evidence of the Commissioner of Customs, it appears that coolies have lately been kidnapped and sold to emigration agents, and a continuance of such proceedings will make the name of Foreigners odious to the Chinese.

If the standing regulations binding on all subjects of Treaty Powers were enforced, and the Chinese authorities would strictly forbid all vessels of non-treaty Powers to carry coolies or emigrants to Foreign ports, these abuses would cease.

If, however, vessels under the Central American, Siamese, or other flags are allowed to carry coolies, the regulations binding on them should be assimilated to the most stringent of those now enforced on Foreign vessels of Treaty Powers, which are placed at a manifest disadvantage by the facilities allowed to other vessels, bound by none of the restraints which in their case are deemed right and necessary.

## HONG KONG.

The news from Hong Kong by the present mail extends to June 9. The French outward mail of April 15 reached there on the 27th May, and the English of April 23 on the 2nd June, the latter with London telegrams to May 15. By the Pacific line letters had been received from New York to April 23, and telegrams to May 4. The following summary of news is chiefly from the *China Mail*:—

The *China Mail* publishes the following paragraph (extracted from the *London and China Express* of April 9), surrounded with a deep mourning border, and in a subsequent issue condemns the action of the Ministry as aiming a death-blow at European prestige in China:—

"CHINA AFFAIRS.—Lord Clarendon has announced that Government disapproves of the recent retaliatory measures in Formosa. The naval operations are censured, the Vice-Consul who instigated them is to be removed, the indemnity money repaid, *and an apology offered to the Chinese.* This most disgraceful course is warmly applauded by *The Times* and the Liberal press, but strongly opposed by all who have any real knowledge of China, and are not biassed by party prejudices."

The Hong Kong Association is apparently dead. "What has become of the Hong Kong Association?" is a question which is beginning to be asked both in England and this colony. Its chairman and committee are apparently of opinion that nothing will more conduce to the benefit of local interests than a state of "masterly inactivity." Subscriptions have been collected—with what object is not very clear—and the Association which was to confer such benefits upon the distressed colony apparently considers that its great object is achieved. *Laborare est orare* is a motto which the Association has evidently dealt with Chinese-fashion by reversing it. Prayer (of that ostentatious character which is entirely secluded from the public eye) is doubtless indulged in with the full expectation that the results usually attending labour will follow. But meantime people in Hong Kong and in China generally are getting impatient. Curious rumours are in circulation that the members are afraid to meet lest discussion should expose the weakness of their arguments, and, worse than that, the indecision of themselves. There is plenty to talk about and plenty to act about; but, except in a general dislike of taxation, and a general desire to see it very much diminished, there is no unanimity. The Association is, for political purposes, a simple collection of mutes, and the public are intensely chagrined to find that the early prophecies made of lame argument, blameable delay, and singular indifference to the avowed objects of the Association on the part of its members are but too fully vindicated. Its first public act was to send home a memorial, feeble in tone, and, despite all warnings, too late to effect its object. Its last act is to sit down calmly under aspersions upon British policy and British honour in China without a word in reply. The recall of Mr. Gibson has excited some little comment and feeling on the part of the public. But the "Association" shows no sign. Where is the chairman? What are the committee doing? We pause (and are likely, we fear, to pause for a long time) for a reply.

We congratulate the Hong Kong Association upon the brilliant success it is achieving in the way of repressing injudicious comments on China matters; for of course members at home can scarcely be expected to believe that there is anything worth talking about when those on the spot associated for the express purpose of talking and acting are silent and inert. Our congratulations are nevertheless sincere. To sit upon the safety valve does away with a great deal of disagreeable noise no doubt, but hardly conduces to safety from explosion. The dead weight and laziness of the Hong Kong Association is overloading the escape through which public feeling, as regards China, might find harmless vent, and some day there will be an explosion. *The* China debate yet to come will be one of the debates of the day; and, convinced as we are that war *must* come, we are not sorry to see the Foreign laziness of China and the selfish peace policy of those at home combined in the one object of putting off, and so really hastening, the evil day.

We are glad that we are at last enabled to announce the arrival at Hong Kong of the Austrian frigate *Donau* and the screw corvette *Friederich*, carrying the expedition to Siam, China, and Japan. Possessing, as Austria so markedly does, the friendly sympathy of Great Britain in this praiseworthy undertaking, the members of the expedition are likely to obtain whatever aid or hospitality it may lie within the power of our officials to afford. Those who remember the satisfactory results, in a literary way

Digitized by Google

at all events, of the *Novara's* voyage, will be glad to learn that the painstaking and able compiler of its history is again in China, for the purpose of "taking notes," and this time even more fully and efficiently assisted than on the former occasion. The following is the list of gentlemen to whom is confided the record of results:—On board the *Donau*, which carries the flag of Admiral Baron von Petz, Minister Plenipotentiary and Ambassador on Extraordinary Mission to the Courts of Siam, China, and Japan, with Chevalier de Wipplinger, Flag Captain commanding the vessel, and Baron Benko, Flag Lieutenant and Aide-de Camp to the Admiral are: Dr. Scherzer, Principal Civil Officer of the Mission, the Chief of the Commercial and Scientific Department of the Expedition; Mr. de Calice, Consul General for China and Japan, with Messrs. Hengelmuller and Schlick, Chancelliers of the Consulate General in China and Japan; Baron Herbert, Chancellor of Legation, and Baron Trautenberg, Secretary of Legation; Baron Ransonet and Mr. de Bernath, Attaches; and Mr. Pfisterer, Secretary to Dr. Scherzer. On board the *Friederich*, commanded by Captain the Chevalier Max de Pitzer, Hen Victor Schönberger is Commissioner for the department of hardware, iron goods, and glass; Dr. Sirsky, appointed to make investigations regarding silkworm breeding. Dr. Schmucker, for the department of Chemistry. Mr. Arthur Scala, for the department of textile industry, spinning, and weaving. Mr. Czerey and Baron Kaas are respectively commissioners, the former for investigating the commercial capabilities of China with regard to food products, insurance, &c., and the latter for general statistics. Mr. Xantois (Director of the Pesth Museum and Zoological Gardens) is deputed to collect zoological specimens, &c., in China and Japan; while, finally, Mr. Burger is the photographer of the Expedition. The *Friederich* and *Donau* will, I believe, probably remain here only about a week. They will then proceed to Shanghai, where the former vessel will remain, the *Donau* proceeding northwards to Taku to enable Admiral Baron Petz to conclude the treaty with China. Thence the *Donau* will continue her voyage to Japan and South America, while the *Friederich* will probably again visit this port.

It is with much pleasure that we learn of steps having been taken by a number of influential Chinese resident in the colony to remove the disgrace of inhumanity hitherto resting upon their countrymen, by forming an hospital committee with ample funds at its disposal to at once commence operations. Mr. Ho Asik, of the Kin Nam Hong, is named as chairman, his associates being some twenty in number. That they are thoroughly in earnest may be believed from the fact that they guarantee from ten to fifteen thousand dollars by way of commencement, trusting to add to that sum by a general subscription, which is shortly to be opened. To this the richer Chinese and many Foreign firms will, it is believed, be quite willing to contribute in more or less proportion, and money devoted to such a purpose will not be ill spent.

We learn that complaints have been addressed to the British authorities by the Chinese Government with respect to certain alleged proceedings on the part of two gentlemen belonging to the American firm of Russel and Co.,—Messrs. Barbour and Stevens, who lately proceeded from Canton to Shanghai overland. It appears that the journey performed by these gentlemen through the Province of Kiang-si was achieved at the expense of the local mandarins, to whom the impression appears to have been conveyed, in some unexplained manner, that the travellers were British officers (!) ordered to join their Legation at Peking, and that in this capacity they were entitled to be provided with official means of transport. What can have led to such an extraordinary hallucination can scarcely be conjectured.

A notification which appears in the *Government Gazette* requesting tenders for the supply of telegraphic posts is a satisfactory indication that the Government has at last determined upon utilising the facilities afforded by electricity for keeping the outstations of police in immediate communication with the central office. None will grudge the outlay necessary for such a purpose, which will confer more real security upon residents in the Colony than the enlistment of hundreds of the dumb and turbaned monstrosities which, under the name of Sikhs, now afflict our highways and byeways (or rather don't afflict them when such a course could be of the slightest use). As persistent advocates of the idea we are glad to see that our views have been adopted; and besides it will be the beginning of telegraphic communication for public use in China.

We (*Friend of China*) hear from Macao, under date the 20th ultimo, that Messrs. Dent and Co.'s old book-keeper, Mr. Loureiro (quondam proprietor of Jessfield and much other valuable property in Shanghai), has been released from the durance to which he was subjected, consequent on his inability to make the books of the firm exhibit proper balances. But we also hear from another party that the release has not actually taken place, though, by a telegram from Lisbon, there can be no doubt of the order for release being on the way, a telegram stating that the despatch had issued from the proper office having already been received.

The British Consul at Saigon has forwarded a despatch to the Government of this colony stating that the French Government have granted for a period of forty years, to Messrs Heard, Kresser, Pollard, and Parker, the exclusive right of telegraphic communication through Cochin China, between Europe and India (through the existing system of Indian Telegraphs,) and Hong Kong, China, Japan, Manila, Singapore, &c. The despatch also states that the Consul has communicated this fact to the Secretary of State, and the Consul has forwarded for the information of this Government a copy of the concession.

The City Hall is fast approaching completion. It will not, however, be formally inaugurated until the arrival of the Duke of Edinburgh, in October next.

## PHILIPPINE ISLANDS.

### MANILA.

(FROM A CORRESPONDENT.)

On the 10th of May the reformed tariff was officially published, and from that date came into force. In the preamble of the decree by the Supreme Government most liberal views are expressed, and the tariff itself is based on liberal ideas. Unfortunately these views are not likely to be carried out further than explicitly laid down in the tariff by the Custom House officials, who are constantly giving proofs of their little-mindedness and anxiety to entrap parties. Frequently may be seen advertised at auction articles seized for some trivial mistake, the total value of which does not amount to one dollar. It is to be hoped that the newly-named superintendent of trade will carry out the views expressed in the above preamble, in order that he may stop these petty tricks, which occasion an enormous amount of trouble to importers, and no benefit to the exchequer. One great relief will be felt from the entire suppression of export dues, the non-interference of the carabineers with exports; this corps has been the bane of both importers and shippers; with the latter they are now, one may say, extinct, but importers will still have to battle with them; these, the petty annoyances of Custom-house officers, and the extra expenses of goods having to be landed and stored at the Custom-house, are more than the value of the 7 per cent. duties levied on most articles imported, and I am sure that importers would prefer and would consider it a less tax having to pay ten per cent. on true value of invoices if the Custom-house could be done away with. In two years hence the differential duties between goods imported by foreign or Spanish flag are to be entirely done away with, and it is likely other liberal reductions will be made in the tariff, and it is to be hoped the Madrid authorities will see by then that it will be a greater advantage to commerce and a gain to the Exchequer to make Manila a free port entirely, instituting instead of duties on importations a stamp tax on bills of lading, exchange, &c., as in Hong Kong and other parts. In the new or reformed tariff, the mode of levying dues has been in part a copy of the French Customs; all piece goods pay duty per kilogramme instead of measurement, and the kilogramme is followed wherever practicable. The suppression of tonnage dues will undoubtedly cause many vessels seeking to call in here, which hitherto have been frightened away by having to pay these high tonnage dues.

I send you a list of the principal changes in the tariff above referred to:—Abolition of export duty; abolition of tonnage dues of all kinds, in place of which a light duty will be levied on cargo discharged. The differential duties on goods have been reduced 50 per cent., *i.e.*, goods formerly paying 7 per cent. per Spanish and 14 by Foreign flag, now pay 10½ per cent. per latter. In two years hence the flags are to be assimilated. Formerly, goods arriving in Spanish bottoms from Europe, Singapore, and China paid 7, 8, and 9 per cent. respectively, now they will pay 7 per cent., irrespective of the port of loading. Protection duties have been reduced 50 per cent., *i.e.*, goods, as wines, &c., formerly paying 40 per cent. in Spanish, and 50 per cent. in Foreign bottoms now pay only 23½ per cent. and 28¼ per cent. respectively. Foreign vessels upon taking the Spanish flag will now pay, if under 100 tons, six dollars and a-half per ton; from 100 to 300 tons, five dollars per ton; over 300 tons, two dollars and a-half per ton; iron vessels of any size, two dollars and a-half per ton. The ton is total measurement and one cubic metre. Owners of Spanish vessels are now at liberty to sell or mortgage the same to Foreigners.

### ILO ILO.

Universal regret is felt at the death of H.M.'s Vice-Consul of Ilo Ilo, Nicholas Loney, Esq., which occurred on April 22 last. Mr. Loney died of fever, brought on by privations suffered in a scientific excursion up the Mountain of "Canlaon" or "Malaspina," never before penetrated by any European. Mr. Loney was beloved by all he came in contact with; Englishmen, Spaniards, and natives equally reverenced him, and their respect was fully shown at his funeral, which was attended by everyone, from the Governor of the island down to labourers of the most humble class; indeed, to such an extent, that a steamer arriving on that day could not get one man to help the crew to discharge her cargo. From the first day of his illness great numbers of people crowded his residence, offering their services in any way which might help to alleviate his sufferings. Mr. Loney to his countrymen was kind, amiable, and generous, and all Spaniards that knew him spoke of him as a "Cumplido Caballero," while the natives considered him the height of an honourable merchant. His literary and scientific contributions to a local paper here were always perused with pleasure, and there is no doubt of his being the principal cause of the recent wonderful increase in the com-

Digitized by Google

merce of the islands of Panay and Negros. Mr. Loney arrived at Manila nineteen years ago, and was named H.M.'s Vice-Consul at Ilo Ilo in 1856, since when, excepting a visit to Europe and a few months as Acting-Consul at Manila, he has fulfilled his duty to the satisfaction of all who came in official contact with him. Mr. Loney leaves a disconsolate widow and two children, and brothers to whom the loss can never be replaced.

## STRAITS SETTLEMENTS.

### SINGAPORE.

Dates from Singapore are to the 18th June. Since the departure of the previous steamer the outward mails of 7th and 13th May had been received. The *Straits Times* gives the following summary of news:—

There has only been one meeting of the Legislative Council since last mail left, at which the Fire Bill was under discussion. His Excellency the Governor, with Lady Ord, Private Secretary and Aide-de-Camp, left this for Java, in the colonial steamer *Peiho*, on the evening of the 11th June, and will, it is anticipated, be absent for about a fortnight. His trip, it has been stated, is undertaken under instructions from home, and with a view to a revisal of the Treaty of Holland, regarding which, and its bearing on the position we are entitled to hold with the native rulers on the North Coast of Sumatra, there have been so many disputes. It is somewhat late in the day now to attempt to remedy the blunders committed by the Treaty of Holland; but if his Excellency's trip will have no better result, it will at least put a stop to the continual bickerings which have existed on the question heretofore. The intelligence of the promotion of the Governor to the military rank of Major-General, and of Colonel Macpherson to the local rank of Lieutenant-Governor of the Settlements, was received by last mail.

The captain and a portion of the crew of the tea clipper *Coral Nymph* arrived on the 4th June, that vessel having become a total wreck on a coral reef in Gaspar Straits; the rest of the crew have arrived since from Mintok. The *Coral Nymph* was bound to Shanghai with a cargo of coals. A court of inquiry has been held at this place to investigate the causes of the loss, and Captain Winchester, the master, has been acquitted of all blame and his certificate returned to him. Great fears are entertained for the safety of the British India Company's steamship *Cheduba*, which left Calcutta on the 14th May, and had not arrived at Rangoon or been heard of otherwise up to the 3rd June, when the last Burmah steamer left. Her passengers include General Faunce and other officers of the Indian army, also several residents of British Burmah. The passage from Calcutta to Rangoon should only occupy four days.

With reference to the reception of the Duke of Edinburgh, the *Straits Observer* remarks:—"It would be an act of abject folly, under present circumstances, for the Legislative Council to grant a vote to Sir Harry Ord, *to* enable him to make a grand display towards his Royal Highness at the expense of the colony. It would be tantamount to an acknowledgment that his Excellency was the true exponent of public opinion, instead of being its regular antagonist. The relations of the residents and the Executive are daily assuming a more hostile form, and the state of the exchequer betokens something like insolvency at no distant date. Already, the approaching visit from Prince Alfred has been made an excuse for hurrying on the works of the new Government house at enormous cost, and we believe that it is contemplated to apply for a further grant for our royal guest's entertainment. Our experience of gubernatorial measures hitherto has not been such as to imbue us with confidence in an economical and effective disbursement of our funds. It is the better and more manly course to reject at once all overtures for a special grant, and to determine that the Duke of Edinburgh shall be really, as well as nominally, the guest of the colony honoured by his presence. It is not much beyond a hearty welcome that we can extend to him, supplemented by a few amusements to relieve the *ennui* of official boredom. The funds can easily be raised by subscription, and administered by the men selected for the purpose by the mass of their fellow-colonists. If the Governor, who, as the Queen's representative, should be the right person to receive the Queen's son, will join in with such a Committee, he will go far to show that his motives are not limited to those of personal aggrandisement, but are sincerely devoted to the interests of the people under his charge. The opposition which his high-handed courses have engendered would be temporarily silenced, and we should be glad to find excuses for shortcomings which were the fault of the head and not of the heart. Let the people receive Prince Alfred, with or without the assistance of his Excellency! If the former, so much the better for all, and a heavy blow to much heart-burning. If the latter, then we must take the matter in our own hands, for our own respect and the honor due to our Queen's son."

The following is also exstracted from the *Straits Observer*:—

The somewhat meagre report of the interview between Lord Granville and the Straits Association, regarding the leading grievances of the colony, shows, at any rate, two things very clearly. The first is, that our friends at home are not slack in fighting the battle; and the second, that the Colonial Secretary is not inclined to turn a deaf ear to our well-grounded complaints. Already a good result has been arrived at by the exertions of the Association, and a rebuff of no ordinary magnitude been administered to our Governor and his Executive adherents. Sir Harry Ord will never have a chance of hoisting his beloved blue ensign on the steamer which he so royally ordered at out expense, but must remain content with the humbleness of the *Peiho*. The saving of $70,000 is in itself no small matter, but what we particularly rejoice at is the assurance afforded by the Colonial Office against selfish extravagance and high-handed arrogance. When the Governor wanted a steamer and brought his requirement before the Legislative Council, he got the best that could be procured. But when his insatiable love of display tempted him to throw away Colonial funds unauthorisedly, then the *Deus ex machinâ* stepped in in the form of Lord Granville, and forbade the waste. This example alone shows that in dealing with our grievances the Colonial Secretary requires only to have them fairly stated by some competent and responsible body, who shall have thoroughly satisfied themselves beforehand of the justice of their case, and whose standing shall guarantee that no idle and frivolous grumbling shall occupy the public time."

### PENANG.

(FROM A CORRESPONDENT.)

A very interesting insurance case came before the Vice-Admiralty Court at Penang on the 4th June. It appeared that the British ship *Spirit of the Deep*, Captain J. Hewitt, left Penang for London on the 24th May, 1867, laden with a cargo of tin and gum benjamin, and shortly after her departure struck on a rock called Battu Buroo, about three miles from the coast of Acheen (Sumatra), in the channel known as the Malacca Passage, and sunk there. The captain and crew proceeded on to Europe in a passing vessel, and the London insurance companies (Lloyd's and others) paid up the claims against them on the ship and cargo. The insurance companies desired every effort to be made to recover the cargo, and two expeditions were sent to the spot from Penang, but were unsuccessful. In the present year several persons from Penang and Singapore proceeded to the wreck and recovered large quantities of the tin, &c., which they very foolishly brought to Penang, with the marks and names of several local firms on them, which firms had shipped them on board the *Spirit of the Deep*. The tin was claimed by these firms, as agents of the insurance companies, and the salvors were offered a moiety as salvage, but they refused to accept it, and claimed the whole as their property by reason (as they allege) of their having obtained leave from the Rajah of Acheen to dive for the tin and gum benjamin, on condition that they gave him half the recovered property. The agents at Penang for the insurance companies, contended that the property in the cargo which bore their marks could not be changed *without condemnation* by a neutral State, and adjudication must be such as is recognised by international law as a regular condemnation of the *res*. The matter came on for argument on an appearance under protest, and the Judge (Sir Wm. Hackett) was of opinion that he must overrule the objection to the jurisdiction, but as it was a case of considerable interest to all concerned he would deliver judgment on some future day. I hear that the value of the property brought to Penang is about 60,000 dols. The case has greatly excited the good people here, as a large portion of the tin was surreptitiously imported into the island and resmelted; in one case the salvors were caught *flagrante delicto*. The case is of some interest to the whole mercantile community, as also in a political point of view.

(FROM OUR SPECIAL CORRESPONDENT.)

Although Penang increases in mercantile importance, the sanitary condition of the settlement does not keep pace with the improvement in other respects. The Government and the residents seem very well agreed on this point, for the neglect and want of proper arrangement is quite as prominent in some of the houses and godowns as in the public streets. Penang has no street lamps. Beach-street—considering it is the great centre of traffic, and that it contains all the merchants' offices and stores—is in a disgraceful state, the stench from the open sewer in front of the shops being intolerable, and a discredit to any civilised Government. The antiquated buildings may be a source of pride to old established firms, but they sadly jar upon one's ideas in 1869, and the sooner they give place to structures of a more modern character the better for the general reputation of Penang. When the merchants do undertake this rebuilding process it is to be hoped they will make strong efforts to erect such a sea-wall as will form what is known in China as a "Bund;" for the present "tag-rag" appearance of the shore, although certainly in harmony with the existing condition of Beach-street, will not suit anything with a new face. The Government should be called upon to aid in the construction of this Bund.

There is unmistakably a "Portuguese" sort of spirit pervading Penang—not in mercantile operations—but in the town generally. The Fort (so called), for instance, is in a most neglected and inefficient condition, being without any defence, and to have European artillery in such a place is one of the greatest burlesques imaginable. It possesses no material for exercising the men in gun practice, and no small field pieces—the most indispensable weapon in the event of a riot. The irregularity of pay to the officers of the

Digitized by Google

rtillery is another reason why the artillery should be withdrawn, the pay and allowances being about half that of the regular Indian regiments. If the Secretary of the War Department could but land here and see how this works to the injury of the officers he would not withhold such an allowance as would put the English officers on a par with those of the Indian service. The appointment of Mr. Bradford (Crown solicitor at Mauritius) to the post of Registrar of the Court at Penang is considered by many a great injustice to the present Acting Registrar, Hon. C. B. Plunket, who is an old Straits servant. Mr. Noble and Mr. Upward, of the Hong Kong and Shanghai Bank, have passed here, *en route* for the Calcutta and Bombay agencies of that Bank.

The Government of Penang is on a very unsatisfactory footing, the appointments being too much under the control of the Singapore authorities, which involves a complication of the work, accounts, and responsibility, constituting a very bad specimen of the "red-tape" system. From the Lieutenant-Governor—Colonel Anson—downwards all the duties have to be discharged subject to the heads of departments in Singapore, which, in the end, of course places the responsibility nowhere Colonel Anson has no more power than the turkeys that walk in his yard. Whatever he or any other official suggests is snubbed by their superiors at Singapore; and to this may be traced in a great measure the sanitary shortcomings of the town.

Penang is rich in old residents, the palm resting with Mr. Ibbetson. who came out in 1805, and has remained here ever since, with the exception of the time occupied in occasional visits to England. For some years Mr. Ibbetson was Resident or Governor, for which he now enjoys a pension of £600 per annum. Although he has passed his eightieth year he is still in full possession of all his faculties, is enjoying good health, and is full of interesting anecdotes of the by-gone days of the East India Company. His wife died many years since, and he has three children, one settled in England. The Protestant religion has been sadly neglected in Penang, but the present chaplain, Mr. Moreton, seems determined to make efforts to redeem the character of the community on that score. The result of the neglect is that Penang an English settlement, is three-quarters Roman Catholic; and who is to blame? The people have been born and bred here, and unquestionably we should have seen at this day three-quarters Protestants had we shown any common attention to the matter.

The proposed annexation of territory at the Dindings is in abeyance, unless the Rajah will concede a larger slice. Governor Ord has decided that it is not worth attention. The iron ship *Dharwar*, belonging to Messrs. John Willis and Sons, on board of which vessel a fire occurred recently, is now nearly discharged. A survey was held on board on the 31st May, when part of the cargo found to be damaged by fire and sea water was recommended to be thrown overboard, and the remainder discharged. The vessel had some 1,500 tons cargo on board when the fire was discovered, most of which was insured.

The sugar estates in Province Wellesley, on the opposite shore, are mostly in a thriving condition. The Right Hon. E. Horsman, who was lately elected M.P. for Liskeard, is proprietor of no less than six of these estates.

The steamer *Ajax*, Capt. Kidd, one of Holt's line, arrived from Liverpool *via* Mauritius on the 4th June, having accomplished the run in 53 days, which is the best yet recorded She has on board twelve naval officers and engineers for the China station. On her arrival in China she will, as usual, load for London, calling at Singapore and Mauritius. This line will be soon passing through the Suez Canal, and the time will then be largely reduced. It will afford a fine opportunity for passengers who cannot afford the mail rates.

# Commercial Report.

## STRAITS, JAVA, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—The market during the fortnight had been dull and inanimate, only a few sales of cotton goods having been effected. Woollens still remained as last quoted. Metals were dull. The Hopewell and Nile had arrived from London. Quotations:—Cotton Yarn: Nos. 16-24, per picul, $48 to 49; 28-32, $48 to 49; 38-42, $50 to 51. Grey Shirtings, 7 lbs., per piece, $2.40 to 2.45; 8¼ to 8⅜ lbs., $2.80 to 2.87; White Shirtings, $2.80 to 3.60; T-Cloths, $1.80 to 2.25; Velvets, Black, per piece, $8.25 to 9.60; Assorted, $7 to 8. Iron, nail rod, per picul, $3.30 to 3.60; hoop, $3.10 to 3.40; bars, $3.30 to 3.60; pig, $1.05 to 1.15; wire, $6.50 to 7; Lead, $7.50 to 7; tin, $17 to 18; tin plates, $6.75 to 7.

TIENTSIN.—The market continued extremely quiet.

SHANGHAI.—Cottons: Seven arrivals during the fortnight had added considerably to the stocks. Grey Shirtings had changed hands to the extent of 80,000 pieces, half of which quantity had been taken by foreigners for delivery at long dates, 8¼ lbs. goods being the weight chiefly sold, at prices varying from Tls. 2.2 to 2.2.5. White Shirtings were rather easier, with a small business doing. Drills had been sold at the quotations given in moderate quantities. For T-Cloths there was a steady demand, about 35,000 pieces having been sold to Chinese, the remaining portion of the reported sales being to foreigners, for arrival. Other Cottons had not attracted much attention. Woollens: Long Ells had been purchased for holding at previous prices; other Woollen Goods were not much inquired for. The sales of Orleans made during the fortnight had been chiefly of inferior goods. Metals.—Nail Rod Iron: Little or no change in prices can be noted. A few invoices of ordinary assortments had been disposed of "to arrive," but dealers were by no means anxious buyers. For Bar Iron there was a small inquiry, but no sales are reported. Lead: Heavy arrivals had rendered sales impracticable, unless at a considerable decline. Coals: At the low rates ruling in the coal market the natives had become considerable purchasers. Two cargoes of Cardiff coals had been sold to arrive at Tls. 8, and small parcels on shore at one tael higher. English not wanted. American—Sales to arrive at Tls. 11, at which rate two shipments had been placed; Tls. 11.5 had been paid for these coals landed. The arrivals had been: From Great Britain, tons 703; Australia, tons 2,051; America, tons 287; Formosa, tons 1,886;—in all, tons 4,927, of which tons 1,100 were to order. The current quotations at date of mail's departure were as follows:—Grey Shirtings, 7lbs., per piece, Tls. 1.9.9 to 2.0.1; 8.4 to 8.6 lbs., Tls. 2.1.8 to 2.2.4; 9 to 9.12 lbs., Tls. 2.7.0 to 3.2.5. White Shirtings, Tls. 2.1 5 to 3.0.0. T-Cloths, Tls. 1.3.5 to 2.5.5. American Drills, 40 yards, Tls. 4.1.5. to 4.3.5. American Jeans, 30 yards, Tls. 3.7.0 to 3.7.5. American Sheetings, 40 yards, Tls. 3.7.5 to 3.8.0. English Drills, 40 yards, Tls. 3.9.0 to 4.1.0. Dutch Drills, 40 yards, Tls. 3.9.0 to 4.0.5. Camlets, English, SS, Tls. 12 to 12.5. Spanish Stripes, per yard, Tls. 0.5.5. to 0.8.0. Medium Broad and Habit Cloths, Tls. 1.0.0 to 1.6.0. Long Ells, Scarlet, 24 yards, H H, per piece, Tls.6.5.0; Scarlet, C P H, Tls. 6.4.5; Assorted, H H, Tls. 6.5.0; Assorted, C P H, Tls. 6.5.0. Iron, Nail Rod, small size, per picul, Tls. 2.1.5 to 2.2.0; fair to good assorted, Tls. 2.2.5 to 2.3.5; Hoop, Tls. 1.9.0 to 2.0 0; Flat and Round, Tls. 2.4.0 to 2.4.5. Lead, Tls. 5.9.0 to 6.1.8. Tin Plates, per box, Tls. 4.5.0 to 4.8.0. Steel, per tub, Tls. 3.5.0 to 3.6.0. Flints, per picul, Tls. 0.5.5 to 0.6.0. Window glass, per box, Tls. 3.0.0 to 3.6.0.

HANKOW.—The manufactured Goods' market had been very dull during the fortnight. Prices of Grey Shirtings had declined to Tls. 2.0.0 to 2.0.2 for 7 lbs., Tls. 2.1.8 to 2.2.3 for 8¼ lbs., and Tls. 3.1.0 to 3.2.0 for 9¾ lbs. goods. White Shirtings were also lower, and not asked for; these were quoted at Tls. 2.1.5 to 2.3 for 56 to 60 reed, and Tls. 2.4 to 2.5 for 64 to 66 reed. T-Cloths were unsaleable. Best English drills had been sold at Tls. 4.1 per piece. American Drills, 40 yards, were quoted at Tls. 4.1.5 to 4.2. Woollens and Worsteds: Considerable sales of Camlets, especially Gentian, were reported, closing quotations for SS being Tls. 12 to 12.7. Lastings, Long Ells, Spanish Stripes, Medium Cloths, and Orleans had been little inquired for.

HONG KONG.—Messrs. Olyphant and Co.'s Report, dated 9th ultimo, contains the following:—Cotton Yarn: Sales have been very small, the entire quantity placed being embraced in two settlements, and prices obtained have been beneath the ideas of larger holders. Quotations are nominally unchanged, but dealers will not come up to these figures, as the demand for shipment is very slack, and no inducement for purchases is offering. Piece Goods: From first hands an unusually small business has been done, and in the sales reported a greater portion has been made at public auction. The considerable quantities of really fair goods placed upon the market at these public sales with the damaged have given dealers an opportunity of supplying their wants, and have consequently brought quotations lower. The Northern demand has slackened, and altogether we have a weak market to report. Stocks of 7lb. Grey Shirtings have been considerably increased, and a decline of 10 cents is noticeable; 8.4lb. have realised at auction $2.64 to 2.70 per piece, and rates at private are 2½ to 5 cents lower. T-Cloths of all weights are down 5 cents; common goods are not wanted, but there is some little demand for 6lb. White Shirtings have further receded in price, and only 54 to 60 reed are inquired for. Drills have felt the depression, and English and Dutch are rather weaker, while quotations for American are still nominal, there being none on offer. Woollens: There has been very little inquiry for this class of goods, and stocks are light, though a rise is confidently looked for by-and-by. Scarlet Long Ells show no change, while Assorted are somewhat weaker and are not wanted. Spanish Stripes are unaltered. Blankets firmly maintain last values. Lastings and Camlets, though not quotably higher, are held for dearer rates. Metals: Operations have not been large, but the market has been fairly well maintained. Nail Rod Iron is firm at previous rates. Round Bar is up 10 cents. Hoop is in short supply and wanted. Steel and Wire unchanged. Lead is higher; W.B. cannot be had under $7.80 to 8, and L.B. is held at $7.50 to 7.70. Tin has fallen $2 to 3 per picul. Tin Plates are rather weaker. Coal: The market is excessively dull, and we are unable to record a single sale as having been made during the interval; arrivals have been 562 tons English, and 3,828 tons Welsh, the greater portion of which comes to consumers. Ginseng: Settlements of 63 casks crude at $123 to 130 per picul constitute the business of the fortnight; these sales were made during the first of the interval, and latterly dealers have not been operating. Stocks not large, and importers firm holders. The following were the current quotations:—Cotton Yarn, Nos. 16 to 24, per bale, $125 to 135.50; 28 to 32, $140 to 145; 38 to 42, $140 to 145; Grey Shirtings, 7 lbs., per piece, $2.50 to 2.55; 8.4 lbs., $2.75 to 2.80; 9.12 to 10 lbs., $3.75 to 4; White Shirtings, $2.50 to 5.10; T-Cloths, $1.95 to 2.95; Spotted Shirtings, White, $2.75; Dyed, $3.40 to 3.50; Turkey Red Shirtings, 3 lbs., per piece, $2.80 to 2.85; American Drills, 40 yards, 15 lbs., per piece, $5.50 to 5.60; Dutch Drills, 40 yards, per piece, $4.95 to 5.0; Spanish Stripes, scarlet, per yard, $0.77 to 0.81; assorted, $0.75 to 0.77; Medium, Ladies', and Habit Cloths, $1.15 to 2; Long Ells, per piece, $7.75 to 8.25; Assorted, $7.75 to 8.25; Camlets, SS Scarlet, $17.50 to 18; SS Assorted, $16 to 16.75; Blankets, per lb., $0.45 to 0.59; Iron Nail Rod, per picul, $2.90 to 3.05; Round, Square, and Flat Bar, $2.50 to 2.80; Hoop, $2.95 to 3; Wire, $6.50 to 7.25; Lead, $7.25 to 7.50; Tin, $30 to 31.50; Tin Plates, per box, $6.25 to 6.40; Steel, per tub, $4.25 to 4.50; Quicksilver, per picul, $64 to 64.50; Window Glass, per box, $3.30 to 3.50; Coals, English, per ton, $9.50 to 10; Welsh, $10 to 10.50.

BATAVIA.—Messrs. Hunter, Houghton and Co. report as follows, under date 11th June:—Business has been rather quiet and rates consequently show a downward tendency. Stocks however are not large, while supplies on the way are very moderate, so that we look for higher rates ruling at an early date. Cambrics, 45 inch by 12 yards. Coarse qualities have been more asked for but prices offered are still low. No. 24's we value at f.3 to f.3.25. 80s and 36s are not so much inquired for. 15/16s best quality may be quoted at f.5.25 per piece. Shirtings White, 40 yards: These continue to be placed at f.11 to f.11.25 per piece for 45 inch, f.9.75 to f.10.25 for 40/1 inch and f.8.75 to f.9.25 for 36 inch, common qualities.

Digitized by Google

The demand is scarcely so brisk as it should be, but this is to a certain extent accounted for by the harvest being if anything later than in previous years, and with which the natives are still busy. Shirtings, Grey 38½ yards: The demand for these is rather quiet at the moment but they will be in better inquiry again soon. 39 inch 7 lbs. we value at f.7.25 per piece; 8½ lbs. at f.8.25 to f.8.50; 45 inch 8 lbs. at f.8 to f.8.25 per piece. Maddapollams, 24 yards.—In this staple there is little change to report. Dutch White, 33/34 inch, we value at f.5.25 per piece, and 40/41 inch at f.6 to f.6.25 per piece; Grey, 34/5 inch, f.5.25 to f.50; and 43/44 inch, f.6.25 to f.6.50 per piece. English White continue without alteration in value, 32/33 inch at f.3.50 to f.3.75 per piece; Grey 8 lbs. at f.3 to f.3½ per piece. Prints: Suitable descriptions, such as Green Grounds, can be placed at fair rates, say f.8 to f.8.25 per piece. Purple and Pink Pads are neglected, and can only be placed at low rates. Steam Prints, imitation Madders, would command f.5 per piece. Printed Jaconets, 9/8 by 24 yards, still remain dull, and prices very low. Dyed Madapollams, 9/8 by 24 yards, attract little attention. The only description inquired for is Orange which we cannot quote higher than f.4 to f.4¼ per piece. Dyed Brocades, 9/8 by 24 yards: These are dull of sale, and not worth more than f.11.50 to f.11.75 per piece. Turkey Red Cloth, 24 yards: This article continues very dull. English, 30/33 inch, we cannot value above f.7 to f.7.25 per piece. Drills, Grey 27 inch by 30 yards: Now in a little less demand. Best Dutch we value at f.8.50 to f.9 per piece. English at f.750 to f.8. Twist, Grey: No further advance in the price of this staple has taken place, but as holders generally are firm we look for higher rates ere long. At present we quote 40s., at f.400 to f.410, 30s. at f.345 to f.355, and 24s., at f.320 to f.330 per bale. Iron, Swedish: In supply; worth f.10 to f.10.50 per picul. Iron, English: Market oversupplied; not worth more than f.6 to f.6.50 per picul. Do. Hoop: Overstocked. We value it at f.7.50 to f.7.75 per picul. Do. Sheet, Square and Round: Some sizes are occasionally enquired for, but the article generally is very dull. Do. Galvanised Corrugated: Worth f.18 to f.19 per picul; with a very slight demand. Spelter: Is in little enquiry, and not worth more than f.16 to f.17 per picul. Zinc, Sheet: Continues dull at f.20 to f.21 per picul. Lead, Pig: The demand is improving a little, but still it cannot be valued above f.18 per picul. Do. Sheet: Extremely dull; value, f.16 to f.17 per picul. Copper Sheathing: Quiet at the moment and not to be placed at a higher figure than f.72 to f.75 per picul. Tin Plates: These cannot be valued at more than f.14 to f.15 per Box.

SINGAPORE.—The business done in Grey Goods had been large, though prices were somewhat weaker. Considerable sales of mildewed cloths had taken place, which had helped to weaken the demand for sound goods. Sales of 8¼ lbs. had been made as low at $2.75 per piece, but the greater part of the business had been done at $2.80. There had been fair sales of 7 lb. at $2.45 to 2.42½; 6 lb. at $2.12½ to 2.10; 45 in. 8 lb. at $2.80, and of 9 lb. at $3.10. Madapollams had continued in moderate inquiry at slightly lower rates; sales of 2 lb. at $21⅜ to 22 per corge. In T-Cloths the business has been moderate. The sales had been: 4¼ lbs. $1.42½ to 1.40; 4½ lbs. $1.47½; 5 lbs. $1.60 to 1.57½; 6 lbs. $1.80 to 1.70; 7 lbs. $2.15 to 2.10 per piece. The demand for Drills had been good, and the market appears bare of English Cloth; sales reported of Dutch at $66½ to 67 for 30 yards, and $94 to 95 for 40 yards per corge. White Shirtings were in some request at the early part of the fortnight, chiefly for export to Siam; but buyers had since kept away, and the finer descriptions were altogether neglected. Some business had been done in the lower makes. The sales were 64 to 66 reeds $3.12½ to 3.20; fine, $4.50 to 5 per piece. Imitations Irish Linens in good demand. Cambrics without alteration; sales of Nos. 15 to 16s at $33 to 34½, and of No. 24s at $20 to 21½. Jaconets, Lappets and Mulls, no transactions; sales reported of White Figured Shirtings, Spots, at $2.80 and 2.85, and of Brocades at $2.87½ per piece. In Dyed Goods, with the exception of T. R. Cambrics, little had been doing. Sales of Orange Shirtings, Plain, at $2.65 and 2.80, and of figured at $3.45. T Red Cambrics of all descriptions in active demand, sales large, and prices well maintained. Prints in better inquiry: Sales of White Grounds at $1.25 to 1.60 per piece, Covered Grounds at $2.85 to 3. Handkerchiefs in heavy stock, and sales could only be effected at low rates. Sarongs and Batticks altogether neglected. Sales of Grey Yarn large, though prices were barely maintained; a considerable quantity of mildewed and damaged goods having been sold at auction—18 to 24s, $115; 20s, $117½; 24s, $120; 30s, $119 to 120; 40s, $127½ to 131½ per bale. T Red Yarn in good demand, and market bare. Cotton Yarns dull, and sales at low rates. In Metals a moderate business had been done during the fortnight. Bar and Nail Rod Iron had been placed to some extent at $2.55 to 2.65 for Govan, and $2.35 to 2.47½ for other descriptions. Pig Lead sold to arrive at $6.20 net cash and $6.25 credit; a small sale on the spot recorded at $6.70. Yellow Metal in greater supply, and rates a little easier. Coals had continued to arrive in large quantities, ten cargoes English having come to hand since last mail; a cargo of 600 tons West Hartley sold at $6. Cardiff may be quoted at $6.50, but there was no inclination to do business.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—The only business done during the fortnight had been the settlement of about 300 piculs for the California market, a few parcels of which consisted of new tea, for which higher prices had been paid. The firmness of dealers, coupled with unfavourable advices from America, prevented much business being done, and quotations were quite nominal. A small quantity of the new season's teas had arrived, but stocks of old leaf remained unchanged. Quotations:—Common, $19.0 to 23.0 per picul; Good Common, $24.0 to 25.0 per picul; Medium, $26.0 to 28.0 per picul; Good Medium, $29.0 to 32.0 per picul; Fine, $34.0 to 37.0 per picul; Finest, $38.0 to 39.0 per picul; Choice $40.0 to 42.0 per picul.

SHANGHAI.—Black: No transactions had taken place. A few musters of new teas had been shown, but teas in bulk were not expected down for about a week. The few arrivals from Hankow had all been for reshipment. Reshipment on owners' account, new tea, 2,686 chests; stock, old tea, 210 chests Ningchow and 400 chests refired Shanghai-packed. Green: The settlements for the fortnight amounted to 1,803 half-chests, leaving a stock of about 4,000 half-chests Shanghai-packed tea unsold. The new Pingsuey were expected in about a fortnight.

HANKOW.—Messrs. Drysdale, Ringer and Co. report as follows under date 28th May:—Our market was opened on the 24th instant by the purchase of one chop Yung Low Toong Tea at 31 taels per picul. As the price paid was considered too high, no more business was done till the following morning, when the chops Tai Chunn and Ung Wha were reported at 30 and 31 taels per picul respectively, giving much better value than the first chop settled. Other buyers then entered the market, and at the end of the day 16 chops had changed hands; a steady business has since been done, total settlements amounting to about 84 chops, at from 22½ to 34 taels per picul. There has been very much less excitement than is usual at the opening of the market, and demand has run principally on the finest Teas, for which prices have been well maintained, but for such Teas as cannot be so classed there has been but little enquiry, and they can now be bought at from 2 to 3 taels per picul decline. Prices paid are on an average 5 to 6 taels lower than last year. The quality of the crop is not, on the whole, so fine as last year, although quite equal, if not superior, in strength. The Oanfas are very much inferior; they have not that fine quality which characterised them last season; they are, however, very strong Teas. The Cheong Sou Kye are superior to last year's growth, and we think some of the chops from this district will prove the best of the year's yield. The Yong Low Toong are about the same as last year, which applies also to the Nip Car See teas. Those from Soong Yong are fine in cup, but rather wanting in leaf; and the Loong Kongs are also wanting in this respect, but are very flavory and attractive. Musters of the Ning Chows were shown here on the 24th instant, and as they are very fine teas, and quite of a fancy class, they found ready buyers at rates equivalent to 2s. 1½d. to 2s. 4d. per lb.; about 8,000 half-chests have been offered, 6,300 of which have found buyers. Settlements reported to date: 56,000 chests, 7,000 half-chests, 6,000 of which are Ningchows. Total arrivals to date, 118,366 chests, 9,816 half-chests. Stock, 57,430 chests, 3,123 half-chests.

KIUKIANG.—Arrivals of Ningchow Teas amounted to 7,474 half-chests, known as Oolongs, which were considered inferior to similar Teas of last year. One chop of Ningchows in chests had been settled at Tls. 29—the quality of which, in water, compared favonrably with that of last season, but in leaf was considered rather poorer. One chop of Hohows was offering, and was thought much superior to like Teas of last year.

FOOCHOW.—The stock of new season's Congou had reached 170,000 chests, but no business had been done by Foreigners, and no anxiety had been shown to commence operations. Teamen were reported as pressed for money, and this fact, with their increasing desire to realise, might lead to business at any time. The quality of the new tea was disappointing. Congous had arrived from all the districts, and the opinion expressed upon them was decidedly unfavourable; the majority of the chops to hand contained a large percentage of old tea, thereby detracting very much from the flavour, and rendering them flat in the drawing. In make the teas were generally satisfactory, and apparently were less dusty than last season's: some exceptional parcels, from the Ching Wo district, were attractive in leaf and liquor, but lacking in body. The stock of Oolongs amounted to 6,000 half-chests, and in quality they were considered wanting in strength. No arrivals of Souchongs had taken place, but advices had been received from the interior of purchases at prices some five to six taels under those of last season. The few Scented Teas shown were fairly well made, but indifferently scented.

AMOY.—The arrivals of the new crop Teas had been but small, and the supplies to hand represented only some 13 or 14 chops of Congou, and 4 or 5 chops of Orange Pekoe; the quality of which was not so satisfactory as could have been wished, though the supply was not large enough to justify an opinion upon the general quality of the crop. The leaf was thought of better make, but the liquor not up to the usual standard. The market was not expected to open for some weeks. Oolongs were expected to be some three weeks later in arriving than last year.

CANTON.—The market had not opened for new season's teas. Native merchants were holding firmly for prices, equal to the extreme rates paid at the commencement of last season, while buyers evinced no disposition to begin purchasing, save at prices on a par with last home quotations, which would leave a loss to the teamen of about 8 to 10 taels. Stocks of all descriptions of Canton made teas were getting heavy. The quality of the crop was quite equal to the average of former years, some parcels were perhaps better scented than usual, teamen having had more time to prepare the leaf.

### SILK.

YOKOHAMA.—The Silk remaining on the market was chiefly Oshue, and of it there was a fair proportion of fine. Of the inferior a further considerable parcel had been returned to the interior for native consumption. Settlements were about 185 bales, and in the absence of more than nominal arrivals stocks were reduced to about 450 bales of all kinds. Prices remained unchanged. The weather continued very favourable, although rumours of damage to the mulberry trees in Oshue were in circulation. The first small lots of the new Silk were expected in 30 to 40 days.

SHANGHAI.—Messrs. Skeggs and Co.'s Circular, dated 3rd ultimo, contains the following:—Season 1868-9 has closed with a total export of 46,885 bales Chinas and 14,906 bales Japans, against 41,396 and 11,610 bales respectively in 1867-8. Advices from the interior have been less satisfactory regarding the new crop, and it is now generally estimated that the yield will be under 55,000 bales. Small hank musters have been received from the various districts, representing good quality but bad colour and coarse size; the latter fault, however, being attributed to hasty reeling. Cargo in bulk is not expected to be on this market for nearly a week yet. The probable cost in the country, as at present named, is considerably in excess of home ideas, but the native dealers appear to be sensible that a heavy decline should and may be established this year, unless influenced to the contrary by later advices from Europe or reckless buying on this side. The P. and O. steamer from Yokohama arrived here on the 1st instant with 162 bales Japans, and the present mail steamer has 38 bales Chinas engaged (old season's silk).

## STRAITS PRODUCE.

SINGAPORE.—The low rates of freight had had their influence on the produce market, and a fair business had been done during the fortnight. About 1,200 tons Gambier in all had been contracted for, at prices ranging from $3.07½ to 3.12½ per picul; latterly buyers had slightly held off, and the closing price was $3.10. Considerable purchases had been made of Basket Gambier, at $3 to 3.07½ for low No. 3; $3.60 for No. 1; and $3.90 for No. 1 in bags per picul. Black Pepper remained unaltered in price; purchases had been made at $6.80, but supplies came in slowly; about 2,700 piculs Acheen ex Hero sold at $6.35 per picul. White Pepper neglected, and $10 to 10.20 per picul may be quoted for fair ordinary. In Sago Flour the transactions had been moderate at $2.45 to 2.55 per picul; Pearl Sago had been in good demand, and considerable purchases had been made at $3.10 to 3.17½; large grain had been purchased at $3.25. A fair business had been done in Tapioca, both Pearl and Flake, at prices ranging from $4.60 to 4.80, according to quality. Rattans continued in good demand. Tin fluctuated from $29¾ to 29, and was again firmer; about 2,000 piculs had been purchased chiefly at $29¾ to 29½.

Off ST. HELENA.—June 29, County of Berwick, from Sourabaya for Rotterdam.

Advices from Capetown, dated June 19, state that some damaged cargo, ex Johanna Mathilda, Lohse, from Saigon to Falmouth, which put into Simon's Bay, April 10, leaky, was sold June 15.

## LATEST TELEGRAMS.

(RECEIVED VIA GALLE, JULY .)

### CHINA.

HONG KONG, JUNE 24.—A proclamation hostile to Foreigners has been posted by secret societies along the Yangtse River. A picnic party at Hankow has been driven away by a mob, upon the pretence that they had come for the purpose of boiling and eating children. A conspiracy has been discovered at Foochow to open another Taiping rebellion; the conspirators number, it is reported, 50,000. It is stated that several Chinese hongs have combined together to establish an agency in London. The Yangtse exploring party have returned to Shanghai.

### COMMERCIAL.

SHANGHAI, JUNE 18.—Gray Shirtings, 6½ catties, 8¼ lb., $2 20c. Cotton, Shanghai, 16 tls. Silk, moderate business; No. 3 Teatlee, 555 bales. Settlements since departure of last mail, 1,200 bales. Export to date (China and Japan, from commencement of season) 2,000 bales. Exchange on London: Bank bills, six months, 6s. 0¾d. Freights: Tea, £3 10s.

HONG KONG, JUNE 23.—Gray Shirtings, 6½ catties, 8¼ lb., $2 85c. Water-twist, 16-24, $1 35c. The Tea-markets have not yet been open either at Canton or Foochow. Total export (China and Japan), 8,000,000lb. Exchange on London, bank bills, six months, 4s. 6¾d.

### JAPAN.

YOKOHAMA, JUNE 16.—An ample apology has been made to Captain Stanhope and Mr. Robertson, Her Majesty's Vice-Consul, for the insult they were recently subjected to in being compelled to dismount before a passing noble. The Mikado's forces have commenced attacking Hakodadi, which is occupied by the rebels. Their success is expected. An earthquake has occurred at Yokohama. Little damage was done.

### TELEGRAMS VIA NEW YORK.

According to China telegrams received by way of New York (date not given), great excitement has been caused at Soochow and other cities on the Grand Canal at the prospect of a formidable rebellion. A letter has been found giving the particulars of a conspiracy to capture Soochow, Huchow, Hanghow, and Shanghai. Another outrage on Foreigners is reported to have taken place near Hankow. The British Consul and his wife were among the party attacked. The Government had promised to investigate the affair. Meanwhile the English gunboat *Opossum* had anchored at Ichang. The state of the crops in China is reported to be "desperate," though slight rains had fallen.

From Yokohama it is stated that the Imperialists have captured Hakodadi. The Mikado was preparing to leave Yedo for the purpose (so it is said) of avoiding a public reception to the Duke of Edinburgh. The depression in trade is stated to be unparalleled, and merchants are strongly recommended not to ship any goods except to order.

A Central Press telegram from New York says that information arrived there yesterday afternoon from Japan that a steamship, formerly the Confederate cruiser *Tallahassee*, has been wrecked near Yoko-

Digitized by Google

hama; twenty-two lives were lost, including the captain. Assistance was soon rendered, by which the greater part of the passengers and crew were saved. No vestige of the wreck was afterwards seen, the vessel having sunk in forty fathoms of water.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

ADAMSON—On the 6th June, at Woodside, Singapore, Mrs. William Adamson, of a son.

BROUGH—On the 8th July, the wife of William Brough, Esq., of Liverpool, of a daughter.

VOGEL—On the 28th June, at Hong Kong, the infant daughter of Mr. and Mrs. E. Vogel.

## LEGAL AND CRIMINAL.

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.—JULY 7.

(Present:—Lord Justice Giffard, Sir J. Colville, and Sir J. Napier.)

THE CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA *v.* EVANS AND ANOTHER (MACKELLAR AND CO.'S ASSIGNEES).

This was an appeal from the Supreme Court for China and Japan, which had ordered the judgment of Her Majesty's Court at Hankow in favour of the appellants to be reversed with costs, and that the respondents be paid 10,027 taels and other moneys, amounting to about £3,000.

Sir Roundell Palmer, Mr. Joseph Browne, Q.C., and Mr. Arthur Cohen were for the appellants; Mr. Field, Q.C., Mr. Arthur Charles, and Mr. Myburgh for the respondents.

The appellants were bankers, among other places, at Hankow, and the respondents, the creditors' assignees of Mackellar and Co., who were merchants at Hankow, and claimed a sum of money in possession of the Bank. The judgment was in favour of the Bank, on which there was an appeal to the Supreme Court, where additional evidence was allowed, and the decision of the Court below was reversed. The present appeal was to reverse the decision of the Supreme Court.

Lord Justice Giffard delivered judgment as follows, reversing Judge Hornby's decision:—

"Their Lordships cannot entertain the slightest doubt in this case. As regards the twenty-seven taels, the respondents must have those, but this small sum cannot affect the question of costs, nor does it appear ever to have been a matter in dispute.

"As regards the case itself, there obviously was but one contract, and one transaction, and that is detailed in the letter to which Mr. Field referred. The letter, taken in connection with the evidence, shows distinctly that there was but one contract, on the 27th of June, and that that contract was an advance of 32,000 taels in this way:—22,000 taels was to be advanced, and 10,000 taels was to be held as margin to secure certain debts.

"If those were the terms on which the advance of the 22,000 taels was made, and the 10,000 taels were to be retained, and if the whole was one transaction, as it clearly was, it necessarily follows that the 10,000 taels cannot be recovered so long as the state of circumstances is such as that consistently with the contract the 10,000 taels ought to be in the hands of the Bank. It is clear that this was the state of things at the time when the judgment was given, and that there was then no ground whatever for proceeding for the recovery of these 10,000 taels. Fraudulent preference therefore can have no application whatever, because the 10,000 taels formed no part of the bankrupt's estate, and there was not in any sense a dealing with that which belonged to the bankrupt.

"Upon these grounds, without going further, their lordships think it sufficient to say that the judgment of the Supreme Court was wrong, that the judgment of the Court of first instance was right, and that the appellants ought to have all their costs before the Court of first instance, before the Court of Appeal, and before this Court, deducting the twenty-seven taels on the assumption that this sum has not been already paid.

"With respect to the facts raising the question of fraudulent preference, it is unnecessary for their lordships to express what their opinion would have been had the dealing been a dealing with the bankrupt's estate; suffice it to say that the learned judge of the Supreme Court has laid down the law more widely than it ought to have been laid down, and in a way to which their lordships cannot assent.

"Their Lordships will, therefore, humbly report to Her Majesty that the judgment of the Supreme Court for China and Japan ought to be reversed with costs, and in lieu thereof that the appeal from the Inferior Court to the Supreme Court ought to be dismissed with costs, and the judgment of the Inferior Court confirmed, deducting the 27 taels if the same has not been paid.'

VICE-CHANCELLORS' COURTS, JULY 22.

(Before Vice-Chancellor Sir J. STUART.)

RE THE LONDON, BOMBAY, AND MEDITERRANEAN BANK (LIMITED).

Mr. Dickinson, Q.C., Mr. Prendergast, Q.C., and Mr. Everitt appeared in this matter on behalf of the Bank of Hindustan, China and Japan, the Union Bank of London, and other creditors of the London, Bombay, and Mediterranean Bank—whose debts amounted in the aggregate to £78,000—in support of a motion for an order to remove the present liquidators of that company, and to appoint a Mr. Archibald Stewart in their stead. The order to wind up the company had been made so long ago as the 20th of July, 1866, and the liquidation was not yet concluded.

The Vice-Chancellor, after some little discussion, and intimating it to be his opinion that the appointment of some one responsible person, some creditor of the company, was the best course to adopt, but expressing a doubt whether he should appoint Mr. Stewart, directed the matter to be brought before him in Chambers on Tuesday next.

ERRATUM.—In our issue of July 5th, under this heading, the case of "The Chartered Bank of India *v.* Wehner" was wrongly described as "Wehner *v.* The Chartered Bank," thus reversing the relations of plaintiff and defendant.

BANKRUPTCY IN THE TEA TRADE.—At the Court of Bankruptcy on the 22nd there was a first sitting before Mr. Registrar Brougham, under the failure of Nathaniel W. Knee, who had carried on business as a wholesale tea-dealer in Mark-lane and Water-lane. The bankrupt's defalcations are to the extent of several thousand pounds, and a grand pianoforte, which cost sixty guineas, is at present the only available asset. In a letter written by the bankrupt at the time of his departure, he states that he is on his way to America, but it is believed that he has absconded to Spain. A reward has been offered for his apprehension, but he is still at large. The bankrupt enjoyed a high reputation as a religious man, and up to the time of his departure he was supposed to be in prosperous circumstances. A lady named Newman, the widow of his former partner, is reported to be the principal sufferer. In the absence of the bankrupt the proofs now tendered were admitted, subject to investigation, and assignees were chosen.

## MISCELLANEOUS.

THE "TELEGRAPH" ON CHINESE PROGRESS.—The *Daily Telegraph* observes that China is at last on the move. The most stand still, exclusive, and conceited of all peoples has at length abandoned its obstinate conservatism; the tide of human progress has risen to such a height that even the Celestial Empire has been swept into the current. John Chinaman, impelled by curiosity, by love of gain, or the sheer necessity of getting something to eat, is gradually severing the ties that bind him to the Central Flowery Land, and seeking a home elsewhere. He overflows into Australia, where he labours at the diggings, traffics in "notions," accumulates and lends at usury, and finally marries some bright-eyed Tipperary girl, who weans him from the joss-house and makes him a sort of Confucian Catholic. He populates California so fast as to affect all the social characteristics of the country; and he elbows both the scheming Yankee and the strong, rough Irishman, out of the most profitable fields both of traffic and of hard labour. But, if a recent telegram from Hong Kong is to be trusted, Chinese enterprise is about to attempt another and a very daring stroke. It is actually about to invade Mincing-lane, and try conclusions with the London tea-broker for the profits of his trade. The "Hongs," we are told, are about to establish an agency in London. But what are "Honga?" the inquirer may ask. Stripped of all technicalities, the announcement simply means that certain Chinese merchants, who have hitherto sent consignments to English houses, are about to appoint their own representatives in the London market, so as to enter into direct relations with English buyers.

THE *Gazette* contains the following:—Admiralty, July 12.—In pursuance of Her Majesty's pleasure Admiral Sir George Rose Sartorius, K.C.B., has this day been promoted to be an Admiral of the Fleet, Vice Sir William Bowles, K.C.B., deceased, to date from the 2nd inst.; and the following promotions consequent thereon have also been made from the same date:—Active List: Vice-Admiral the Hon. Sir Henry Keppel, K.C.B., to be admiral; Rear-Admiral George Henry Seymour, C.B., to be Vice-Admiral; Capt. William Edmonstone, C.B., to be Rear-Admiral.

THE executors of the late Douglas Lapraik, Esq., have issued a notice requiring all persons having claims on the estate of the deceased to send them in on or before the 1st of January next to the solicitors, Messrs. Brooks and Co., Doctors' Commons.

ADMIRAL HORNBY reports in his letter from Madeira of the 2nd July the arrival of his squadron at Madeira on the 1st of July, and that the Barossa joined him on the 2nd inst., and would proceed with the squadron to Bahia the same evening.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—ADVT.

*LONDON, TUESDAY, JULY 27.*

## THE DEBATE ON CHINA.

THE long-promised debate on our relations with the Chinese Empire came off at last, on the 13th inst. The China merchants certainly could not have had a more zealous advocate than Colonel SYKES, though their cause might have been argued more logically. For instance, Colonel SYKES, after an elaborate exposition of the utter powerlessness and incompetency of the Chinese Government, proceeded to argue from these premises that we ought forthwith to increase our demands upon it; a little inconsistency that the Liberal Press is not slow to lay hold of, and ask, what on earth is the use of demanding more concessions from a Government that, on your own showing, is unable to give effect to those it has already granted? In fact, this is the weak point with many of those who, like Colonel SYKES, support the views of the merchants. But for all that, the inconsistency is only apparent. We perfectly recognise the fact that the Government is in many respects a feeble and helpless one; and we demand no unreasonable concessions. The Treaty of Tientsin, if carried out as it should be, both in letter and in spirit, would of itself do away with most of the grievances of which merchants and missionaries at present complain. A liberal interpretation of its clauses would even provide for the introduction of railways and telegraphs, those *bêtes noirs* of the Tsong-li-Yamen. Colonel SYKES entered into an unnecessarily lengthy *resumé* of the history of China for the last sixteen centuries, and thus tired out an audience already disposed to be impatient, before he came to the main point of his argument, which was the utter impotency of the Peking Government, and its inability to carry out its engagements to our trade; and he maintained that in return for the services we were compelled to render, we were entitled to a revision of our trading relations, both in regard to transit dues and the right to reside in the interior. He also maintained, and with justice, that there is no inherent hostility to us on the part of the natives generally, and that most of the difficulties in which Foreigners find themselves involved arise from the jealousy and ill-will of the officials. In this Colonel SYKES does but endorse our own firm and often-expressed convictions as to the origin of such difficulties.

The next speaker, Mr. LIDDELL, was of opinion that, if we desired to preserve our China trade, a new system of diplomacy, based on a steadier adherence to international rights, must be employed. By "a new system of diplomacy" Mr. LIDDELL was candid enough to explain that he meant a conciliatory policy, and a system of concessions, not only to the interests, *but even to the prejudices*, of the Chinese. Lord CLARENDON, as we have before had occasion to observe, eats humble-pie with an apparent appetite, but Mr. LIDDELL is perfectly voracious for it; he cannot wait even to make two bites at it, but wants to swallow it whole. Of course he held up the irreproachable conduct of the United States towards China as an example to be followed. Sir CHARLES DILKE followed on the same side, and asserted that the Chinese had granted us "everything we had a right to expect." Of course, having made a voyage round the world, and written a big book, Sir CHARLES knows all about China affairs. It would never do to suggest to so eminent a personage that we have perhaps some right to expect an occasional fulfilment of solemn promises; safety for our persons, and protection for our property; and that our Consuls and other official representatives should be treated with respect, and not kicked and cuffed by brutal mandarins. Mr. LIDDELL and Sir CHARLES DILKE having thus demolished the China merchant, and no other member having anything to say in his favour, Mr. OTWAY (the Under-Secretary for Foreign Affairs) rose to wind up the discussion. He showed most satisfactorily—to himself, at least, and apparently to the House—that there was no necessity for any steps towards improving our position in China, inasmuch as our relations with that country were steadily improving of their own accord. He took credit to the Government for its anxiety to consult the wishes of the mercantile community both in China and at home, but quite forgot to congratulate himself on the admirable skill with which this praiseworthy desire has been concealed. He rather ingeniously attributed Colonel SYKES's arguments in favour of the rights of inland residence to a desire to cause confusion, which might result in the overthrow of the existing dynasty and the establishment of his old friends the Taipings. And finally, he announced the intention of the Government to do nothing until four more years have elapsed, when the EMPEROR will attain his majority, and the term of the existing treaties with European Powers will expire.

As usual, when India, China, or Colonial affairs are under discussion, there was a thin and inattentive House. None of those members who are directly or indirectly connected with the China trade took part in the debate. During the whole of Mr. OTWAY's speech, almost the only symptom of interest was a slight laugh raised by an allusion to Mr. ALABASTER's statement that when travelling in the interior of China, he was called "His Excellency the Devil." In the end, Colonel SYKES withdrew his motion for papers relative to the revision of the Treaty. There are not many points in the debate worthy of notice, but one of them is the persistence with which those who support the Chinese view of the question adhere to the idea that the Treaty of Tientsin was "extorted," by force and fear, from a weak and prostrate foe. This is by no means a fair description of the circumstances under which it was obtained. In truth, the provisions of the treaty, even if carried out *au pied de la lettre*, would be but a moderate recompense to England for the services rendered in the annihilation of the Taiping rebellion. Again, we are represented as always bullying and coercing China, whereas, in the instance just named, we rendered assistance in the hour of her sorest need, and in fact saved the Government from utter subversion. Another curious circumstance is the confusion, in most of the speeches, between the Chinese people and the Chinese Government. Members speak generally of "The Chinese" as opposing this, or willing to grant that concession, but seem incapable of realising the great and important fact that the rulers and the people are not as one; but that, on the contrary, the populace, as a body, are ready and willing in most cases to enter into closer relations with Foreigners, whereas the governing classes, seeing danger to their own power in the spread of enlightenment and the introduction of Foreign civilisation, interpose every obstacle in their power to prevent this *rapprochement*. On this point Colonel SYKES was clear enough, and we must not forget either to give him credit for his manly defence of the character of our merchants in China, who, he maintained, were in no way responsible for any of the complications that have lately arisen. But what an unsatisfactory state of things it is when, in the whole House of Commons, the best, or rather the *only* champion of the English merchants in China is—Colonel SYKES!

---

COLONEL SYKES has also questioned the Government about the appropriation of the sums arising from the licensing of gaming-houses in Hong Kong, and elicited a reply to the effect, that although it had been included in the general estimates of the colony for the present year, this would not in future be sanctioned, but the money would form a special fund, to be appropriated eventually to the suppression of gambling. It is lucky for the tax-payers in the colony though, that Sir RICHARD MACDONNELL has got it into the general estimates even for one year.

---

MR. AYRTON has brought in a Bill (which was read a second time in the House of Commons on the 23rd inst.) making provision for the erection of a lighthouse on the great Basses Rock, in Ceylon," and for other purposes connected therewith." Perhaps Government will some day undertake the improvement of Galle Harbour.

WE learn from the *Moscow Gazette* that the Russian and Chinese Commissioners appointed to trace the frontier between the two empires have met at the military station at Oakek, in Eastern Siberia. The Russian Government proposes to open a trade with the western provinces of China, and has instructed its consul at Koudja to draw up a report on the industrial and commercial resources of the district.

A NOTIFICATION in the *Gazette* announces that the QUEEN has appointed JOHN FREDERIC LOWDER, Esq., now Her MAJESTY'S Vice-Consul at Hiogo and Osaka, to be Her MAJESTY'S Consul at Ne-e-gata; and to appoint ADOLPHUS ARTHUR ANNESLEY, Esq., to be Her MAJESTY'S Vice-Consul at Hiogo and at Osaka.

## OUR CHINA POLICY.

(STANDARD.)

China debates in the House of Commons seldom leave a pleasant taste in the mouth. One is conscious, it is true, of much wholesome indignation directed against the Chinese authorities by the exponents of the British merchants, and of much hig-hminded forbearance exhibited by the British Government. A foreigner watching the debates would perceive that the interest of the poorest Asiatic villages in contact with the military or naval forces of this country was as jealously cared for in the English Parliament as if Quangtung and Kiangsi were English constituencies; and he would, it is to be hoped, be duly impressed with an admiration for the generous spirit which animates our policy abroad. But at the same time we fancy he would be at a loss to know what the assailants of the Government were driving at, and what views were being defended by gentlemen in office. Everyone seems to be talking round about the subjects dealt with, and while the aspirations of one side in the discussion seem to be put forward in a half-digested state, the motives for obstructing them which animate their opponents appear equally undefined. Colonel Sykes raised a discussion of the ordinary stamp last week by a motion, subsequently withdrawn, for papers connected with the negotiations for a revision of the Treaty of Tientsin. He dwelt upon some of the most familiar mercantile grievances, especially complaining of the transit dues, those inland duties which are levied on goods sent to the interior in addition to the original customs' duty charged on them at the port of entry, and also explained to the House how China was in a wildly anarchical state, ruled by departmental despotism based upon corruption. All this was part, of course, of a very old story. Then Mr. Otway made the usual official apology for the Chinese Government, which, afflicted by rebellions and foreign wars, was really entitled to consideration at our hands, even if all its promises had not been quite accurately fulfilled. He also varied the proceedings by introducing the House to a new and ingenious motive for doing nothing. The young Emperor, he pointed out, would come of age in four years, when it might be expected that a new era would dawn upon the Chinese Empire. Instead of troubling ourselves at present, therefore, with any attempts to improve our relations with the country, the better plan would be to wait for the Emperor's majority. It is difficult to understand how we should be any the better off then than we are now, but the event referred to is still a good way in the future, and that, no doubt, recommends it to Mr. Otway's mind as a date at which something might be done.

It is not likely that our relations with the Celestial Empire will be discussed in a more satisfactory manner as long as the advocates of progress in China are chiefly occupied with promoting the interests of the British merchant, while on the other side the Home Government is only, or mainly, desirous of avoiding any trouble with the Chinese authorities. The mercantile spokesmen have a fair case, it is true. The European traders in China are performing very useful functions, in the course of which they ought to be protected and assisted as far as possible. The British Government is also animated by a praiseworthy desire in wishing to avoid bloodshed and expense, but in making treaties with the Peking Government we ought to have a broader object before us than the pecuniary interest of the foreign merchant, even though that merchant is our own countryman, and in dealings with the Central Government no policy can be worse than one which simply aims at obtaining just as much good for ourselves as we can secure without risk. It is necessary for us to arrive at a clear understanding of the objects towards which we are tending. If there is not a higher justification for our proceedings than is to be found in the duty of protecting commerce, it might fairly be argued that a good deal of what we have already done in the Empire is unjustifiable. It may be, however, on the other hand, that we should be justified in reality in going a great deal further than the mere interests of our commerce could require. If it can be made clear that human progress and the advancement of millions in comfort and material happiness is the object which lies beyond the improvements sought for in the Treaty of Tientsin, then the aspect of our negotiations with the Peking Government assumes a new character. Assuredly we do not want to argue that England has a mission from above to compel all weaker nations to follow in her footsteps, and mould their institutions in all respects on her own. Perhaps we might be able to give a few lessons in political economy and the arts of government to many nations, but it is better that we should not go out of our way to do this. When, however, it lies distinctly in our way to influence races inferior to ourselves, when the exigencies of our commerce send us amongst them for their benefit as much as for our own, then it becomes ridiculous to ignore our superiority, and forcibly hold back our countrymen when they are eager to engage in progressive enterprises and develop new fields for the exercise of profitable industry. To keep up an artificial theory about the respect which it is necessary to pay in such a case to the dignity of some decrepit Government, which feebly blocks up the way, is to prove ourselves unworthy of standing in the foremost files of time, or of wielding the power of an enlightened nation.

China is already struggling upwards towards the light of civilisation in a remarkable manner. The concessions which were obtained for European pioneers of progress by the vigorous policy adopted ten years since have led to enormous improvements in the internal communications of the country, to the increased prosperity of agriculture and manufactures, and to the preparation of the native mind for new and still more important measures of development. Irresistible masses of evidence prove that intercourse with European nations and the introduction of European art and science is in no way repugnant to the Chinese, but, on the contrary, that they are prepared to receive Western appliances and customs with perfect cordiality as soon as their superiority becomes intelligible. Nothing now interposes to prevent a succession of gigantic strides towards the effectual development of China, except the obstinacy of a Government which has no single claim to our respect or consideration, and the life of which is only maintained by a constant struggle with rebellion. The advocates of inaction may plead on behalf of Prince Kung and his colleagues, that they have but just emerged from a long and disastrous civil war; but can any one show the least reason to suppose that they will enjoy tranquillity in the future any more than they or their predecessors have enjoyed it in the past? The condition of China will always be one of chronic insurrection, unless circumstances of an entirely unforeseen character should supervene. No reasons are in force now which would not be in force at any time against negotiating with China for new concessions calculated to enable Europeans to make fresh advances towards the development of the Empire. Its internal resources of various kinds, above all its mineral wealth, await the application of European capital and intelligence. Its teeming population is stagnating in poverty and degradation for want of proper means of communication. In a hundred ways China is dumbly imploring us to lend her a helping hand and save her from the retrogressive prejudices of her own rulers. The fulfilment of these great aims by all legitimate means is the true motive of action which statesmen should recognise—a motive which would bestow a new importance on the demands of our own merchants, and serve, beyond this, as an infallible guide in the difficulties and dilemmas of diplomacy.

(PALL MALL GAZETTE.)

Colonel Sykes has fallen upon evil days. The policy of which he constituted himself the advocate on Tuesday night was in its glory more than ten years ago. When Lord Palmerston carried the country with him in the quarrel about the *Arrow*, the notion that our dealings with China ought to be regulated by any other considerations than our own convenience would have been generally scouted. That the Chinese were only half civilised, and that being so they had obviously been created or the use of Englishmen was an argument, which in one form or another, brought universal conviction with it. The merchants favoured it because they thought it would lead to increased profits; the missionaries, because they thought it would lead to increased conversions; Lord Palmerston, because it suited his temper; the country, because it suited Lord Palmerston. Since that time Englishmen have grown a little wiser, and the fact that a state of permanent anarchy is not favourable to trade has gradually become apparent to them. The plan of entirely ignoring the Peking Government was found to have its drawbacks. It gave great freedom to the English residents, but then it gave equal freedom to native briganda. The English merchant would have liked to keep the central authority alive for the purpose of maintaining order and protecting the transit of goods, while he was willing to take upon himself the enforcement of his contracts with the natives, and the assessment of damages for their nonfulfilment. Unfortunately for the success of this arrangement, a Government cannot be discredited by halves. If it is weakened for one purpose, it is weakened in proportion for all others. The success of the Taiping rebellion brought this truth home to us. The policy of Great Britain had impaired the power of the central Government in fact, and it had impaired it still more in the estimation of its own subjects. The devastation of the country, and all the injury to foreign trade which ensued from it, were the natural results of the measures we had taken to enrich our merchants and to glut our markets.

The lesson which most Englishmen have drawn from this experience has not been learned by Colonel Sykes. His speech was directed to prove the uselessness of expecting anything from the Peking authorities, and the consequent necessity of taking the law into our own hands. There was a patent inconsistency in his reasoning, since from the inability of the Chinese Government to execute the treaties it has entered into he inferred that in any revision of the treaty of Tientsin additional privileges ought to be reserved for English merchants. It would be interesting to know what Colonel Sykes expects to gain by demanding further concessions from a Power which, on his own showing, has already promised more than it can fulfil. It may be assumed, however, that Colonel Sykes cares more for his premiss than for his conclusion, and that his principal anxiety is to establish the barbarism of the Peking Government. With this view he had recourse to history, and proved his point triumphantly by the fact that in the last sixteen hundred years there had been twenty-two distinct dynasties in China. We fear that if Colonel Sykes's method is to be allowed there is not a single European Power that can make good its claim to be counted among civilised nations. The other ground on which he rested his case was the superior sureness and swiftness with which redress has been obtained in those cases in which Englishmen have demanded it by the despatch of a gunboat, instead of by an appeal to Peking. As regards any one particular outrage, there is, no doubt, some truth in this latter argument. We have so weakened the central authority that, now that it is left to itself again, it is not at once able to reassert itself with much effect. We must not complain if our change of tactics is not at once followed by a reversal of past results.

There are, in reality, but two alternatives open to this country in

Digitized by Google

determining its relations with China. We might make the undoubted weakness of the central Government an excuse for having no dealings except with the authorities of each town or district, and for conducting our negotiations with the latter on a footing of constant armed intervention. It might be possible, if the matter could be judged by purely local considerations, to allege reasons of some weight in support of such a policy. On more general grounds, however, it is open to a fatal objection. It would start us on a road which could lead to no other goal than the assumption by Great Britain of the administration of a great part of the Chinese Empire. We could not in conscience destroy the only power to which the peaceable inhabitants can look for aid or protection without being prepared to take its duties on ourselves. In other words, we should have to make China a second India, with very little chance of the experiment being attended with equal success. There is no East India Company to do the work for us, and even if there were there is no probability that Russia or France would sit still while the work was being done. If this plan is rejected we have no choice but to respect the Peking Government ourselves, and to do our best to make others respect it. The gunboat policy naturally finds the inhabitants of a maritime village more impressible than a Government department 1,000 miles off. But if we are to prevail by milder methods the Government department is better suited for our purpose than the villagers. There can be no real antagonism between the interests of China and England. The trade which is of so much importance to the latter can hardly be of less importance to the former. If the Chinese rank among the largest customers of Great Britain, Englishmen hold a still more prominent position among the customers of China. Peking diplomacy has never shown itself regardless of this fact, except when the recognition of it has been demanded on terms to which no Government can be expected to accede except under the pressure of actual violence. The surest way to impede the natural development of our commerce in China is to associate it in the minds of the Chinese nation with a persistent disregard of its political independence. If we ask nothing for which we are not prepared to give a fair equivalent, we shall enlist on our side the commercial instincts of a singularly industrious people. That those instincts have in many cases done so little for us is to be attributed to the pains we have formerly taken to neutralise them. We have done our best to persuade the Chinese that our favourite amusement is to defy their prejudices, and our most settled purpose to outrage their patriotism, and then we go about wondering that they are not eager to trade with us on our own terms. It is to be hoped that whenever the treaty of Tientsin comes under consideration again, its revision will be conducted in that better spirit which has of late begun to characterise our Chinese policy.

---

The above article called forth the following rejoinder from Colonel Sykes:—

(To the Editor of the *Pall Mall Gazette*.)

SIR,—Pardon me for a brief comment on your strictures upon my speech of last night on our relations with China. I did not advocate "additional privileges" for the mercantile community, but simply that the privileges guaranteed by the Treaty of Tientsin might have practical effect given to them—namely, that a merchant might accompany his goods into the interior and not be compelled to pay double duties, or rather duties twice over. With respect to my assertion that it is useless to refer to Peking for redress, I only entertain it in common with our ambassador to the Chinese Government, as is shown by the following letter from Sir R. Alcock to Lord Stanley, dated February 5, 1869:—

"Hitherto the course of affairs has been only too truly described by the memorialists from the ports. When any wrong or injustice is suffered by a Foreigner, for which there is no appeal to a public Court of Justice, and a written code of laws, if the Chinese local authorities are not moved, as is too often the case, by the Consul's representations, the only resource is a reference to the Minister at Peking, and then commences an *interminable* series of references backwards and forwards—a see-saw correspondence on both sides between the ports and the capital, and *no final solution is ever arrived at*. It may safely be affirmed that such is the common experience of all Foreign Representatives. I am assured there is no one of those who cannot point to numerous cases which have been so treated for a succession of years, despite their best efforts."

Sir F. Bruce, on the 5th of June, 1863, to Prince Kung, had expressed the same sentiments.—Your obedient servant, W. H. SYKES.

July 14, 1869.

---

The *Star* also had an article on Colonel Sykes's speech, and the Colonel has written as follows, in reply thereto:—

SIR,—It was only this afternoon that your comments upon my speech in the House of Commons on Tuesday last on British relation with China came under my observation. The terminal paragraph is in the following words:—"A vast and unwieldy empire is gradually breaking down its own great wall of exclusiveness. Its rulers have made many concessions to brute force; and, now that they have exhibited a disposition to get rid one by one of the prejudices which are the growth of unnumbered centuries of isolation, it is more than ever the duty of civilised nations to abstain from a single unfriendly or discourteous act." Permit me, Sir, in justification of the main arguments of my speech, to adduce the testimony of our ambassador at Peking, Sir R. Alcock, who in his despatch to Consul Medhurst, at Shanghai, dated March 3 of the *present year*, says:—"You may inform Dr. Macgowan that there is no argument in favour of telegraphy referred to in his letter which has not been repeatedly and earnestly pressed upon the attention of the Ministers of the Tsung-tu Yamen (Foreign-office), and no objection to it on the part of the Chinese that has not been met in the way he would indicate, by *my colleagues* and myself. *You may also add, that if the desire for progress which the Chinese Mission now in Europe assured Dr. Macgowan's countrymen was so ardent and general with the rulers of China there is no evidence here*, if any hopes are built upon its existence. Therefore I fear there is nothing but disappointment in store for those who indulge in them."

This is strong language from so experienced and able a diplomatist as Sir Rutherford Alcock, but such language, as well as similar language used by other diplomatists, supplied the "logic of facts" of my speech.

The brute force of which you speak was only had recourse to when redress for personal outrage, robbery, and attempted assassination was not obtainable without a military demonstration or a military operation.—Your obedient servant, W. H. SYKES, Colonel, M.P.

47, Albion-street, Hyde-park, July 17.

---

## FOREIGN CONSULS IN CHINA.

The following letter from a British subject in China appeared last week in the *Pall Mall Gazette*:—

SIR,—I have lately seen, in the number of your journal for March 20, the notice of a "remarkable pamphlet" published at Hamburg, the object of which, you state, is "to prove that the nations which succeed best in extending their commercial relations with foreign countries are those which possess no naval force, no foreign consuls-general, and in no way pretend to exercise a political influence over the nations with which they are brought in contact." The theory thus advanced, with its obvious deductions, is so charmingly paradoxical, so much in harmony with the grand discovery in politics of *laissez faire*, and, above all, so promisingly cheap, that it would surprise no one to see the principle involved reported on with approbation by a Committee of the House of Commons, and actively urged to a practical fulfilment.

Will you, however, permit me to enter your lists for a moment in opposition to Herr Wirckman, the author of this remarkable pamphlet? It is tolerably obvious that the learned writer, who gives, as examples of his thesis, the States of Switzerland, Belgium, and Hamburg, and who observes that the merchants of such nationalities, "who can expect no support either from their Consuls or a military navy, look only, and look successfully, to honesty and courtesy for an extension of their trade," must refer to countries where trade is habitually carried on under the action of specific treaties, and not to the civilised nations of Europe and America, where the right to come and go, to buy and sell, is looked upon as the common privilege of mankind. No Consuls or vessels of war are required, indeed, to ensure justice or facilities of trade at such places as London, New York, or Havre; and it must be, therefore, to countries such as China and Japan, where every foreigner, no matter what his errand, is looked upon as a natural enemy, by both the Governments and the majority of the people, that Herr Wirckman refers in proof of the successful working of his system. Now, that the subjects of small and wholly pacific States, such as Hamburg, Switzerland, &c., do prosper and make money in the ports of China and Japan is a fact upon which I do not wish to cast the least suspicion of doubt; but a very elementary acquaintanceship with the state of affairs in those countries would suffice to show Herr Wirckman that they do this, not in virtue of their superior honesty and courtesy, but by their availing themselves very naturally and with great shrewdness of the advantages conquered by the armaments and maintained by the consular and diplomatic agents of greater Powers. A clever little crab in the West Indies is a great favourite with naturalists, on account of the sagacity with which, while dispensing with a cumbrous shell of his own, he is always ready to pop into and utilise any vacant quarters of a suitable nature that he may discover lying about on the beach; and the inexpensive success of the Hamburg trader reminds me very forciby of the tactics of this ingenious crustacean. But it is very noticeable, in connection with Herr Wirckman's theory, that no sovereign State in the world has been more prodigal of consular appointments (on the unpaid list) than these self-same minor States whose policy he extols. It is a notorious fact to all who are acquainted with affairs in China and Japan, that almost the first thought of a German "commission agent" on establishing himself in business at one of the ports thrown open to commerce by the arms of Great Britain has hitherto been the acquisition of a right to call himself Consul for Hamburg, Bremen, Lubeck, Oldenburg, or some other State which, until reluctantly compelled within the last few months to yield its powers in this respect into the hands of the Prussian Government, has been accustomed to give away Consular patents as liberally as an American university distributes doctors' degrees. I know more than one port in China where every German resident—of perhaps four or five in all—was consul for one or other of the nationalities enumerated above; and the "consulates" of these gentlemen, or, in other words, their mercantile offices, decorated with highly ornamented national flags, have been habitually made the scenes of transactions little dreamt of in the philosophy of Herr Wirckman. The Oldenburg consul who, when threatened by a Chinese authority with the detention of his ship for smuggling, retorted (successfully) with the threat of summoning "the nearest Oldenburg man-of-war" to his assistance; the Swiss Consul who landed with his portmanteau stuffed with watches, and defied the Custom-house to touch the luggage of a foreign functionary; the consul for another State who imported fire-arms for sale to rebels in cases marked "official," are instances well known to China of the abuses to which the parody of the consular system by petty Governments has led. The fact simply is that under the liberal arrangements made by Great Britain in 1842 (taking Chinese alone, for the present into account) the subjects of all nations have been admitted, without reserve, to share in the advantages of the China trade; and the respect which it has been necessary on repeated occasions for Great Britain to conquer for her own subjects has been shared almost equally by every comer rejoicing in the possession of a European suit of clothes. Of these privileges and this prestige Germans and Swiss have, indeed, availed themselves largely in the countries to which I refer; but their success is directly owing to the exertions and presence of those armaments and public functionaries which other nations have been compelled to employ, and under

Digitized by Google

whose protection they flourish abroad, only, it would seem, as in the case of Herr Wirckman's pamphlet, to show their ingratitude by ignoring them at home.—I enclose my card, and am, Sir, your obedient servant,

A BRITISH SUBJECT.

China, May, 1869.

# PARLIAMENT.

## HOUSE OF COMMONS.

### THE SUEZ CANAL.

(July 12th.) Mr. GOURLEY asked the Under Secretary of State for Foreign Affairs if any negotiations have been or are intended to be entered into with his Royal Highness the Sultan of Turkey, or with his Highness the Viceroy of Egypt, relative to the navigation of the Suez Canal by vessels of the British naval and mercantile marine; if so, the terms upon which British and foreign vessels were to have the use of it.

Mr. OTWAY said he would reply to the latter part of the question first. The 6th article, regulating the concession to M. Lesseps, provided for the equality of the tariff for all nations in the navigation of the Suez Canal. No negotiations had been entered into with the Sultan or the Viceroy of Egypt on the subject, but, as his hon. friend was aware, the opening of the Suez Canal was a matter of deep interest and importance to many nations, and to none more than our own. It was impossible, therefore, to say that no negotiations would occur on the subject.

### CHINA.

(July 13th.) Colonel SYKES rose to call attention to British relations with China in reference to the revision of the treaty of Tien-tsin, and to move an address for copies of the memorial of the Chamber of Commerce at Shanghai to Sir Rutherford Alcock, and his reply to the memorial addressed to Consul Medhurst, dated 23rd of March last, and of all correspondence of the Foreign-office with Sir R. Alcock on the subject of the renewal of the Treaty of Tientsin. He said that the British merchant in China continued to be exposed to personal outrage, to liability to be robbed of his goods, and to attempted assassination. These were strong terms, but it would be his duty to prove that they were matters of fact, not from hearsay or newspaper reports, but from the records of that House. That state of affairs was attributable to the weakness —he might say the impotence—of the central Government at Peking, and also to the constitution of society in China and the literal powerlessness of the Viceroys in the provinces, and of the Kontais or magistrates in the cities. That the House might understand the bearings of his statement, he would say a few words on the constitution of society in China. As they all knew, it was of very ancient origin, but he would not go further back than the year 265. (Laughter.) From that time to this, so far from there having been a continuous dynasty, there had been no fewer than twenty-two distinct dynasties, and each had been supplanted by rebellion and bloodshed. The fact was there had been chronic anarchy in China. These commotions were among the Chinese themselves with one exception; when, in 1646, the Mantchou Tartars, to whom the present Imperial family belonged, conquered China, with such cruelty did they exercise their authority that in the taking of Canton alone 100,000 people, according to their own annals, were put to death. Their Government had always been as far as possible a military despotism, and had excited a very considerable feeling of hostility among the ancient inhabitants of the country. They had been hostile ever since, and there had been successive organisations of secret societies, which acted whenever they could against the Imperial Government and its officers, for the military officers were always Tartars, not Chinese. These secret societies had occasioned a succession of rebellions. Indeed, so numerous were they that Sir H. Parkes said at a meeting of the Geographical Society, on the 24th of March, 1862, that he recollected that some years ago a memorial to the Emperor was sent in, which stated that ten rebellions were going on at the same time in different provinces of China. The hon. and gallant gentleman proceeded to quote various authorities to show the dreadful state of anarchy and rebellion to which the country was continually exposed. Recent events showed most conclusively that the rebellions in China could for the most part be traced to the weakness of the Central Government. The Taepings, whose name had been associated with him in that House for some time past, had defied the Government of China for thirteen years past, and that rebels were still active in China was proved by the fact that the war tax had this very month been increased thirty per cent. Touching upon the constitution of the Government, he stated that China was divided into eighteen provinces, each of which was governed by a Viceroy, who generally obtained his position by intrigue or money, and, once appointed, was allowed to do as he pleased. Generally speaking, they continued to squeeze the people, and the lower officers of the Government followed suit; but the people, who were divided into clans, and were not unaccustomed to act in concert, uniformly opposed this pressure, and also quarrelled among themselves to such an extent that the Government lost all control of them, although the Viceroys were intended by the Constitution to be despots. The case of the *Cockchafer*, which had excited a very strong feeling in this country against British interference, showed the weakness of the Government. It appeared that the clans of eighteen villages were at loggerheads, and in turn came into collision with Commodore Jones, who, notwithstanding the local authority had been unable to control these clans, reduced the whole eighteen villages to complete submission to their governors, who were correspondingly thankful. The case of the *Buzzard* was similar. The vessel having been fired into, and black mail having been levied on the boats bringing up provisions, Commodore Johnson sought redress, but on his approach the delinquents took to their heels and ran away. A second attack on the place was successful. The town was reduced, and it was found full of corn, sugar, rice, and other commodities which had been taken from traders. In another case the *employés* of an Englishman were beaten on going to take possession of a house which he had rented. Thereupon Mr. Holt, the acting Consul, sent to Amoy for a gun-vessel, and on its arrival he said to the Chinese, "If you do not give up possession of the house, and replace the goods you have taken out, I shall be compelled to operate against you." The Chinese yielded instantly, and gave compensation for the brutal attack of which they had been guilty. In another instance the resistance to authority on the part of the monopolists led to the melancholy affair in connection with which so much odium was cast upon Mr. Gilson, our acting Consul. Mr. Pickering obtained a pass to go and look after his property, an attempt was made to assassinate him, and he escaped by getting into a small boat and drifting out to sea. Redress was demanded, but it was not obtained until a gunboat was called in; a distinguished officer had been promoted for his conduct on the occasion; and, in consequence of the action taken, instead of Foreigners being treated with contempt, they were respected, and perfect quiet prevailed. Mr. Gilson, unhappily, commenced his proceedings a little too soon, and he had been dismissed from his office. In another case at Amoy an Englishman and his party were driven off the ground he had rented, and, when redress was applied for, the answer was that the mandarin had no power. The gunboat *Janus* was sent for, and the matter was settled in a very short time. An attack upon a fleet of thirteen junks had been made a subject of censure, but the mandarin of Amoy was on board one vessel; it was known that a piratical fleet was coming from Hong Kong; these junks were heavily armed; they were virtually pirates, for they were smugglers; they were furnished with papers from Hong Kong as traders, carrying opium, and the whole thing was a fraud. In numerous instances it had been proved that the mandarins had not the power or the will to give redress; and a writer in the *North China Herald* said that if the British fleet were withdrawn from the coast of China, the mandarins would be driven into the interior within three months, and the whole coast would be in possession of the opium smugglers, or pirates. Why, when we were attacking the Taipings, Captain Roderick Dew engaged the assistance of a piratical fleet to reduce the city of Ningpo. With regard to the missionaries, the evidence, confirmed, too, by the statements of Sir Rutherford Alcock, went to show that there was not active hostility on the part of the people, and that it was not until the minds of the natives had been excited by statements on the part of the literati and authorities, and until the missionaries had been accused of scooping out children's eyes, poisoning their converts, and committing other enormities, that enmity was displayed against them. Numerous instances were on record of Foreigners having travelled through different parts of China, and of no difficulty having been experienced where the traveller could speak the language and acted with common prudence. To show the great interest that we as a mercantile community had in this matter, he might mention the fact that the Chinese imports in 1868 amounted to £23,770,071, and the exports for the same year to £23,380,234, the share of England in this trade amounting to no less than 82 8-10 per cent. As a commercial body we had a permanent and a large interest in maintaining our rights as conferred upon us by the treaty of Tientsin. It had been sought to cast the odium of originating the disturbances that had occurred in China upon the mercantile community, but this was not the fact. The disturbances arose generally through the misconduct of some runaway seamen from the various ships, but the mercantile community were in no way responsible. He contended that the inland duties were the main cause of the non-expansion of trade. If the duties were collected at the barriers there would be no difficulty in the matter; but as they were not collected there, but sent to Peking, the provincial authorities were obliged to levy the duties over again. Sir R Alcock had unluckily said that he thought the two-and-a-half per cent. was never intended to comprise the transit duties of the interior. A despatch from Lord Clarendon showed that to be a mistaken view of the case. Again, in instructions given by him to Lord Elgin in 1857, Lord Clarendon stated that in his arrangements with the Chinese Government Lord Elgin was to induce that Government to give British subjects unrestricted access to the cities and also permission to reside in them. Effect was given to those resolutions in the 9th, 12th, and 28th articles of the Treaty of Tientsin; but the obligations imposed on the Chinese by those articles had never been fulfilled. The fact was the Chinese Government had no power to enforce the fulfilment of the treaties into which it had entered. Taking all the circumstances into consideration, it appeared to him that English merchants had a right to expect that under any new arrangements that might be entered into they should have free access to the country secured to them. The hon. and gallant member concluded by moving an address for copies of the memorial of the Chamber of Commerce at Shanghai to Sir Rutherford Alcock, and his reply to the memorial addressed to Consul Medhurst, dated the 23rd of March last; and of all correspondence of the Foreign office with Sir Rutherford Alcock on the subject of the renewal of the Treaty of Tientsin.

Mr. LIDDELL rose to second the motion, and observed that the question raised by the hon. and gallant member, involving, as it did, a large and lucrative trade, was of considerable importance at the present moment when our relations with China, as defined by the Treaty of Tientsin, were about to undergo revision. The papers moved for could not fail to be interesting, inasmuch as all Chinese correspondence was eminently sensational. A succession of papers had already been laid before that House, containing details of military occupations, and other acts of war, which were of a very interesting, although, perhaps, of rather an alarming nature, and it had been very satisfactory after reading them to hear our Foreign Minister in the House of Lords state, in April last, that there was not the slightest cause for anxiety upon the subject, inasmuch as our relations with China had never been on a more satisfactory footing than they were at the present moment. The language and the tone our Foreign Minister had held in condemning the transactions to which he referred

Digitized by Google

deserved the approval and the support of the country, because it was clear that if we desired to continue our present peaceful relations with China we must adopt some new system of diplomacy with regard to that country. He rejoiced to think that a new era was about to commence in our dealings with a community with whom we carried on a gigantic trade. He hoped that those who were to perform the task of revising our treaty relations with China would not forget that the existing Treaty of Tientsin had been exacted from that country by fear, and under the pressure of force, and that, therefore, it was only just that they should not insist too rigorously and absolutely upon its stipulations. He was satisfied that concessions to Chinese interests, and, perhaps, even to Chinese prejudices, would promote the general interests of trade. It had been said that in dealing with Oriental nations it was unwise to make concessions; but he thought that justice could never be misplaced, and if reasonable concessions on our part were accompanied by a firm, a determined, and even, perhaps, a peremptory demand for the strict fulfilment of the treaty stipulations, no misunderstanding would be likely to arise as to the true cause for our line of conduct. It was impossible that any trade could thrive under the system of interior transit duties adopted by the Chinese authorities in defiance of treaty stipulations, and it was as much in the interest of the native traders as of ourselves that the duties should be abolished. The hon. gentleman remarked upon the fact that the United States of America had lately concluded a special treaty with the Court of Peking for the mutual protection of American and Chinese trade, and that by that treaty the United States had bound themselves to see that the trade with China, in which we were their rivals, was carried on in accordance with the principles of international law. He expressed his belief that the Americans would maintain this compact with China, and pointed out the difficulties that were likely to arise in our relations with America, where an unfortunate feeling of jealousy towards this country existed, if we did not take care in future to conduct our Chinese trade with a strict regard to international rights. Without wishing in any degree to cast blame upon our consuls or our naval officers in China, the difficulties of whose position he recognised, he condemned that system of diplomacy which always had recourse to force for the redress of any injury done to British subjects in China, instead of making proper application to the Court of Peking on the matter. He, therefore, highly approved the principles lately laid down by Lord Clarendon for the guidance of our consuls in China, by which in future any resort to force was not to be permitted excepting under circumstances in which life and property were in imminent peril, and our agents were instructed invariably to address remonstrances to the proper quarter—namely, the Central Government in Peking. On the other hand, Lord Clarendon stated that the observance of treaty rights and a friendly reception to British subjects resident there was to be exacted from China. Those wise precepts would, he trusted, continue to be faithfully enforced by the Foreign-office. In conclusion, the prospect opened out to our trade in China was almost unlimited, and he sincerely hoped that the opportunity now offered us for placing trade on a peaceful, and therefore, a permanent footing would not be thrown away. (Hear.)

Sir C. DILKE said the Chinese Government had never admitted that it was responsible for outrages committed in Formosa in as high a degree as for those committed elsewhere; nor, indeed, was it really any more responsible for them than we were for the outrages perpetrated by the Maories in the north island of New Zealand. In regard to the revision of the Treaty of Tien-tsin, the two main points insisted upon by the Chinese Chambers of Commerce in the treaty ports were residence in the interior of China, and the affirmation of the transit duty clause. There were difficulties involved in the question of the transit dues, as Lord Elgin, writing to Lord Clarendon, after the treaty was made, himself recognised. Those dues were imposed on the goods of both natives and Foreigners; and it should be remembered that the roads and canals in China were kept up by the Government. But it had not been shown that the transit dues clause had been generally or even in any case broken. The Chinese authorities had always drawn a distinction between transit dues and special taxes levied at certain places after the goods reached those places. As to the other point of residence in the interior, the matter was by no means so clear as his hon. and gallant friend would make it. He had stated before, and would venture to repeat now, that the right of residence was not asserted in any treaty; and Lord Russell, in a despatch on the subject, used these words—that the specification of the right to reside in the treaty ports implied the exclusion of the right of residence in other towns. He would not go into the question that certain persons resided in various parts of the interior, because the Chinese themselves drew a distinction between residence as a matter of privilege and as a matter of right. The London Missionary Society had laid it down that their missionaries should never claim residence in the interior as a right, but ask it as a favour. The Chinese had stated that they were prepared not only to revise the tariff but to provide bonded warehouses, and to issue a proclamation for the better enforcement of the transit clauses, and of the right of lodging for persons passing through the country under passport, which was a very important point. In short, the Chinese were prepared to grant everything consistent with the safety of their country, and Sir Rutherford Alcock had said that everything had been granted which could be granted at the moment, and that it would be worse than a waste of time to postpone the revision of the treaty, for all was obtained that we could with justice hope to gain.

Mr. OTWAY said that his hon. and gallant friend had suggested a policy to be followed in our treaties with the Chinese Government from which he must express his entire dissent. His hon. and gallant friend assumed throughout that it was necessary to deal with the Chinese Government and nation in an exceptional manner in consequence of the weakness of the Central Government. But let the hon. and gallant gentleman consider the position of that Government and of the Chinese nation. Within the last thirty years the Chinese nation had to sustain three great wars. Two foreign armies had landed in China and marched to Peking, and the palace of the Emperor had been sacked. The country had, in consequence, been more or less in a disturbed state. Was it to be wondered at, under these circumstances, that the Government should not possess all the power and concentration that was to be desired, and that its authority was not obeyed like one that had not undergone such vicissitudes? What was the policy recommended by his hon. and gallant friend? Not to strengthen the Government in any way, but to proceed, on all occasions whenever there was any real or supposed wrong done to a British subject, to take the law into our own hands. Was that a wise or a just policy? Why, it was our interest to strengthen in every way the Central Government, and on that point he had heard with pleasure the remarks of the hon. gentleman opposite (Mr. Liddell) with regard to the views of the Secretary of State for Foreign Affairs. Lord Clarendon had always strenuously maintained the same policy, and it was only that very day, in looking over a file of China papers, that he came upon a very curious fact which illustrated the views entertained by Lord Clarendon some fifteen or twenty years ago. He would not read the case to which he referred, because the opinion of the law officers of the Crown, the present Lord Chief Justice Cockburn and Lord Westbury, would illustrate what those views were. Having been consulted with reference to the opinions of a gentleman who filled the office of acting Attorney-General of Hong Kong, they said—"We do not agree in the conclusion of the acting Attorney-General, that the Chinese are to be considered as beyond the pale of civilised nations." If our conduct was not to be regulated by customs which governed our relations with civilised nations, it was impossible for our dealings with China to continue on a satisfactory footing. Reference had been made to our trade with China, which, by the Board of Trade Returns, appeared to amount to some £40,000,000 per annum; and who would recommend that that trade should be interfered with by the adoption of a warlike policy? If a gunboat policy were persisted in we should find that China in time would be getting gunboats of her own to resen tour domination. But there was another delicate point. Other nations besides ourselves possessed treaty rights with China, and what we demanded they also would require; indeed, our acquisition of a concession was a ground for other nations demanding a similar concession. If we obtained powers to reside in districts at present closed to us, all other nations would demand the same right, and a refusal would lead to inextricable confusion in the country, which was not desirable in the estimation of those who did not sympathise with the hon. and gallant gentleman in his desire to see the Chinese Government overthrown and the Taepings established. There had been no objection to anybody residing in China who conformed to the habits of the country; but what nation would concede the claims put forward by some merchants, which no one in this country acquainted with China attempted to justify but the hon. and gallant member? The hon. and gallant member had referred to terms of opprobrium used by the Chinese with regard to Foreigners, but he remembered reading an interesting journal by Mr. Alabaster, who had travelled hundreds of miles into the interior of China, in which he stated that, wherever he went, although never molested, he was always called "His Excellency the Devil." (Laughter.) Such things must be expected in a nation as strange and exclusive in character as the Chinese. Two important points, however, had been raised with reference to the Treaty of Tientsin—internal residence and transit duties. Yielding the disputed point, that the transit duties should be 2½ per cent. *ad valorem* duty without other impost, he explained that the system had broken down through an improper traffic which sprung up between the British merchants and the Chinese in the transit licences, by which the Chinese sent goods as British merchants through the country, and thereby defrauded their Government. The discovery of this matter had somewhat complicated affairs, but the whole subject of the treaty was under consideration, and the wishes of the mercantile community had been ascertained, because it was part of the policy of the Foreign-office to be guided in this matter by mercantile interests as far as possible. Officials experienced in Chinese affairs all agreed that any reform introduced into China must be gradual in its character because it was obviously necessary for the Chinese to comprehend the advantages of such appliances as the telegraph and steam before they could be induced to adopt them; and another reason for deprecating haste was that the Chinese Government was at present in a state of transition. The young Emperor would in four years time attain his majority, the same period determined the treaties with European Powers, and the wiser course would be to wait until the new order of things was established before steps were taken to secure any extension or alteration of treaty rights. In the meantime our relations were gradually improving. There had been, and there always would be, outrages of the character referred to; and such outrages did not occur in China alone; it might happen even to hon. members to be stopped or robbed before reaching their homes when they left that House. The matter had been fully considered by Lord Clarendon, and he had determined upon adopting the policy which had been already enunciated in the House. That policy was, in all cases in which British subjects were wronged, to look to the Central Government for redress, to make that Government responsible, and to abstain altogether from those acts which would relieve the Central Government of responsibility, and throw it upon the minor officials in the provinces. There was every desire on the part of Her Majesty's Government to consult the wishes of the mercantile community in China and at home; but the Government were satisfied that the best course was to make demands gradually, and to wait for the expiration of the treaties and the majority of the Emperor, when, perhaps, we might be able to give a greater development to trade. There was no objection to produce the papers asked for; in fact, they had already appeared in the *Shanghai Gazette;* but those referring to negotiations that were in progress could not be given.

The motion was withdrawn.

## THE GOVERNMENT OF MALTA.

(July 13th.) Mr. TORRENS called attention to a petition recently

Digitized by Google

presented from Malta, complaining of anomalies in the constitution of the island. The chief grievance on which he touched was the mixture of Crown nominees with elected members in the Legislative Council, and he complained also that of late the Governor had always been a mil tary man. In 1847 the Secretary for the Colonies took a step towards removing some of the grievances of which the people complained; but the system of Government subsequently established was not what a population of 150,000 people living under British rule were fairly entitled to. The governing body instituted by Earl Grey was composed of eight members elected by the people and ten nominees of the Crown; and under this system, although the form of a Constitutional Government was kept up, the island was practically governed in Downing-street, the popular representatives being in a helpless minority. In the year 1859 a military Governor was appointed, and the result had been that the people of Malta had been governed for the last ten years by a sort of mild military despotism. It was of these grievances that the people of Malta now complained by a petition signed by all the leading men in the island. The hon. member concluded with a resolution calling for the restoration of the ancient constitution of the island.

Mr. MONSELL made a brief reply, pointing out how rapidly the island had increased in material prosperity of late, chiefly owing to the enlightened action of the Council, and assuring the House that its civil interests would never be sacrificed to military considerations.

Mr. TORRENS withdrew his motion.

### HONG KONG GAMBLING-HOUSES.

(July 12th.) Colonel SYKES asked the Under-Secretary of State for the Colonies whether the money arising from the licensing of gambling-houses in Hong Kong has been included as an ordinary source of revenue in the return of revenue and expenditure for 1868; and whether such appropriation is sanctioned by the Secretary of State.

Mr. MONSELL said that the money arising from those houses had been included in the estimates for the present year; he could not say whether it had been sanctioned by the Secretary of State, but, at any rate, it would not be sanctioned for the future. (Hear, hear.) Earl Granville had sent a despatch to the Governor of Hong Kong, stating that it was the wish of the Government that the money arising from these houses should be funded and reserved, to meet the extraordinary expenditure that was likely to be incurred when a vigorous effort was made to suppress the public exercise of gambling. (Hear, hear.)

### COLONIAL LEGISLATIVE COUNCILS.

(July 20th.) Mr. BOWRING asked the Under Secretary of State for the Colonies whether the Colonial-office addressed a circular despatch in the course of last year to the governors of the various colonies, defining the duties and responsibilities of ex-officio members of Legislative Councils; and, if so, whether the Colonial-office had yet received any notification from the Governor of Hong Kong of his having communicated the contents of this despatch to the ex-officio members of the Legislative Council of that island for their information and guidance.

Mr. MONSELL said that such a despatch was issued last year, but that no information had been received from the Governor of Hong Kong stating that either he or anybody else had communicated the contents of the despatch to the ex-officio members of the Legislative Council.

### THE OPIUM TRADE.

(July 22nd.) Sir WILFRID LAWSON asked the Under-Secretary for India whether it was true that, in consequence of the Imperial Chinese proclamation forbidding the cultivation of the poppy in China, it had been determined to increase the production of opium in the Bengal Presidency?

Mr. GRANT DUFF said it had been determined to increase the production of opium in the Bengal Presidency, but that determination was in no way connected with the Chinese proclamation to which his hon. friend alluded. The Government of India some time ago proposed to increase the growth of the poppy in Bengal with a view to obtaining a reserve of 10,000 chests of opium, and to offering for sale a fixed quantity of 48,000 chests in each year, exclusive of the opium sold to the retail traders. The object of the Government of India in proposing this was to steady prices, and to mitigate some, at least, of the uncertainties so embarrassing to the Indian financier which arose from fluctuations in the opium market. This proposal of the Government of India was sanctioned by the Secretary of State in Council as far back as March last.

Sir S. NORTHCOTE asked whether the correspondence on the subject would be laid on the table before the Indian Financial Statement was introduced?

Mr. Grant Duff made a gesture of assent.

### SIR H. KELLETT.

(July 22nd.) Sir J. D. ELPHINSTONE asked the First Lord of the Admiralty whether Vice-Admiral Sir Henry Kellett, K.C.B., had received a notification from the Admiralty that, owing to circumstances connected with the state of preparation in which his intended flagship has been found, he will after all be obliged to proceed to China by the 15th of August, *via* the Red Sea, and should he not be well enough by that time, another officer will be selected to succeed Admiral the Hon. Sir Henry Keppel, K.C.B.

Mr. CHILDERS said there was no foundation for the statement. When Sir Henry Kellett was appointed it was arranged that he should go overland to China, meeting Sir Henry Keppel at Singapore. No communication as to any other route had either been made to or by him, nor had there been any idea of appointing any other admiral.

### THE BASSES ROCK LIGHT.

(July 23rd.) On the second reading of the Bill for providing the cost of a lighthouse on the Great Basses Rock,

Mr. LEFEVRE explained that the sum expended in placing a light vessel near the Little Basses Rock, off the coast of Ceylon, was £12,000, and the annual cost of lighting and maintaining that vessel was £2,000 a-year. The estimated cost of erecting a lighthouse on the Great Basses Rock, as proposed in the Bill before the House, was £65,000. A toll of one penny per ton was now levied on all vesse which passed the light, and this charge, which was collected in the United Kingdom, at the Mauritius, India, and the Cape, produced £6,500 a-year. It was proposed to increase that toll by a halfpenny.

## Monetary and Commercial.

The prospectus has been issued of the Falmouth, Gibraltar, and Malta Telegraph Company (Limited), with a capital of £660,000 in shares of £10. This is the portion alone remaining to be undertaken to complete the system of submarine lines between England and India, and as an agreement has been made with the Anglo-Mediterranean and British-Indian Submarine Companies for twenty-one years for co-operative working and division of through rates, the probable revenue seems to admit of being estimated with some approach to precision from the data already obtained by those undertakings. The total length of cable will be 2,456 miles (1,431 from Falmouth to Gibraltar and 1,025 from Gibraltar to Malta), and the cost under the contract with the Telegraph Construction and Maintenance Company will be £640,000. The balance of receipts and expenses is calculated at £104,656, or over 15 per cent. per annum, after allowing a yearly appropriation of £5,000 to reserve, irrespective of the increase of business to be hoped for from the contemplated extension lines from India to China and Australia. The work is to be completed by the 31st of May next, at which date the entire line between Falmouth and Bombay will, it is believed, be complete. The subscriptions closed on Wednesday last; all the shares were taken up, and they are now quoted at a premium.

A telegram announces that the cable of the Indo-European Telegraph Company across the Black Sea, about 200 miles in length, has been successfully submerged, and that the Kertch cable will be laid immediately.

The forty-second report of the Union Bank of London, which was adopted at the annual general meeting, states that the net profits of the bank for the six months ending 30th June last, after payment of all charges (including the sum of £75,096 13s. 3d. for interest paid and due to customers on their current and deposit accounts), and making full provision for all bad and doubtful debts, are £102,482 13s., which, with £32,788 17s. 4d. brought forward from 31st December last, amount to £135,271 10s. 4d. The directors declared a dividend for the last six months at the rate of 15 per cent. per annum, and a bonus of 2½ per cent. on the paid-up capital, clear of income-tax. There will remain an unappropriated balance of £15,271 10s. 4d. to be carried forward to profit and loss new account.

Creditors of the Asiatic Banking Corporation are required to send the particulars of their claims to Mr. W. Turquand, the official liquidator, by the 1st November, the 15th November having been appointed by Vice-Chancellor Stuart for adjudicating upon them.

Two more failures in the cotton trade at Preston are announced. One is that of the executors of the late Mr. James Naylor, Southgate-mill, and the other that of Mr. E. T. Gardner, Oxheys. According to the *Manchester Guardian*, both failures are attributed to the suspension of Messrs. Livesey and Thorpe. The Southgate Mill contains 21 pairs of mules, comprising 32,680 spindles, besides about 400 looms; and Mr. Gardner's mill contains 15½ pairs of mules, comprising 18,000 spindles, and there are also nearly 200 looms. In the former upwards of 200 operatives were employed, and in the latter about 120.

At a meeting of the creditors of Messrs. S. L. Halliwell and Brothers, of Manchester, a composition of 9s. in the pound was agreed to—3s. in cash, 3s. in six months, and the remaining 3s. in twelve months.

Tenders for Rs. 32,50,000 in bills on India were received at the Bank of England on Wednesday, the 21st. The amounts allotted were, to Calcutta, Rs. 27,26,00; and to Madras, Rs. 524,000. The minimum price was fixed, as before, at 1s. 10¾d. on Calcutta and Madras. Tenders on those Presidencies at 1s. 11⅛d. will receive about 39 per cent.; those above that price in full. These terms indicate a further slight increase in the demand for the means of remittance to the East.

The amount of bullion by the P. and O. Company's steamer *Massilia*, from Southampton on the 10th inst., was in gold, to Bombay, £50; to Madras, £777; in silver, to Hong Kong, £11,499; to Foochow, £800; total in gold, £827; in silver, £12,299.

The steamer *Bangalore* takes £177,895 in specie for the East. Annexed are the particulars, viz.:—For Bombay, gold, £90,000; Galle, gold, £20,000; Madras, gold, £6,880; Singapore, silver, £34,800; Hong Kong, silver, £25,000; and Shanghai, silver, £1,215.

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the present month, which contain details of the quantities of Cotton Manufactures and Yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th July, 1869, compared with the corresponding periods of the two preceding years :—

### HONG KONG AND WHAMPOA.

PLAIN COTTONS.—Export for the month ended 16th July, 1869, 5,313,297 yards; for the twelve months 1869, 50,384,899 yards; for the twelve months, 1868, 63,009,570 yards; for the twelve months 1867, 37,107,800 yards. Decrease for 1869 against 1868, 12,624,671 yards.

COLOURED COTTONS.—Export for the month ended 16th July, 1869, 84,300 yards; for the twelve months 1869, 1,377,669 yards; for the twelve months, 1868, 2,076,877 yards; for the twelve months, 1867, 2,483,078 yards. Decrease for 1869 against 1868, 699,208 yards.

PRINTED COTTONS.—Export for the month ended 16th July, 1869, 88,957 yards; for the twelve months 1869, 1,332,672 yards; for the twelve months 1868, 1,696,719 yards; for the twelve months, 1867, 918,775 yards. Decrease for 1869 against 1868, 364,047 yards.

COTTON YARN.—Export for the month ended 16th July, 1869, 683,230 lbs.; for the twelve months 1869, 5,536,950 lbs.; for the twelve months 1868, 7,055,478 lbs.; for the twelve months 1867, 4,943,886 lbs. Decrease for 1869 against 1868, 1,518,528 lbs.

VALUE.—For the month ended 16th July, 1869, £169,880; for the twelve months 1869, £1,360,941; for the twelve months 1868, £1,732,272; for the twelve months 1867, £1,240,752. Decrease for 1869 against 1868, £371,331.

### SHANGHAI.

PLAIN COTTONS.—Export for the month ended 16th July, 1869, 24,347,612 yards; for the twelve months 1869, 264,703,717 yards; for the twelve months 1868, 205,106,299 yards; for the twelve months 1867, 113,947,165 yards. Increase for 1869 against 1868, 59,597,418 yards.

COLOURED COTTONS.—Export for the month ended 16th July, 1869, 2,162,202 yards; for the twelve months 1869, 10,273,560 yards; for the twelve months 1868, 8,503,096 yards; for the twelve months 1867, 10,875,762 yards. Increase for 1869 against 1868, 1,770,464 yards.

PRINTED COTTONS.—Export for the month ended 16th July, 1869, 596,713 yards; for the twelve months 1869, 3,054,216 yards; for the twelve months 1868, 5,087,367 yards; for the twelve months 1867, 6,271,347 yards. Decrease for 1869 against 1868, 2,033,151 yards.

COTTON YARN.—Export for the month ended 16th July, 1869, 51,350 lbs.; for the twelve months 1869, 405,923 lbs.; for the twelve months 1868, 356,300 lbs.; for the twelve months 1867, 173,132 lbs. Increase for 1869 against 1868, 49,623 lbs.

VALUE.—For the month ended 16th July, 1869, £477,204; for the twelve months 1869, £4,770,803; for the twelve months 1868, £3,686,350; for the twelve months 1867, £2,740,971. Increase for 1869 against 1868, £1,084,453.

### JAPAN.

PLAIN COTTONS.—Export for the month ended 16th July, 1869, 727,340 yards; for the twelve months 1869, 21,454,872 yards; for the twelve months 1868, 22,305,351 yards; for the twelve months 1867, 16,073,839 yards. Decrease for 1869 against 1868, 850,479 yards.

COLOURED COTTONS.—Export for the month ended 16th July, 1869, 168,298 yards; for the twelve months 1869, 1,384,457 yards; for the twelve months 1868, 1,956,615 yards; for the twelve months 1867, 3,299,015 yards. Decrease for 1869 against 1868, 572,158 yards.

PRINTED COTTONS.—Export for the month ended 16th July, 1869, 43,450 yards; for the twelve months 1869, 802,339 yards; for the twelve months 1868, 604,632 yards; for the twelve months 1867, 836,592 yards. Increase for 1869 against 1868, 198,207 yards.

COTTON YARN.—Export for the month ended 16th July, 1869, 324,580 lbs.; for the twelve months 1869, 5,708,504 lbs.; for the twelve months 1868, 4,350,037 lbs.; for the twelve months 1867, 1,757,203 lbs Increase for 1869 against 1868, 1,358,467 lbs.

VALUE.—For the month ended 16th July, 1869, £38,808; for the twelve months 1869, £780,466; for the twelve months 1868, £720,266; for the twelve months 1867, £591,184. Increase for 1869 against 1868, £60,200.

### SINGAPORE AND PENANG.

PLAIN COTTONS.—Export for the month ended 16th July, 1869, 6,237,673 yards; for the twelve months 1869, 48,325,559 yards; for the twelve months 1868, 59,683,691 yards; for the twelve months 1867, 48,500,862 yards. Decrease for 1869 against 1868, 11,358,132 yards.

COLOURED COTTONS.—Export for the month ended 16th July, 1869, 357,347 yards; for the twelve months 1869, 5,063,333 yards; for the twelve months 1868, 5,500,354 yards; for the twelve months 1867, 9,583,234 yards. Decrease for 1869 against 1868, 437,021 yards.

PRINTED COTTONS.—Export for the month ended 16th July, 1869, 577,044 yards; for the twelve months 1869, 2,943,904 yards; for the twelve months 1868, 2,718,625 yards; for the twelve months 1867, 4,461,281 yards. Increase for 1869 against 1868, 225,279 yards.

COTTON YARN.—Export for the month ended 16th July, 1869, 139,933 lbs.; for the twelve months 1869, 1,414,596 lbs.; for the twelve months 1868, 2,603,061 lbs.: for the twelve months 1867, 1,944,281 lbs. Decrease for 1869 against 1868, 1,188,465 lbs.

VALUE.—For the month ended 16th July, 1869, £142,200; for the twelve months 1869, £1,061,636; for the twelve months 1868, £1,319,751, for the twelve months 1867, £1,481,962. Decrease for 1869 against 1868, £258,115.

### BATAVIA.

PLAIN COTTONS.—Export for the month ended 16th July, 1869, 901,074 yards; for the twelve months 1869, 14,448,586 yards; for the twelve months 1868, 18,206,405 yards; for the twelve months 1867, 26,695,285 yards. Decrease for 1869 against 1868, 3,757,819 yards.

COLOURED COTTONS.—Export for the month ended 16th July, 1869, 712,972 yards; for the twelve months 1869, 6,625,881 yards; for the twelve months 1868, 8,650,053 yards; for the twelve months 1867, 15,273,617 yards. Decrease for 1869 against 1868, 2,024,172 yards.

PRINTED COTTONS.—Export for the month ended 16th July, 1869, 377,967 yards; for the twelve months 1869, 4,856,873 yards; for the twelve months 1868, 8,255,211 yards; for the twelve months 1867, 15,697,631 yards. Decrease for 1869 against 1868, 3,398,338 yards.

COTTON YARN.—Export for the month ended 16th July, 1869, 68,800 lbs.; for the twelve months 1869, 466,530 lbs.; for the twelve months 1868, 635,840 lbs.; for the twelve months 1867, 785,741 lbs. Decrease for 1869 against 1868, 169,310 lbs.

VALUE.—For the month ended 16th July, 1869, £44,225; for the twelve months 1869, £546,180; for the twelve months, 1868, £781,746; for the twelve months 1867, £1,354,902. Decrease for 1869 against 1868, £235,566.

### MANILA.

PLAIN COTTONS.—Export for the month ended 16th July, 1869, 2,207,559 yards; for the twelve months 1869, 15,782,271 yards; for the twelve months 1868, 17,357,271 yards; for the twelve months 1867, 16,073,978 yards. Decrease for 1869 against 1868, 1,575,000 yards.

COLOURED COTTONS.—Export for the month ended 16th July, 1869, 2,267,923 yards; for the twelve months 1869, 13,510,017 yards; for the twelve months 1868, 13,277,558 yards; for the twelve months 1867, 18,108,638 yards. Increase for 1869 against 1868, 232,459 yards.

PRINTED COTTONS.—Export for the month ended 16th July, 1869, 40,515 yards; for the twelve months 1869, 1,203,918 yards; for the twelve months 1868, 925,355 yards; for the twelve months 1867, 1,142,803 yards. Increase for 1869 against 1868, 378,563 yards.

COTTON YARN.—Export for the month ended 16th July, 1869, 8,335 lbs.; for the twelve months 1869, 231,164 lbs.; for the twelve months 1868, 349,313 lbs.; for the twelve months 1867, 142,594 lbs. Decrease for 1869 against 1868, 118,149 lbs.

VALUE.—For the month ended 16th July, 1869, £96,519; for the twelve months 1869. £617,453; for the twelve months 1868, £777,205; for the twelve months 1867, £899,410. Decrease for 1869 against 1868, £159,752.

### CEYLON.

PLAIN COTTONS.—Export for the month ended 16th July, 1869. 1,130,539 yards; for the twelve months 1869, 19,900,279 yards; for the twelve months 1868, 21,364,179 yards; for the twelve months 1867, 21,734,923 yards. Decrease for 1869 against 1868, 1,463,900 yards.

COLOURED COTTONS.—Export for the month ended 16th July, 1869, 28,458 yards; for the twelve months 1869, 849,729 yards; for the twelve months 1868, 754,680 yards; for the twelve months 1867, 1,478,029 yards. Increase for 1869 against 1868, 95,049 yards.

PRINTED COTTONS.—Export for the month ended 16th July, 1869, 188,810 yards; for the twelve months 1869, 2,367,480 yards; for the twelve months 1868, 1,757,764 yds.; for the twelve months 1867, 3,053,699 yards. Increase for 1869 against 1868, 609,716 yards.

COTTON YARN.—Export for the month ended 16th July, 1869, 56,500 lbs.; for the twelve months 1869, 293,137 lbs.; for the twelve months 1868, 545,200 lbs.; for the twelve months 1867, 444,908 lbs. Decrease for 1869 against 1868, 252,063 lbs.

VALUE.—For the month ended 16th July, 1869, £25,900; for the twelve months 1869, £409,202; for the twelve months 1868, £444,841; for the twelve months 1867, £630,686. Decrease for 1869 against 1868, £35,639.

### FREIGHTS AND CHARTERS.

Current rates of freight for vessels on the berth:—Per steamer to Japan, 100s. meast. To Yokohama: 40s. weight or meast. To Nagasaki: 40s. weight, 50s. meast. To Hiogo: 50s. weight or meast. To Tientsin: 60s. weight or meast. To Chefoo: 60s. weight or meast. To Shanghai: 35s. weight, 30s. meast; per steamer, 80s. meast. To Foochow: 50s. weight, 45s. meast. To Hong Kong: 35s. weight, 27s. 6d. meast. To Amoy: 50s. weight, 45s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 30s. weight, 25s. to 30s. meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Shanghai: £44. For Hong Kong: £33. For Singapore: £25. For Galle: £25. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2. For Shanghai: £2 2s. 6d. For Hong Kong: £1 13s. For Singapore: £1 6s. For Galle: £1 6s.

### CASUALTIES.

A telegram from Galle, dated 4th July, states as follows:—"The Miss Preston, from Sunderland to Singapore, has been lost in the Straits of Sunda; crew saved."

Advices dated June 4, received at Amsterdam July 9, state that the Hollandia, Nieuwenhuis, from Amsterdam to Macassar, which put into the Cape of Good Hope with damage, had reloaded, and would proceed the following week.

Advices from Capetown, dated June 4, state that the Sydpolen, Silversparre, from Singapore to New York, which put into Table Bay May 27, for repair, was discharging.

A telegram received at Galle, dated July 17, states that the Alfred Storer, from Shields to Singapore, had been totally wrecked in the Straits of Sunda.

### MISCELLANEOUS.

At RIO DE JANEIRO.—June 11, Witch of the Wave, Bachalder, from New York, for Hong Kong, with damage to mainmast.

At ASCENSION.—May 24, Jacoba Cornelia (Dutch barque), from Batavia, and sailed 26 for Rotterdam.

Off ASCENSION.—May 20, Waterloo (Dutch ship), from Sourabaya, for Amsterdam; 24, Cornelius Gips (Dutch barque), from Batavia, for Rotterdam.

At ST. HELENA.—June 7, Carrick Castle, Peters, from Singapore, and sailed for London.

At TABLE BAY.—May 27, Sydpolen, Silversparre, from Singapore, for New York, for repairs.

At SIMON'S BAY.—May 20, Hollinside, Bains, sailed for Ceylon.

At ALGOA BAY.—May 21, Chryseis, Cowie, from Bangkok, and sailed 24 for Falmouth; 30, Queen of the West, King, from Colombo, put in for supplies.

Off RIO GRANDE BAR.—June 3, Guttenberg, from Hamburg, and sailed, 6, for Batavia.

At TABLE BAY.—June 4, Euphrosyne, Christie, and sailed for Batavia.

Fifty and sixty guineas have been paid at Lloyd's to effect reinsurances on the ship Gala, which sailed from Colombo, January 29, for London, and is considered overdue.

### LAUNCHES.

A fine barque of 460 tons register was launched last week from the building-yard of Messrs. Towers and Nesbit, Pallion. The launch was made in the smoothest and best of styles, and as she entered the water she was named The Stavers by Mrs. Hetherington. She is owned by Mr. G. Stavers, of Morpeth, and is intended for the China trade.

Messrs. William Denny and Brothers have launched from their building yard, Dumbarton, a handsome screw-steamship of 616 tons, builders' measurement, for Messrs. Jardine, Matheson, and Co., of Hong Kong. Her dimensions are:—Length of keel and forerake, 180 feet; breadth, 27 feet; depth moulded, 19 feet 3 inches. The vessel was named the Lismore.

### MISSING VESSELS.

Four vessels were last week "posted" at the Underwriters' Rooms as missing—involving a loss of four hundred lives, and from an underwriting point of view a loss of many thousand pounds. These four were the screw-steamer United Kingdom, from New York for the Clyde, full particulars of which, with the names of the passengers and crew, have been frequently published as she became more and more overdue; the screw-steamer Cheduba, from Calcutta for Rangoon, which left Calcutta on the 14th May, and is supposed to have foundered in the cyclone which swept over the Bay of Bengal on the 17th May. She, too, had a number of passengers; the ship Bombay, which left the Clyde on the 2nd of November last for Bombay; and the ship Golden Pledge, which sailed hence on the 26th January last for Castine, Maine. The United Kingdom formed one of the well-known "Anchor" line of Clyde packets, and was owned by Messrs. Handyside and Henderson, of Glasgow. The Cheduba was the property of the British India Steam Navigation Company, and was a Clyde-built iron steamer of 667 tons register. The Bombay was a ship of 890 tons, built in Dumbarton in 1859, and owned by Mr. Kerr, of Greenock. The Golden Pledge was a ship of 764 tons, built in New Brunswick in 1864, and was the property of Messrs. Thomson and Co., of Leith. She had undergone extensive repairs immediately before sailing.

# NAGASAKI PATENT SLIP.

**THIS SLIP IS NOW AVAILABLE FOR DOCKING SHIPS OF 1,200 TONS OR UNDER.**

ALL WORK CONNECTED THEREWITH, AS ALSO IN THE

**SHIPWRIGHTS, JOINERS, BOAT BUILDERS, SPAR MAKERS', AND GENERAL DEPARTMENTS,**

STEAMER POINT, ADEN.

Drawing and Reading-room free to Passengers.

THE *London and China Express* ON SALE.

HOLLOWAY'S OINTMENT and PILLS

PALPITATION, PAIN IN THE SIDE.—Wheezing or tightness of the chest portends mischief. The sufferers at this season from coughs, colds, bronchitis, asthma, and disordered action of the heart are earnestly recommended to rub Holloway's searching Ointment well over the back and chest twice a-day. Invalids may confidently rely upon the beneficial effects resulting from this treatment, which involves no danger and very little expense. Fortunately neither Ointment nor Pills can possibly prove injurious. They soon relieve all urgent symptoms, ultimately eradicate the complaint, and remove all causes for its recurrence. In early life more particularly all departures from health demand immediate attention.

LIEBIG COMPANY'S EXTRACT OF MEAT.—Only sort warranted perfect and genuine by BARON LIEBIG, the Inventor. "A success and a boon."—*Medical Press and Circular.* One pint of delicious beef tea for 2½d., which costs 1s. if made from fresh meat. Cheapest and finest flavoured "stock" for soups, &c.

CAUTION.—Require BARON LIEBIG'S signature upon every jar. Sold by all Italian Warehousemen, Grocers, Chemists, and Ship's Store Dealers.

PARIS EXHIBITION, 1867, TWO GOLD MEDALS; HAVRE EXHIBITION, 1868, THE GOLD MEDAL.

This Extract is supplied to the British, French, Prussian, Russian, and other Governments.

Nos. 9 AND 11, KING'S ARMS YARD, MOORGATE STREET, E.C.

DOUGLAS LAPRAIK, ESQ., deceased.—Pursuant to an Act of Parliament made and passed in the 22nd and 23rd years of the reign of Her present Majesty, cap. 35, intituled "An Act to further amend the Law of Property, and to relieve Trustees," NOTICE is hereby given that all creditors and persons having any claim and demands upon or against the estate of DOUGLAS LAPRAIK, formerly of Hong Kong, China, but late of The Oaks, Acton, in the county of Middlesex, Esq., deceased, who died on or about the 24th day of March, 1869, and whose will was proved by William Lane, Esq., William Manger, Esq., and John Steward Lapraik, Esq., three of the executors named in the said will, on the 28th day of April, 1869, in the principal registry of Her Majesty's Court of Probate, are hereby required to send in the particulars of their claims or demands to the said executors at the offices of Messrs. Brooks and Co., No. 7, Godliman-street, Doctor's-commons, in the City of London, their solicitors, on or before the 1st day of January, 1870. And Notice is hereby also given that after that day the said executors will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which the said executors shall then have notice, and that they will not be liable for the assets or any part thereof so distributed, to any persons of whose debt or claim they shall not then have had notice.

Dated this 12th day of July, 1869.

BROOKS AND CO.,
7, Godliman-street, Doctor's-commons, London,
Solicitors for the Executors.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility, at moderate charges, for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships and steamers.

Their large Granite Dock has 286 feet length on the blocks and at average spring tides can receive vessels of 16 to 17 feet draught It has a caisson-gate and a powerful centrifugal steam pump, and an engineer's workshop fitted with lathes and tools, driven by steam: iron and brass foundries, boiler-makers' shop, a large smithy and carpenters and boat-builders' sheds. All superintended by resident Europeans.

Their two smaller GRANITE DOCKS can receive, at spring tides, vessels drawing 12 feet.

Spars, timber, and other Dockyard material kept in stock.

Quarters for officers and a DRY GODOWN for stores of vessels under repair.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.
